Congressional Record

PROCEEDINGS AND DEBATES OF THE 97th CONGRESS, FIRST SESSION

SENATE—*Monday, December 14, 1981*

(Legislative day of Monday, November 30, 1981)

The Senate met at 12 noon, on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Not to us, O Lord, not to us, but to Thy name give glory, for the sake of Thy steadfast love and Thy faithfulness! Why should the nations say, "Where is their God?" Our God is in the heavens; He does whatever He pleases.—(Psalm 115: 1–3.)

Lord God of the nations, as the Senate returns to its work, the situation in Europe is tense and fragile. Much as the domestic situation demands the attention of our leadership, international affairs cannot be ignored. Grant to the President, the Secretary of State, the National Security Council and the Members of Congress superhuman wisdom and courage so that they may work through the sensitive issues according to the will of God and for the common welfare.

We pray for the leadership of Europe, especially Poland that they may be guided to decisions that will insure peace. Dear God, may the promise of Christmas be a reality as never before, "Glory to God in the highest, peace on earth, good will toward men." In the name of the Father, the Son and the Holy Spirit. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

THE JOURNAL

Mr. McCLURE. Mr. President, I ask unanimous consent that the Journal be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. McCLURE. I yield to the majority leader.

POETRY

Mr. BAKER. Mr. President, I leave to the poet, Marianne Moore, the task of distinguishing between understanding and appreciating, on this, the last Monday of the session. I ask unanimous consent that her poem, "Poetry," be printed in the RECORD.

There being no objection, the poem was ordered to be printed in the RECORD, as follows:

POETRY

I, too, dislike it: there are things that are
important beyond all this fiddle.
Reading it, however, with a perfect contempt for it, one discovers in
it, after all, a place for the genuine.
Hands that can grasp, eyes
that can dilate, hair that can rise
if it must, these things are important not because a

High-sounding interpretation can be put upon them but because they are
useful. When they become so derivative as to become unintelligible,
the same thing may be said for all of us, that we do not admire what
we cannot understand: the bat
holding on upside down or in quest of something to

eat, elephants pushing, a wild horse taking a roll, a tireless wolf under
a tree, the immovable critic twitching his skin like a horse that feels a flea, the
baseball fan, the statistician—
nor is it valid
to discriminate against "business documents and

school-books"; all these phenomena are important. One must make a distinction
however: when dragged into prominence by half poets, the result is not poetry,
nor till the poets among us can be
"literalists of
the imagination"—above
insolence and triviality and can present

for inspection, "imaginary gardens with real toads in them," shall we have
it. In the meantime, if you demand on the one hand,
the raw material of poetry in
all its rawness and
that which is on the other hand
genuine, then you are interested in poetry.

DEPUTY SECRETARY OF STATE WILLIAM P. CLARK

Mr. BAKER. Mr. President, I call to my colleagues' attention an article which appeared this morning in the Washington Post, an incisive and revealing portrait of Deputy Secretary of State William P. Clark.

Despite his initial lack of expertise in foreign policy, Bill Clark has emerged from his first year in office as one of the most influential and effective No. 2 men in recent State Department history. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CLARK, AFTER A SHAKY START, HAS GAINED RESPECT AT STATE

(By John M. Goshko)

"Reagan chooses nitwit as minister," read the headline in an Amsterdam newspaper; and the London Daily Mirror commented: "America's allies in Europe will hope he is never in charge at a time of crisis."

These were only two of the brutally harsh and sarcastic judgments rendered by the world press on William P. Clark last February after he testified before the Senate Foreign Relations Committee on his qualifications to serve as deputy secretary of state. It wasn't one of Clark's finer hours.

He was unable to identify the prime ministers of South Africa or Zimbabwe and reacted as if he was hearing for the first time about such matters of international interest as the controversy over placing tactical nuclear weapons in Europe or the split in the British Labor Party. In fact, he seemed like one of the most spectacularly ill-suited candidates for a major foreign policy post in modern memory.

Even the normally mild-mannered committee chairman, Charles H. Percy (R-Ill)., who reluctantly voted to confirm Clark out of a sense of party loyalty, later remarked acidly, "Never again can we accept a man who professes to have no knowledge in the area for which he has been nominated."

But that was eight months ago. In the time since, there probably has been no other senior Reagan administration official about whom opinions have changed more radically than Clark, a 50-year-old former California Supreme Court justice who is known throughout the State Department as "the judge."

Clark's name doesn't appear in the news very often these days. However, among people familiar with the inner workings of the administration's foreign policy machinery, he is widely regarded as perhaps the most influential and powerful man to occupy the State Department's second-ranking job since George Ball in the 1960s.

Clark's standing within the administration is so high that he frequently is mentioned as a potential successor to his boss, Secretary of State Alexander M. Haig Jr., or as a possible candidate for an important insider's slot at the White House. More recently, as the

impression has spread that President Reagan's national security affairs adviser, Richard V. Allen, is on his way out, Clark's name keeps cropping up prominently in the speculation about likely replacements.

He got there partly by making up for his lack of expertise through sheer hard work and a punishing, on-the-job learning process. Although there are still a lot of blank spots in his knowledge of world affairs, Clark has parlayed his ability to learn by going into a major role in the internal management of the department. He also has put his fingerprints indelibly on such controversial and high-priority administration policies as its approach to combating Cuban influence in the Caribbean and resolving racial tensions in southern Africa.

However, Clark's real importance rests in his ability to perform another—and unique—function for the administration. He is the principal buffer, interpreter, guidance counselor and damage-control intermediary between the mercurial Haig and the palace guard surrounding Reagan at the White House.

Clark has been able to fit into that role because he has won Haig's trust and respect, while retaining his credentials as a member in high standing of the tight circle of Californians—among them presidential counselor Edwin Meese III, White House deputy chief of staff Michael K. Deaver and Defense Secretary Caspar W. Weinberger—who have been among the president's closest political intimates since his days as governor of California.

It was Clark who moved in as Reagan's chief of staff in 1967 when the governor's office in Sacramento was in a shambles and made it run smoothly, who enlisted Meese and Deaver for the Reagan team and who spent his 1969 vacation in Washington helping Weinberger, then a Nixon administration official, reorganize the Federal Trade Commission.

As one long-time observer of this old-boy network points out, "What Clark lacks in knowledge of foreign affairs is more than compensated for by the fact that he knows every contour of the hearts and minds of Meese and Deaver and Weinberger and Reagan himself. He shares their conservative political outlook and their penchant for doing things in orderly, teamwork fashion. He speaks their language in a way that a temperamental type like Haig would never be able to do."

This ability to "speak their language" keeps Clark almost constantly on the telephone to his old cronies at the White House and the Pentagon, running interference for Haig on policy and jurisdictional disputes and smoothing over the dustups that sometimes have made Haig appear to be in open warfare with the rest of the administration.

Authoritative State Department sources say that at least twice Clark was instrumental in diverting Haig from a collision course that could have had disastrous results for the administration's image. Last spring, when Haig exploded in public anger at the White House's decision to give control of the government's crisis management machinery to Vice President Bush rather than to Haig, Clark sat with the secretary for hours and patiently talked him out of resigning.

Then, these sources add, during the summer, Clark stepped in again and gently dissuaded Haig from demanding that Reagan apologize personally for critical comments about the secretary leaked by White House aides to the press.

Clark's skill at this kind of conciliation helps to explain why most State Department insiders discount the rumors that he might move into the national security adviser's job if the president decides that Allen's problems over his dealings with former Japanese business associates make it advisable to drop him.

In part, many department officials note privately, Clark's education in foreign policy matters still hasn't gone far enough to really qualify him for a job whose main function is to keep the president informed and the rest of the administration coordinated on the broad range of national security business.

Only last week, during a visit to Ireland, Clark demonstrated that there still are some very rough edges on his grasp of sensitive issues. During an interview in Dublin, he used some carelessly loose language that implied the United States was departing from its policy of noninterference in the Irish reunification dispute and that forced the State Department to rush out a clarifying statement that U.S. policy remained unchanged.

But, these officials continue, the main reason Clark is considered unlikely to move to the National Security Council, if and when Allen leaves, is that the president and the senior White House staff consider him more valuable in his present position as their interlocutor with Haig.

It's a role that Clark didn't expect to be playing a year ago when his old friend Reagan, won the presidency. He had left active politics in 1970 for a series of judgeships that culminated in his supreme court appointment, and he was content to divide his time between his cattle and grain ranch in California's San Luis Obispo County and his duties on the court, where he was known as a strict law-and-order conservative at frequent odds with the court's liberal majority.

His name immediately came up on Reagan's short list of candidates for such jobs as attorney general, secretary of agriculture and director of the Central Intelligence Agency, but Clark sent word that he was happy where he was and didn't want to be considered for any of them.

It wasn't until Meese made a cross-country trip to Clark's judicial chambers in San Francisco and advised him that the president wanted him to become deputy secretary of state that Clark reluctantly relented, even though, as he candidly admits, "I didn't know any more about the subject than any casual reader of Time or Newsweek."

Initially, everyone assumed that Reagan wanted Clark at State to act as a watchdog on the unpredictable Haig. But, after the fiasco of Clark's confirmation hearing, it seemed that the pugnacious, internationally famous former general would swallow the softspoken, judiciously quiet outsider from California in a single gulp.

When a reporter asked Haig at a cocktail party how he felt about having a deputy whose credentials seemed so threadbare in comparison to his own far-ranging experience in foreign policy and national security, the secretary grinned broadly and replied: "Actually, I feel pretty good about it."

In reality, State Department sources agree, the two hit it off well from the outset. Both basically shared Reagan's mistrust of communism and his desire to restore American preeminence in world affairs. Haig, instead of trying to shut Clark out, earned his gratitude and affection by taking the newcomer into his confidence and assigning him increasingly important responsibilities.

Clark himself recalls, "From the outset, the problems began piling up to the point where there was far more on Al's plate than he could handle. When something new came in that needed immediate attention, I'd say, 'Al, do you want me to take that one?' and he invariably would answer, 'Bill, could you do that for me?' "

Clark also insists that there never has been a conflict between his loyalties to Reagan and Haig. He says, "Since I've been here, Al has known of every communication I've had with the White House, both before and after; and he, in turn, has shared all his information and decision-making problems with me. We don't always agree on how to do some things, but we work together; and he's never held me away from a problem out of concern that I won't do it the way he wants."

Clark admits, "I had to start pretty much from ground zero and educate myself on subjects I'd never thought about before." But department officials at all levels give him credit for being a quick learner and, even more importantly, a man who could slice through bureacratic red tape and make his decisions stick.

In addition to his primary role of liaison with the White House and other government agency heads, Clark by now has staked out a number of little-noticed but very important functions within the department—ambassadorial appointments, internal management, the controversial shifting of human rights policy away from the activism of the Carter administration—as provinces where his is pretty much the last word.

Where policy initiatives are concerned, Clark has had a big role in two areas where the administration has generated a lot of controversy: Latin America and southern Africa. He has been the main overseer of State's efforts to launch the still evolving Caribbean basin initiative, aimed at combating Cuban influence in that region through development and trade assistance. A few months ago, he went to Pretoria for talks with South African Prime Minister Pieter W. Botha—"the man whose name I didn't know at my confirmation hearing"—to help break the logjam on negotiating an independence settlement for Namibia.

"That doesn't mean that the Caribbean or Africa are areas that have been assigned to me for my exclusive concentration," Clark says. "I have no priorities, and I try to be a utility infielder. More and more, my role inside the department is doublechecking and backstopping things that we're falling behind on in all areas."

"My job is trying to avoid what Al calls the grave error of the Vietnam era when the government got so focused on one issue that we lost sight of other things that were of concern to both our friends and foes. I got into the Caribbean basin thing because we wanted it on the president's agenda at a time when other people wanted to defer its consideration, and I went to South Africa because there was a danger that the Namibia negotiations would get frozen by inertia to the point where the opportunity would be lost."

"Now," he adds, "these matters are on track, for the moment at least; and I can get into other areas that need attention."

As to the future, Clark professes to miss life on his ranch, which is being run for the time being by the eldest of his five children, and talks about getting back there "before too much longer."

However, others see different scenarios for Clark's future. Within the department, there are many career officials, impressed by his access to the White House, who would like to see him become secretary if and when Haig calls it a day. Others, including some Republican politicians, note that Meese reportedly would like to end his service in the Reagan administration as attorney general and say, if that happens, Clark could wind up as Reagan's right hand at the White House.

For the present, such ideas remain in the realm of sheer speculation. What is clear, though, is that both Reagan and Haig seem very happy having Bill Clark sitting in his seventh-floor State Department office ready to pick up the telephone when some smoothing out is needed, and both probably would go to very great lengths to keep him there.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. McCLURE. Mr. President, I ask unanimous consent that following the recognition of the two leaders under the

standing order, there be a period for the transaction of routine morning business, not to extend beyond 30 minutes, with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I reserve the remainder of my time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The minority leader is recognized.

Mr. ROBERT C. BYRD. I thank the Chair.

CRISIS IN POLAND

Mr. ROBERT C. BYRD. Mr. President, events in Poland over the weekend are cause for grave concern among all Americans. It is my sincerest hope that the latest crisis in that country will be resolved peacefully. It is my sincerest hope that the Soviets will see it in their interest to avoid intervention, directly or indirectly, in the present crisis facing Poland.

The Poles must be left alone to resolve the differences between the ruling Communist elite and the 10-million-member Solidarity union movement. The declaration of martial law by the ruling Military Council and the detention of an estimated 1,000 Solidarity union leaders present a potentially explosive situation in Poland. There is room for cautious optimism, however. Reports indicate that Solidarity leader Lech Walesa has flown to Warsaw for talks with Polish authorities. It is my hope, and that of all Americans, that these talks will succeed and the state of emergency will be lifted.

The liberalization effort in Poland which began in the shipyards of Gdansk during the summer of 1980 has been a remarkable development. It has been a particularly welcome development in light of the special relationship the people of the United States have had with Poland over the years. I was, therefore, heartened by Secretary of State Alexander Haig's statement of yesterday which noted:

> A senior Polish foreign official had assured the United States and other western nations that reforms will continue despite the military takeover.

I support the Secretary's statement that the United States "will watch very carefully whether this promise will be kept" and "the political experiment underway in Poland should be allowed to proceed unimpeded."

Mr. President, Americans join with Pope John Paul II in praying that bloodshed will be avoided. The Poles have endured enough suffering throughout their history. It is time for mutual restraint, conciliation, and cooperation in resolving the economic ills plaguing that country. And in this connection, I stand by the efforts of our Government to assist in this endeavor.

THE BUDGET—A HISTORY OF BROKEN PROMISES

Mr. ROBERT C. BYRD. Mr. President, on December 9, the U.S. Senate perpetrated the biggest sham in the history of the budget process when it voted 49 to 48 to adopt a meaningless, nonbudget, when it adopted the Domenici amendment to the second budget resolution.

Through this vote, the Senate also took the amazing step of committing itself to cut social security, defense, and other vital areas of Federal priority. The sponsors of the Domenici amendment have clearly given up on the administration's commitment to a balanced budget. They replaced their earlier trust in the administration with the Domenici amendment which employed a peculiar twist of language whereby the majority of the Budget Committee urged itself to produce a plan next March for fiscal years 1983 and 1984 that results in a balanced budget by fiscal year 1984. I fail to understand why the majority party must ask itself to draft legislative language next year. Since the makeup of the Senate and of the Budget Committee will be the same on March 31 as it is now, what sense did it make to approve such an amendment? Certainly, the amendment captured a few lines of newsprint, and a few seconds of television time, but what was the point of it? Are things any better today than they were before this amendment passed? Are we any closer to a balanced budget in fiscal year 1984 now than we were a few hours before? Obviously, things are no better and we are no closer to a balanced budget.

If this amendment's only failing were that it was pointless, I would not be too upset. After all, I became used to such proposals from my good friends on the other side of the aisle during their long tenure as the minority. But while this amendment was pointless as a balanced budget assurance, it was pernicious in the example it set for future budget cuts.

To quote from the amendment, it urged cuts in "all parts of the budget, including entitlement programs." Let me repeat that, "including entitlement programs."

Well, we on our side do not intend to stand idly by as the most basic entitlement program—social security—is cut, and our contract with this Nation's elderly is broken in two. After the President assured the Nation he would not seek cuts in social security, the majority party nevertheless pushed through an amendment which would require such cuts. Let us take a moment to consider what brought us to this terrible moment.

Throughout the entire budget and tax cutting process, Democrats warned that we would be heading for trouble—that the President's fiscal plan would not work. Yet, our colleagues on the other side of the aisle marched in lock-step with the administration. There was no attempt to achieve a workable program. Now the massive tax cut is in place. Massive deficits are assured.

Let us review the history of this balanced budget fight for a moment.

In January, the President will send us his fiscal year 1983 budget. As this week's newspaper reports indicate, the administration's preliminary calculations are for a budget deficit of $109 billion in fiscal year 1982 rather than the $43 billion projection they gave us in September. For fiscal year 1984, the March, July, and September administration budgets predicted a balanced budget, but the new administration forecast projects a deficit of $162 billion.

Of course, we will hear cries that these are only preliminary projections and that there will be significant cuts to reduce these unacceptably high budget deficits. But there are two important questions to be addressed. The first is: Why are these deficit projections so much higher than those of March or July or September?

I believe the answer is that the administration is finally bringing its economic forecast out of fantasy land. What concerns me now is whether David Stockman or some other administration adviser will rework the economic forecast to make the deficits disappear.

We know from Mr. Stockman's admissions in the Atlantic Monthly article that his first action as OMB Director was to change the computer model that correctly projected high deficits. Will he change the model again?

Or has a balanced budget slipped forever from this administration's grasp?

In September 1980, candidate Reagan promised the American people a balanced budget in fiscal year 1983 by cutting waste, fraud, and abuse. On September 21, 1981, President Reagan reaffirmed his belief in a balanced budget, saying:

> This Administration is committed to a balanced budget, and we will fight to the last vote to achieve it in 1984.

A mere 7 weeks later, on November 6, the country was shocked to hear the President say:

> I've never said anything but that it was a goal. And the eventual goal, whether it comes then [in 1984], or whether it has to be delayed or not, is a balanced budget.

What are we to believe? What signal are we to follow? When this administration first took office and announced its economic recovery plan, the American people were telling us to give the President a chance.

Give him his programs they said. His programs promised a balanced budget, a huge tax cut, and increased defense spending. Well, Congress gave his programs to him—we responded, we gave the President everything he said was necessary for his economic recovery plan. Central to that plan was the promise of a balanced budget in fiscal year 1984, and now that promise has been broken and abandoned.

On November 16, the President said:

> I did not come here to balance the budget—not at the expense of my tax-cutting progam and my defense program. If we can't do it in 1984, we'll have to do it later.

Now we have to ask: What is it the President wants? Will he ever balance the budget?

The second question I must ask is: If the President does still want a balanced budget, how will that budget be balanced? I think $162 billion is too much of a "magic asterisk" even for David Stockman, but one can never be sure.

On October 15, I submitted an amendment instructing OMB Director Stockman to reveal which budget cuts and which tax increases would be necessary to reach the administration's deficit targets of $43.1 billion in fiscal year 1982, $22.9 billion in fiscal year 1983, and a balanced budget in fiscal year 1984. This amendment, which was offered to the social security minimum benefit bill, asked nothing more than that the full picture be painted for the Congress and the American people. The amendment sought to flush out any future social security cuts which might be lurking under the rubric of unidentified cuts. Unfortunately, it was made into a partisan matter and voted down on a straight party line vote.

I would point out at this time that the first budget resolution for fiscal year 1982 includes an assumption that there will be unspecified COLA cuts of almost $5 billion in fiscal year 1982 and $7 billion in both fiscal years 1983 and 1984.

On October 28, I introduced a bill which again directed the Office of Management and Budget to spell out the unidentified budget cuts and tax increases necessary to reach the administration's deficit targets. There has been no action on that bill.

On November 18, when the Senate was considering the ill-fated continuing resolution, I offered a simple sense of the Senate amendment that the President should present a balanced budget for fiscal year 1984 and should detail the plan to reach that balance. Well, that sense of the Senate amendment was spared the opportunity of the veto when it was defeated on a party line vote of 47 to 50.

If one of these amendments had been adopted, there could be no so-called unidentified cuts. There could be no vague language that would leave Congress or the American people in doubt as to what cuts would be necessary or what tax increases would be required in order to achieve a balanced budget in fiscal year 1984. It would all be out on the table, for everyone to see and understand, for the Congress and the American people, so that they could clearly appreciate what cuts would be included and what tax increases would be required.

The administration could not continue to pretend future proposals for savings, unidentified cuts, or magic asterisks can balance a budget.

My concern about the blue smoke and mirrors which were being used to project a balanced budget began when the President transmitted his budget to Congress on March 10. Even at that time, there were disturbing signs. Most disturbing were the $74 billion in unidentified cuts for fiscal years 1983 and 1984. Were magic asterisks the only way this administration could balance a budget?

Last April, when more realistic economics were used by the Senate Budget Committee, three Republicans joined Senate Budget Committee Democrats in opposing the fiscal year 1982 first budget resolution because it did not provide for a balanced budget in fiscal year 1984.

Over the Easter recess, faced with the prospect of no fiscal year 1982 budget resolution, a new master budget plan developed which reduced fiscal year 1984 spending by $44.8 billion, coincidentally the exact amount necessary to balance the budget in fiscal year 1984.

But even this doctored document contained unidentified cuts. In fiscal year 1983, there were $28 billion in unidentified cuts and an incredible $35 billion in fiscal year 1984.

Although these unidentified cuts troubled me and my fellow Democrats, the worst was yet to come, because the administration's July tax cut bill, which slashed $280 billion in revenues between 1982 and 1984, has proven to be a disaster.

Not only is this tax cut an unfair transfer of wealth from middle to upper income citizens, but it put a balanced budget by 1984 out of reach. President Reagan said the Kemp/Roth tax bill "* * * includes just about everything to help the economy. * * *" But we now find out from Mr. Stockman that it was nothing more than a trickle down wolf in the sheep's clothing of supply side economics.

In September, the budget situation turned even more grim. The economy was not responding to the plan. As the bad news continued to mount, the administration announced another multiyear budget plan to bring the deficit to zero by 1984. Their fall budget plan included new spending cuts of $48 billion for fiscal year 1984 on top of the $51 billion that had already been cut by the administration's reconciliation plan passed in July.

After the surprising vote on my October 15 amendment, I sent a letter to Director Stockman on October 29. The letter asked Mr. Stockman to answer two critical questions:

First, what are the amounts of "unidentified" cuts for fiscal years 1982, 1983, and 1984 that are presently included in the President's Fall Budget Program? . . . Second, based on the economic and budget situation as you see it today, what is your best estimate of spending reductions and revenue increases that are necessary to maintain the Fall Budget Program's projected deficits of $43.1 billion in fiscal year 1982, $22.9 billion in fiscal year 1983, and a balanced budget in fiscal year 1984?

Although this letter was sent nearly 5 weeks ago, I received no response until December 4. Mr. Stockman's letter said that there are $49 billion in unidentified savings in the administration's latest budget. He did not answer my question as to what budget cuts and tax increases are necessary to balance the budget by fiscal year 1984.

Recent weeks have brought some added pressures on Director Stockman. The Atlantic Monthly article confirmed the fear I had harbored all along, the fear that had caused me to offer legislation seeking clarification of the unidentified cuts and necessary tax increases assumed by the President's package.

The article depicted David Stockman as dismissing this important matter of unidentified cuts. To him, the unidentified cuts which held his deficit projections together were just magic asterisks. Well, I supose magic asterisks have their place in a program that the Vice President once labeled "voodoo economics." Unfortunately, they have no place in the world of free market economics.

The administration may have decided to abandon its balanced budget goal for 1984, but many of us have not, and the Senate should not. If we abandon this goal, what point of reference do our business and labor leaders have as they try to plan for the future? If we abandon this goal, I am afraid we are jeopardizing economic recovery.

I ask unanimous consent that my letter to Director Stockman, his response, and a special report detailing the administration's flip-flops on the balanced budget be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

OFFICE OF THE DEMOCRATIC LEADER,
Washington, D.C., October 29, 1981.

Hon. DAVID A. STOCKMAN,
Director, Office of Management and Budget, Executive, Office Building, Washington, D.C.

DEAR MR. DIRECTOR: On October 15, 1981, I offered an amendment to H.R. 4331, a bill to amend the Omnibus Reconciliation Act of 1981 to restore minimum benefits payments under the Social Security Act.

My amendment asked that you report to Congress a complete list of budget reductions and revenue increases that are necessary to achieve the FY 1982 and FY 1983 deficits, and the balanced budget for FY 1984 projected in the President's Fall Budget Program.

My amendment sought to identify all budget initiatives necessary to meet the Administration's most recent projections. This would include your latest internal revisions of the budget, as well as the "undentified" savings assumed in the Fall Budget Program. Based on the information provided in the September 24, 1981, Fact Sheet released by the White House, it appears that there were "unidentified" cuts of $51.7 billion in FY 1983 and $82.0 billion in FY 1984.

Today, for the first time, I learned that the Office of Management and Budget privately disputes that the amounts of "unidentified" cuts in fiscal years 1983 and 1984 are that large.

To help clarify this situation, I would be grateful if you could immediately provide the answers to two questions. First, what are the amounts of "unidentified" cuts for fiscal years 1982, 1983, and 1984 that are presently included in the President's Fall Budget Program? I believe these amounts should include any proposals that have not been transmitted to Congress.

Second, based on the economic and budget situation as you see it today, what is your best estimate of spending reductions and revenue increases that are necessary to maintain the Fall Budget Program's projected deficits of $43.1 billion in fiscal year 1982, $22.9 billion in fiscal year 1983, and a balanced budget in fiscal year 1984?

I would appreciate your immediate attention to this matter.

Sincerely,

ROBERT C. BYRD.

OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C., December 2, 1981.

Hon. ROBERT C. BYRD,
U.S. Senate,
Washington, D.C.

DEAR BOB: This is in response to your letter of October 29, 1981, in which you raise ques-

tions about the Fact Sheet on the Fall Budget Program (September 24, 1981), and about our current assessment of spending reductions and revenue increases necessary to meet the September targets.

The table below shows the identified and unidentified savings reflected in the September estimates. It shows that the Administration identified proposed savings—including both outlay reductions and revenue enhancements—of $16.0 billion in 1982, $28.3 billion in 1983, and $35.8 billion in 1984. In addition, further savings of $11.7 billion in 1983 and $23.0 billion in 1984 were estimated to be required to achieve the Administration's target of a $22.9 billion deficit in 1983 and a balanced budget in 1984. These estimates of unidentified savings are substantially below those mentioned in your letter.

[Estimates in billions of dollars]

	1982	1983	1984
Identified savings:			
12 percent across-the-board cut in fiscal year 1982	8.4	5.3	3.8
Defense slowdown	2.0	5.0	6.0
Entitlements reform	2.6	10.0	15.0
Revenue enhancements	3.0	8.0	11.0
Subtotal, identified	16.0	28.3	35.8
Unidentified savings		11.7	23.0
Total savings	16.0	40.0	58.8

The entitlement reforms and revenue enhancements reflected in the table above, which were originally expected to be transmitted to the Congress in October, will instead be transmitted in the 1983 Budget in January.

In response to your second question, as part of our annual fall review process we are reassessing the economic outlook and its implications for the goals reflected in the President's September address. Because this reassessment has not been completed—and will not be completed until shortly before the 1983 Budget is delivered to Congress—I cannot respond to your second question at this time.

Sincerely,

DAVID A. STOCKMAN,
Director.

SPECIAL REPORT OF DEMOCRATIC POLICY COMMITTEE, NOVEMBER 10, 1981

This Administration is committed to a balanced budget, and we will fight to the last blow to achieve it by 1984. . . .

We will not sit on our hands and watch helplessly as the deficit swells and swells.—President Ronald Reagan, September 21, 1981.

I did not come here to balance the budget—not at the expense of my tax-cutting program and my defense program. If we can't do it in 1984, we'll have to do it later.—President Ronald Reagan, Newsweek, November 16, 1981.

THE BALANCED BUDGET: ANOTHER BROKEN PROMISE

After nine months of predictions that a balanced budget in 1984 would be a reality, the Administration finally admitted what non-Administration economists were saying all along. Given the Administration's economic plan, it cannot happen.

Below is a history of select quotes about the balanced budget starting with September 1980, and ending in November 1981.

On September 9, 1980, Ronald Reagan: "We must balance the budget, reduce taxes, and restore our defenses. These are the challenges. . . . I know we can do these things, and I know we will."—Source: Address to the International Business Council.

On September 21, 1980, Ronald Reagan: "I believe the budget can be balanced by 1982 or 1983."—source: Anderson-Reagan Debate.

On October 28, 1980, Ronald Reagan: "I have submitted an economic plan . . . and believe that over a five year projection, this plan can permit the extra spending for needed refurbishing of our defensive posture, that it can provide for a balanced budget in 1983 if not earlier, and that we can afford—along with the cuts that I have proposed in government spending—we can afford the tax cuts I have proposed. . . ."—Source: Carter-Reagan Debate.

On February 3, 1981, and he (President Reagan) told interviewers in the Oval Office that "one of the things I have not retreated from is the 1983 target" of a balanced budget—Source: The New York Times, February 4, 1981.

On February 18, 1981: By fiscal 1984—under the policy recommendations presented in this document—the Federal budget should be in balance.—Source: "America's New Beginning: A Program for Economic Recovery."

On March 2, 1981, Budget director David A. Stockman said yesterday that the Reagan administration will propose further spending cuts if a weakening economy later this year threatens to increase the budget deficit.

Stockman said that if such a trend develops this spring, the Reagan administration would "as a matter of basic policy, look for offsetting economies," rather than accommodate that kind of growth in the deficit. "It may not be a 100 percent offset," he said, "but we would not allow the budget to become hostage to the economy."—Source: The Washington Post, March 3, 1981.

On September 15, 1981, President Ronald Reagan: "I'm as committed today as on the first day I took office to balancing the budget, freeing the people from punitive taxation, and making America once again strong enough to safeguard our freedom. And I'm surer today than I ever was that we can achieve all three of these things. We'll continue to make budget adjustments as needed, and we'll hold the line."—Source: Remarks at a White House Reception.

On September 21, 1981, President Ronald Reagan: "This Administration is committed to a balanced budget, and we will fight to the last blow to achieve it by 1984. . . .

"We will not sit on our hands and watch helplessly as the deficit swells and swells." Source: Address to the National Federation of Republican Women.

On September 24, 1981, President Ronald Reagan: ". . . Maybe you'll remember that we were told in the spring of 1980 that the 1981 budget, the one we have now, would be balanced. Well, that budget, like so many in the past, hemorrhaged badly and wound up in a sea of red ink:

"I have pledged that we shall not stand idly by and see that same thing happen again."—Source: Televised Address to the Nation, September 24, 1981.

On October 26, 1981, OMB Director David Stockman: "I don't think anybody's talking about literal accounting balance or making a fetish (of a balanced budget)."—Source: The New York Times, October 29, 1981.

On October 29, 1981, White House Communications Director David Gergen: "The President is sticking firmly to the idea of a balanced budget in 1984."—Source: The New York Times, October 31, 1981.

On October 30, 1981, testifying before the Senate Budget Committee, Mr. Regan said it is "possible, but not probable" that the goal (of a balanced budget) will be reached.—Source: The Baltimore Sun, October 31, 1981.

On November 6, 1981, Treausry Secretary Donald Regan: "We will not be able to achieve a balanced budget by 1984, but we will be on a path leading to a balanced budget."—Source: The Baltimore Sun, November 7, 1981.

On November 6, 1981, President Ronald Reagan: "I've never said anything but that it was a goal. And the eventual goal, whether it comes then (in 1984) or whether it has to be delayed or not, is a balanced budget."—Source: The Washington Post, November 7, 1981.

On November 1981, President Ronald Reagan: "I did not come here to balance the budget—not at the expense of my tax-cutting program and my defense program. If we can't do it in 1984, we'll have to do it later."—Source: Newsweek, November 16, 1981.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield to the Senator from Wisconsin.

HOUSE HEARINGS UNDERSCORE NEED FOR RATIFICATION OF GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, last week the Senate Foreign Relations Committee held its 11th day of hearings on the Genocide Convention since President Truman transmitted the Convention to the Senate in 1949. As that committee renews its consideration of the treaty, I would like to take this opportunity to call the attention of my colleagues to important hearings on the crime of genocide held by the House Committee on International Relations in 1975.

For 2 days that committee received testimony from a number of historians, sociologists, and other experts on the two greatest human tragedies of this century, the Holocaust, which destroyed or displaced almost the entire Jewish population in Europe, and the massacre of 1½ million Armenians by the Turks during World War I. By closely examining those two instances of genocide in an effort to reach a broader understanding of the crime of genocide and its implications, the committee sought to provide a basis for the discussion of possible methods of prevention.

First and foremost, the witnesses implored the committee to remember the absolute horror of these human atrocities, the incredible suffering and death borne by the victims, and the callousness, intolerance, hatred, and inhumanity which the perpetrators were capable of.

Subcommittee Chairman Lester Wolff recognized in his opening statement that—

> We cannot permit the passage of time to erase the memory of an act of genocide. It is a time that cannot be forgotten. Just twenty-five years after the massacre of the Armenians, Adolph Hitler, as he was laying out his own plans for atrocities, callously noted, "Who, after all, speaks today of the annihilation of the Armenians?"

Mr. President. that is a shocking quote. Think about it.

That Hitler could possibly have been deterred from instigating the slaughter of Europe's Jews had the international reaction to the Armenian Holocaust just 25 years earlier been firmer and more

vocal is a most disturbing notion, one that must sting in the conscience of us all.

Repeatedly, the witnesses of this hearing stressed that to establish the climate of world opinion necessary to deter future genocides, it is essential that the world be vividly reminded, again and again, of the willful slaughters of human beings that have occurred throughout history.

But, Mr. President, as the international reaction to the Armenian massacre at the time Hitler was plotting his final solution demonstrates to us, the memory of mankind is dangerously short lived.

This fact reiterates the need for the international community to formally commit itself to the prevention of genocide. And that, Mr. President, is exactly what the Genocide Convention does. It provides a framework for the nations of the world to effectively oppose the planned destruction of whole groups of people.

I urge my colleagues to take the time to review some of the excellent testimony contained in this hearing record, which effectively makes the case for ratification of the Genocide Convention by this body.

Mr. President, I ask unanimous consent that former Representative Lester Wolff's excellent opening remarks be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

Mr. WOLFF. The subcommittee will come to order.

Genocide is, perhaps, the most heinous of international crimes. It takes the form of organized violence directed, usually by a state, against a people who are relatively defenseless. As these people are persecuted by the very state in which they live, their only recourse is assistance from abroad.

Today, the Subcommittee on Future Foreign Policy Research and Development, augmented by several additional members who are with us, will hold the first in a series of hearings to probe the terror of genocide: to try to determine how nations can prevent future crimes from occurring and bring to an end genocidal activities that do begin.

There is a growing concern in the Congress over the state of human rights in various nations in the world. These hearings will concentrate on the most extreme violation of human rights, the destruction of a people. To do this, we will examine certain past instances of genocide.

We will study the massacres of the Armenian people, and the "Holocaust" that claimed the lives of millions of European Jews.

We will examine the details of these tragedies and try to draw from conclusions as to the nature of genocide and how our Nation can respond in the future.

We have before us a panel of distinguished guests who will provide us with a wealth of information on the first genocidal tragedy of the 20th century, that which befell the Armenian people in the years 1910–20 when 1.5 million people were killed or driven from their homes and left to die. Our purpose in this is twofold. We shall examine this tragedy as part of the broader problem of genocide and also to determine whether the repercussions of the tragedy are still being felt today.

We cannot permit the passage of time to erase the memory of an act of genocide. It is a crime that cannot be forgotten. Just 25 years after the massacre of the Armenians, Adolph Hitler, as he was laying out his own plans for atrocities, callously noted, "Who, after all, speaks today of the annihilation of the Armenians?"

In these hearings, we will show that such crimes are not forgotten but remain etched in the memory of man and serve to redouble man's efforts to prevent another tragedy.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, if I may have the attention of the distinguished minority leader for a moment, in examining the Executive Calendar for today, I find that, under nominations, all of those nominations beginning with Calendar Order No. 572, C. T. Conover, of California, to be Comptroller of the Currency, and extending, without exception, through page 41, to include nominations placed on the Secretary's desk in the Coast Guard, Air Force, Army, and Navy, have been cleared on our calendar. I wonder if the minority leader is prepared at this time to proceed to the consideration of all or any of those nominations.

Mr. ROBERT C. BYRD. Mr. President, all nominations on page 2 and going through page 41 have been cleared on this side of the aisle.

Mr. BAKER. Mr. President, would the distinguished minority leader be prepared at this time then to consider those nominations en bloc?

Mr. ROBERT C. BYRD. Mr. President, with the exception of the nomination which appears on page 2 in connection with which Senator PROXMIRE wishes to speak, this side is ready to proceed en bloc.

Mr. BAKER. I thank the minority leader.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now go into executive session for the purpose of considering the nominations just identified.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, would the clerk please state the first nomination?

The PRESIDENT pro tempore. The clerk will state the first nomination.

NATIONAL TRANSPORTATION SAFETY BOARD

The assistant legislative clerk read the nomination of James Eugene Burnett, Jr., of Arkansas, to be a member of the National Transportation Safety Board.

Mr. BAKER. Mr. President, I am sorry. The first one, if I am not mistaken, is C. T. Conover, of California. Is that not correct? The others are to be considered en bloc was the advice I received from the minority leader. I believe the minority leader agreed to consider all the nominations beginning on page 2 under "Nominations." It was my hope the Chair would ask the clerk to state the first nomination, which would be C. T. Conover, on which there would be some debate. After the disposition of that nomination, I will ask that the remainder of them be considered en bloc.

The PRESIDENT pro tempore. The clerk will state the nomination.

DEPARTMENT OF THE TREASURY

The assistant legislative clerk read the nomination of C. T. Conover, of California, to be Comptroller of the Currency.

Mr. PROXMIRE. Mr. President, I will be very very brief. I do not expect to be more than 2 minutes.

Mr. President, this is a nomination which gave me a great deal of concern. Fortunately, Mr. Conover has cleared up my principal concern. I commend him for his willingness to compromise.

Mr. Conover had been a founder of the business consulting firm of Edgar, Dunn, and Conover a few short years ago. The firm has represented national banks. In fact, about 20 percent of their business and their revenues is from national banks.

Because the office to which he is being nominated is the most powerful office in the life of national banks and has virtually complete power over them as far as regulation is concerned, I was concerned with the situation of Mr. Conover being Comptroller of the Currency, the top man in this office, and, at the same time, his name appearing on a firm which national banks hired and paid to represent them. The conflict and especially the apparent or perceived conflict of interest could hardly be more obvious. I told Mr. Conover this in his nomination hearings before the Senate Banking Committee, and I told him the same thing when we had a private conference.

I must say, to Mr. Conover's great credit, by a letter dated December 8, 1981, he will have his name removed from the Edgar, Dunn firm. I think Mr. Conover has done the right thing with respect to the firm name. Mr. Conover will also recuse himself from bank client matters involving the Edgar, Dunn firm. For this, too, I commend Mr. Conover and I wish him well and express my desire to work with him as he enters upon his duties as Comptroller of the Currency. I have no objection to him. I think he is a competent man and an intelligent man with a fine background and I approve his nomination.

The PRESIDENT pro tempore. The nomination is confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Now, Mr. President, I ask unanimous consent that the remainder of the nominations appearing on today's Executive Calendar, beginning on page 3, National Transportation Safety Board, and continuing to the end, without exception, and to include the nominations placed on the Secretary's desk, be considered and confirmed en bloc.

The PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

The nominations confirmed are as follows:

NATIONAL TRANSPORTATION SAFETY BOARD

James Eugene Burnett, Jr., of Arkansas, to be a member of the National Transportation Safety Board for the term expiring December 31, 1985.

COMMUNICATIONS SATELLITE CORPORATION

Robert M. Garrick, of California, to be a member of the Board of Directors of the Communications Satellite Corporation until the date of the annual meeting of the Corporation in 1984.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Bobby Jack Thompson, of New York, to be Administrator of the U.S. Fire Administration.

U.S. AIR FORCE

The following officers for appointment in the U.S. Air Force under the provisions of chapter 36, title 10 of the United States Code:

Brig. Gen. Leon W. Babcock, Jr., to be major general.

Brig. Gen. Robert D. Beckel, to be major general.

Brig. Gen. John A. Brashear, to be major general.

Brig. Gen. Duane H. Cassidy, to be major general.

Brig. Gen. William M. Charles, Jr., to be major general.

Brig. Gen. Joseph H. Connolly, to be major general.

Brig. Gen. Charles J. Cunningham, Jr., to be major general.

Brig. Gen. Thomas G. Darling, to be major general.

Brig. Gen. William A. Gorton, to be major general.

Brig. Gen. Monroe W. Hatch, Jr., to be major general.

Brig. Gen. Paul H. Hodges, to be major general.

Brig. Gen. William L. Kirk, to be major general.

Brig. Gen. Donald L. Lamberson, to be major general.

Brig. Gen. Gerald D. Larson, to be major general.

Brig. Gen. William J. Mall, Jr., to be major general.

Brig. Gen. Charles McCausland, to be major general.

Brig. Gen. Robert E. Messerli, to be major general.

Brig. Gen. Joseph D. Moore, to be major general.

Brig. Gen. Richard D. Murray, to be major general.

Brig. Gen. David L. Nichols, to be major general.

Brig. Gen. Peter W. Odgers, to be major general.

Brig. Gen. George B. Powers, Jr., to be major general.

Brig. Gen. Richard W. Pryor, to be major general.

Brig. Gen. Bernard P. Randolph, to be major general.

Brig. Gen. Robert H. Reed, to be major general.

Brig. Gen. Thomas C. Richards, to be major general.

Brig. Gen. Robert A. Rosenberg, to be major general.

Brig. Gen. Robert D. Springer, to be major general.

Brig. Gen. Thomas S. Swalm, to be major general.

Gen. William E. Thuman, to be major general.

Gen. Edward L. Tixier, to be major general.

Brig. Gen. Harold W. Todd, to be major general.

Brig. Gen. Kermit Q. Vandenbos, to be major general.

Brig. Gen. Brien D. Ward, to be major general.

Brig. Gen. Clifton D. Wright, Jr., to be major general.

Brig. Gen. Frank H. Smoker, Jr., to be major general.

Brig. Gen. Henry C. Smyth, Jr., to be major general.

Brig. Gen. Herbert L. Wassell, Jr., to be major general.

Col. Carl D. Black, to be brigadier general.

Col. John E. Blewett, to be brigadier general.

Col. James T. Botticelli, to be brigadier general.

Col. Charles S. Cooper III, to be brigadier general.

Col. Michael DiBernardo, to be brigadier general.

Col. Thomas A. Facelle, Jr., to be brigadier general.

Col. Richard J. Geehan, Jr., to be brigadier general.

Col. William H. Johnson, to be brigadier general.

Col. Harold E. Juedeman, to be brigadier general.

Col. John M. Karibo to be brigadier general.

Col. Myrle B. Langley, to be brigadier general.

Col. John R. Layman, to be brigadier general.

Col. Alexander P. MacDonald, to be brigadier general.

Col. William M. MacInnes, to be brigadier general.

Col. John T. Olson, to be brigadier general.

Col. Robert W. Paret, to be brigadier general.

Col. Bertram W. Sealy, Jr., to be brigadier general.

Col. John J. Zito, to be brigadier general.

U.S. ARMY

The following-named officers for appointment in the Regular Army of the United States to the grade indicated under the provisions of section 601(a), Public Law 96–513, 12 December 1980, and title 10, United States Code, section 624:

Maj. Gen. Ames S. Albro, Jr., to be major general.

Maj. Gen. Andrew H. Anderson, to be major general.

Brig. Gen. (promotable) Thurman E. Anderson, to be major general.

Maj. Gen. Richard W. Anson, to be major general.

Maj. Gen. William S. Augerson, to be major general.

Maj. Gen. Donald M. Babers, to be major general.

Maj. Gen. Charles W. Bagnal, to be major general.

Maj. Gen. Floyd W. Baker, to be major general.

Maj. Gen. Quinn H. Becker, to be major general.

Maj. Gen. Robert L. Bergquist, to be major general.

Maj. Gen. Raymond H. Bishop, Jr., to be major general.

Maj Gen. Richard D. Boyle, to be major general.

Maj. Gen. Arthur E. Brown, Jr., to be major general.

Maj. Gen. Edward M. Browne, to be major general.

Maj. Gen. John D. Bruen, to be major general.

Maj. Gen. Paul P. Burns, to be major general.

Brig. Gen. (Promotable) Andrew P. Chambers, to be major general.

Maj. Gen. Mary E. Clarke, to be major general.

Maj. Gen. Neal Creighton, to be major general.

Brig. Gen. (promotable) John S. Crosby, to be major general.

Maj. Gen. Howard G. Crowell, Jr., to be major general.

Maj. Gen. Jerry R. Curry, to be major general.

Brig. Gen. (promotable) William S. deCamp, to be major general.

Maj. Gen. Edward A. Dinges, to be major general.

Maj. Gen. Henry Doctor, Jr., to be major general.

Brig. Gen. (promotable) Robert J. Donahue, to be major general.

Maj. Gen. Benjamin E. Doty, to be major general.

Maj. Gen. David K. Doyle, to be major general.

Maj. Gen. Harry L. Dukes, Jr., to be major general.

Maj. Gen. Charles W. Dyke, to be major general.

Maj. Gen. David W. Einsel, Jr., to be major general.

Brig. Gen. (Promotable) James N. Ellis, to be major general.

Maj. Gen. Robert M. Elton, to be major general.

Maj. Gen. Vincent E. Falter, to be major general.

Maj. Gen. Joseph L. Fant, to be major general.

Maj. Gen. Charles J. Fiala, to be major general.

Maj. Gen. Robert C. Forman, to be major general.

Brig. Gen. (promotable) Robert H. Forman, to be major general.

Brig. Gen. (promotable) Charles D. Franklin, to be major general.

Maj. Gen. James E. Freeze, to be major general.

Maj. Gen. Daniel W. French, to be major general.

Maj. Gen. Niles J. Fulwyler, to be major general.

Maj. Gen. John R. Galvin, to be major general.

Maj. Gen. John D. Granger, to be major general.

Maj. Gen. Henry H. Harper, to be major general.

Maj. Gen. Thomas F. Healy, to be major general.

Maj. Gen. Elvin R. Heiberg III, to be major general.

Maj. Gen. John A. Hemphill, to be major general.

Maj. Gen. Robert L. Herriford, Sr., to be major general.

Brig. Gen. (promotable) Arthur Holmes, Jr., to be major general.

Maj. Gen. John W Hudachek, to be major general.

Maj. Gen. William K. Hunzeker, to be major general.

Maj. Gen. Edward J. Huycke, to be major general.

Maj. Gen. Theodore G. Jenes, Jr., to be major general.

Maj. Gen. James H. Johnson, to be major general.

Maj. Gen. Vaughn O. Lang, to be major general.
Maj. Gen. Donald R. Lasher, to be major general.
Maj. Gen. Richard D. Lawrence, to be major general.
Maj.Gen. Allen H. Light, Jr., to be major general.
Brig. Gen. (promotable) Aaron L. Lilley, Jr., to be major general.
Maj. Gen. James J. Lindsay, to be major general.
Maj. Gen. Fred K. Mahaffey, to be major general.
Maj. Gen. James P. Maloney, to be major general.
Brig. Gen. (promotable) George E. Marine, to be major general.
Maj. Gen. Carl H. McNair, Jr., to be major general.
Brig. Gen. (promotable) Walter J. Mehl, to be major general.
Maj. Gen. Louis C. Menetrey, to be major general.
Maj. Gen. Bernhard T. Mittemeyer, to be major general.
Maj. Gen. William C. Moore, to be major general.
Maj. Gen. Max W. Noah, to be major general.
Maj. Gen. John B. Oblinger, Jr., to be major general.
Maj. Gen. Edward C. O'Connor, to be major general.
Maj. Gen. Joseph T. Palastra, Jr., to be major general.
Maj. Gen. Elmer D. Pendleton, Jr., to be major general.
Maj. Gen. James C. Pennington, to be major general.
Brig. Gen. (promotable) Garrison Rapmund, to be major general.
Maj. Gen. Benjamin F. Register, Jr., to be major general.
Maj. Gen. Roderick D. Remick, Jr., to be major general.
Maj. Gen. Hugh G. Robinson, to be major general.
Maj. Gen. Patrick M. Roddy, to be major general.
Maj. Gen. Vincent M. Russo, to be major general.
Maj. Gen. William H. Schneider, to be major general.
Maj. Gen. Robert L. Schweitzer, to be major general.
Maj. Gen. John W. Seigle, to be major general.
Maj. Gen Lawrence F. Skibbie, to be major general.
Maj. Gen. Harold I. Small, to be major general.
Maj. Gen. Robert B. Solomon, to be major general.
Maj. Gen. Howard F. Stone, to be major general.
Maj. Gen. Albert N. Stubblebine III, to be major general.
Maj. Gen. Duane H. Stubbs, to be major general.
Maj. Gen. Robert A. Sullivan, to be major general.
Maj. Gen. Edward L. Trobaugh, to be major general.
Maj. Gen. Dale A. Vesser, to be major general.
Maj. Gen. Carl E. Vuono, to be major general.
Maj. Gen. Louis C. Wagner, Jr., to be major general.
Maj. Gen. David E. Watts, to be major general.
Maj. Gen. James S. Welch, to be major general.
Maj. Gen. Richard M. Wells, to be major general.
Maj. Gen. James A. Williams, to be major general.
Maj. Gen. John W. Woodmansee, Jr., to be major general.

Brig. Gen. Floyd C. Adams, Jr., to be brigadier general.
Brig. Gen. Robert B. Adams, to be brigadier general.
Col. (promotable) Edwin M. Aguanno, to be brigadier general.
Brig. Gen. Anthony F. Albright, to be brigadier general.
Brig. Gen. Jack A. Apperson, to be brigadier general.
Brig. Gen. Norman E. Archibald, to be brigadier general.
Brig. Gen. John C. Bahnsen, Jr., to be brigadier general.
Brig. Gen. John L. Ballantyne III, to be brigadier general.
Brig. Gen. Lyle J. Barker, Jr., to be brigadier general.
Brig. Gen. Gerald T. Bartlett, to be brigadier general.
Brig. Gen. Richard J. Bednar, to be brigadier general.
Brig. Gen. Gerald H. Bethke, to be brigadier general.
Brig. Gen. Frederick C. Biehusen, to be brigadier general.
Brig. Gen. Zeb B. Bradford, Jr., to be brigadier general.
Brig. Gen. Jack O. Bradshaw, to be brigadier general.
Brig. Gen. James T. Bramlett, to be brigadier general.
Col. (promotable) Joe J. Breedlove, to be brigadier general.
Brig. Gen. Charles F. Briggs, to be brigadier general.
Brig. Gen. Leo A. Brooks, to be brigadier general.
Brig. Gen. Grail L. Brookshire, to be brigadier general.
Brig. Gen. Jeremiah J. Brophy, to be brigadier general.
Brig. Gen. Charles W. Brown, to be brigadier general.
Brig. Gen. Dallas C. Brown, Jr., to be brigadier general.
Brig. Gen. Frederic J. Brown III, to be brigadier general.
Brig. Gen. John M. Brown, to be brigadier general.
Brig. Gen. David L. Buckner, to be brigadier general.
Col. (promotable) Robert H. Buker, to be brigadier general.
Brig. Gen. Jerry M. Bunyard, to be brigadier general.
Brig. Gen. Peter G. Burbules, to be brigadier general.
Brig. Gen. Peter G. Burbules, to be brigadier general.
Col. (promotable) William F. Burns, to be brigadier general.
Brig. Gen. Archie S. Cannon, Jr., to be brigadier general.
Brig. Gen. Richard G. Cardillo, to be brigadier general.
Brig. Gen. William E. Carlson, to be brigadier general.
Brig. Gen. Thomas E. Carpenter III, to be brigadier general.
Col. (promotable) William S. Carpenter, to be brigadier general.
Col. (promotable) James C. Cercy, to be brigadier general.
Brig. Gen. Hubert T. Chandler, to be brigadier general.
Brig. Gen. James L. Collins, Jr., to be brigadier general.
Brig. Gen. Donald W. Connelly, to be brigadier general.
Brig. Gen. Michael J. Conrad, to be brigadier general.
Brig. Gen. Andrew L. Cooley, to be brigadier general.
Col. (promotable) Johnnie H. Corns, to be brigadier general.
Brig. Gen. Walter C. Cousland, to be brigadier general.
Col. (promotable) Eugene R. Cromartie, to be brigadier general.

Brig. Gen. Robert T. Cutting, to be brigagdier general.
Brig. Gen. Harold M. Davis, Jr., to be brigadier general.
Brig. Gen. Sidney Davis, to be brigadier general
Brig. Gen. Peter M. Dawkins, to be brigadier general.
Brig. Gen. Donald J. Delandro, to be brigadier general.
Brig. Gen. Norman G. Delbridge, Jr., to be brigadier general.
Brig. Gen. James R. DeMoss, to be brigadier general.
Brig. Gen. James L. Dozier, to be brigadier general.
Brig. Gen. Charles F. Drenz, to be brigadier general.
Brig. Gen. James E. Drummond, to be brigadier general.
Brig. Gen. William R. Dwyre, to be brigadier general.
Col. (promotable) Donald E. Eckelbarger, to be brigadier general.
Brig. Gen. Charles H. Edmiston, Jr., to be brigadier general.
Brig. Gen. Maurice O. Edmonds, to be brigadier general.
Col. (promotable) Fred E. Elam, to be brigadier general.
Brig. Gen. Jack B. Farris, Jr., to be brigadier general.
Brig. Gen. Thomas J. Flynn, to be brigadier general.
Brig. Gen. Johnie Forte, Jr., to be brigadier general.
Brig. Gen. John W. Foss, to be brigadier general.
Brig. Gen. Eugene Fox, to be brigadier general.
Brig. Gen. Joseph P. Franklin, to be brigadier general.
Col. (promotable) Forrest T. Gay III, to be brigadier general.
Brig. Gen. Charles E. Getz, to be brigadier general.
Brig. Gen. Wendell H. Gilbert, to be brigadier general.
Brig. Gen. Charles F. Gorden, Jr., to be brigadier general.
Brig. Gen. William H. Gourley, to be brigadier general.
Brig. Gen. Todd P. Graham, to be brigadier general.
Brig. Gen. Richard G. Graves, to be brigadier general.
Brig. Gen. Donald J. Gudinas, to be brigadier general.
Brig. Gen. James R. Hall, Jr., to be brigadier general.
Brig. Gen. Robert D. Hammond, to be brigadier general.
Brig. Gen. Bruce R. Harris, to be brigadier general.
Brig. Gen. Henry J. Hatch, to be brigadier general.
Col. (promotable) Mildred E. P. Hedberg, to be brigadier general.
Brig. Gen. James R. Henslick, to be brigadier general.
Brig. Gen. Bernard M. Herring, Jr., to be brigadier general.
Brig. Gen. Patrick J. Hessian, to be brigadier general.
Brig. Gen. James M. Hesson, to be brigadier general.
Col. (promotable) Jere L. Hickman, to be brigadier general.
Col. (promotable) Donald C. Hilbert, to be brigadier general.
Brig. Gen. Jerome B. Hilmes, to be brigadier General.
Brig. Gen. Fred Hissong, Jr., to be brigadier general.
Brig. Gen. Stanislaus J. Hoey, to be brigadier general.
Col. (promotable) Curtis F. Hoglan, to be brigadier general.
Brig. Gen. Ronald M. Holdaway, to be brigadier general.

Brig. Gen. Edward Honor, to be brigadier general.
Brig. Gen. Houston P. Houser III, to be brigadier general.
Brig. Gen. Victor J. Hugo, Jr., to be brigadier general.
Brig. Gen. Cary B. Hutchinson, Jr., to be brigadier general.
Brig. Gen. Claude T. Ivey, to be brigadier general.
Brig. Gen. Hazel W. Johnson, to be brigadier general.
Brig. Gen. Johnny J. Johnston, to be brigadier general.
Brig. Gen. Homer Johnstone, Jr., to be brigadier general.
Brig. Gen. Kenneth A. Jolemore, to be brigadier general.
Brig. Gen. Lincoln Jones III, to be brigadier general.
Col. (promotable) France F. Jordan, to be brigadier general.
Brig. Gen. Robert M. Joyce, to be brigadier general.
Col. (promotable) Walter W. Kastenmayer, to be brigadier general.
Brig. Gen. Thomas W. Kelly, to be brigadier general.
Brik. Gen. Richard S. Kem, to be brigadier general.
Brig. Gen. Richard D. Kenyon, to be brigadier general.
Brig. Gen. Claude M. Kicklighter, to be brigadier general.
Brig. Gen. John M. Kirk, to be brigadier general.
Brik Gen. William E. Klein, to be brigadier general.
Brig. Gen. Eugene S. Korpal, to be brigadier general.
Brig. Gen. Frank F. Ledford, Jr., to be brigadier general.
Col. (promotable) Ray H. Lee, to be brigadier general.
Brig. Gen. Billie B. Lefler, to be brigadier general.
Brig. Gen. Kenneth C. Leuer, to be brigadier general.
Brig. Gen. Kenneth E. Lewis, to be brigadier general.
Brig. Gen. Bernard Loeffke, to be brigadier general.
Brig. Gen. Joseph C. Lutz, to be brigadier general.
Col. (promotable) Robert G. Lynn, to be brigadier general.
Brig. Gen. Bobby J. Maddox, to be brigadier general.
Brig. Gen. Phillip H. Mason, to be brigadier general.
Brig. Gen. Church M. Matthews, Jr., to be brigadier general.
Brig. Gen. James F. McCall, to be brigadier general.
Brig. Gen. Thomas P. McHugh, to be brigadier general.
Brig. Gen. John H. Mitchell, to be brigadier general.
Brig. Gen. John H. Moellering, to be brigadier general.
Brig. Gen. Robert F. Molinelli, to be brigadier general.
Brig. Gen. Gerald E. Monteith, to be brigadier general.
Brig. Gen. James E. Moore, to be brigadier general.
Brig. Gen. Donald R. Morelli, to be brigadier general.
Col. (promotable) Robert D. Morgan, to be brigadier general.
Brig. Gen. John T. Myers, to be brigadier general.
Col. (promotable) Cecil N. Neely, to be brigadier general.
Col. (promotable) Rocco Negris, to be brigadier general.
Brig. Gen. Thomas C. Nelson, to be brigadier general.
Brig. Gen. Stephen E. Nichols, to be brigadier general.
Brig. Gen. John W. Nicholson, to be brigadier general.
Brig. Gen. William E. Odom, to be brigadier general.
Brig. Gen. William G. O'Leksy, to be brigadier general.
Brig. Gen. Hardin L. Olson, Jr., to be brigadier general.
Brig. Gen. Allen K. Ono, to be brigadier general.
Brig. Gen. Donald M. O'Shei, to be brigadier general.
Brig. Gen. Joe S. Owens, to be brigadier general.
Brig. Gen. Dave R. Palmer, to be brigadier general.
Col. (promotable) Ellis D. Parker, to be brigadier general.
Brig. Gen. Julius Parker, Jr., to be brigadier general.
Brig. Gen. Burton D. Patrick, to be brigadier general.
Brig. Gen. Christian Patte, to be brigadier general.
Brig. Gen. August R. Pede, to be brigadier general.
Brig. Gen. Benjamin J. Pellegrini, to be brigadier general.
Col. (promotable) Harry D. Penzler, to be brigadier general.
Brig. Gen. Donald S. Phil, to be brigadier general.
Col. (promotable) James Piner, Jr., to be brigadier general.
Col. (promotable) Robert W. Pointer, Jr., to be brigadier general.
Brig. Gen. Bobby B. Porter, to be brigadier general.
Brig. Gen. William E. Potts, to be brigadier general.
Brig. Gen. Colin L. Powell, to be brigadier general.
Brig. Gen. Charles G. Prather, IV, to be brigadier general.
Brig. Gen. Roger J. Price, to be brigadier general.
Brig. Gen. John P. Prillaman, to be brigadier general.
Brig. Gen. Hugh J. Quinn, to be brigadier general.
Brig. Gen. Frank A. Ramsey, to be brigadier general.
Brig. Gen. Lloyd K. Rector, to be brigadier general.
Brig. Gen. Leonard J. Riley, to be brigadier general.
Brig. Gen. Robert W. Riscassi, to be brigadier general.
Col. (promotable) George R. Robertson, to be brigadier general.
Brig. Gen. Thurman D. Rodgers, to be brigadier general.
Brig. Gen. John E. Rogers, to be brigadier general.
Brig. Gen. William C. Roll, to be brigadier general.
Brig. Gen. Jimmy D. Ross, to be brigadier general.
Col. (promotable) Jackson E. Rozier, Jr., to be brigadier general.
Brig. Gen. Crosbie E. Saint, to be brigadier general.
Col (promotable) Thomas A. Sands, to be brigadier general.
Brig. Gen. William R. Sarber, Jr., to be brigadier general.
Brig. Gen. Richard A. Scholtes, to be brigadier general.
Brig. Gen. Henry J. Schumacher, to be brigadier general.
Brig. Gen. H. Norman Schwarzkopf, to be brigadier general.
Col. (promotable) James E. Shelton, to be brigadier general.
Brig. Gen. Mark J. Sisinyak, to be brigadier general.
Brig. Gen. Joseph J. Skaff, to be brigadier general.
Brig. Gen. Henry G. Skeen, to be brigadier general.
Col. (promotable) Anthony A. Smith, to be brigadier general.
Brig. Gen. Douglas S. Smith, to be brigadier general.
Brig. Gen. Isaac D. Smith, to be brigadier general.
Brig. Gen. Scott B. Smith, to be brigadier general.
Brig. Gen. Tommie G. Smith, to be brigadier general.
Col. (promotable) Harry E. Soyster, brigadier general.
Brig. Gen. David W. Stallings, to be brigadier general.
Col. (promotable) Lynn H. Stevens, to be brigadier general.
Brig. Gen. Eugene L. Stillions, Jr., to be brigadier general.
Brig. Gen. Carl W. Stiner, to be brigadier general.
Brig. Gen. George R. Stotser, to be brigadier general.
Col. (promotable) Tracy E. Strevey, Jr., to be brigadier general.
Col. (promotable) Roy M. Strom, to be brigadier general.
Brig. Gen. Leroy N. Suddath, Jr., to be brigadier general.
Brig. Gen. Robert J. Sunell, to be brigadier general.
Brig. Gen. William E. Sweet, to be brigadier general.
Brig. Gen. James R. Taylor, to be brigadier general.
Brig. Gen. James A. Teal, Jr., to be brigadier general.
Brig. Gen. Charles E. Teeter, to be brigadier general.
Brig. Gen. James E. Thompson, Jr., to be brigadier general.
Brig. Gen. Francis J. Toner, to be brigadier general.
Brig. Gen. Gary L. Turner, to be brigadier general.
Brig. Gen. Guthrie L. Turner, Jr., to be brigadier general.
Brig. Gen. William G. T. Tuttle, Jr., to be brigadier general.
Brig. Gen. Nathan C. Vail, to be brigadier general.
Brig. Gen. James W. van Loben Sels, to be brigadier general.
Brig. Gen. Robert E. Wagner, to be brigadier general.
Brig. Gen. John F. Wall, Jr., to be brigadier general.
Brig. Gen. Chester L. Ward, to be brigadier general.
Brig. Gen. Gerald G. Watson, to be brigadier general.
Brig. Gen. Henry G. Watson, to be brigadier general.
Brig. Gen. Ronald L. Watts, to be brigadier general.
Col. (promotable) Carlton P. Weidenthal, to be brigadier general.
Brig. Gen. Sidney T. Weinstein, to be brigadier general.
Brig. Gen. Donald P. Whalen, to be brigadier general.
Brig. Gen. Albin G. Wheeler, to be brigadier general.
Brig. Gen. Orren R. Whiddon, to be brigadier general.
Brig. Gen. Howard C. Whittaker, to be brigadier general.
Brig. Gen. Robert D. Wiegand, to be brigadier general.
Brig. Gen. Richard W. Wilmot, to be brigadier general.
Brig. Gen. William P. Winkler, Jr., to be brigadier general.
Brig. Gen. Leonard P. Wishart III, to be brigadier general.
Brig. Gen. George W. Withers, Jr., to be brigadier general.
Brig. Gen. Frederick F. Woerner, Jr., to be brigadier general.
Col. (promotable) Jack D. Woodall, to be brigadier general.

Col. (promotable) Stephen R. Woods, Jr., to be brigadier general.

Brig. Gen. John J. Yeosock, to be brigadier general.

Brig. Gen. Robert S. Young, to be brigadier general.

Brig. Gen. Ronald W. Zeltman, to be brigadier general.

The following-named officers for appointment in the Regular Army of the United States to the grade indicated under the provisions of title 10, United States Code, sections 611(a) and 624:

Brig. Gen. Norman G Delbridge, Jr., to be permanent major general.

Brig. Gen. Frederic I. Brown III, to be permanent major general.

Brig. Gen. Stephen E. Nichols, to be permanent major general.

Brig. Gen. Francis J. Toner, to be permanent major general.

Brig. Gen. James J. Henslic, to be permanent major general.

Brig. Gen. Leo A. Brooks, to be permanent major general.

Brig. Gen. Richard A. Scholtes, to be permanent major general.

Brig. Gen. H. Norman Schwarzkopf, to be permanent major general.

Brig. Gen. Robert M. Joyce, to be permanent major general.

Brig. Gen. Johnny J. Johnston, to be brigadier general.

Brig. Gen. Joe S. Owens, to be brigadier general.

Brig. Gen. Claude M. Kicklighter, to be brigadier general.

Brig. Gen. John F. Wall, Jr., to be brigadier general.

Brig. Gen. Victor J. Hugo, Jr., to be brigadier general.

Brig. Gen. John H. Mitchell, to be brigadier general.

Brig. Gen. Jerry M. Bunyard, to be brigadier general.

Brig. Gen. Crosbie E. Saint, to be brigadier general.

Brig. Gen. James E. Moore, to be brigadier general.

Brig. Gen. William G. O'Leksy, to be brigadier general.

Brig. Gen. Thomas J. Flynn, to be brigadier general.

Brig. Gen. Robert W. Riscassi, to be brigadier general.

Brig. Gen. William E. Odom, to be brigadier general.

Brig. Gen. Henry J. Schumacher, to be brigadier general.

Lt. Gen. William Joseph Hilsman, to be brigadier general.

Gen. Robert Morin Shoemaker, to be general.

U.S. NAVY

The following-named officers of the U.S. Navy for permanent promotion to the grade indicated in the line and various staff corps, pursuant to title 10, United States Code, Sections 5780, 5781, and 5791, or sections 611(a) and 614 of the Defense Officer Personnel Management Act (Public Law 96-513), as applicable, subject to qualifications therefor as provided by law:

Line

Austin, Robert Clarke, to be rear admiral.

Baldwin, John Ashby, Jr., to be rear admiral.

Booth, Peter Blake, to be rear admiral.

Cassidy, Thomas Joseph, Jr., to be rear admiral.

Cooper, Daniel Leander, to be rear admiral.

Davis, George Wilmot, Jr., to be rear admiral.

Felt, Donald Linn, to be rear admiral.

Grich, Richard John, to be rear admiral.

Hogan, Edward Joseph, Jr., to be rear admiral.

Howe, Jonathan Trumbull, to be rear admiral.

Johnson, Roger David, to be rear admiral.

Johnston, Fred William, Jr., to be rear admiral.

Kearns, William Anselm, Jr., to be rear admiral.

Klein, Verle Wesley, to be rear admiral.

Martin, Edward Holmes, to be rear admiral.

McArthur, John Chester, to be rear admiral.

McCardell, James Elton, Jr., to be rear admiral.

McCarthy, Paul Fenton, Jr., to be rear admiral.

McCauley, William Frederick, to be rear admiral.

Moore, Charles Julian, to be rear admiral.

Moore, Virgil Wayne, Jr., to be rear admiral.

Myers, Lowell Richard, to be rear admiral.

Parker, Jackson Knowles, to be rear admiral.

Parker, John Theodore, Jr., to be rear admiral.

Peebles, Edward Metcalfe, to be rear admiral.

Piotti, Walter Theodore, Jr., to be rear admiral.

Roane, Donald Patterson, to be rear admiral.

Smith, Dickinson Miller, to be rear admiral.

Smith, William Dee, to be rear admiral.

Taylor, Clinton Wagner, to be rear admiral.

Watson, Thomas Campbell, Jr., to be rear admiral.

Wellman, Harold Nixon, to be rear admiral.

Williams, Allen Dean, to be rear admiral.

Wyatt, William Claudius, III, to be rear admiral.

Young, Harold Lawrence, to be rear admiral.

Medical corps

Lowery, Clinton Hershey, to be rear admiral.

Seaton, Lewis Hiram, to be rear admiral.

The following-named officers of the U.S. Navy for permanent promotion to the grades indicated when eligible in the line and various staff corps, pursuant to sections 611 (a) and 614 of the Defense Officer Personnel Management Act (Public Law 96-513), as applicable, subject to qualifications therefor as provided by law:

Line

Addams, John Franklin, to be commodore and rear admiral.

Almstedt, Theodore A., Jr., to be commodore and rear admiral.

Arthur, Stanley Roger, to be commodore and rear admiral.

Aut, Warren Edward, to be commodore and rear admiral.

Batzler, John Richard, to be commodore and rear admiral.

Box, Roger Elden, to be commodore and rear admiral.

Chang, Ming Erh, to be commodore and rear admiral.

Chatham, Walter Lewis, to be commodore and rear admiral.

Demars, Bruce, to be commodore and rear admiral.

Donnell, Joseph Stover, III, to be commodore and rear admiral.

Dunleavy, Richard Michael, to be commodore and rear admiral.

Fetterman, John Henry, Jr., to be commodore and rear admiral.

Flatley, James Henry, III, to be commodore and rear admiral.

Furlong, George Morgan, Jr., to be commodore and rear admiral.

Hecker, Benjamin Thurman, to be commodore and rear admiral.

Hokman, Peter Maynard, Jr., to be commodore and rear admiral.

Herberger, Albert Joseph, to be commodore and rear admiral.

Holland, William Jeremiah, Jr., to be commodore and rear admiral.

Kelso, Frank Benton, II, to be commodore and rear admiral.

Kohn, Edwin Rudolph, Jr., to be commodore and rear admiral.

Kurth, Ronald James, to be commodore and rear admiral.

MacKay, Gerald Wallace, to be commodore and rear admiral.

Marryott, Ronald Frank, to be commodore and rear admiral.

McDowell, Don Hardin, to be commodore and rear admiral.

Maronville, Kendall Elmer, to be commodore and rear admiral.

Narmi, Ronald Eugene, to be commodore and rear admiral.

Nyquist, John Walfrid, to be commodore and rear admiral.

Paulson, Allan Gerald, to be commodore and rear admiral.

Poindexter, John Marlan, to be commodore and rear admiral.

Rogers, Robert Burnett, to be commodore and rear admiral.

Schmitt, Robert William, to be commodore and rear admiral.

Severance, Laverne Stanard, Jr., to be commodore and rear admiral.

Steele, Ted Charles, Jr., to be commodore and rear admiral.

Storms, James Granville, III, to be commodore and rear admiral.

Sutherland, Paul Edward, Jr., to be commodore and rear admiral.

Thompson, Richard Lee, to be commodore and rear admiral.

Toole, Morton Egner, to be commodore and rear admiral.

Walsh, William Albert, to be commodore and rear admiral.

Williams, James Dale, to be commodore and rear admiral.

Medical corps

Cooley, Norman Vale, Jr., to be commodore and rear admiral.

Crews, Quintous Earl, Jr., to be commodore and rear admiral.

Elliott, Robert Cahoone, to be commodore and rear admiral.

McDermott, William M., Jr., to be commodore and rear admiral.

Zimble, James Allen, to be commodore and rear admiral.

Supply corps

Sansone, Joseph Sarto, Jr., to be commodore and rear admiral.

Walker, Edward Keith, Jr., to be commodore and rear admiral.

Wilson, Donald Edwin, to be commodore and rear admiral.

Civil engineer corps

Conner, Donald Lee, to be commodore and rear admiral.

Dental corps

McLeod, Carlton Joseph, to be commodore and rear admiral.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Clarence Eugene Hodges, of Maryland, to be Chief of the Children's Bureau, Department of Health of Human Services.

INTERNATIONAL BANKING ORGANIZATIONS

Myer Rashish, of the District of Columbia, to be U.S. Alternate Governor of the International Bank for Reconstruction and Development for a term of 5 years; U.S. Alternate Governor of the Inter-American Development Bank for a term of 5 years; U.S. Alternate Governor of the Asian Development Bank; and U.S. Alternate Governor of the African Development Fund.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE COAST GUARD, AIR FORCE, ARMY, AND NAVY

Coast Guard nominations beginning Irving G. Sauer, to be captain, and ending Arthur E. Henn, to be captain, which nominations

were received by the Senate and appeared in the Congressional Record on November 2, 1981.

Air Force nominations beginning Thomas F. Abbott, to be lieutenant colonel, and ending Nancy L. Wiseman, to be lieutenant colonel, which nominations were received by the Senate and appeared in the Congressional Record on November 23, 1981.

Air Force nominations beginning William J. Athas, to be lieutenant colonel, and ending Alan B. Johnson, to be lieutenant colonel, with nominations were received by the Senate and appeared in the Congressional Record on November 23, 1981.

Army nominations beginning Donald C. Askew, to be colonel, and ending Bruce Walton, to be lieuteuant colonel, which nominations were received by the Senate and appeared in the Congressional Record on December 1, 1981.

Army nominations beginning Eugene Womack Allen, to be colonel, and ending George Allen J. McNamee, to be captain, which nominations were received by the Senate and appeared in the Congressional Record on December 1, 1981.

Navy nominations beginning Paul F. Abrahams, to be capital, and ending Stephen A. Zimmerman, to be lieutenant commander, which nominations were received by the Senate and appeared in the Congressional Record on November 12, 1981.

Navy nominations beginning Wilbur D. Jones, Jr., to be captain, and ending Frederick A. Aalbue, to be lieutenant (j.g.), which nominations were received by the Senate and appeared in the Congressional Record on December 1, 1981.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President immediately be notified that the Senate has given its consent to these nominations.

The PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDENT pro tempore. Without objection, it is so ordered.

RECESS SUBJECT TO THE CALL OF THE CHAIR

Mr. BAKER. Mr. President, there is a briefing going on in another part of the Capitol to which all Senators are invited, dealing with the situation in Poland. I think it would not be wise to continue the session of the Senate during that time.

I ask unanimous consent that the Senate stand in recess subject to the call of the Chair.

There being no objection, the Senate, at 12:41 p.m., recessed subject to the call of the Chair; whereupon, the Senate reassembled at 1:44 p.m. when called to order by the Presiding Officer (Mr. LUGAR).

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, it is my hope shortly to ask the Senate to proceed with the Treasury-Postal Service appropriations bill. I will not do that at this moment because I do not believe the principals are yet on the floor and available.

After we finish with Treasury-Postal Service, Mr. President, and I hope and expect we can do that today, it would be my hope that we could go to the Nuclear Regulatory Commission reform bill.

There are other matters that may perhaps be dealt with today. It is not expected that today will be a late session of the Senate. I estimate somewhere in the range of 6 o'clock to conclude the activities of the Senate on this calendar day.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, while we await the arrival of those charged with the management of the Treasury-Postal Service bill, and before I ask the Chair to lay that measure before the Senate, I ask unanimous consent that there now be a brief period for the transaction of routine morning business, to extend not past the hour of 2 o'clock, in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE HEALTH EFFECTS OF NITRATE, NITRITE, AND N-NITROSO COMPOUNDS

Mr. GRASSLEY. Mr. President, last Thursday, the 10th of December, the National Research Council of the National Academy of Sciences released a study entitled "the Health Effects of Nitrate, Nitrite, and N-Nitroso Compounds." It includes the following statement: "Evidence does not indicate that nitrite acts directly as a carcinogen in animals." Mr. President, this prestigious report brings welcome news to consumers. It also verifies the precarious and costly position imposed on producers and processors of meat products by certain governmental actions and threats of action in 1978.

First, Mr. President, I would like to share some background information with my colleagues who may not be familiar with this issue. The safety in the use of nitrites in the processing of meats came into question in 1978. For this reason, I ask that a historical perspective, which is included in the NAS report, be made part of the RECORD at this point.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

CHAPTER 1—EXECUTIVE SUMMARY

HISTORICAL PERSPECTIVE

Curing salts, some of which contain nitrate and nitrite, have been used for many centuries to preserve meat. However, the intentional use of nitrate and nitrite salts to cure meat is a relatively new practice.

Since the 1900s, the U.S. Department of Agriculture (USDA) has regulated and monitored the addition of nitrate and nitrite to red-meat and poultry products. The intentional use of these compounds was originally motivated by their ability to produce a reddish-pink color in meat. Subsequently, it was discovered that nitrite inhibited the growth of certain bacteria such as putrefactive anaerobes, which cause the spoilage of meats, and Clostridium botulinum, which causes a foodborne intoxication—botulism.

In recent years, a number of observations have led to concern about potential risks to human health resulting from the use of nitrate and nitrite. At present, primary concern is focused on the possibility of carcinogenic effects, especially since nitrite can interact with substrates such as amines or amides to produce N-nitroso compounds, which can contaminate the nitrite-preserved foods. Many of these N-nitroso compounds (which include nitrosamines) are known to cause cancer in many animal species. In mid-1978, this concern was exacerbated by the results of a 2-year feeding study in animals, which suggested that nitrite per se causes cancer. These results would have necessitated the banning of nitrite in order to comply with the Food Safety Provisions and, for some uses of nitrite, the Delaney Clause of the Food, Drug and Cosmetics Act, which proscribe the addition of known carcinogens to foods. However, further evaluation of these data suggested that the initial conclusion may not have been justified. Not only did the effects of nitrate and nitrite on human health need to be fully assessed, their contribution to the total body burden of nitrosamines had also to be determined. Thus, in 1980 the USDA and the Food and Drug Administration (FDA) asked the National Academy of Sciences to examine the current state of knowledge concerning these issues and to assess the status of research on curing agents that can be used as alternatives to nitrite.

Mr. GRASSLEY. At that time, when I was a Member of the other body, the Food and Drug Administration and the Department of Agriculture were preparing legislative and regulatory steps to ban the use of nitrites in the processing of meats. Shortly after these efforts began, I learned that the study on which the agencies were basing their actions was less than conclusive.

These reports concerned me because, of course, consumer protection must be based on the most complete information available, and I urged the agencies to reexamine their findings and conclusions. Two points were of particular concern to me: First, were consumers about to be exposed unnecessarily to meats that could cause death because of botulism (a danger in the absence of nitrites); and second, was an unnecessary cloud of uncertainty being raised over meat products, especially pork, which were processed with nitrite.

It has been estimated that the Nation's pork producers suffered nearly $1 billion in damages through just those actions the Government did take. If the governmental agencies had not been questioned and held in check, their actions might have dealt a devastating blow to pork producers, one-fourth to one-third of whom are located in Iowa. We must remember that in 1978 it was not generally recognized that our food safety laws were outdated and in need of revisions—in particular that governmental agencies needed to reexamine how they determined regulatory decisions such as the one pertaining to nitrites.

Because of my concern, I asked Iowa State University to organize a study group to look over the primary data used by the governmental agencies in forming their policies vis-a-vis nitrites. This study group went to work immediately, and their conclusions indicated that the

evidence did not support the pending actions of the governmental agencies.

In addition, Congressman WAMPLER asked the Library of Congress to examine all the material, including internal memos, that related to this issue. Their findings pointed out such serious shortcomings as that there was essentially no peer review of the study used by the agencies—only the Commissioner of the Food and Drug Administration and selected individuals saw the study and contributed to the decision. If you have the interest and time to read this report, I urge you to do so in order to see just how governmental agencies should not go about making a decision. It surely does not do much toward instilling confidence in our agency decisionmakers.

I and several of my House colleagues at that time in 1978 asked the General Accounting Office to look into this matter. The GAO report agreed basically with those of the other groups I have mentioned, in finding that the decisionmaking process in the agencies was poorly executed and that the conclusions of the report did not warrant the actions contemplated by the agencies.

Now we have this report from the National Academy of Sciences. I hope that it will, once and for all, reassure American consumers that nitrites are not directly linked to cancer.

As we all know, legislation has been introduced in both Houses of Congress that addresses the issue of our food safety laws and the handling of the decisionmaking process on these issues. The "nitrite fiasco" certainly made all too clear the need for public debate and revision of these laws. Early this year I testified before the House Agriculture Committee on legislation dealing with the peer review process in this regard, and it is my understanding that there will be hearings in the Senate in late January or early February on amendments to the food safety laws.

I am pleased that we are moving forward with this public debate, but I can assure you it has been a long struggle—sometimes an unpopular one. For the benefit of my colleagues, I ask unanimous consent that the recommendations of the executive summary of the report of the National Academy of Sciences be included in the RECORD.

There being no objection, the recommendations were ordered to be printed in the RECORD, as follows:

RECOMMENDATIONS

1. Results of limited experiments suggest that nitrate is neither carcinogenic nor mutagenic. However, evidence from several epidemiological studies in human populations is consistent with the hypothesis that exposure to high levels of nitrate may be associated with an increased incidence of cancer of the stomach and the esophagus. Thus, the committee recommends that to confirm these preliminary findings, future epidemiological studies focus on correlating the incidence of cancer and established precursor lesions with actual exposure to nitrate, nitrite, N-nitroso compounds, nitrosatable substances, and inhibitors or enhancers of nitrosation. Where possible, exposure should also be correlated with levels of nitrate, nitrite, and N-nitroso compounds in biological fluids such as blood, saliva, or urine.

2. Evidence does not indicate that nitrite acts directly as a carcinogen in animals. However, because it is mutagenic in microbial systems and because of its implied role in the induction of esophageal and stomach cancer in humans, further testing in animals may be warranted. If such tests provide any indication of carcinogenicity, then the committee recommends that attempts be made to distinguish between the types of carcinogenic activity, i.e., activity as a complete carcinogen, cocarcinogen, or promoter.

3. Most N-nitroso compounds are carcinogenic in laboratory animals, mutagenic in microbial and mammalian test systems, and some are teratogenic in laboratory animals. Although these tests are indicative of potential carcinogenicity in humans, they are of limited value for predicting the quantitative risk to humans. The committee recommends that future carcinogenicity assays emphasize quantitative assessment of potency as well as the qualitative outcome. It also recognizes the need to characterize premalignant lesions induced by N-nitroso compounds and to develop short-term in vivo bioassays to determine their carcinogenicity.

4. Because nitrate and nitrite can exert acute toxic effects such as methemoglobinemia and probably contribute significantly to the total body burden of N-nitroso compounds, which are carcinogenic in laboratory animals and may be carcinogenic in humans, the committee recommends that exposure of humans to these agents be reduced. Exposure to nitrite should be reduced to the extent that protection against botulism is not compromised. Additionally, the committee recommends that, with the exception of dry-cured products and fermented sausage products in which the presence of nitrate may be necessary, the use of nitrate salts in the curing process be discontinued in all meat and poultry products. Furthermore, the committee suggests that attention should be given to the feasibility of reducing the nitrate content of vegetables and drinking water and that further studies should be conducted to develop methods to reduce nitrate in vegetables while maintaining the content of ascorbic acid and other inhibitors of nitrosation.

5. The committee suggests that the sources of exposure to N-nitroso compounds in various environmental media be determined so that methods to reduce the exposure to these contaminants can be developed. Standardized analytical methods are needed to assess the total body burden of nonvolatile N-nitroso compounds. In addition, it is necessary to obtain accurate estimates of exposure to nitrate and nitrite by improving the assay procedures, especially to distinguish between free and bound nitrate, and to determine whether the residual nitrite is a true measure of nitrosating capacity.

6 The exposure of humans to amines and nitrosamines can be reduced in certain circumstances by modifying manufacturing practices that result in high levels of exposure. For example, pesticides produced as secondary and tertiary amine salts could be replaced by other formulations and certain readily nitrosated drugs could be replaced by drugs that have the same therapeutic effect but are not nitrosated. Further research should be conducted to identify amino compounds that could be nitrosated in vivo, especially those that are readily nitrosated or to which humans are extensively exposed.

7. The committee believes that additional studies are needed to increase understanding of the metabolism and pharmacokinetics of nitrate in humans. Also requiring clarification is the role of bacteria in the reduction of nitrate to nitrite and the formation of N-nitroso compounds, especially in certain clinical conditions such as gastric achlorhydria and bladder infection.

8. The nitrosation-inhibiting effects of ascorbate and other substances have been established, and this knowledge has been put to use commercially to inhibit the formation of nitrosamines in bacon. Normal dietary constituents that enhance or inhibit nitrosation should be studied further to determine the extent of their effects in the diet and in vivo. Specifically, further research is needed to determine the amount of nitrite that is destroyed in the human stomach and the extent to which nitrosation reactions are modified by the various inhibitors. Attention should also be paid to interactions among inhibitors, catalysts, and other components of the diet (e.g., lipids). The nature and extent of in vivo nitrosation by nitrite, by nitrogen oxides, and by transnitrosation also require further evaluation.

9. Further studies are required to determine the mechanisms whereby nitrite controls the outgrowth of C. botulinum spores. Research is also needed to determine its mechanism of action in cured meats, especially its antioxidant activity and its effect against microorganisms that are responsible for spoilage and against pathogens other than C. botulinum. Since the effect of nitrite varies considerably among products, it should be examined on a product-by-product basis.

10. Although it is not possible to estimate the potential morbidity or mortality from C. botulinum in the absence of nitrite as a curing agent in certain products, the prudent approach to protecting public health requires consideration of the possibility that certain preserved food items may be contaminated and may be abused.

11. In view of the possible but unquantified risk resulting from the use of nitrite as a curing agent, the committee recommends that the search for alternatives and alternative approaches to the use of nitrite be continued. However, no new agent or combination of agents should be substituted for nitrite until adequate testing has ensured that it does not present a hazard to human health.

U.S.S. CORPUS CHRISTI

Mr. GRASSLEY. Mr. President, perhaps nothing better exemplifies the wrong-headedness of certain segments of the peace movement in the United States than the controversy over naming a U.S. submarine the "Corpus Christi." I read with interest an article by William F. Buckley, Jr., in last Friday's Washington Post, which is a lucid account of the controversy. Since I will request, at the appropriate time, that the article be made a part of today's RECORD, I will not bother to recount the details of the controversy. I would, however, like to highlight a portion of the article. At one po'nt, Mr. Buckley quotes from a letter written to Bishop Thomas J. Drury from the Secretary of the Navy, John Lehman.

My concern as a Catholic with the theme that seems to underlie this issue: that naval ships and even military service are somehow profane and less worthy of association with the Sacred Name than, for example, the city itself. I am sure that the real significance of the name of our submarine, suggestive of unity and peace among men, will be reflected in the profession of her commander and crew. They recognize that their essential mission is to keep the peace. A noble, ethical and virtuous mission . . . fully recognized in traditional church teaching.

Mr. President, I am strongly reminded of a story that is told about George Washington. At the Constitutional Convention a delegate rose to propose that the Constitution include a provision that the Army of the United States never be larger than 5,000 men. Now, Washington was presiding over the convention and,

therefore, could not himself make a motion, so he turned to another of the delegates and said "Amend that motion to say that no enemy will invade our shores with more than 3,000 men." Needless to say, Mr. President, the motion to limit the size of the Armed Forces was not adopted.

I do not think any one of us in this body would not rather live in a world where it would be unnecessary to spend 1 penny on defense. Perhaps, with God's grace, we will be able to build such a world. Unfortunately, we must live in the world as it is—a world in which armed conflict and aggression are common occurrences. In such a world, we must be able to defend ourselves if we are to remain free. We may inhabit a more complicated world than George Washington did, but that fact has not altered.

Mr. President, I ask unanimous consent that the article by William F. Buckley appear at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

USS CORPUS CHRISTI

(By William F. Buckley, Jr.)

The failure at the end to have remarked rapturously on the virtues of our secretary of the Navy is to be taken as evidence not of his shortcomings, but of mine. He has transferred much energy and intelligence in the enterprise of rebuilding our fleet, which suffered as much devastation at the hands of President Carter, whose name will live in infamy, as at Pearl Harbor. But his prodigies as a shipbuilder are not the subject of this column, which addresses his stirring exchange with Bishop Thomas J. Drury of Corpus Christi, Tex.

Here is what happened. The elders of Corpus Christi put pressure on the Navy Department to name a vessel after the city, an altogether conventional request, particularly coming from a city by the sea. The Navy acknowledged the request by naming a newly commissioned nuclear submarine the Corpus Christi. The city passed a formal resolution of gratitude and that would have been that—except that Bishop Thomas J. Drury wrote to Secretary John Lehman to protest, on the grounds that it was not fitting to name a warship "Corpus Christi."

One assumes that Bishop Drury is an elderly bishop, and therefore recalls, from the days when Latin was the universal liturgical instrument of the church, what exactly Corpus Christi means, which is "body of Christ." Twenty years after Hiroshima, a group of modernists within the Catholic Church ganged up against the use of Latin, so that the sons of Corpus Christi are probably unaware what it actually is that their city is named after. On the other hand, that knowledge is presumably not denied to the Russians, whose KGB can penetrate most secrets, regardless of how zealously the modernists in the Vatican protect them.

So Secretary Lehman answered the bishop, and began by reminding him that naming a naval vessel "Corpus Christi" was not a historical precedent, since we deployed vessels so named during World War II and Vietnam. The Brazilian navy has a vessel called Espiritu Santo—and so on.

Lehman then reflected on the positive effects that can come from recalling the historical background of American creations, which include not only submarines, but also cities. We cannot know whether the crime rate in Los Angeles would diminish if it were widely advertised that the city was named after Our Lady, Queen of Angels, but it could hardly hurt. The alternative, of course, is to take such names as "St. Paul, Minn.," and strip them of their Christian heritage; but that would be the opposite of exorcism, hardly commending itself to the bishop of Corpus Christi, who precisely wishes to remind us what the city's name is supposed to celebrate.

Then Lehman jollied the bishop along by reminding him that wholly secular uses of saintly references are simply a fact of life, and who can change it?—as when you run into such headlines in the sport pages as "B.C. Crushes Holy Cross," or, "St. Andrews Edges Holy Spirit." As a graduate of St. Joseph's College in Pennsylvania, the secretary is presumably familiar with the problem.

But then Lehman struck. He quoted from St. Augustine ("To maintain peace within the natural order of men, rulers require the power and decision to declare war") and St. Paul ("Not without cause does he carry a sword, for he is God's minister").

"My concern is as a Catholic with the theme that seems to underlie this issue: that naval ships and even military service are somehow profane and less worthy of association with the Sacred Name, than, for instance, the city itself. I am sure that the real significance of the name of our submarine, suggestive of unity and peace among men, will be reflected in the profession of her commander and crew. They recognize that their essential mission is to keep the peace. A noble, ethical and virtuous mission . . . fully recognized in traditional church teaching."

The bishop probably wishes he had been hit by the submarine, rather than its commander. Let us pray for him, as we do for peace.

Mr. GRASSLEY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SPECTER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONDEMNING THE POLISH CRACKDOWN

Mr. SPECTER. Mr. President, I wish today to comment about the serious and sad events in Poland over the weekend and Poland's declaration of martial law, which I believe to be an unconscionable assault on the forces of freedom in Poland.

During the past year, we have all watched the emergence of Solidarity with hope and admiration. Gradually, and without violence, the trade unionists began to lift the oppression of the Communist regime. Each concession offered by the Polish Government in my view, represented a victory for human rights and human dignity.

The decision to arrest Solidarity's leaders again bluntly reminds us of the intolerance and tyranny of Communist governments. It is a tragic irony that the regime felt compelled to silence the very workers whose welfare it is supposed to be concerned about.

It is my sincere hope that the situation will be resolved without bloodshed. The response of the U.S. Government has been very restrained in terms of simply noting our concern about the right of the Poles and our monitoring the situation with the hope and expectation that there will not be Soviet intervention.

Mr. President, I personally hope that there will be a lifting of martial law and a release of the some 1,000 of Solidarity's leaders and others who are alleged to be in custody to return Poland to the road toward democracy.

This is a time of special trial and tribulation of American citizens of Polish extraction, who are watching the events in Poland. I think it is an event which ought to be commented upon in terms of the oppressiveness and inappropriateness of the action of the Soviet Government in declaring martial law. I hope that that situation will soon be ended for the benefit of freedom and democracy in Poland.

I yield the floor, Mr. President. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DELIBERATE RECESSION: PULLING THE PLUG ON ECONOMIC RECOVERY

Mr. ROBERT C. BYRD. Mr. President, last July, as our economy sank into recession, after the shortest expansion period since 1919, Treasury Secretary Regan said:

All I know is that our economy is slowing down, and I think that's healthy.

Then in October, Commerce Secretary Baldrige said:

A slight recession, I think, is almost necessary right now.

Well, the administration's tight money policies have now produced a recession. Nine million people stand in unemployment lines, stripped of the basic dignity of a job, 15,892 businesses have padlocked their doors forever, and housing starts are at a 16-year low.

Economic retrenchment is an expensive, cynical, and painful policy. It is a policy without a heart.

The Republican Governor of Vermont, Richard Snelling, recently told the League of Cities Annual Convention in Detroit that:

Frankly, I think that what is happening is that we are having an economic Bay of Pigs.

Unfortunately, the frontline soldiers of the economic assault are unwilling conscripts who have lost their jobs or their businesses.

The only way we will bring our budget into balance, lower interest rates, and beat inflation is to put our people back to work. High unemployment means lower Government revenues and greater Government spending. It means more crime, lower productivity, and increased tension in our cities.

Instead of new growth, we have got no growth. Instead of new economic vistas, we have got a new economic waste-

land. Instead of Hoover's Dustbowl, we have got Reagan's Rustbowl as our industrial heartland stands idle.

This administration's policies could have led nowhere but here. As David Stockman's musings have revealed, the administration had no plans beyond its roller coaster rhetoric which hid a program of pain and suffering for the savers, investors, and workers of this country, and reward for the speculators and truly wealthy

The Democratic Policy Committee has assembled the facts about this administration's economic program in a document entitled the "Recession Review." This review shows clearly that its policies are not working.

This administration's so-called economic recovery plan has failed, and the patient's vital signs are weakening. I call on the administration to prescribe a course of treatment, instead of simply pulling the plug on our economy.

I ask unanimous consent that a copy of the "Recession Review" be included in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

RECESSION REVIEW

"We think you probably will see a turning of the (economic) tide, probably later this year; the early expectations being reflected in that"—Treasury Secretary Regan, February 19, 1981.

"Literally what no one knows at this point is just how deep a recession we are going to be in . . . the current quarter may be a real downer"—Treasury Secretary Regan, November 9, 1981.

WHERE WE ARE

"I think there's a slight recession, and I hope a short recession"—President Reagan, October 18, 1981.

Most economists agree that the United States has now slipped into its eighth postwar recession. After a strong first quarter rise of 8.6 percent, the nation's real GNP has flattened out dramatically, falling by 1.6 percent in the second quarter and rising a slight 0.6 percent in the third. Though the traditional definition of a recession requires two consecutive quarters of declining real GNP, nearly all economic indicators show that the economy is in a recessionary decline.

Official recessions are declared by the Business Cycle Dating Committee of the National Bureau of Economic Research, a private, non-profit research organization in Cambridge, Massachusetts. When declaring a recession, the Committee looks not only at the two-consecutive-quarters benchmark (the duration), but also at how many industries, businesses and services are affected by the downturn in the economy (the breadth), and at how far real GNP falls (the depth). The next meeting of the Dating Committee will most likely be in January, at which time it is expected to officially announce that the economy sunk into a recession last July.

While the recession is currently unofficial, the effects are all too real for our nation's 8.5 million unemployed workers and the 15,243 businesses which have been forced into bankruptcy this year. Many economists believe that the worst news is not yet upon us. Howard Samuels told a recent Democratic Thursday Afternoon Issues meeting that October was "like hitting a brick wall" for the business community. There is a growing concern that this recession could be our nation's worst since World War II, surpassing the prolonged 1973–75 downturn.

This concern is increased by looking at the standard economic indicators. In September, the Commerce Department's Composite Index of Leading Indicators fell 2.7 percent, its sharpest decline since a 4 percent drop in April of 1980. This September decline followed a 0.5 percent drop in August, and was the fourth downturn in the last five months. In addition, the Composite Index of Roughly Coincident Indicators declined for the second consecutive month, falling almost 1 percent below its cyclical peak in July.

These composite economic indicators are not alone in pointing to a more severe recession. Among other warning signs are:

HOUSING

The housing industry traditionally has been an accurate barometer of the nation's economy. Housing starts are a particularly reliable leading indicator of the economy's direction. That is, housing starts decline before the rest of the economy weakens, and they begin to rise before the rest of the economy climbs out of recession. On average, housing starts lead general economic recovery by slightly more than six months. Over the course of 1981, there has been a consistent decline in housing starts, and there are no signs of a near-term recovery.

Another leading indicator is the number of building permits issued. Like housing starts, the number of building permits issued begins to rise ahead of the general economy. Again, there has been a significant drop during 1981, with no indications of improvement in the immediate future.

According to the National Association of Home Builders, the housing slump is expected to continue well into 1982. The Home Builders' current forecast is for a recovery to begin during the third quarter of next year. Most housing analysts agree that the problems facing the housing industry stem from the depressing effect that high mortgage rates, currently at 17.7 percent, have on home sales. As the number of home sales drops, new construction slows, and the consensus is that mortgage rates must fall to 12 percent or 13 percent before there will be a recovery.

Housing starts plunged 6.8 percent in October to an annual rate of only 857,000, the lowest level in 16 years. The October decline was a continuation of a year-long downward spiral which has caused housing starts to decline by 42 percent since January.

Building permits for new residential structures fell 14.2 percent in October to a level lower than the levels reached during the depths of the 1973–75 recession. The October annual rate of 729,000 was 40 percent below the annual rate of building permits issued in January.

New single-family home sales dropped 12.6 percent in September to the lowest one month level on record.

Sales of existing homes fell sharply in October to an annual rate of only 1.92 million units, the first time in ten years that the number of units sold has dropped below two million.

THE "FLIGHT TO QUALITY" IN INVESTMENT

One sign of a recession is a "flight to quality" in financial investments. In an effort to protect their holdings, investors move out of riskier money funds and stocks and into the most secure investments possible. As this occurs, the increased demand for safe investments lowers the interest rates paid by secure instruments. A good indication of this "flight to quality" is the 91-day Treasury bill interest rate, since it is one of the safest investments available. Over the last two months, the rates on these bills have decline steadily, and dramatically.

As of November 23rd, the yield of 91-day Treasury bills was more than six percentage points below the peak yields paid in May of this year. Since the beginning of October, the rates on these bills have fallen rapidly:

91-Day T-Bills, new issues

October 5th, 14.2 percent; October 26th, 13.4 percent; November 2nd, 12.7 percent; November 9th, 11.1 percent; November 16th 10.7 percent; and November 23rd, 10.6 percent.

BUSINESS STRENGTH

Inventory accumulation is an important measure of business strength, and is a leading indicator of the general economy. It is not only a sign of current sales weakness, but also an indication of future economic weakness. As larger inventories pile up, businesses have to run down their current stock before placing new orders. This leads to a slowdown in manufacturing, which can spread even further as the manufacturers slow their orders for new goods. This chain reaction causes a widespread economic decline, with lower productive output, idle plants and equipment, and decreasing productivity.

As a leading economic indicator, inventory accumulation reaches a low point, and begins climbing, before other areas of the economy. Productive output, capacity utilization, and productivity, on the other hand, generally move in tandem with the whole economy, and are therefore classified as coincident indicators.

Another indicator of business strength is the number of business failures. Traditionally, the bankruptcy rate rises during a recessionary period in the economy. Over the course of 1981, the business failure rate has been well above the pace of previous years, and has been increasing through the year.

After rising a relatively small $4.5 billion in the first quarter of 1981, inventory accumulation peaked in the second quarter, increasing by $23.3 billion. Most analysts foresaw a dramatic slowdown in accumulation during the third quarter, as businesses began to rundown their stocks. Surprisingly, inventory accumulation continued at a strong pace of $17.6 billion in this period.

The index of Industrial Production, which accounts for one-third of the total GNP, and measures the total output of all stages in manufacturing, mining, and utilities, dropped 1.5 percent in October, following a revised 1.2 percent decline in August.

The Rate of Capacity Utilization, which measures the amount of idle equipment in our nation's factories, continued to decline in October. Factories operated at 76.9 percent of capacity in October, down considerably from September's 78.4 percent rate and August's 79.6 percent pace. The drop in October was the fourth downward movement in capacity utilization in the last five months.

Productivity in the non-farm sector fell at a 2.2 percent annual rate during the third quarter, after rising 4.3 percent in the first quarter and 1.4 percent in the second.

As of November 19th, the total number of business failures in 1981 climbed to 15,243, setting the average weekly number of failures to 331, a pace 43 percent above last year's weekly rate. If the current weekly rate is maintained through the end of the year, the number of bankruptcies for all of 1981 will exceed 17,200, the highest level since 1933.

BUSINESS CONFIDENCE

Business confidence in future economic growth can be measured by current and planned spending for basic production materials. If business expects economic growth and prosperity, demand for capital goods should be rising. However, economic indicators suggest that business has little confidence in the short-term future. This is particularly important since the Reagan economic program leans heavily on an expected surge in capital spending by the private sector.

New orders of non-defense capital goods declined, in real terms, by 10.0 percent in September to $11.3 billion.

In October, new orders for manufacturer's durables (equipment with a life of three or more years, measured in constant (1972) dollars), fell to $34.99 billion, a staggering drop of 8.6 percent. The October decline was the third straight monthly decrease, following a 2.9 percent fall in August and a 1.6 percent decrease in September.

In September, machine tool orders dropped to a level 50 percent below their 1980 level.

Contracts and orders for plant and equipment have fallen substantially over the course of 1981. In real terms, they declined 7.2 percent to a level of $12.85 billion during September. With respect to their peak level of $15.4 billion in December, 1980, contracts and orders have declined by 16.6 percent.

Capital spending plans for 1982 appear to be weak. According to the McGraw-Hill autumn survey of plant and equipment spending plans, business plans to expand its spending for capital goods by 9.6 percent. However, since inflation expectations by business are equal to that figure, real spending plans are completely flat.

CONSUMER PLANS

Retail sales reflect the strength of our economy's consumer sector. On average, retail sales move downward in tandem with the economy, but begin to climb 1½ months before the rest of the economy.

For the last two years, as our economy struggled to avoid a serious downturn, retail sales were the most important component of demand stimulus which allowed the economy to avoid a recession. Now it appears that retail sales are weakening dramatically and without a countervailing surge in business investment, the current recession could be deeper and longer than now expected.

According to a Washintgon Post-ABC News survey conducted November 17–22, three out of five Americans plan to cut back their spending during the Christmas season this year. Forty percent of those surveyed said they have had to forego purchases this year because of high interest rates.

Retail sales measured in current dollars plunged 1.5 percent in October for the fifth monthly sales drop this year.

In October, domestic auto sales plummeted 24.6 percent below the seasonally adjusted annual sales rate in September. The unadjusted number of cars sold during the month dropped 26 percent from last October and was the lowest selling rate for that month in 23 years.

In the same Washington Post-ABC News poll, 55 percent of those surveyed said the nation's economy is getting worse, 11 percent said it was getting better, and 33 percent said it was staying the same.

THE ROAD TO OUR CURRENT RECESSION

"All I know is that our economy is slowing down, and I think that's healthy." Treasury Secretary Donald Regan, July 12, 1981.

If the Dating Committee of the National Bureau acts as it is expected to, and declares July the month our current recession began it would mean that, one year after having emerged from the 1980 recession, our 1981 recession began. This would be the shortest expansion period since 1919. By comparison, the average recovery period since 1853 has been 31 months.

We may now be experiencing a real recession after two years of fitful economic performance. Chart I and Table I, in the Appendix, illustrate real GNP performance since the beginning of 1979. The chart shows the overall economic flatness which left us moving into the final quarter of 1981 only $32.9 billion above the first quarter, 1979, real GNP figure of $1.479 trillion.

This flatness disguised a two-tiered economy, with housing and autos leading credit-sensitive sectors to near depression levels, while oil, defense, and non-food retail operations chugged along at healthy levels. Looking at the percent change in profits, as reported in Business Week, since the third quarter, 1979, the two-tiered economy becomes obvious:

CORPORATE PROFITS

Percent change, 3d quarter 1979 versus 3d quarter 1978

Industry Average, plus 22 percent.

The Best

Conglomerates, plus 100 percent.
Fuel, plus 97 percent.
Metals and Mining, plus 89 percent.
Paper and Forest Products, plus 60 percent.
Tobacco, plus 48 percent.
Chemicals, plus 34 percent.

The Worst

Real Estate and Housing, minus 6 percent.
Trucking, minus 6 percent.
Tire and Rubber, minus 67 percent.
Airlines, minus 74 percent.
Appliances, net loss.
Automotive, net loss.

Percent change, full year 1980 vs. full year 1979

Industry Average, plus 3 percent.

The Best

Steel, plus 55 percent.
Oil Svc. & Supply, plus 46 percent.
Appliances, plus 44 percent.
Beverages, plus 27 percent.

The Worst

Building Materials, minus 23 percent.
Tire & Rubber, minus 28 percent.
Savings & Loan, minus 55 percent.
Airlines, minus 89 percent.
Automotive, net loss.

Percent change, 3rd quarter 1981 vs. 3rd 1980

Industry Average, plus 11 percent.

The Best

Steel, plus 1,609 percent.
Tire and Rubber, plus 114 percent.
Oil Svc. & Supply, plus 48 percent.
Chemicals, plus 36 percent.
Retail (Nonfood), plus 22 percent.
Beverages, plus 19 percent.

The Worst

Food & Lodging, minus 11 percent.
Paper, minus 21 percent.
Metals & Mining, minus 25 percent.
Airlines, minus 30 percent.
Building Materials, minus 35 percent.
Real Estate and Housing, minus 76 percent
Savings & Loan, net loss.
Automotive, net loss.

Looking at the industrial production indices, which measure current production as a percentage of production in 1967, the inter-industry differences are just as clear. Charts 11–14, which graph various production indices, show that the production of industrial equipment, commercial, transit, and farm equipment, as well as defense and space equipment were all up. On the other hand, the production of automobiles and construction supplies fell steadily, while consumer durables, represented by appliances, air conditioners and televisions, ended near their first 1979 level.

Naturally, this two-tiered economy was represented in unemployment. The industrial heartland, including Michigan, Ohio, and Pennsylvania, plus the lumber industry in the Pacific Northwest, were hit the hardest, while States like Nebraska and Oklahoma were at near full employment levels. In October 1981, although only the 10 largest States have reported, we see that the range runs from 12.7 percent unemployment in Michigan, and 10.4 percent in Ohio to 5.1 percent in Texas. State-by-State analyses of September unemployment levels appear in Table 4, in the Appendix.

Unemployment differentials among the races is also apparent, even in official unemployment indicators, which have historically understated the rate of minority unemployment. As of October 1981, the rate of unemployment for all workers was 8.0 percent, but it was 6.9 percent for whites, 10.9 percent for Hispanics, and 16.7 percent for blacks. The most egregious case of unemployment's sectoral nature, however, is the case of black teenagers, where unemployment levels rose from a shocking 40.6 percent in October 1980 to 46.3 percent in October 1981. Interestingly, comparing all adult men with all adult women, there was no great difference. It was 6.7 percent for men and 7.0 percent for women.

All indications are, however, that this recession is beginning to move beyond the blue-collar and basic industry sectors to affect a broader range of workers. The movement is beginning in the wholesale and retail trades, agriculture and the finance industries. This is not to say that things are improving in the automotive and construction industries, as the table below makes clear.

Percent unemployed by industry

[In percent]

	October, 1981	October, 1980
Construction	18.0	14.6
Manufacturing	8.6	9.2
Transportation	4.6	5.3
Wholesale and retail trade	8.3	7.8
Finance	6.3	5.6
Government	4.6	4.4
Agricultural	13.3	11.1

THE ROAD OUT OF THE CURRENT RECESSION

"We may be headed for something like the depression . . . I wish we had better economic advice."—An unidentified Senate Republican, Washington Post, November 3, 1981.

"The second half of 1982 will be one of the most vigorous periods of economic growth in recent years."—Murray Weidenbaum, Face the Nation, November 15, 1981.

There is a general belief, or perhaps a general hope, that the scheduled 1982 tax cuts will bring the country out of the recession in the second half of the year. Traditionally, a tax cut is stimulative, and it has been one of the major Keynesian countercyclical weapons during recessions. That is one argument against delaying or reducing the personal tax cut due in July 1982.

Sooner or later, when discussing the path out of this recession, we must come back to interest rates. If interest rates, particularly the long-term rates, remain at, or near, their current levels, in the 1982 tax cuts may not be enough to substantially shorten the recession. There is convincing evidence that the 1981 tax cut has failed to make any headway against this current recession for just this reason.

Speaking to the Economic Club of Indianapolis on September 14, 1981, Secretary of the Treasury Regan said:

"We have carried through on our commitments . . . but where is the business response? Where are the new research and development initiatives? Where are the new plants? Where are the expansion plans? It's like dropping a coin down a well—all I'm hearing is a hollow clink."

The Secretary is correct that the effect of the Reagan program to date has been unimpressive, and one clue to this may lie with the interest rate levels. According to a recently completed Chemical Bank report: ". . . high interest rates this year have cost corporations more than they gained from the tax cuts, and they will continue to provide a

considerable offset to the corporate tax cut of next year."

Interest rates, in particular the long-term rates that corporate borrowers use for capital investment, must begin to come down if new investment is to become profitable.

Traditionally, interest rates decline during recessions, and the current recession seems to be no exception at this point, with the prime rate dropping from 20.5 percent to 16.0 percent, and 91-Day Treasury Bill rates dropping from 14.2 percent on October 5 to 10.6 percent on November 23. However, the key rates to recovery are those for long-term loans that corporations need to finance capital investments that will not pay for themselves in a few years.

Here, there may be substantial problems in bringing rates down enough to support a strong recovery. A few of the more prominent difficulties are:

Competition for borrowing among private businesses, and between businesses and Government, may continue to hold long-term interest rates above acceptable levels. It is widely believed that pent-up business demand for credit runs into the hundreds of billions of dollars. This demand will run head on to ballooning Federal deficits, combined with ballooning State and local borrowing, which will soak up an increasing share of available credit as deficits approach, and pass the $100-billion-a-year mark through 1984. This will, naturally, keep interest rates high.

The Federal Reserve Board may not loosen its tight money policy sufficiently, as it has traditionally done during a recession. Chairman Volcker is convinced that little progress has been made against inflation. Continued tight money policy will mean a continued shortage of credit, and high interest rates.

The money markets are primed to react perversely to an easing of money targets. The Wall Street Journal quotes an official of Weyerhaeuser who expresses the business/financial consensus on high money growth: ". . . it would increase economic activity all right, but at the expense of further inflation." The Administration, and the Federal Reserve Board have made the large business and financial community into monetarists, so the reaction to eased money availability is likely to include expectations of higher future inflation, which means higher interest rates.

Many banks and other lenders were caught by surprise in the 1979–81 inflation bout, and lost money on long-term, low interest loans. These banks are wary of renewed inflation, and will be cautious about long-term loans, demanding a healthy inflation premium. Further, because of their recent losses, many institutions are using the current level of interest rates to make up for lost profits.

In the end, if we are to climb out of recession and escape the sluggish economy of our last few years, interest rates will have to remain well below current levels.

LENGTH OF RECESSIONS IN THE POST-WORLD WAR II ERA

If the recession were to end next July, as Murray Weidenbaum recently predicted on "Face the Nation", it would be a twelve month recession, compared to a post-war recession average of 11.3 months. The seven previous recessions have been:

November 1948–October 1949 (12 months).

July 1953–May 1954 (11 months).

August 1957–April 1958 (9 months).

April 1960–February 1961 (11 months).

December 1969–November 1970 (12 months).

November 1973–March 1975 (17 months).

January 1980–July 1980 (7 months).

It should be noted that five of the seven post-World War II recessions occurred during Republican administrations. The exact duration of each recession is not a matter on which all economists agree, but the National Bureau of Economic Research does set the official standards, which are reflected above.

LABOR AND RECESSION

This recession could hardly be more ill-timed for labor. As the corporate profits table above makes clear, the automative industry is ending its third straight year of net loss, and the food industry's profits are down, as are the earnings positions of many other companies. No one expects 1982 to be a particularly bright year for industry, yet it is the year of pattern-setting bargaining for the next three years' wage cycle, and labor is in its weakest position in years.

Labor represents a smaller percentage of the total workforce than it has since the late 1930's, and its stronghold industries are the ones primarily crippled by high interest rates and the current recession.

This scenario will receive more in depth treatment as the negotiations approach, but the major negotiations are listed below:

Unions and Contract Expiration:

Oil Chemical and Atomic Workers, January 7.

Teamsters, March 31.

Rubber Workers, April 19.

Garment Workers, May 30.

Electrical Workers, June 30/July 15.

United Food and Chemical Workers, August 31.

United Auto Workers, September 14/September 30.

Recent negotiations in the automobile and steel industries have not gone well for labor. The Chrysler wage concessions, followed by hard pre-bargaining talk by General Motors' management, and an ultimatum by Ford in Alabama have marked a sour year for the United Auto Workers. Likewise, the Steel Workers were recently forced to accept a contract with Timken Company of Canton, Ohio, which included an 11-year no-strike clause. This clause was a firm condition of Timken's proposed $500 million investment in new plant and equipment for Canton.

The bargaining position that large unions appear to be adopting is that any wage concessions, including cost-of-living allowance (COLA) eliminations, must be coupled with increased job security and worker participation in shopfloor level decision-making.

APPENDIX

This appendix includes tables and charts which will be updated monthly or quarterly, as appropriate, during the course of the recession, as well as brief explanations of the most reliable cyclical indicators included.

BRIEF EXPLANATION OF INDICES

Economic time series are useful tools for analyzing and forecasting business cycles. Composite indices are summary measures designed to indicate changes in the direction of aggregate economic activity. Each composite index measures the average behavior of a group of economic time series that represents different activities and sectors within the economy, but which show similar timing at business cycle turns. In contrast to composite indices individual time series are more narrowly focused on single types of economic activity. Though their measurement of economic activity is not as broad, individual time series are equally useful cyclical indicators.

The Number of Persons Unemployed and the Unemployment Rate are measures of unemployment within the civilian labor force. Both are lagging indicators during movements from recession to recovery which trail the economy by an average of 3.8 months.

The Composite Index of Leading Indicators is a group of 12 time series which forecast changes in the business cycle. On average, during periods of declining economic performance, the Index of Leading Indicators reaches a low approximately four and one-half months before the economy.

The Composite Index of Roughly Coincident Indicators is composed of four time series which, as its name implies, generally moves in tandem with the economy. On average, the Index of Roughly Coincident Indicators and the economy both reach lows within one month of each other during periods of economic recession.

The Rate of Capacity Utilization, Manufacturing is the ratio of manufacturing production to manufacturing capacity. It coincides with the economy during changes in the business cycle from periods of economic decline to recovery.

The Composite Index of Capital Investment Commitments is a subgroup of the Index of Leading Indicators and is composed of three times series more specifically related to business investment. The Index of Capital Investment Commitments has a lead time of about two months in advance of the economy during shifts from economic decline to recovery.

New Private Housing Units Started, Total measures the number of private housing units on which construction is started each month in the United States. It is classified by cyclical timing as a leader at turning points in the business cycle and, on average, leads the economy by approximately six months during changes from declining to expanding economic activity.

The Index of Industrial Production, Total measures the monthly changes in industrial production in all stages of the manufacturing, mining, and gas and electric utility industries. It is classified by cyclical timing as a coincider during shifts from recession to recovery.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

The majority leader is recognized.

TREASURY, POSTAL SERVICE, AND GENERAL GOVERNMENT APPROPRIATIONS, 1982

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 4121, the Treasury-Postal Service appropriations bill.

The PRESIDING OFFICER. The bill will be stated by title.

The bill clerk read as follows:

A bill (H.R. 4121) making appropriations for the Treasury Department, the United States Postal Service, the Executive Office of the President, and certain independent agencies, for the fiscal year ending September 30, 1982, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Appropriations with amendments.

Mr. ABDNOR. Mr. President, the Treasury, Postal Service, general government appropriations bill now before the Senate provides funding for 62 Federal agencies and functions and it carries a total cost of $9,397,072,000. That is almost a billion dollars below last year's appropriation.

I might say that the legislative notice which is on the desk of each Senator is not an accurate accounting of this bill. Other actions on the appropriations bill have been taken since its publication.

Funding in this bill provides for four of the most important functions of the Federal Government. These functions are law enforcement, collection of revenues, the world's largest postal service, and policymaking for the most powerful Nation in the free world.

The U.S. Treasury Department is the world's largest law enforcement organization. Upon its bureaus falls the task of policing counterfeiting and forgery and protecting people and places by the Secret Service; the smuggling of contraband is covered by the U.S. Customs Services; tax evasion is policed by the Internal Revenue Service and arsonists, rum runners and terrorist bombers are watched by the Bureau of Alcohol, Tobacco and Firearms. It could truly be said that Treasury collects more money, processes more tax returns, issues more checks to pay Federal bills, arrests more people for violations of law, and keeps the largest set of financial books in the world.

The U.S. Postal Service handles more pieces of mail, delivers it to more places and processes it in more stations than any other nation on Earth. For instance, the mail load of New York City is larger than the total handled by any other nation on Earth.

The General Services Administration is our Nation's housekeeper. It has charge of more than 10,000 buildings, operates the largest supply business in the world and is the largest construction force in existence.

Our committee bill funds the White House and executive offices, and provides the funds for decisionmaking which affects the lives of every human being on Earth.

More than 560,000 employees are provided for in this bill and this constitutes more than one-fourth of the entire Federal work force. It follows, therefore, that the largest single cost factor in the bill is wages.

It has been my honor to chair the subcommittee's efforts toward developing this legislation, however, I must give full credit to my colleagues on the subcommittee, and in particular pay special tribute to our ranking minority member, the Senator from Arizona (Mr. DECONCINI). He has been a faithful and cooperative colleague throughout many long and tedious hours of hearings, meetings, and markup.

I should also note that as the first-year chairman of the subcommittee, I owe a special thank you to the chief clerk Burkett Van Kirk. His knowledge and experience was invaluable to me and other members of the subcommittee during our deliberations on this bill.

Mr. President, at a later time I will submit an amendment giving 5-percent transfer authority to the Department of the Treasury. This amendment will vitiate the language on page 3 of our report which was issued prior to the President's most recent budget submission. The committee now feels that the Department of the Treasury needs the 5-percent transfer authority in view of their severely reduced budget.

Mr. President, I will also submit another amendment increasing the trans-

fer authority between accounts for the General Services Administration to 5 percent. Once again it is our feeling that the General Services Administration, like the Department of the Treasury, has been so severely reduced that satisfactory and adequate operations may become impossible.

Mr. President, the committee report contains guidelines and instructions to the agencies that are just as valid today as when the committee wrote the report. We expect that where applicable and proper, each agency must in good faith carry out the intent and earmarkings contained in our report. For instance, under IRS the committee expects that the $1 million earmarked to provide tax counseling for the elderly will be carried out in toto. Additionally, the committee's instructions regarding the Postal Service revolving fund are to be explicitly carried out as are prohibitions against closing small post offices, instituting less than 6-day mail delivery or mandatory implementation of a 9-digit ZIP code.

Pertaining to the GSA, the committee expects the GSA Administrator to follow to the letter insofar as possible the directives of our report irrespective of the recent September budget reductions. For example, we expect that the earmarking for the national historical records program will be faithfully implemented, and that certain construction projects will be pursued forthwith.

Mr. President, due to printing errors, I ask unanimous consent to make the following technical amendments:

On page 12, line 19, insert a stricken "$13,200,000" before the figure "$12,210,000."

On page 28, line 5, "$20,131,000" instead of "$17,715,000." I send the amendment to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ABDNOR. Mr. President, I ask unanimous consent that the committee amendments be agreed to en bloc and the bill as thus amended be regarded for the purpose of amendment as original text provided that no point of order shall be considered to have been waived by agreeing to this request.

Mr. DENTON. Mr. President, reserving the right to object, if the Senator from South Dakota would kindly modify his request to exempt from his request the committee amendment striking from the bill section 619, the so-called Ashbrook amendment, I would have no objection. If the Senator could not see his way clear to agree with this, I have to object at this time.

Mr. ABDNOR. Mr. President, I so modify my request.

Mr. DENTON. Mr. President, I thank the Senator. I have no objection.

The PRESIDING OFFICER (Mr. MURKOWSKI). Without objection, it is so ordered.

Mr. DENTON. Thank you, Mr. President.

On page 2, line 16, strike "$36,007,000" and insert "$35,029,000";

On page 2, line 23, strike "not to exceed $2,000,000", and insert "$1,075,000";

On page 3, line 1, strike "$22,300,000" and insert in lieu thereof "$20,149,000";

On page 3, line 11, strike "$14,279,000" and insert in lieu thereof "$12,566,000";

On page 3, line 15, strike "$209,304,000" and insert in lieu thereof "$153,826,000";

On page 3, line 23, strike "$150,591,000", and insert "$120,473,000";

On page 4, line 10, beginning with the colon, strike through and including line 12;

On page 4, line 21, strike "$499,743,000", and insert "$503,468,000";

On page 4, line 22, beginning with "of", strike through and including "and" on line 23;

On page 5, line 5, strike "$25,000", and insert "$20,000";

On page 5, line 9, after the colon, insert the following:

Provided further, That none of the funds provided in this Act shall be used to close the Phoenix, Arizona Air Radar Support and Air Intelligence facility; the Albuquerque, New Mexico Air Interdiction facility; the El Paso, Texas Air Interdiction facility, or any other Air Interdiction base or support facility in Arizona, New Mexico, or Texas.

On page 5, line 19, strike "$52,206,000", and insert "$45,941,000";

On page 6, line 4, strike "$206,625,000" and insert in lieu thereof "$184,000,000";

On page 6, line 14, strike "$168,436,000" and insert in lieu thereof "$148,224,000";

On page 6, line 20, strike "$867,572,000", and insert "$812,886,000";

On page 6, line 21, strike "$660,000", and insert "$1,000,000";

On page 7, line 6, strike "$933,513,000" and insert in lieu thereof "$901,813,000";

On page 7, line 15, strike "$617,428,000" and insert in lieu thereof "$602,628,000";

On page 7, line 21, strike "$500,000" and insert in lieu thereof "$440,000";

On page 8, line 9, strike "$179,224,000", and insert "$180,324,000";

On page 8, line 23, after the colon, insert the following:

Provided further, That the $1,600,000 appropriated in Public Law 97–12, approved June 5, 1981, for the costs of construction and installation of a White House complex security system shall remain available until expended.

On page 10, strike line 14, through and including line 19;

On page 11, line 6, beginning with "and for", strike through and including page 11, line 17, and insert the following: $869,240,000. *Provided*, That none of the funds provided in this Act shall be used to consolidate or close small rural and other small post offices in the fiscal year ending on September 30, 1982: *Provided further*, That none of the funds provided in this Act shall be used to curtail six-day mail delivery or any other existing postal service in the fiscal year ending on September 30, 1982: *Provided further*, That none of the funds provided in this Act shall be used to mandate the implementation of nine-digit ZIP code in the fiscal year ending on September 30, 1982.

On page 12, line 5, after "$250,000", insert the following:

: *Provided*, That none of the funds made available for official expenses shall be expended for any other purpose and any unused amount shall revert to the Treasury pursuant to section 701 of title 31 of the United States Code: *Provided further*, That none of the funds made available for official expenses shall be considered as taxable to the President.

OFFICE OF ADMINISTRATION

SALARIES AND EXPENSES

For expenses necessary for the Office of Administration, $12,210,000, including services authorized by 5 U.S.C. 3109 and 3 U.S.C. 107, and hire of passenger motor vehicles.

THE WHITE HOUSE OFFICE

SALARIES AND EXPENSES

On page 13, line 10, strike "$22,278,000" and insert in lieu thereof "$19,664,000";

On page 14, line 11, strike "$1,640,000" and insert in lieu thereof "$1,443,000";

On page 14, line 16, strike "$2,263,000" and insert in lieu thereof "$2,035,000";

On page 14, after line 16, insert the following:

OFFICE OF POLICY DEVELOPMENT

SALARIES AND EXPENSES

For necessary expenses of the Office of Policy Development including services as authorized by 5 U.S.C. 3109, and personal services as authorized by 3 U.S.C. 107, $2,604,000.

On page 15, line 5, strike "$3,939,000" and insert in lieu thereof "$3,496,000";

On page 15, line 11, strike "$33,416,000", and insert "$33,416,000";

On page 15, line 17, strike "$2,628,000" and insert in lieu thereof "$2,453,000";

"including payments for the fiscal year ending September 30, 1981";

On page 33, line 11, strike "$15,037,000" and insert in lieu thereof "$13,233,000";

On page 34, line 2, strike "$4,373,000" and insert in lieu thereof "$3,848,000";

On page 34, line 12, strike "$16,812,000", and insert "$14,795,000";

On page 34, line 22, strike "$12,404,000" and insert in lieu thereof "$11,000,000";

On page 36, line 1, strike "Civil Service Commission", and insert the following:

"Office of Personnel Management";

On page 37, after line 3, insert the following:

SEC. 506. No part of any appropriation contained in this Act shall be available for the procurement of, or for the payment of, the salary of any person engaged in the procurement of stainless steel flatware not produced in the United States or its possessions, except to the extent that the Administrator of General Services or his designee shall determine that a satisfactory quality and sufficient quantity of stainless steel flatware produced in the United States or its possessions, cannot be procured as and when needed from sources in the United States or its possessions, or except in accordance with procedures provided by section 6-104.4(b) of Armed Services Procurement Regulation, dated January 1, 1969. This section shall be applicable to all solicitations for bids issued after its enactment.

On page 37, line 18, strike "506", and insert "507";

On page 37, line 24, strike "507", and insert "508";

On page 38, line 4, strike "508", and insert "509";

On page 44, line 13, after "318),", insert the following: "but shall not be restricted to certain Federal property as otherwise required by the proviso contained in said section,";

On page 46, strike line 16, through and including line 6 on page 47, and on page 47, strike line 16, through and including line 20.

Mr. ABDNOR. Mr. President, I further ask unanimous consent that the majority and the minority managers of the bill have the authority upon their joint agreement to lay aside temporarily this committee amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ABDNOR. I shall be happy to notify the Senator from Alabama when we consider the amendment.

At this time I yield to the ranking minority member of the committee who has been so helpful, Senator DECONCINI.

Mr. DECONCINI. Mr. President, I thank the chairman for his kind remarks.

This is one of the leanest, toughest appropriations bills that I have seen come to the Chamber since I entered the Senate 5 years ago. The distinguished chairman of the subcommittee, Senator ABDNOR, has already outlined the aggregate total for the bill, but I believe that they bear some repeating.

On September 22, the Appropriations Committee reported a bill that totaled $9,827,130,000 or $38 million below President Reagan's March 1981 budget estimate of $9,864,638,000. Then on September 30, the President submitted additional budget revisions and reduced the aggregate budget estimates for activities and programs within the Treasury bill by $722.3 million to a new level of $9,142,274,000. Finally, on October 22, the full committee met to consider a package of budget modifications to the committee-reported bill that were crafted by the chairman of the Treasury Subcommittee, Senator ABDNOR, and myself, in response to the President's call for more cuts in discretionary programs. These modifications were approved by the committee and incorporated into H.R. 4121 on November 17.

The bill, as modified on November 17, totals $9,397,072,000 which is $254,798,000 over the new Reagan budget estimates, but is $467,566,000 below the President's March 1981 budget estimates; $430,058,000 below the committee bill as reported on September 22; $348,220,000 below the House-passed bill; and $919,852,000 below fiscal year 1981 for the Treasury bill. By any measure, this bill is an exceptional example of fiscal restraint.

Frankly, Mr. President, there are a number of items in this bill that I was extremely reluctant to reduce at all below the levels approved by the full committee in September. In fact, there are two major law enforcement agencies within the Treasury Department where no reductions were proposed below the amounts contained in the committee-reported bill. They were the U.S. Customs Service and the U.S. Secret Service. Both of these agencies play a major role in our Federal law enforcement effort and should be funded at the committee-passed levels.

It was with great reluctance and with serious reservations that I agreed to modify the committee-passed levels for the Internal Revenue Service, particularly in the areas of examinations and appeals, investigations and collections, and taxpayer service and returns processing. The committee-passed bill had contained funding levels for these activities that I felt were appropriate in light of the important taxpayer service and law enforcement activities involved under these accounts. Under normal economic conditions, I would not have agreed to any modification to these important IRS activities. However, in the spirit of cooperation with the President in his effort to further reduce discretionary spending next year, the chairman and I agreed to the modifications that are incorporated in this bill.

Mr. President, I will highlight the various provisions of the bill.

Mr. President, in view of the rather unorthodox procedure that has been followed this year in handling modifications to the bill that was reported by the full Senate Appropriations Committee on September 22, I believe that it is critical to spell out in some detail the various provisions of the Treasury bill and also address the status of the committee report (Senate Report 97-192) as it is affected by the modifications approved on October 22 by the committee. As you know most of the numbers outlined in the committee report have changed significantly.

However, there are important directives earmarkings, and recommendations contained in the report that are still applicable and should be considered binding by the agencies, commissions, boards, and departments affected. Let me proceed title by title through the bill and make reference to those key provisions in the committee report that should be brought to the attention of the Senate and the agencies funded in this bill.

TITLE I: DEPARTMENT OF THE TREASURY

Appropriations in the bill, as modified, for the Department of the Treasury total $3,725,901,000 which is $50,685,000 over the President's revised budget estimates, $202,985,000 below his March estimates, and $235,961,000 below the House-passed bill.

Within the Office of the Secretary, international affairs activity, the committee has not changed its recommendation that a limitation of $1,075,000 be provided for travel, and has proposed that a full 12-percent cut below the President's March estimates be approved.

The committee has recommended that the funding level reported out of committee on September 22, 1981 for the U.S. Customs Service remain at $503,468,000, which is an increase of $52,267,000 over the revised budget estimates, $23,457,000 over the March budget estimates, and $3,725,000 more than the House bill. The committee bill proposes a floor on Customs employment at the April 30, 1981 level, and has recommended in its report (S. Rept. 97-192) that the 625 positions proposed for reduction by the administration be restored. Included in the committee's recommendations is one that would provide an additional 220 inspector positions over 1981 levels next year. The committee's decision not to reduce its original recommendations for the U.S. Customs Service is a clear indication of the committee's deep concern about the drug enforcement and passenger facilitation activities, where inspectors are of critical importance. If we are to maintain our drug enforcement posture in fiscal year 1982, these additional resources for the Customs Service are essential.

The committee has also proposed an add-on of $5 million for the Customs air interdiction program—a major deterrent to the flow of illegal drug traffic into the southeastern and southwestern sectors of the country.

INTERNAL REVENUE SERVICE

With great reluctance, the committee-passed bill has been modified to reduce funding levels for the Internal Revenue Service below those levels recommended on September 22. A total of $2,465,551,000 has been proposed for IRS which is $100,098,000 below the March budget estimates, $12 million over the President's revised estimates, and $121,398,000 below the House. Within the taxpayer service and returns processing account, the committee has retained the $1 million earmarking for the tax counseling for the elderly program (TCE).

Frankly, I believe that the cuts in the taxpayer service and revenue-generating accounts, that is, examinations and appeals, investigations and collections, and taxpayer service and returns processing, are too deep. However, in order to help achieve the President's goals of cutting the budget, I have reluctantly and with great reservation gone along with the modifications before you.

Finally, the committee has not recommended any modifications to the $180,324,000 proposed for the Secret Service,

another key law enforcement agency with critical protection and investigative functions.

TITLE II: U.S. POSTAL SERVICE: PAYMENT TO THE POSTAL SERVICE FUND

The committee has modified its September 22 recommendations for the Postal Service subsidy and proposed an appropriation of $869,240,000, the same aggregate amount recommended by the President in March but with a different mix. The committee had proposed an appropriation of $946,240,000 for the Postal Service, including $250 million for public service subsidies and the balance of $696,240,000 for so-called revenue foregone subsidies. The modification before you would provide the same amount for the public service subsidy but would provide only $619,240,000 for revenue foregone funding.

However, the administration has proposed only $619 million for the postal subsidy, including total elimination of the public service subsidy. The committee believes that it is important to continue at a reduced level the public service subsidy, and maintain the revenue foregone funding level at a level that is $119,240,00 more than the level proposed in the President's March budget estimate.

Therefore, the appropriation recommended by the committee for the Postal Service is $77 million below the level recommended by the committee in September but is $250 million more than the President's latest budget estimates.

The committee has retained language in the bill which would preclude the closing or consolidation of small post offices, would prohibit the curtailment of 6-day delivery, and would prohibit the use of subsidy funds to mandate the implementation of 9-digit ZIP code.

TITLE III: EXECUTIVE OFFICE OF THE PRESIDENT

The committee bill, as modified, contains a total of $82,310,000 for the offices within the Executive Office of the President. This amount is $10,851,000 below the March budget estimates, $2,163,000 below the House, and $284,000 below the most recent budget estimates submitted on September 30.

The committee has essentially proposed going along with the President's revised budget for all of the entities which comprise the Executive Office of the President, with slightly deeper reductions targeted for the Office of Management and Budget, the Executive Residence, and unanticipated needs.

TITLE IV: INDEPENDENT AGENCIES

This title contains funding for a number of small agencies, boards, commissions, and offices, including the General Services Administration, the Federal Election Commission, and the Office of Personnel Management.

The total appropriation contained in the committee bill, as modified, for these title IV entities is $4.719.621,000, which is $45,603,000 below the current, revised budget estimates, $253,730,000 less than the March budget estimates, and $110,-096.000 below the House-passed bill.

The major bulk of title IV funding goes for the General Services Administration. The modified committee bill proposes sharp reductions in almost every function of this agency. In fact, the modified bill would reduce GSA funding by $43,-184,000 below the President's revised budget and $112,734,000 below the March estimates. The committee has, however, preserved the September 22 recommended funding level of $20,131,000 for the Office of Inspector General at GSA, an important watchdog activity at this troubled agency.

Within the Federal buildings fund at GSA, a number of important building projects have been approved by the committee, including: A border station at San Luis, Ariz., a courthouse at Madison, Wis., a courthouse and Federal office building at Ashland, Ky., startup funding for a Federal office building in Omaha, Nebr., a post office and courthouse annex in Charleston, S.C., a lease construction project in Tallahassee, Fla., and design funding for the Bonneville Power Administration Federal Building in Oregon. Funding levels for the Federal building fund were not reduced by the President in his package of budget revisions on September 30.

Under the National Archives and Records Service operating expenses account, the committee continues to recommend that up to $3 million be provided within the total Archives appropriation to sustain the national historical publications and records grant program in fiscal year 1982. The House has earmarked $1 million for this program next year. The committee believes that this small, but important program should be continued next year at the level discussed in Senate Report 97–192.

In most of the other accounts under title IV, the committee has gone along with the President's revised budget with the exception of the Merit Systems Protection Board and the U.S. Tax Court, where the committee has recommended going below the revised budget estimates.

WASTE, FRAUD, AND ABUSE

The committee has included an important section of language in its report which addresses the issue of waste, fraud, abuse, and mismanagement, and outlines some specific directives to the Office of Management and Budget in this regard. The committee has directed OMB to provide a full report to the committee by March 15, 1982 on the levels of funding within each agency, department, and instrumentality of the Government for consultant services, audiovisual and certain other public relations publications, and debt collection activities.

It is crucial that the Appropriations Committee have this fundamental data next year so that it can focus its attention on the appropriate levels of funding that these activities should receive. I remain convinced that $3 to $4 billion of waste can be saved by reducing these and other administrative expenditures, while, at the same time, accelerating our debt collection effort substantially.

Mr. President, again, this is a lean, tough appropriation bill and I recommend that it be approved.

Mr. President, in closing I shall take just a moment to pay tribute to the chairman of the subcommittee, Senator AEDNOR, who, in his first year as chairman of a major appropriation subcommittee, has done an excellent job of guiding this important appropriation bill through some stormy shoals. He has had to face not one, not two, but three different budgets since January. He has sat through weeks of hearings and markup sessions, and he has had to balance the fiscal marching orders of his President with the need to protect important programs in this bill, particularly those involving law-enforcement activities.

As the ranking minority member of the subcommittee, I have enjoyed working with Senator ABDNOR in bringing this bill to the floor and I appreciate the cooperation and courtesy he has shown me over this past year. I also thank his able majority clerk, Burkett Van Kirk and Bobb Mills for working so closely with the minority staff of this bill.

If the chairman, Senator ABDNOR, has no objection, I will offer an amendment at this time.

The PRESIDING OFFICER. Does the Senator from Arizona lay aside the committee amendment?

Mr. DECONCINI. Mr. President, I ask unanimous consent to lay aside the committee amendment and move to the amendment I will send to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. I thank the Chair.

UP AMENDMENT NO. 787

(Purpose: To improve the ability of the U.S. Secret Service to protect the President of the United States and other designated protectees)

Mr. DECONCINI. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Arizona (Mr. DECONCINI) for himself and Mr. KENNEDY, proposes an unprinted amendment numbered 787.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 47, after line 20, insert the following:

SEC. 617. Section 1752 of title 18, United States Code, is amended (1) by amending the title of such section to read as follows:

"§ 1752. Temporary residences and offices of the President and others";

(2) in subparagraph (i) of paragraph (1) of subsection (a) by amending such paragraph to read as follows:

"(i) any building or grounds designated by the Secretary of the Treasury as temporary residences of the President or other person protected by the Secret Service or as temporary offices of the President and the President's staff or any other person protected by the Secret Service, or";

(3) in subparagraph (ii) of paragraph (1) of subsection (a) by inserting the words "or other person protected by the Secret Service" after the word "President";

(4) in paragraph (1) of subsection (d) by amending such paragraph to read as follows:

"(1) to designate by regulations the buildings and grounds which constitute the temporary residences of the President or other person protected by the Secret Service and the temporary offices of the President and the President's staff or of any other person protected by the Secret Service, and";

(5) in paragraph (2) of subsection (d) by inserting the words "or other person protected by the Secret Service" after the word "President"; and

(6) by adding at the end thereof the following new subsection:

"(f) As used in this section the term 'other person protected by the Secret Service' means any person authorized to receive the protection of the United States Secret Service pursuant to section 3056 of title 18, United States Code, or Public Law 90–331, as amended, who has not declined such protection.".

SEC. 2. (a) Chapter 41 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 879. Threats against certain other United States Secret Service protectees

"(a) Whoever knowingly and willfully threatens to kill, kidnap, or inflict bodily harm upon a former President of the United States; a major candidate or the spouse of a major candidate for the Office of the President or Vice President; or a member of the immediate family of the President, the President-elect, the Vice President, the Vice President-elect, or a former Vice President who is receiving Secret Service protection, shall be fined not more than $1,000 or imprisoned not more than five years, or both.

"(b) As used in this section—

"(1) 'major candidate or the spouse of a major candidate for the Office of President or Vice President' means any person receiving Secret Service protection pursuant to provisions of Public Law 90–331, as amended;

"(2) 'immediate family' includes—

"(A) any person who is related by blood, marriage, or adoption to the President, President-elect, the Vice President, or the Vice President-elect and who receives Secret Service protection; or

"(B) any person to whom the President, President-elect, Vice President, or Vice President-elect stands in loco parentis and who receives Secret Service protection; and

"(3) 'President-elect' and 'Vice President-elect' shall have the same meaning given those terms in section 871(b) of this title.".

(b) Section 3056(a) of title 18, United States Code, is amended by striking out in the fifth clause the phrase "and 871" and inserting in lieu thereof "871, and 879".

(c) The analysis for chapter 41 of title 18, United States Code, is amended by adding at the end thereof the following new item:

"879. Threats against certain other United States Secret Service protectees.".

(d) Section 871 of title 18, United States Code, is amended by inserting the words ", to kidnap," in subsection (a) after the words "to take the life of".

SEC. 3. (a) Section 3056 of title 18, United States Code, is amended—

(1) in the first clause of subsection (a) by amending such clause to read as follows: "Subject to the direction of the Secretary of the Treasury, the United States Secret Service, Treasury Department, is authorized to protect the person of the President of the United States, the members of the President's immediate family, the President-elect, the Vice President or other officer next in the order of succession to the Office of President, and the Vice President-elect, and the members of their immediate families unless the members decline such protection";

(2) in the second clause of subsection (a) by amending such clause to read as follows: "protect former Presidents during their lifetime, and the person of a former Vice President and the spouse or surviving spouse and children under sixteen years of age of a former President for a period of six months, unless such protection is declined; provided however that the Secretary of the Treasury may extend or reinstate protection for such persons after the six-month period if the Secretary deems such protection necessary";

(3) in the fifth clause of subsection (a) by amending such clause to read as follows: "detect and arrest any person violating any of the provisions of sections 508, 509, and 871 of this title and, insofar as the Federal Deposit Insurance Corporation, Federal land bank associations are concerned, of sections 213, 216, 433, 493, 657, 709, 1006, 1007, 1011, 1013, 1014, 1907, and 1909 of this title; and

(4) in the ninth clause of subsection (a) by amending such clause to read as follows: "pay expenses for unforeseen emergencies of a confidential nature under the direction of the Secretary of the Treasury and accounted for solely on the Secretary's certificate".

(b) No person receiving Secret Service protection on the date of enactment of this Act shall have such protection terminated by the amendments made by subsection (a).

SEC. 4. Section 102 of the Treasury Department Appropriations Act, 1970 (Public Law 91–74; 31 U.S.C. 1032) is amended to read as follows:

"SEC. 102. Under regulations prescribed by the Secretary of the Treasury, the Department of the Treasury is authorized to—

"(1) reimburse its agents working on protective missions, as provided by law, for subsistence expenses without regard to rates provided by section 5702 of title 5; and

"(2) reimburse its agents for subsistence expenses when working on protective missions, as provided by law, in a nontravel status on a twenty-four-hour-a-day basis.".

Mr. DECONCINI. Mr. President, I do not know of a more important amendment that this body could pass in these last few days of the first session of the 97th Congress than the amendment I have just introduced with the distinguished Senator from Massachusetts, Senator KENNEDY. Let me say at the outset, that I have talked to the director of the FBI, Mr. Webster, and he has no problems with this amendment. Furthermore, this amendment has the full support of the U.S. Secret Service.

Back on Monday, March 30, like a recurring nightmare, this Nation and the entire world were shocked by the senseless and tragic assassination attempt on the life of the President of the United States. That horrible sight of the President, his press secretary, and the courageous law enforcement officers being wounded in front of the Washington Hilton should have pricked the national conscience and warned us in the Congress that something must be done to help our Secret Service win the battle against would-be assassins and terrorists.

Then, just last week, the story broke across the country and around the world that the President's life and the lives of his top officials were threatened by a group of terrorist hitmen, allegedly under the direction of Colonel Qadhafi of Libya, who had penetrated U.S. borders. Secret Service protection was ordered for top administration officials, including the Secretary of Defense and members of the top White House staff.

Mr. President, the amendment that I am offering today will take a major initiative toward providing the Secret Service with the necessary legislative assistance to overcome many of the obstacles which currently impede their efforts to crackdown on potentially dangerous individuals before tragedy strikes—not after the fact.

Frankly, this amendment does not include all of the legislative remedies that I feel are essential to improve our Secret Service's ability to protect the President and to improve the quantity, the qualyity, and protect the confidentiality of intelligence data from all sources including foreign, State, and local governments. For example I believe that the Secret Service should be granted an exemption from the Freedom of Information Act for its records maintained for law enforcement purposes. My amendment does not include this provision.

My amendment also does not include provisions granting the Secret Service concurrent jurisdiction in a number of criminal investigation areas where both the Federal Bureau of Investigation and the Secret Service have particular expertise. These provisions and others are included in legislation that I introduced on June 18, 1981, S. 1394, the Secret Service Reform Act of 1981, which is currently bottled up in the Senate Judiciary Committee.

Let me briefly outline what my amendment does include: First, it permits the Secret Service to establish so-called physical zones of protection for protectees of the Secret Service, other than the President of the United States. Currently, this physical zone of protection authority exists only for the protection of the President. This new provision would provide a specific criminal offense for violation of this zone of protection for protectees of the Service and provide further deterrent for unauthorized personnel to penetrate security areas established by the Service. This was a legislative recommendation of the House Select Commission on Assassinations that has never been implemented. It would cover White House staff and other top officials under Secret Service protection while with the President.

Second, it would extend to various other specified protectees of the Service, including presidential candidates the same type of statutory protection against threats of physical harm which is presently afforded the President and officer next in line of succession to the Presidency. This provision would enable the Service to immediately investigate and prosecute persons making such threats against our highly visible and vulnerable public figures. Investigation and prosecution of such threats have been hampered because of a lack of an applicable Federal statute similar to the Presidential threat statute. This would correct this problem and would also amend section 871 of title 18 U.S.C., to include kidnapping threats to the President under these new protections.

Third, it would continue protection of former Presidents during their lifetime, would extend protection to a former Vice President and the spouse or surviving spouse and children under 16 years of age of a former President for a

period of 6 months, unless such protection is declined or unless the Secretary of the Treasury extends or reinstates such protection after this period.

The Secretary of the Treasury however, would continue to gather intelligence relating to the necessity for providing or reinstating such protection and can reinstate such protection at any time. Furthermore my amendment would "grandfather in" those currently receiving Secret Service protection upon the date of enactment of this measure. For example, Mrs. Reagan, former First Lady Mrs. Johnson and Mrs. Truman would continue to receive protection under current law.

It is the feeling of the Service that the foregoing modifications in existing protection are justified on the basis of the experience of the Service in its protective responsibilities. Intelligence gathered by the Service regarding the number and kinds of threats against public officials and their families suggests that the manpower and resources of the Service can be better utilized in other areas of responsibilities.

Fourth. Finally, it would provide authorization for the Treasury to reimburse its Secret Service agents working on protective missions for subsistence expenses when the agents, though not in travel status, are, nevertheless, specifically assigned to remain in close physical proximity to a protectee on a 24-hour basis. This is not a major legislative change but it would help to improve morale and fairness among on-duty agents and rectify what is believed to be an inequity within the Secret Service.

Mr. President, these are not Secret Service reforms that the Senator from Arizona or the Senator from Massachusetts dreamed up overnight. On April 2, just 3 days after the assassination attempt on the life of President Reagan, the Treasury, Postal Service, General Government Appropriations Subcommittee, of which I am the ranking minority member, held a hearing with the Secret Service which focused both on the tragic events of March 30 at the Hilton and on the legislative changes that would facilitate the gathering of critical intelligence data and improving the protective functions of the Service.

Secret Service Director, H. Stuart Knight, was very candid about the statutory roadblocks that impede the gathering of accurate, crucial intelligence data on potentially-dangerous groups and individuals and the ability of the Service to better protect the President and other protectees. The subcommittee asked the Secret Service to outline in detail the legislative changes that would enable them to do a better job of protection and investigation. Four of those recommendations are included in this amendment that I have introduced with the Senator from Massachusetts.

Mr. President, in closing let me say that at a time when the lives of the President of the United States and his top assistants are once again threatened by terrorists, the time has come to move these and other changes in law in order to help the Secret Service better serve the President and the country in this most critical, dangerous, and difficult task. I have repeatedly attempted to move S. 1394 out of the Judiciary Committee without success. I have worked long, hard, and in close cooperation with the U.S. Secret Service on my bill, S. 1394, and on this particular amendment.

They need this amendment to do their job and we should give it to them now. Finally, Mr. President, I want to allay the fears of those on the Judiciary Committee and perhaps those in other law enforcement agencies downtown that this amendment does not—repeat—does not confer any new criminal investigation authority on the U.S. Secret Service. And again, it does not provide the exemption to the Freedom of Information Act that I mentioned earlier in my statement.

I would hope that my colleagues would recognize the importance of this amendment at this particular time in our history, when terrorism is increasing and the threat against the lives of our top Government leaders are real, and pass this amendment on its merits.

Mr. ABDNOR. Mr. President, I would like to say that we on this side are happy to accept Senator DECONCINI's amendment. As a matter of fact, I think it was an excellent bill and I was happy to be one of the Senator's cosponsors.

Mr. DECONCINI. I thank the chairman. If he will yield, let me say he is a cosponsor of the Secret Service Protection Act, and that has had the effect of moving that bill, and without his help it would not be able to do that.

If there is no further debate then I move the adoption of the amendment.

The amendment (UP No. 787) was agreed to.

Mr. DECONCINI. I move to reconsider the vote by which the amendment was agreed to.

Mr. ABDNOR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 788

Mr. ABDNOR. I now send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Does the Senator further ask unanimous consent to lay aside the excepted committee amendment?

Mr. ABDNOR. This is one of my committee amendments.

The PRESIDING OFFICER. We have an excepted committee amendment which would have to be laid aside temporarily in order to consider further amendments.

Mr. ABDNOR. I now ask unanimous consent to take up the amendment just sent to the desk and temporarily laying aside the excepted committee amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The bill clerk read as follows:

The Senator from South Dakota (Mr. ABDNOR) proposes an unprinted amendment numbered 788.

Mr. ABDNOR. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 10, after line 13, insert the following:

SEC. 105. The Secretary of the Treasury is authorized to transfer up to 5 percent from any appropriation within title 1 of this Act: *Provided*, That the recipient appropriation account is not increased by more than 5 percent of the amount provided by this Act: *Provided further*, That approval for such transfers are obtained in advance from the House and Senate Committees on Appropriations.

Mr. ABDNOR. This amendment alludes to a statement I made earlier about giving the Secretary of the Treasury 5-percent transfer authority within the Department of the Treasury subject, of course—and I want to bring this out—to approval in advance from the House and Senate Committees on Appropriations.

Mr. President, I think this is a very necessary amendment particularly since we have cut so deeply into the various budgets of the agencies in the Department of Treasury.

I ask for its immediate adoption.

Mr. DECONCINI. Mr. President, I am going to support the chairman's amendment. I must admit I have had some reservations about granting these two major agencies this type of authority to shift between appropriation accounts.

I know the Treasury Department and particularly GSA are having a difficult time coping with the stringent budget cuts placed on their operations by the administration, and I am sympathetic to the efforts being made by the Senator from South Dakota. He has been under enormous pressures from the Treasury Department to provide this transfer authority.

Mr. President, I must admit that I was initially sympathetic myself to a request from Treasury for a 2-percent transfer authority, a level of transfer authority which was discussed earlier in the fall during committee consideration of the Treasury bill. Now, however, the Department has requested 5-percent transfer authority and now GSA wants to get into the act. Section 5 on page 30 of the bill already grants GSA authority to transfer up to 3 percent of its personnel appropriations between appropriation accounts, so I wonder why this additional authority is needed at this time as it relates to GSA. I realize that the Appropriations Committees would have a veto over such transfer requests from both Treasury and GSA, but I still do not believe that such authority makes good fiscal sense even if the committees would have such a veto.

Mr. President, I would like to support my chairman on this amendment, but after much soul searching, I do not believe that it is in the best interests of the committee or the American taxpayers to permit such extensive transfer authority for Treasury or GSA.

I withhold judgment on that. The chairman has worked long and diligently trying to work out a formula here, and I respect his judgment.

I must also point out that the Senator from Florida (Mr. CHILES) is concerned

about this matter and I am advised he is on his way to debate this amendment.

Mr. ABDNOR. I appreciate the comments by my good friend, the Senator from Arizona, who has been so helpful on this entire bill. Of course we are bound to have a few differences here and there.

I think we must all remember that the level of reductions taken in this particular bill is extremely great and deep. We have even added the 12-percent cut the President asked for early this fall, and we think it is going to cause some severe operational difficulties.

I think what I need to point out to the Members of the Senate is that most of the Department's funds in both GSA and the Treasury go for personnel and related costs. Actually there is relatively little used for the type of expenditure such as construction that can be postponed easily, and there are no major contract or grant programs in the Treasury that can be fine-tuned.

Also the Department funds are split into a large number of separate appropriations that all blend together. So they have an unusual situation, believe me. If anyone on this floor thinks I am inclined to go along with this permissively helping them transfer funds they are mistaken. We have written into this legislation provisions to cover every possibility so as to make sure they are not taken advantage of. They have to come before our subcommittees and before the full committee on both sides, I think, as Members of the Senate we are capable of policing and seeing that it is properly handled.

So I think this is really very, very necessary. I understand the Senator from Florida is coming. We can call for a quorum.

Mr. DECONCINI. Mr. President, I understand the Senator is on his way and will be here momentarily.

Will the distinguished chairman yield?

Mr. ABDNOR. Yes.

Mr. DECONCINI. I just want to say to my colleagues that Senator ABDNOR, the chairman of this subcommittee, has been a stalwart in revising the number of reprogramings and efforts to shift those accounts over the past 10 months. I compliment him for those efforts. It has been no easy task when those requests have come.

In the Appropriations Committee, I did support the chairman's request for a 2-percent transfer authority with the same reservation that I have today, that I felt that was the best the chairman could negotiate. I am sure there is justification, on some manner of argument and presentation, for this 5-percent transfer. I know the chairman has a duty and obligation to proceed with it, but it does trouble me, indeed.

Mr. President, the Senator from Florida should be here momentarily. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the order for the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ABDNOR. Mr. President, I ask unanimous consent that we suspend further action on the proposed amendment, the amendment at the desk, until the arrival of our colleague, the Senator from Florida.

Mr. President, the Senator from Florida has just arrived, so I will withdraw that request and we will continue on with the amendment at the desk.

At this time, I yield to the Senator from Florida.

Mr. CHILES. Mr. President, my understanding is that the amendment that is offered by the distinguished Senator from South Dakota is to allow a transfer provision of 5 percent between the various accounts in both Treasury and GSA. I hate to see us do this, because we had a debate regarding transfer authority on the continuing resolution just this last week and I thought we resolved the matter then.

My concern is that what we are about to start through this transfer authority is really a backdoor way of getting us back into the whole impoundment issue again. Because if we allow these agencies to be able to transfer up to 5 percent, then we are talking about allowing the bureaucrats, basically, to look at any program and decide that they want to cut 5 percent out of that program and basically rewrite the whole bill.

Now, last week it was argued that because the continuing resolution made 4-percent across-the-board cuts, that it was going to be necessary to allow some kind of flexibility to permit the agencies to protect a program.

During that debate we were talking about 2 percent transfer authority, or 2 percent above the 4-percent, across-the-board cut, I think, that we were talking about, up to 6 percent; with 2 percent transfer authority. And this was an issue that the Senator from Florida was very concerned about. I was prepared to debate this at length because of my concern that we were opening up the possibility for the impoundment issue again.

At that time, the distinguished chairman of the Appropriations Committee, who happens to be on the floor at this time, said that he also was concerned about any change that would take us back to the impoundment fight that we would have again. Then Chairman HATFIELD said that he was going to consider this to be reprograming authority that would have to be approved by the committee. A letter has been written by the chairman of the Appropriations Committee, the ranking member of the Appropriations Committee, joined by members of the House Appropriations Committee, to the administration that they should not consider this 2-percent transfer authority that was within an account beyond the basic, 4-percent cut to be anything other than reprograming; that information would have to come back to the committees and the committees would have to consent to that.

Now, the language that we are looking at here provides this transfer authority and allows it now up to 5 percent and not just within an account but between accounts. Where are we going to stop with this? We started with 2 percent and now we are talking about 5 percent in this bill. If this passes and if any one of the agencies sees that they could have a 5-percent transfer authority, why in the world should all of the other agencies not ask for this? And then we are right back into the situation of permitting impounds. It changes the whole thrust.

Now if the administration wants to make a cut of 5 percent with a rescission or a deferral, that has to come and be approved by both Houses of the Congress. Here we are talking about giving authority to cut up to 5 percent out of a program, not to be approved by both Houses of the Congress. You simply give notification and seek approval of the transfer in advance by the House and the Senate Committee on Appropriations. So what we see is the Congress itself surrendering its authority and we are going to be back into the same game that we have been in before when we had court battles and all kinds of other confrontations between the White House and the Congress.

Mr. President, I think we would be totally unwise to enter into somthing like this especially something of this size. For the life of me, I cannot understand why it is necessary for the Department of the Treasury or for the GSA to have authority to transfer up to 5 percent between their accounts. As I say, we were only granting 2 percent in the continuing resolution and the continuing resolution is applying to all of the departments and agencies. Even in that 2 percent, we very carefully laid out, under the auspices of the chairman of the Appropriations Committee, that that would only be done if it was considered to be a reprograming request. Now on top of that we see a request to move from the 2 percent all the way up to 5 percent.

UP AMENDMENT NO. 789

Mr. CHILES. Mr. President, I send to the desk a perfecting amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Florida (Mr. CHILES) proposes an unprinted amendment numbered 789 to Mr. ABDNOR's unprinted amendment numbered 788.

The amendment is as follows:

On line 2 and on line 4 of the amendment strike the phrase "5 percent" and insert in lieu thereof "2 percent" and on page 30, line 6, of the bill strike the phrase "3 per centum" and insert in lieu there of "2 percent.".

Mr. CHILES. Mr. President, this amendment would allow the Treasury Department to have authority to transfer up to 2 percent in the same way that we have under the continuing resolution. I think that that is the extent of what we should do in allowing any kind of transfers.

The PRESIDING OFFICER. The Chair would advise the Senator from Florida that the amendment attempts to amend both the pending amendment and the bill. The part of the amendment attempting to amend the bill would only be in order by unanimous consent.

Mr. CHILES. Mr. President, what we were attempting to do in the second part

was to amend the bill so that we would amend the GSA provision to also have it apply to 2 percent. We can do this with two amendments. I think the argument is really the same. I was trying to save the time of the Senate.

Mr. ABDNOR. I assure the Senator I am not going to object to the Senator offering his amendment.

Mr. CHILES. I appreciate that. I thank the distinguished Senator for that. I ask unanimous consent that the amendment be considered to be in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHILES. Mr. President, I must oppose Chairman ABDNOR'S proposal to give the Treasury Department 5 percent transfer authority between their several appropriation accounts. I understand that Secretary Regan wants this authority in order that the Department can better accommodate to the budget cuts proposed by the President. It sounds like the Treasury Secretary is trying to make an end run around the cuts they have proposed, had adopted and have taken credit for.

My major objection, however, is that this gives away our congressional prerogatives. We decided on the appropriate spending levels after advice from the administration. If these reductions are too great, the administration can send up a supplemental. If the levels are too high, the administration can send up a rescission or a deferral. By these means the Congress can maintain its constitutional powers of the purse.

Chairman HATFIELD and Chairman ABDNOR and I had previously agreed to a 2 percent transfer authority for Treasury to permit them to develop a more credible Inspector General operation.

Mr. President, the Department of the Treasury now has a small Inspector General function included within the Office of the Secretary. This small office has fewer than 15 professional investigators and auditors and does not have statutory independence as do other Inspector Generals in the executive branch; it does not have subpena powers and it is also not required to report to the Congress on its activities as are the statutory Inspector General offices.

Currently, the Department relies on the auditors and investigators in each of the independent agencies to investigate allegations of their own wrongdoing. While the small Inspector General activity in the Office of the Secretary tries to provide oversight to these activities, it is too small to have any real leverage. It is also not independent from top management in the Department.

Last year the Appropriations Committee recommended to the full Senate the transfer of 200 positions and $7.5 million from the various Treasury agencies and departments to create a new Office of Inspector General.

Mr. President, I ask unanimous consent to have a table appear at this point in the record which shows the transfers that were recommended last year. These transfers would have been achieved by moving approximately 15 percent of the auditor and inspector resources that now exist in each of the independent agencies to a central office. This would have left each of Treasury bureaus and agencies with adequate resources to also conduct their own internal investigations.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Office/Bureau	Offsets	
	Positions	Amount
Office of the Secretary	22	$882,000
Bureau of Government Financial Operations	3	115,000
Bureau of Alcohol, Tobacco and Firearms	5	193,600
U.S. Customs Service	30	1,163,700
Bureau of the Mint	1	28,000
Bureau of Public Debt	2	71,000
Internal Revenue Service	134	4,976,500
U.S. Secret Service	3	115,000
Total	200	7,544,800

Mr. CHILES. Mr. President, last year we also recommended that this new Inspector General office be included as a separate appropriation account; that it be given subpena powers; and that it be required to comply with the reporting requirements of section 5 of Public Law 95-452, the Inspector General Law of 1978. As the Members may recall, the Treasury bill never came to the Senate floor last year and, therefore, the full Senate was never given a chance to vote on those particular recommendations.

This year, the House has passed H.R. 2098 to create a statutory Inspector General at Treasury. This legislation is now pending in the Senate Committee on Governmental Affairs. I am hopeful that this legislation will be passed into law and the Department will move quickly with this transfer activity to create a more credible Inspector General operation.

It is my hope that this transfer authority will be used to create a more credible Inspector General at Treasury. In a previous colloquy Senator ABDNOR agreed with me that this would be an appropriate use of the transfer authority.

Mr. President, my arguments for GSA are identical.

We have accepted many of the cuts proposed by the administration for the General Services Administration. The committee has exercised its best judgment on these matters.

To now give the GSA 5 percent transfer authority only undermines our congressional prerogatives and gives GSA the option to rewrite the bill.

There is a process available for GSA to seek adjustment. If the cuts—ones that the administration requested—turn out to be too deep, a supplemental can be requested.

If we provide too much, deferrals or rescissions can be proposed.

Mr. President, basically what the amendment does is it allows the provisions for both the GSA and the Treasury transfer authority to be limited to 2 percent rather than 5 percent. That is the amount we allowed to be transferred in the continuing resolution. I feel that would be proper, rather than seeing us extend it to 5 percent. Some other agency is liable to ask for 10 percent if we continue this way. We ought not to allow this to go any further than we allowed it to go in the continuing resolution. I personally do not think there should be a transfer authority spelled out, but I would agree to the 2 percent as it is in the continuing resolution.

Mr. ABDNOR. Mr. President, I appreciate the efforts of the Senator from Florida. I happen to strenuously disagree with him and his amendment to the amendment.

Back when we proposed our 2-percent transfer authority to the Treasury, prior to the additional cuts that we made in the budget. This made it a serious problem, or it could possibly be a serious problem, to the Department of the Treasury.

As I have said, most of the funding for the Department of the Treasury goes for personnel and related agencies with little of the other kind of expenditure that so many of the other agencies and departments have contained in their budgets. In fact, the department budgets most affected by these reductions are precisely those which spend the most for personnel. These areas include the Internal Revenue Service, which is of great concern to this committee because we do not want to do anything to hamper that service, and the Office of the Secretary of the Treasury, which deals with the larger issues of economic and tax policy.

Both of these areas will be experiencing major reductions if this legislation passes, and both are going to need managerial flexibility in managing their reductions.

In order to do this is why we went from the 2 percent to the 5 percent, which was approved by the Appropriations Committee. It is just a one-time authority to transfer money between the 15 separate appropriations that make up this Department. The authority would be limited, as we said, to a 5-percent transfer on any one appropriation measure. The committee expects it will be consulted.

I guess I have a lot more confidence in the Appropriations Committee than does the Senator from Florida. I just do not believe with what we are experiencing, a shortage of funds for the various agencies, that we will let them be carried away and do foolish things. As long as the subcommittee handles this and the entire Appropriation Committees, not only of one House but of both Houses which have to approve this, it should arrest any fears that any of us have as far as some Mickey-Mousing going around here that we do not approve of, if I can use that expression.

I am not one to give them all kinds of authority. Believe me, I had serious consultations with the Treasury before we agreed to do this. However, I came away convinced that this is necessary, as long as we retain the kind of jurisdiction and control that we do over this transfer. I see no problem with it whatsoever and I urge rejection of the 2 percent and the adoption of the 5 percent for transfer authority.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. CHILES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHILES. Mr. President, I see the distinguished chairman of the Appropriations Committee on the floor. I wonder if he might take the floor and yield for a question from me.

Mr. ABDNOR. I yield to the distinguished chairman.

Mr. CHILES. This was on a subject that the chairman and I spent some time debating last week, or talking about last week. That was the whole question of transfer authority. It was in the continuing resolution, as the chairman will recall, and I was very concerned, concerned about backing us into the issue of impoundments again. At that time, the distinguished chairman made quite clear, and I think it has now been made clear by letter signed also by the ranking minority member of the Appropriations Committee. The letter to OMB's Stockman makes clear that we consider the 2-percent transfer authority in the continuing resolution to be an extraordinary matter and that it could only be done after the consent of the Appropriations Committee.

At that time, I expressed to the distinguished chairman my fear that we were going to start off with 2 percent, that we were going to see that figure made higher, and agencies would start saying, "Well, if 2 percent is good, why not ask for 5?"

Today we are seeing a request for 5 percent by Treasury and the GSA. What is to stop any other agency from saying, "Well, if they have 5 percent, we would like to have 10 percent."

Before long Congress will be surrendering its authority to say where the money will be spent because the agencies will have this kind of transfer authority to rewrite the bills. That was the concern that I was expressing last week, that we were going too far.

I would like to have the chairman's views on this concerning the area which we are talking about. It is an amendment of 5 percent but I asked that we make that 2 percent, as in the continuing resolution.

Mr. HATFIELD. The Senator is correct, that this was discussed in the debate on the continuing resolution. We are talking about here the flexibility within an account. We were concerned how an agency should be permitted to proceed within an account. It was assumed when the legislative record was made, and we felt very strongly, that if the adjustment was made in the account it should be a reprograming action. Now the Senator is suggesting that we have a problem, perhaps of setting into motion an action that could very quickly proliferate among the other agencies. That is, providing for transfer authority between accounts, if I understand the Senator's question.

I have a very strong feeling that I would much rather support an agency in its general appeals that it may offer to our subcommittees of the Senate Appropriations Committee concerning actions proposed by OMB or the other House.

I also think we have the additional safeguard that if there is something unanticipated that would arise in the life of an agency, that through reprograming the committee can work with that agency in making those adjustments.

Third, I would say there is always the vehicle of the supplemental that the agency has at its command. So that in revision, review, or reassessment it can still get relief through the supplemental system.

I do not see anything happening in terms of an action taken that we cannot control. It will be the Congress that has to give the agency the authority for 2 percent, 1 percent, or 5 percent.

We are willing to yield that kind of appropriation fiscal check and balance. Then it is the Congress, not the agencies. The agencies will push us, I am sure, as far as they can.

I want to cooperate with the agencies, but I think we ought to hold inviolate the legislative responsibility in the appropriations process. Therefore, I have already made my amends with the very distinguished subcommittee chairman, the Senator from South Dakota (Mr. ABDNOR). While I traditionally try to support my subcommittee chairman to the fullest extent, he and I have reached an understanding. We may, I believe, disagree on this point without in any way rupturing that relationship.

I say I shall support the 2-percent transfer authority, but I think the 5 percent is not necessary when the committee is open and available to these agencies. After all, we are in the same party now—the people downtown and the majority of the Senate. I see no reason why the agencies cannot feel a friendly reception up here under Republican leadership. They are Republican appointees that are coming up here to get these adjustments.

I believe this would occur even if it were the other way around, a Democratic controlled Congress. I have sat on this committee now for many years under Democratic leadership and they have studiously assessed those requests by the agencies. They have worked with reprograming, supplementals and appeals in dealing with the committee on what the agencies considered to be a higher level of authorization or appropriation. These have been handled, I think, very professionally.

I say to the Senator from Florida that we only yield what we are willing to yield to those agencies. I believe at this point, 2 percent gives them enough flexibility.

Mr. CHILES. I thank the distinguished chairman of the Committee on Appropriations and I know this is a matter we have not had a chance to discuss in the full committee. I can understand, because once I was a subcommittee chairman and sometimes the agencies come to you with special requests. The matter has not had a chance to come before the full committee, they make a reasonable or what sounds to be a reasonable argument, and you carry that argument to the floor. I would hope that the distinguished chairman of the subcommittee, realizing that this has not had a chance to be discussed in the full committee, would accept the pending amendment that I have made in line with what we did in the continuing resolution, in line with what the distinguished chairman of the Appropriations Committee feels would be a proper policy.

Then this is a matter where, if the agencies want to bring it up, it can come before the committee for full consideration. But more properly, as the distinguished chairman of the Appropriations Committee has said, this is a matter where we shall listen to those agencies. We do have supplementals that will come. There are ways, if a hardship has been worked on them, to fix that. On the one hand, for them to say "We are for these cuts," and on the other hand, for them to come to the back door of Congress and say, "Give us a 5-percent transfer because we want to go in and decide where we want to cut more or not cut more," as the chairman said, is giving away what is purely the Congress authority. I hope that the distinguished chairman of the subcommittee will allow us to make this conform with the continuing resolution and handle it in that way.

Mr. HATFIELD. Mr. President, will the Senator yield for a final comment?

Mr. CHILES. Yes, Mr. President.

Mr. HATFIELD. I know of no person who has been a greater champion of the needs of the Treasury Department and Secretary Regan than the Senator from South Dakota (Mr. ABDNOR). I am sure Secretary Regan would affirm that observation. The Senator from South Dakota has certainly served effectively and conscientiously the needs of that Department. I know the Secretary appreciates the fact that he has been his advocate, his representative, and his defender.

If the Senate accepts the 2 percent rather than the 5 percent, this should in no way affect the genial and effective working relationship between the Appropriations Committee in general and the agencies involved. More especially that should not affect the subcommittee dealing with the Treasury Department and the agency. And even more specifically than that, the relationship between the Senator from South Dakota and the Secretary of the Treasury.

Mr. ABDNOR. Mr. President, let me say that I have spent considerable time on the budget of the Treasury. Of course, I am not exactly known as one of the big spenders. It was after considerable discussion that I went along with the proposal of transfer authority of 5 percent. Maybe it is a dangerous precedent. There was a precedent here once before for transfer authority of a much lesser percentage when money was more available. That was rescinded. I like to think this could be rescinded in the years to come if it is not necessary.

Mr. President, the problem arises—it is not that I am this anxious to have the 5-percent authority back and forth.

That is exactly why we went to the trouble to make sure to have the complete approval of the subcommittees of both the House and the Senate, as well as the entire Appropriations Committee. As I have said, there are over 15 seperate accounts within the Department of the Treasury, some extremely large and some very small.

As the legislation calls for in the amendment, not over 5 percent can be transferred out of any one fund or more than 5 percent added to one account. I look at the large accounts of the Treasury Department, like the taxpayer's service and return processing, which takes over $867 million. I look at examinations and appeals, where we are appropriating $933 million. I look at the investigations and collections, $617 million. Then I look at the smaller ones, like the office of the Secretary with $36 million, the Federal Law Enforcement Training Center, $14 million. Five percent does not amount to very much when you take it out of those small accounts. If you are able to transfer it over to something like IRS work, it may be only a very small percentage into their account, but it is a big percentage out of the account that you made transfer from. This is a thing that troubles me.

I would like to go along with 2 percent, but I hope it would be with the understanding of everybody in the Chamber that when they are in a real bind and it is very obvious to us that it is, that we take care of their problems with supplemental appropriations. I do not know whether we do it this way and make them live with their money or let them spend it all any way they want to and transfer. They will not have to do that now.

They could come back, I guess, and ask for a supplemental. Is that what the Senator has in mind?

Mr. CHILES. I certainly would want to work with the distinguished Senator from South Dakota as he wrestles with those problems. The difference would be that they would come back to us and we would love the chance to make the final decision. Do we agree this is necessary and how should it best be handled? Should it be handled by making the cuts somewhere else or by saying that this is a matter deserving a supplemental and this is something we have to provide money for? Mr. President, that is what the role of Congress is about and I do not think we should be shifting that role to the administration.

Mr. ABDNOR. Let me say to the Senator I honestly feel we are doing all that with having them seek the approval and come to us on a one-time proposition and get the full approval of the committees. That is what we do on any appropriation.

The only thing about going the other route, if there is a place we could have cut, they go ahead and spend and give the ones that need it the extra dollars of general funds, where they might have gotten by with transfer authority. I just think we are going to give them more for the buck under the proposal of the 5 percent.

We started with 2 percent. If the Senator thought 2 percent was satisfactory before we made the 12-percent cut, he should be happy with the 5 percent because we are making a big cut where we took from where we were with the additional second cut of 12 percent. We really cut.

There are some serious doubts and questions. But I am willing to gamble on it with this kind of authority. I suppose it changes my way of thinking, but I feel very strongly that the 5 percent, even though I do not like it, is a necessity.

If it is the opinion of this body that 2 percent is as far as we should go, I will have to accept it, but I think we should bring it to a vote.

Mr. CHILES. I thank the distinguished Senator from South Dakota. I think part of the concern is expressed by the chairman of the Appropriations Committee.

The hangup of the Senator from Florida is not wanting to give away our authority. Even if it puts some additional work on us and it is easier to say, "Let them wrestle with that, and we do not have to look at that," we would be setting a bad precedent.

I thank the Senator from South Dakota for his statement. I think that is the best way out of the dilemma.

Mr. DECONCINI. Mr. President, will the Senator yield?

Mr. CHILES. I yield.

Mr. DECONCINI. Mr. President, the distinguished chairman, the Senator from South Dakota, has struggled with this matter. I supported his 2-percent amendment in the committee, in the discussions we had there, and I did it with great reluctance.

I believe the Senator from Florida is correct, and I regret not supporting the chairman. This amendment brings us back to what the committee decision was and is indeed a compromise, and I would have to support the amendment.

Mr. ABDNOR. Mr. President, I have serious questions about this, but I will accept the amendment of the Senator from Florida, with the understanding that we watch this very closely.

I admonish the Senator from Arizona and the staff that we watch this matter very closely and that we come through with supplementals where necessary.

Mr. DECONCINI. I am thankful that the chairman agrees to accept the Senator's amendment. I commit myself to working with the chairman in the event problems do arise. I think we have struck a very good compromise here.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 789) was agreed to.

Mr. DECONCINI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ABDNOR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the first-degree amendment, as amended.

The first-degree amendment (UP No. 788), as amended, was agreed to.

Mr. DECONCINI. Mr. President, I move to reconsider the vote by which the first-degree amendment, as amended, was agreed to.

Mr. CHILES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 790

Mr. ABDNOR. Mr. President, I move to lay aside the pending committee amendment, and I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from South Dakota (Mr. ABDNOR) proposes an unprinted amendment numbered 790.

Mr. ABDNOR. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 10, after line 19, insert a new subsection as follows:

SEC. 106. No funds made available pursuant to this Act may be used to accomplish or implement a proposed reorganization of the Bureau of Alcohol, Tobacco, and Firearms before March 31, 1982. Such reorganization plan may be implemented after March 31, 1982, unless disapproved by the House and Senate Committees on Appropriations.

Mr. ABDNOR. Mr. President, this amendment is identical to the amendment which I offered to the recently vetoed continuing resolution and which was accepted by both Houses. Basically what my amendment does is prevent a proposed reorganization or elimination of the Bureau of Alcohol, Tobacco, and Firearms before March 31, 1982. Such reorganization of BATF after March 31, 1982, could be effectuated unless disapproved by the House and Senate Committees on Appropriations.

Mr. President, all my amendment does is maintain the constitutional prerogatives of the Congress. As of this moment no one in the Senate or the other body can tell us for certain what this reorganization will cost. My amendment will give the committee time to hold hearings, call interested witnesses and marshal the evidence to determine whether or not the reorganization of BATF is in fact in the interest of our constituents.

It is my intent, if this amendment is adopted, to hold hearings in February on the issue of the reorganization of BATF.

Let me assure my colleagues that we will call all pertinent witnesses and promptly report our findings to the full Appropriations Committee.

Mr. DECONCINI. Mr. President, I support the amendment of the Senator from South Dakota.

This amendment does not signal our disapproval of the President's reorganization plan for the Bureau of Alcohol, Tobacco, and Firearms. It does not say that we want to keep that troubled agency alive for another year. It merely sends a signal to the Treasury Depart-

ment that the Committee on Appropriations and the Senate want to take a close look at this major shift of both personnel and responsibilities before approving this significant reorganization. And Mr. President, this is a major policy initiative by the administration.

The reorganization plan announced just the other day would apparently call for the shift of 1,200 BATF S. 1811 agents into the Secret Service for the purpose of enforcing the Gun Control Act of 1968 and the explosives program formerly contained within BATF.

The plan also would apparently call for shifting about 700 BATF personnel into the U.S. Customs Service to enforce laws affecting the cigarette and alcohol industries, including enforcement of the Federal Alcohol Administration Act.

I am informed by Treasury that they intend to eliminate all but a few essential alcohol regulatory functions under the President's reorganization plan. This major policy decision could have a very significant effect on both the distilled spirits industry and the beer and wine interests—businesses which total over $11 billion a year. We should know exactly what the ramifications of sharply curtailing these regulatory functions might be and we cannot do that in the last remaining days of this session of Congress.

Mr. President, we are now told that to implement the reorganization plan it will cost an additional $18 million above and beyond the President's revised September 30 budget estimate for the Bureau of Alcohol, Tobacco, and Firearms. We are all aware of the tremendous need to hold the line on spending and we should have the opportunity to see exactly why this large amount of money is required, when supposedly one of the reasons for the reorganization is to save money—not cost the Treasury more money.

We should also know if the recipient agencies—Secret Service and Customs—will be able to absorb these new functions without jeopardizing their other crucial law enforcement, protective, and investigative functions in such areas as protection of the President, drug and narcotic investigations, and passenger facilitation in our national airports.

Mr. President, for all of these reasons and others, we should not strike the language in section 109. We should wait until we have had a chance to examine this plan from top to bottom. We do not have any good information from Treasury as to exactly what they intend to do. Frankly, I'm not sure that Treasury has all of the wrinkles out of the plan. We should have extensive hearings before the Appropriations Committee, including Treasury Department and other administration officials, and outside groups who will be either directly or indirectly affected by the reorganization.

As the ranking minority member of the Treasury Subcommittee, I will give you, the committee, the President, and the Senate my personal assurance that I will work with the distinguished chairman of this subcommittee, Senator ABDNOR, to hold such hearings as early as possible upon the return of the Senate in late January.

Mr. President, in closing, no one is more supportive of the U.S. Secret Service or the U.S. Customs Service than I. And no one is more concerned about the past abuses of the Bureau of Alcohol, Tobacco and Firearms in enforcing the gun-control laws on the books than the Senator from Arizona. My record on both is crystal clear. However, holding up for 3 months the reorganization plan affecting BATF and these two Treasury agencies is a proper action for the Senate to take. We need more information and we will get it. I urge the adoption of the amendment.

Mr. ABDNOR. Mr. President, I appreciate the comments of the Senator from Arizona.

The PRESIDING OFFICER (Mr. QUAYLE). The question is on agreeing to the amendment.

The amendment (UP No. 790) was agreed to.

Mr. DECONCINI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ABDNOR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 791

Mr. ABDNOR. Mr. President, I move to lay aside the pending committee amendment, and I send to the desk another amendment.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from South Dakota (Mr. ABDNOR) proposes an unprinted amendment numbered 791.

Mr. ABDNOR. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 4, line 12, insert the following: "*Provided further*, That of the funds made available by this act for the Bureau of Alcohol, Tobacco and Firearms, $15,000,000 shall be available solely for the enforcement of the Federal Alcohol Administration Act during fiscal year 1982."

Mr. ABDNOR. Mr. President, this amendment would earmark out of those funds provided for the Bureau of Alcohol, Tobacco and Firearms $15 million to be used for the implementation and enforcement of the Federal Alcohol Administration Act during fiscal year 1982.

Mr. President, all in the world my amendment does is insure that this very socially sensitive issue continue to receive Federal oversight and attention during the current fiscal year. Without my amendment, the Department of the Treasury might fail to enforce the Federal Alcohol Administration Act and that could prove tragic not only for the beverage industry but the Nation at large.

Mr. DECONCINI. Mr. President, I support the Senator's amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 791) was agreed to.

Mr. DECONCINI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ABDNOR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BUREAU OF ALCOHOL, TOBACCO AND FIREARMS

● Mr. D'AMATO. Mr. President, it has come to my attention that with the budget of $120 million for the Bureau of Alcohol, Tobacco and Firearms there is a high probability that the enforcement of the Federal Contraband Cigarette Act may be curtailed.

The enforcement of this law is very important to both New York State and New York City to insure that taxes on cigarettes are collected.

Mr. President, Senator MOYNIHAN and I would like to insert into the RECORD a letter from James H. Tully, commissioner of taxation and finance, State of New York.

Mr. Tully's letter states the position of those States, cities, and localities that receive tax revenues from cigarette sales.

The letter follows:

STATE OF NEW YORK, DEPARTMENT OF TAXATION AND FINANCE,
Albany, N.Y., October 26, 1981.

Hon. DONALD T. REGAN,
Secretary of the Treasury,
Washington, D.C.

DEAR MR. SECRETARY: During the last few weeks, I have heard reports indicating that enforcement of the Federal Contraband Cigarette Act (P.L. 95–575) by the Bureau of Alcohol, Tobacco and Firearms is to be curtailed.

Mr. Secretary, the enforcement of this law is of paramount importance in insuring collection of New York State and New York City cigarette taxes as well as those of other states, and is essential in preventing organized crime from diverting $150–200 million of such taxes each year.

The study of the Advisory Commission on Intergovernmental Relations estimated that prior to the enactment of the act, the states lost a total of $391 million in cigarette tax revenue each year. The Commission estimated that New York State alone lost $72.3 million each year.

However, in the last fiscal year, New York State's loss was reduced to approximately $28 million which I attribute largely to the efforts of the Bureau of Alcohol, Tobacco and Firearms in enforcing the Contraband Cigarette Act. I would expect the State's losses to increase by about $40 million annually if enforcement is curtailed. New York City would lose an additional $10–15 million annually if enforcement is curtailed.

I would point out that the legislative history of the Contraband Cigarette Act makes it clear that the cigarette bootlegging problem is not just a state and local problem. As the Senate Report on the bill noted: "... the interstate nature of organized cigarette bootlegging and the jurisdictional limitations of the various State investigative agencies have resulted in the State's efforts having little impact on the problem of cigarette bootlegging." (Sen. Rep. No. 95–962, p. 8; 5 U.S. Cong. & Adm. News '78, p. 5523). That, succinctly stated, is the reason the bill was enacted and why it should continue to be enforced.

For these reasons, I urge you to reconsider any decision to cease enforcing the act. It might well be that you would decide to transfer such enforcement functions rather

than to eliminate them, and if you do so, we stand ready and most willing to cooperate with any designated agency as we have with the Bureau of Alcohol, Tobacco and Firearms.

I urge also that, if possible, statements be avoided about the curtailment of enforcement. Publicity of that type only invites organized crime to resume interstate bootlegging activity.

Sincerely,

JAMES H. TULLY, Jr.,
Commissioner.

Mr. D'AMATO. Mr. President, in fact, Senate Report 95-962 included a study conducted by the Advisory Commission on Intergovernmental Relations which found that cigarette bootlegging was a serious problem in 14 States and a moderate problem in 8 other States. Those 14 States contained nearly one-half of the Nation's population. This commission estimated that $391 million in revenue for the States was lost as a result of illegal sales of cigarettes.

Mr. President, we cannot allow criminals and racketeers to rob the State treasuries of revenue that rightfully belongs to the people. In this time of tight fiscal policy, we must not hamper the State's efforts to collect tax revenue.

I share the Senator's concern for the need to cut the Federal budget and applaud your leadership in this committee. However, I am sure that you understand my concern over this very pressing problem in the State of New York.

Mr. ABDNOR. Mr. President, I certainly understand the problems that concern the junior Senator from New York. Additionally, I have no desire to curtail the important function that BATF performs in assisting State and local government.

Mr. D'AMATO. I thank the Senator. I hope that during the conference on H.R. 4121, you will bring to the attention of your fellow conferees this important problem and will urge that the necessary funding, which I understand to be an additional $2 million, will be included in the conference report.

Mr. ABDNOR. I can assure my colleagues from New York and the other affected States that I will discuss this with the conferees on H.R. 4121 for the purpose of insuring that this important function of BATF is properly attended to.

Mr. MOYNIHAN. Mr. President, I wish to thank the distinguished chairman the Senator from South Dakota, for taking the time to discuss this matter. And I wish to thank my colleague from New York who has been unflagging in his support.

Since the passage of the Contraband Cigarette Act of 1978, the Bureau of Alcohol, Tobacco and Firearms has played an important role in assisting State and local law enforcement and revenue officials in their efforts to stem illicit trafficking in contraband cigarettes. This effort has helped assure that States and localities receive the tax revenue from cigarette sales to which they are entitled.

For example as a result of the BATF effort, the State of Florida enjoyed a $19 million increase in revenue last year; New York, $10 million; and Ohio, $3.8 million. It is important to recognize that the interstate nature of trafficking in contraband cigarettes means that State and local law enforcement officials are often ill-prepared to control this activity without the active support of the Federal Government.

To illustrate the seriousness of this problem I would insert for the RECORD a reprint of a table from the 1978 hearings on the Contraband Cigarette Act, indicating the loss in tax revenue that was occurring prior to the involvement of BATF in this area.

The material follows:

A number of recent studies have detailed the nature and extent of cigarette bootlegging throughout the country. The most recent of these studies conducted by the Advisory Commission on Intergovernmental Relations (ACIR), found that cigarette bootlegging was a serious problem in 14 States and a moderate problem in 8 other States. The 14 States which considered cigarette bootlegging to be a serious problem contained nearly one-half of the nation's population. ACIR estimated that $391 million in revenue to the States was lost each year as a result of cigarette bootlegging, and for 13 States this amounted to as much as ten percent of their total cigarette tax revenue. As estimated in millions of dollars, the loss to the individual States as computed by ACIR is as follows:

Alabama	6.9
Arizona	3.4
Arkansas	6.5
California	16.0
Connecticut	15.1
Delaware	.2
Florida	35.7
Georgia	2.8
Illinois	21.7
Iowa	4.0
Kansas	1.6
Louisiana	2.1
Maine	2.1
Massachusetts	12.1
Michigan	6.9
Minnesota	12.2
Mississippi	1.3
Missouri	5.0
Montana	.3
Nebraska	1.7
New Jersey	26.0
New Mexico	1.0
New York	72.3
North Dakota	.2
Ohio	16.9
Oklahoma	1.2
Pennsylvania	35.6
Rhode Island	.3
South Dakota	.1
Tennessee	7.8
Texas	43.1
Washington	13.2
West Virginia	1.9
Wisconsin	13.6

These figures show that nearly 70 percent of the States are affected in varying degrees by cigarette bootlegging.

UP AMENDMENT NO. 792

Mr. HATFIELD. Mr. President, I call up my amendment which is at the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Oregon (Mr. HATFIELD) proposes an unprinted amendment numbered 792.

Mr. HATFIELD. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place insert the following new section:

SEC. . "Notwithstanding any other provision of law, the Secretary is authorized and shall seek to acquire the lands described in Section 505(a) of the Act of November 10, 1978 (92 Stat. 3467) by first acquiring federal excess or surplus lands of equivalent values in any State or States from the General Services Administration and then exchanging such excess or surplus lands for the lands described in Section 505(a) of that Act with the land owners. Exchanges shall be on the basis of equal value, and any party to the exchange may pay or accept cash, or furnish or accept other lands or properties, in order to equalize the value of the property exchanged."

Mr. HATFIELD. Mr. President, this is one of those hardship cases which I am offering as an amendment to this bill.

In 1969, the Federal Government commenced a study for a public park, a Federal park in Hawaii, entitled Koloko-Honokohau. Since 1978, this park of three private parcels has been so authorized for purchase by the Federal Government.

The only problem is that there has not been an appropriation for this land. The owners have now grown old and are perhaps in their last days. They are incurring very large medical bills. They have no way to dispose of their property and if they should pass on and their heirs inherit this property, the heirs will have to pay estate and other taxes.

So we have a hardship not only of the moment, but a pending hardship.

What this amendment provides is that the GSA would be authorized to exchange or trade Federal land of equal value for this Federal park, in order to relieve the present burden of the ownership of that land. This would give them a clear opportunity to retrieve the value of that land which they have otherwise no ability to sell to a private party because of the cloud that is over their land. The Federal Government shows no immediate plan to purchase the land.

I might say as chairman of the Appropriations Committee, that I do not see under this kind of budgetary restraint, moneys available in the park budget to make such a purchase. But we could move to relieve this unfair burden and this hardship by the opportunity to exchange Federal excess or surplus land of the same value. This is what the amendment proposes to do to relieve this hardship case.

Mr. DECONCINI. Mr. President, will the Senator from Oregon yield?

Mr. HATFIELD. I yield.

Mr. DECONCINI. Is there precedent for this?

Mr. HATFIELD. Yes.

Mr. DECONCINI. This Senator is not aware of the precedent.

Mr. HATFIELD. It is my understanding that there is precedent for such land exchange. It was certainly my intent that this authority be granted for Koloko-Honokohau when Congress passed my amendment to the Interior appropriations bill in November 1980. In fact, we just passed a bill out of the Energy and Natural Resources Committee to provide

for the Department of the Interior to make some land exchanges for the Georgetown waterfront land.

So it is my understanding that there have been other examples of action taken of this kind.

Mr. DECONCINI. Mr. President, will the Senator yield further?

Mr. HATFIELD. I yield.

Mr. DECONCINI. Will this fall under their already authorized authority? Will it fall under the GSA authorized authority?

Mr. HATFIELD. Yes. The GSA has general authority for handling surplus land to be exchanged in any given area. My amendment instructs the Secretary of the Interior to seek to acquire from GSA, excess lands, as well.

This is really, in effect, more of an instruction to GSA to move ahead on this type of action because the GSA has been very reluctant to undertake this task.

It also provides clarification of authority to make an exchange beyond the borders of Hawaii. Again, we are dealing with a very restricted area unlike, say, in the Senator's State or my State, where we may have a multiplicity of Federal ownership from various agencies and acreages. We have a greater restriction in Hawaii itself. So this would authorize Interior and GSA to perhaps exchange excess or surplus land without geographic limitation.

Mr. DECONCINI. I thank the chairman of the Appropriations Committee.

Mr. President, I have no objection to the amendment.

Mr. ABDNOR. Mr. President, I am more than happy to accept this amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oregon.

The amendment (UP No. 792) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DECONCINI. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I thank the leadership for their assistance on this.

UP AMENDMENT NO. 793

(Purpose: To strike section 609)

Mr. HATFIELD. Mr. President, I send a second amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Oregon (Mr. HATFIELD) proposes an unprinted amendment numbered 793.

On page 43, strike lines 10 through 16.

Mr. HATFIELD. Mr. President, if I could get a copy of the bill, this is on page 43. I direct the attention of the managers to the bill at this time. On page 43 of H.R. 4121, section 609, it is very brief and I shall merely recite it.

No part of any appropriation contained in this or any other Act, shall be available for interagency financing of boards, commissions, councils, committees, or similar groups (whether or not they are interagency entities) which do not have prior and specific statutory approval to receive financial support or instrumentality.

Mr. President, this simply deletes that provision which prohibits such moneys in the support of interagency activity.

We passed in this Chamber the bipartisan proposal here a week ago to set up a new Hoover Commission to study the reorganization of the Federal executive branch of Government. This does provide the kind of ongoing reorganization and review that should occur.

I think too frequently we think of these Hoover Commissions as a one-shot affair—it happens every 10 years or every 20 years—and there is nothing that has to be done in between.

I think one of the problems we have is an accumulation of things that should have happened in between these major reorganization studies. I, therefore, would not want to encumber any President, Democratic or Republican, from carrying on certain activities that involve interagency review or interagency cooperation. These activities attempt to break down some of the balkanization that exists by nature between the agencies. I think under such circumstances, the President should be free to reform and to propose alternatives that reduce the duplication and overlapping which occurs so readily amongst these various agencies.

This amendment merely deletes that section in order to empower the President to continue interagency activities and interagency reviews. They may not need to have authorization. That is, this authority need not be set into statute. They may just be informal, ad hoc, commissions or task forces, in existence for a 2-week period or a month-long period.

I do not think we should have to pass a law every time there is an interagency action that is geared toward the elimination or streamlining of the Government, which may save us money.

So I wish to suggest to the leadership that this section be deleted.

Mr. DECONCINI. Mr. President, will the Senator yield?

Mr. HATFIELD. I am happy to yield.

Mr. DECONCINI. Is there any cost related to this of which the Senator is aware?

Mr. HATFIELD. There is no budgetary impact of this amendment. Whatever activity would come under this section would have to be funded under existing budget authority and under the existing budget decisions.

Mr. DECONCINI. I have no further questions. I support the amendment.

Mr. ABDNOR. Mr. President, not only are we happy to accept the amendment but we commend the Senator for an excellent amendment. It is something we should have taken care of in the subcommittee.

Mr. HATFIELD. I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oregon.

The amendment (UP No. 793) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DECONCINI. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. I thank again the distinguished managers of the bill for the cooperation on these two amendments.

UP AMENDMENT 794

Mr. DECONCINI. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Arizona (Mr. DECONCINI), for himself, Mr. MCCLURE, Mr. SASSER, Mr. KASTEN, Mr. STEVENS, and Mr. D'AMATO, proposes an unprinted amendment numbered 794.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill insert the following:

None of the funds appropriated by this act shall be used to impose or assess any tax due under Subchapter D of Chapter 32 of the Internal Revenue Code of 1954, as amended, sections 4161 and 4181, in all cases where less than fifty (50) items are manufactured or produced per annum.

Mr. DECONCINI. Mr. President, I offer this amendment for myself, Senator MCCLURE, Senator SASSER, Senator KASTEN, Senator STEVENS, and Senator D'AMATO.

This amendment would have been offered today by Senator SASSER from Tennessee.

This amendment provides a limitation on the IRS activities relating to custom gunsmiths. This is, I believe, a very noncontroversial amendment which was approved by the Senate in a different form on the tax bill but was dropped in conference.

The amendment provides that none of the funds available for the IRS can be used to impose any excise taxes on the Nation's custom gunsmiths in those cases where these individuals manufacture 50 or less items annually. Presently excise taxes of 10 or 11 percent are now imposed on American firearms producers. The problem that we have today is that there are many, many custom gunsmiths throughout the Nation that manufacture only a few firearms a year and do not properly regard themselves as firearms manufacturers. These custom gunsmiths produce a limited number of hand-crafted guns either for themselves or for gun collectors throughout the country. They really are not firearms manufacturers.

Because there are some inconsistencies in the definition of what constitutes a firearms manufacturer many of these custom gunsmiths are concerned that the IRS will improperly judge them to be firearms manufacturers and thereby be held liable for back excise taxes. These custom gunsmiths legitimately fear that their small businesses and hobbies will be disrupted or even wiped out by just the threat of an IRS ruling.

This amendment simply provides that these custom gunsmiths will be free from arbitrary and unfair IRS action. I hope this amendment can be adopted.

Mr. President I ask unanimous consent that a fact sheet regarding this amendment be printed in the RECORD at this point.

There being no objection, the fact sheet was ordered to be printed in the RECORD, as follows:

FACT SHEET

The definition of manufacturer contained in Section 4181 of the IRS Code of 1954 and the Treasury Regulations on Manufacturers 26 CFR 48.02, are not consistent with the definition contained in Title 18 USC Section 921(a)(10) relating to firearms manufacturers. The above inconsistency has created a confusing and possibly financially devastating tax problem for custom gunsmiths found liable for back excise taxes. Few, if any, of the many individuals who handicraft custom firearms have ever considered themselves to be manufacturers. Recent rulings deciding the tax status of a firearms manufacturer have been based on such fine technical points as to whether the customer or the gunsmith supplies the action or barrel. Even an individual who makes one firearm for his or her own use can be liable for the excise tax.

When a custom gunsmith is judged by the IRS to be a manufacturer, he is then liable for the tax due on all firearms that he has made in the past. For the small custom gunsmith this is usually equated to bankruptcy.

Congressional intent in imposing the tax was to make it applicable to bona-fide manufacturers, not the individual custom gunsmith.

Custom gunsmiths who produce fifty or fewer firearms per year should not be classified as manufacturers. This change would address the unique nature of the individual craftsman, allowing him to stay in business.

There would be no revenue loss as custom gunsmith's have not considered themselves to be manufacturer's given the inconsistent definitions of manufacturer outlined above. In at least one case, the IRS spent nearly three years and a half million dollars to collect $10,000 from a custom gunsmith.

Exempting custom gunsmiths from being classified as "manufacturers" if they make less than fifty firearms per year would be a simple solution to a significant problem for custom gunsmiths and the nation's sportsmen.

Mr. ABDNOR. Mr. President, I just wish to compliment the Senator for bringing this inequity to the attention of the Senate. I also wish to compliment Senator SASSER, who has spoken to me about this amendment, as well as Senator MCCLURE.

The purpose of the amendment is to resolve a question which has arisen in the application of the excise tax to individuals who produce hand-crafted firearms and fishing rods and reels.

It is contrary to our legislative history for Congress to permit the IRS to distort the everyday meaning of the term "manufacturer" to include an individual who custom-makes a few firearms or fishing rods.

Additionally, I understand the IRS pursued this one custom gunsmith for 3½ years to collect $10,000. This is hardly an efficient tax policy of the administration.

It is an excellent amendment and I am happy to support it.

Mr. DECONCINI. I move the adoption of the amendment.

The PRESIDING OFFICER. Without objection, the excepted committee amendment will be temporarily set aside.

The question is on agreeing to the amendment of the Senator from Arizona.

The amendment (UP No. 794) was agreed to.

Mr. DECONCINI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. ABDNOR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

COMMITTEE AMENDMENT ON PAGE 74, LINES 7 THROUGH 15

The PRESIDING OFFICER. The question recurs on agreeing to the committee amendment.

Mr. DENTON. Mr. President, the issue today is quite simple and need not provoke a great deal of long emotional debate. This body has repeatedly debated the issue of the Federal funding of abortions, and has voted over 40 times on this question alone, so we pretty much know where we stand.

The matter that this amendment addresses is the one glaring inconsistency in our Federal policy on abortion. Over the past several years, the Congress has enacted, and the Supreme Court has upheld, the Hyde amendment restriction on medicaid-funded abortions. Today, however, the Federal Government continues to assume partial financial responsibility for some 20,000 abortions at a cost of over $9 million a year. These abortions are paid for under the Federal employees health insurance program, which is financed through a 60-percent contribution by the Federal Government.

We in the Congress have denied, since 1976, and I believe rightfully so, the use of taxpayers' dollars for the taking of innocent lives of unborn children of indigent medicaid recipients while continuing to allow the use of tax dollars for abortion for Federal employees.

There are those in this body who believe that Federal health employee benefits are a form of compensation that should not be interfered with, notwithstanding the fact that they support the thrust of my amendment. It must be remembered, however, that participation in this program is not mandatory for Federal employees and that this is not an entitlement program. The Federal Government offers employees these benefits as a means of protecting them against high and unpredictable costs of medical care. The types of benefits offered by any particular health plan are not now nor have they ever been fixed. The Office of Personnel Management is authorized to exclude or include any benefits that it considers necessary or desirable. Currently, benefits such as eyeglasses, dental care and even routine pap semars to detect cervical cancer are excluded by some of the major carriers. Some 18 of the plans exclude coverage for nontherapeautic abortions. Moreover, the CHAMPUS health program for military personnel and their dependents does not finance abortions of convenience.

The essential point to be made is that the Federal Government as an employer is not obligated to finance abortions in which the life of the mother is not in jeopardy. We must realize the character of nontherapeutic abortion. As the Supreme Court said in the McRae against Harris case, upholding the constitutionality of the Hyde amendment:

Abortion is inherently different from other medical procedures because no other procedure involves the purposeful termination of a potential human life.

Congress has no obligation to support the funding of this medical procedure simply because it is legal. The taking of human life in the womb is a concern of Congress. If abortion is truly a private matter, as has been repeatedly contended, then it needs no public financing.

In rejecting this committee amendment, this body will aline itself with the expressed position of both the House and the administration. I would note that the Ashbrook amendment was passed by the House by a vote of 253 to 167 and that the Senate Appropriations Committee struck the amendment by a vote of 13 to 7. The Senate has repeatedly voted to uphold the principle that the Federal Government should not finance abortions. Those of us who voted to add similar language with regard to medicaid-funded abortions in May should vote for the restoration of this House-passed amendment. Additionally, I would note that the Office of Personnel Management recently exercised its legitimate authority to reduce the abortion coverage presently afforded under Federal health insurance programs.

The American Federation of Government Employees filed suit against the administration, challenging the legality of OPM's decision not to approve any health benefit plan that provides abortion coverage. A lone Federal judge held that OPM had acted arbitrarily and outside the scope of its statutory authority, and he ordered that OPM not eliminate abortion coverage in the AFGE plan. Subsequently, several other employee organizations filed similar law suits before the same judge. In light of the judge's decision, OPM has had to permit some plans to continue their abortion coverage.

The basis for the court order is that the administrative decision to exclude abortion benefits is not in line with Executive or congressional intent, even though the House has overwhelmingly passed the Ashbrook amendment. In fact, the court decision and administrative actions have left an even more inconsistent arrangement. Therefore, it is incumbent upon the Senate to clarify congressional intent through completion of the legislative process, by creating a statutory prohibition of funding abortion coverage.

In closing, I would stress, again, that the Ashbrook amendment in no way denies Federal employees the right to obtain or contract for coverage of abortions at their own expense through their insurance carriers. It merely withdraws that portion of Federal participation in paying for abortions. We also are not

talking about taking away any earned benefits. The Government's share for medical care would remain constant for any contract offered in the future. The scope of the abortion benefits will simply be limited in much the same way as occurred in Nebraska and Kentucky recently.

It is time to end this patent inconsistency in Federal policy, and I urge my colleagues to join with me in rejecting the committee amendment.

I respectfully ask unanimous consent that the RECORD include a recent letter from Mr. Donald Devine, Director of the Office of Personnel Management which states, "The Ashbrook amendment is in accord with the Administration's position on abortion."

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OFFICE OF PERSONNEL MANAGEMENT,
Washington, D.C., October 30, 1981.

Hon. JEREMIAH DENTON,
U.S. Senate,
Washington, D.C.

DEAR SENATOR DENTON: Thank you for your letter of October 28, 1981, concerning the Ashbrook Amendment to the Treasury Postal Appropriations bill and your kind remarks.

As you may know, the Office of Personnel Management has recently negotiated a reduction in abortion coverage in all but a few of the insurance plan contracts for 1982. The plans which will provide abortion benefits with Federal participation are offered by employee organizations that have challenged my efforts to limit abortion coverage in the Federal Employees Health Benefits program.

On October 8, 1981, a Federal District Court enjoined me from eliminating or modifying coverage for therapeutic abortions in the plaintiff's 1982 contract, without the agreement of the plaintiff. It is important to note, however, that in the order of the Court, Judge Gesell specified that nothing contained in that order should be "deemed to apply if the Office of Personnel Management is prohibited by statute from funding therapeutic abortion coverage under 1982 benefit plans."

On July 28, 1981, I informed Congressman William Ford, Chairman of the House Committee on Post Office and Civil Service, that the Ashbrook Amendment was in accord with the Administration's position on abortion. That position remains unchanged.

Thank you for your continued interest in this matter.

Sincerely,

DONALD J. DEVINE,
Director.

Mr. DENTON. I urge the adoption of the amendment.

Mr. President, I ask unanimous consent that statements by Senators NICKLES and JEPSEN be entered in the RECORD.

● Mr. NICKLES. Mr. President, I would like to state my support for Senator DENTON'S amendment to H.R. 4121. This amendment would prohibit Federal tax dollars from going to subsidize abortions for Federal employees, except where the life of the mother is endangered.

Prior to OPM's actions this fall, 90 of the 120 health insurance plans offered to Federal employees included some form of coverage for abortions. The Washington Post reported that this policy cost the Government $9 million for a total of 17,000 abortions.

Early last summer OPM realized that the Federal employee health benefits program was in a financial crisis—with the rising cost of health care milking the fund dry. Something had to be done. As part of a plan to cut down on this fall's premium increases, OPM asked the various carriers to cut out or reduce in three areas: mental health benefits, dental benefits, and abortion benefits. This action was seen as consistent with the current administration, both in fiscal and moral terms. However, a court ruling has since said that such a restriction on abortion by the Director of the Office of Personnel Management was beyond his scope of authority.

Such an action is not, however, beyond the scope of the Congress. Since the court decision, OPM has worked out a "compromise agreement" which results in five health packages still offering coverage for abortion. About 292,000 Federal employees are currently enrolled in those plans which cover abortion, but that is subject to change with the approaching open season.

What is needed now is a clear sense from Congress as to our position toward any Federal funding of abortion. Just this past May we voted against Federal funding for abortion under medicaid. In the past year, the House has voted three times for this very same amendment that my colleague, Senator DENTON, has proposed today. Now it is time for the Senate to take a stand on this issue. I say, let us be consistent. If we are going to stand against subsidizing the taking of the innocent life with those who are poor, then we should also prohibit such Government subsidization within our own ranks.

Now, I know that there are some who have alleged that such a policy is denying Federal employees what other workers in the private sector freely receive. There is concern that somehow Congress is butting into private collective bargaining negotiations by passing this amendment. In response to such concerns, I would point to the very significant difference of this situation: No other employee group except those working for the Federal Government has 60 percent of their health premium paid for with tax dollars. Because over $2 billion goes from the Federal till toward premium purchases for Federal employees each year, we have an obligation—a moral responsibility—to make sure that such money is not being used in a manner that is offensive to the American public. And it is offensive to the American public. We are responsible to the American people for how we spend their tax dollars. Let us be consistent. The Federal Government is the employer, and we belong in the collective bargaining process.

In addition, we are not, as some would allege, denying Federal employees any right to an abortion that those in the private sector may have: We are simply saying that tax dollars should not be used to finance such an activity.

I know that there are other questions that my colleagues have as they consider this amendment. Those of a procedural nature, those related to substance, those related to "Mount Sinai", and other practical considerations. I hope that we have full opportunity to address each question and concern to the satisfaction of everyone.

I believe that this is an issue that needs to be resolved. Congress needs to be consistent in its opposition to the Federal funding of abortion. What we decide is appropriate public policy for one segment of our society should be the standard for all.

Therefore, I urge the adoption of this amendment and encourage my colleagues to stand firm against the Federal funding of abortion.●

● Mr. JEPSEN. Mr. President, when the Office of Personnel Management saw fit to revise its employee health plans to prohibit Government funds from being used for nontherapeutic abortions, I hailed that action as a major victory in support of our Nation's unborn. This decision was consistent with the policies of both this administration and this Congress.

However, opponents of this decision have succeeded in blocking its implementation by convincing the Court that the OPM acted beyond its authority. If this is indeed the case, then it falls to the Congress to lead the way in overcoming this obstacle.

The action taken by Dr. Donald J. Devine, the Director of OPM, originally moved to correct a glaring inconsistency in abortion policy, that of allowing roughly 3 million Federal employees to use Government funds to help pay for abortions while prohibiting medicaid recipients from the same service. The new regulations would have blocked Federal funds from even indirectly subsidizing an estimated 17,000 annual abortions at a cost of nearly $10 million.

The Senate must act now to legitimize the OPM decision. The amendment introduced by Congressman ASHBROOK to this appropriations bill must be adopted. It seeks to accomplish through legislation what OPM could not do through regulation. We must now take a forceful stand to remedy the inequities of the present OPM policy and to insure the future protection and sanctity of unborn human life.

It is time for the Congress to reassert the underlying political and moral philosophy of our country, embodied in the Declaration of Independence and the Bill of Rights to the Constitution, which advocates the protection of those who have no one else to protect them.●

Mr. DENTON. Mr. President, my purpose is to place the Senate on record regarding this important issue. I ask for the yeas and nays at this time.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HELMS. Mr. President, I fully support this action proposed by the distinguished Senator from Alabama (Mr. DENTON). All Americans morally committed to the sanctity of innocent human life certainly support the Senator's leadership on this issue today.

Mr. President, some may contend that the issue today is not abortion. They

would assert that the issue is whether Federal employees should be allowed to negotiate for the health benefits they consider appropriate. In this case, abortion is to be considered a "health benefit."

Recently, before the Subcommittee on the Constitution chaired by the able Senator from Utah, a physician testified on the so-called "prochoice" side of the abortion issue. This physician estimated that there are some 10,000 cases nationwide each year in which abortion is necessary to save the life of the mother. Mr. President, there are some 1½ million abortions reported every year. While some argue that the 10,000 figure is inflated, we can nevertheless conclude that well under 1 percent of the abortions performed annually are necessary to save the life of the mother.

Except in those rare cases where abortion is truly necessary to save the life of the mother, abortion should not and must not be thought of as simply a health benefit. The action under discussion today would, of course, permit continued funding, and I quote the language, "where the life of the mother would be endangered if the fetus were carried to term."

Mr. President, innocent unborn life should not and must not be taken for any reason less compelling than to save the life of the mother. The inclusion of elective abortion in group health plans directly contributes to a sadly misguided viewpoint evident in some segments of our society. This viewpoint regards abortion as nothing more than a routine medical procedure. Americans morally committed to the sanctity of innocent human life recoil from this tragically misguided viewpoint.

The right of an innocent unborn child to life is not negotiable as part of some health benefit package. The right of an unborn child to life is among the most fundamental of human rights.

Mr. President, last year, 17,000 abortions were performed under the Federal employee health benefit program. The Federal Government pays at least 60 percent of the cost of the health benefits. The issue today is clearly abortion and the Federal funding of abortion. Again, I am pleased to give my full support to the efforts of my distinguished colleague from Alabama.

● Mr. ZORINSKY. Mr. President, through the Helms-Hyde amendment, we have long since ended payments for abortions under medicaid, except when necessary to save the life of the mother. Yet we continue to fund abortion-on-demand for Federal employees, congressional staff, and dependents, through the Federal employees health benefits program. This is a blatant inconsistency.

The Federal Government pays at least 60 percent of the cost of FEHB (Federal employees health benefits), which paid for 17,000 abortions last year. Like the Helms-Hyde amendment, the amendment proposed today by my distinguished colleague from Alabama would permit abortion funding "where the life of the mother would be endangered if the fetus were carried to term." This amendment would not interfere with contracts currently in effect. When I was the mayor of Omaha, I led the successful effort to eliminate abortion funding from the city's employee health plan.

Mr. President, it seems to me that on the grounds of consistency alone, regardless of other reasons, I and others who voted for the Helms-Hyde amendment cannot fail to support this amendment as well.

There were those who argued, "Since abortion is legal, the Helms-Hyde amendment is unjust because it denies to the poor what is available to the wealthy." I and others rejected this argument because we recognize that every abortion destroys a living human being. Therefore, no consideration less weighty than the life of the mother itself can justify abortion. And if there is discrimination involved, it is not against the poor, but against the unborn children whose lives cannot be saved by the Helms-Hyde amendment because their destruction is funded through other sources.

In some States, the cost of elective abortions for low-income women has, unfortunately, been assumed by the States. But in those States in which this has not occurred, the number of women in this group who carry their children to term has increased by as much as 40 percent, according to the Center for Disease Control.

Congress has ended Federal funding of abortion-on-demand under medicaid. And we are speaking today of another program which is directly funded and administered by the Federal Government. I suggest that we ought not to continue to provide for the relatively well-to-do something which we have rightly denied the poor. I urge adoption of the amendment.●

The PRESIDING OFFICER. The question is on agreeing to the committee amendment. The yeas and nays have been ordered, and the clerk will call the roll.

Mr. DECONCINI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. D'AMATO. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 795

(Subsequently numbered Amendment No. 1241.)

Mr. D'AMATO. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The Chair will state that only an amendment to section 619 would be in order without unanimous consent.

Mr. D'AMATO. Mr. President, I ask unanimous consent that my amendment on industrial development bonds be considered to be in order.

The PRESIDING OFFICER. Is there objection? The Chair hears none. Without objection, it is so ordered.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from New York (Mr. D'AMATO), for himself, Mr. WEICKER, Mr. STEVENS, and Mr. DOLE, proposes an unprinted amendment numbered 795.

Mr. D'AMATO. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place insert:

SEC. . (a) None of the funds appropriated by this Act may be used to—

(1) enforce Revenue Ruling 81-216 or the proposed amendments to Income Tax Regulations § 1.103-7 and § 1.103-10 which were published in the Federal Register on October 8, 1981, or

(2) propose, promulgate, or enforce any ruling or regulation reaching the same result as, or a result similar to, such Revenue Ruling or Regulations, in connection with a qualified issue, or

(3) issue rulings or regulations which treat as exempt from taxation under section 103 (b) (6) of the Internal Revenue Code of 1954 any interest earned on an obligation the proceeds of which are used for a disqualified facility.

(b) (1) For purposes of subsection (a), the term "qualified issue" means a single issue (which is part of a composite or multiple series of issues)—

(A) the obligations of which are directly or indirectly guaranteed or secured in whole or in part by—

(i) a State or political subdivision thereof or an instrumentality of either, or

(ii) in the case of an issue all of the proceeds of which are used for agricultural purposes, a qualified person (within the meaning of section 46(c) (8) (D) of the Internal Revenue Code of 1954 determined without regard to clauses (iii) and (iv) thereof), and

(B) none of the proceeds of which are used in connection with a disqualified facility or a facility with respect to which, at any time before January 1, 1987—

(i) any disqualified person used more than 5 percent of the facility, or

(ii) more than 25 percent of the facility is (in the aggregate) used by the disqualified persons.

For purposes of subparagraph (B), use by a related person (within the meaning of section 103(b) (6) (C) of such Code) shall be treated as use by the disqualified person.

(2) (A) For purposes of paragraph (1), the term "disqualified person" means a person (other than an exempt person within the meaning of section 103(b) (3) of such Code) which has aggregate capital expenditures for any purpose which, for the period beginning October 1, 1979, and ending September 30, 1982, exceed $25,000,000.

(B) For purposes of determining the aggregate capital expenditures of any person under subparagraph (A), there shall be taken into account the capital expenditures of all persons which are—

(i) related persons (within the meaning of section 103(b) (6) (C) of such Code) with respect to such person; or

(ii) guarantors of any portion of the issue with respect to which a determination is being made under this subsection other than a guarantor which—

(I) is a State or a political subdivision thereof or an instrumentality of either, or

(II) in the case of an issue all of the proceeds of which are used for agricultural purposes, a person described in paragraph (1) (A) (ii), or

(III) One or more financial institutions which are not related persons (within the meaning of Section 103(b)(6)(C) of such Code) to the user of the proceeds of the issue.

(C) For purposes of this paragraph, the term "captial expenditures" has the meaning given such term by section 103(b)(6)(D) of such Code, except that such term shall not include any amount paid or incurred by the taxpayer which constitutes a qualified research expense (within the meaning of section 44F(b) of such Code).

(c) For purposes of subsection (a) and subparagraph (b)(1)(B) a "disqualified facility" is any private or commercial

(i) golf course,

(ii) country club,

(iii) massage parlor, or

(iv) tennis club.

(d) It is the sense of the Senate that after August 23, 1981, and until Congress enacts legislation which affects section 103(b)(6) of such Code, the Secretary of the Treasury or his delegate should in all cases enforce any ruling or regulation described in subsection (a) (1) or (2) in a manner consistent with the provisions of subsection (a).

Mr. D'AMATO. Mr. President, I do not wish to belabor my interest in the industrial development bond program. However, I rise to propose an amendment to H.R. 4121 that deals with IRS Revenue Ruling 81–216. This amendment is virtually the same as the amendment that was passed on House Joint Resolution 357 and passed again on House Joint Resolution 370 on December 11, 1981. This amendment is cosponsored by Senators WEICKER, STEVENS, and DOLE, who have all worked tirelessly on this issue. During consideration of House Joint Resolution 370, I delivered a long statement about the IDB program and the necessity for keeping it viable. For the sake of brevity, Mr. President, I will not reiterate that statement, but commend it to the attention of any of my colleagues who are interested. That statement explains both the need for and the meaning of this amendment.

I would further like to point out that this amendment is in no way intended to prohibit—nor in my opinion as the original sponsor of this amendment, does it prohibit—the grandfathering process now being followed by the IRS for those bonds which had begun the process of being issued prior to August 24, 1981.

Mr. DOLE. Mr. President, the amendment regarding multiple lot industrial development bonds offered by Senator D'AMATO is an amendment identical to that adopted by the conference committee on the vetoed continuing resolution and included in the continuing resolution recently passed.

The conference committee version of this amendment was somewhat changed from the Senate compromise version worked out between Senator D'AMATO and myself. As I said when this body voted on the conference committee report, while I wholeheartedly stand behind the original Senate compromise, I strenuously oppose the conference changes.

Despite my opposition to the conference changes, I lend my name to this amendment today to reiterate the messages that both the Senate compromise and the conference agreement make clear: First, big business is an inappropriate beneficiary of the Federal credit subsidy these bonds provide; and second, State or locally backed bonds are to be favored over bonds issued without that backing.

As I have stated before, a message or signal is all that can be derived from this amendment since the amendment does not amend the Internal Revenue Code—and until the code is amended—the disputed revenue ruling, No. 81–216, remains the prevailing interpretation of substantive law, regardless of whether it can be enforced or, temporarily, not enforced. All parties now appear to agree on this point. Because, by adopting this amendment, we do not sanction the issuance of any tax-exempt bonds that would not already be tax exempt under the rule of 81–216, I think it more important to reiterate the basic message of this amendment, rather than delay consideration of this measure because of my disagreement with the conference changes.

So that there is no mistaking what this amendment means, I ask unanimous consent to insert in the RECORD my previous remarks on the subject, including the remarks of the chairman of the Ways and Means Committee, Mr. ROSTENKOWSKI, which I endorse, and a resolution approved by the National League of Cities at their December 2 annual meeting.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

REMARKS OF SENATOR DOLE OF NOVEMBER 22, 1981

Mr. President, I would like to make a brief statement about the House amendment to Senate amendment No. 43 dealing with multiple lot industrial development bonds.

As I said on the floor when the Senate version of this amendment was adopted, the Senate amendment was the result of a negotiated compromise among several Senators.

This Senator stands behind that agreement. Unfortunately, the conference has changed the carefully-drafted language of our amendment and attempts to broaden it.

In spite of this, I will not repudiate the agreement and will not oppose this House amendment, though I strenuously oppose the changes.

I do, however, want to repeat what I said when this provision passed the Senate. I do not believe that this appropriation rider changes the underlying tax code. It affects only the enforcement of the code. Unless we amend the code, we have not said that this type of bond is tax exempt.

I have been asked by the chairman of the Ways and Means Committee, Mr. ROSTENKOWSKI, to express his views on the amendment. I ask unanimous consent to have his remarks printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

REMARKS OF REPRESENTATIVE DAN ROSTENKOWSKI

Mr. ROSTENKOWSKI. Mr. Speaker, I rise to express my strong reservation with respect to the matter contained in Senate amendment numbered 43 on which the conferees are recommending that the House recede and concur with an amendment. My objections are both procedural and substantive in nature.

The amendment attempts to prohibit in certain circumstances the enforcement of Revenue Ruling 81–216, and regulations reaching the same result.

The amendment would prohibit the enforcement of the ruling in the case of bonds which are backed by a State or locality where the proceeds of the bonds are not to be used by very large corporations—with more than $25 million in capital expenditures, worldwide, in a 3-year period.

First of all, on procedural grounds, we have a Senate floor amendment which attempts to negate a proper interpretation by the Internal Revenue Service of a substantive provision of the tax laws by limiting the discretion of the Service in its internal use of its administrative moneys.

Not only is the amendment not properly within the purview of the appropriations process, but the conferees have even gone to the point of expanding its scope to broaden its impact. Those of us on the tax-writing committees find this to be improper and, in a sense, irresponsible inasmuch as the matter addressed by the amendment is a complex one with policy implications which should be carefully reviewed by the tax-writing committees prior to the taking of congressional action.

In a more important sense, I would like to inform my colleagues that it is my view that the action recommended by the conferees in accepting this amendment will have no substantive effect. It will not result in the issuance of bonds which would be prohibited absent the existence of this appropriations rider.

It should be pointed out that, inasmuch as this language in no way amends the Internal Revenue Code, it cannot affect the legal basis under which bonds can be issued under existing law.

Since it is customary for bond counsel to issue opinions on the legal basis for the tax exemption of the bonds in question. I wanted to make this statement at this time so that no bond counsel or potential purchasers would improperly construe that this simple funds limitation has the effect of legalizing the bonds in question.

Once the continuing resolution expires, the IRS will be able to enforce the Revenue Ruling in question, Revenue Ruling 81–216, even as to the interest earned on bonds issued during the period of this appropriations freeze.

I would want to inform my colleagues that I have discussed this issue at great length with the Chairman of the Senate Committee on Finance who shares my view that this language is ineffectual in achieving the purpose which it seeks to accomplish. The sole effect of this language is to delay IRS action in this area. It cannot and does not, the sense of the Senate language relating to future periods notwithstanding, change the underlying law which in the end controls the legal basis for the granting of the tax exemption.

It is unfortunate for the entire legislative process that one or two law firms specializing in the processing of these transactions have attempted to modify the tax laws without going through the appropriate committees which Congress established to deal with the tax laws. In so doing, they have added nothing—except confusion to the whole area of tax-exempt bonds.

REMARKS OF SENATOR DOLE OF NOVEMBER 19, 1981

Mr. President, this amendment is cosponsored by a number of Senators who have been working on this amendment for about 3 weeks. I commend the distinguished Senator from New York (Mr. D'AMATO) for his untiring efforts. I also commend his staff, my staff, and Senator METZENBAUM and his staff and others, Senator STEVENS and Senator WEICKER and their staffs for their efforts.

What we have done is try to tighten up the issuance of multiple lot industrial development bonds and to send a signal about tightening the issuance of all IDB's.

This amendment is intended to replace an amendment sponsored by those Senators I have mentioned and adopted by the Appropriations Committee. Their original amendment would have prohibited the Treasury Department from enforcing revenue ruling 81-216, a ruling interpreting present law to prohibit multiple lot or umbrella bonds—those bonds issued where an issuer or corporate user strings together a series of bond issues with some form of common or "pooled" security. The substitute puts certain limits on the original amendment.

It is important, crucially important, however, to note that neither the original amendment nor this compromise substitute in any way amends substantive law. Both speak only to the enforcement of the law—neither changes the Internal Revenue Code.

BIG BUSINESS IDB USE

Why then is this substitute amendment important? It is important because it sends the message that these bonds, this Federal credit subsidy, is not for big businesses.

The ruling that spawned this amendment, and the proposed regulations that would replace that ruling, do not merely affect small business and State-sponsored umbrella bond programs designed to provide small business with federally subsidized credit. They also affect big business and big business multi-State or multicounty bond issues.

Prior to 81-216, it was common practice for major corporations—manufacturers, motel chains, fast food franchisors—to float multiple lots of $1 million bonds—all commonly guaranteed by the parent corporation or sold to a single investor—to finance capital expenditures all over the country. A fast food chain, for instance, cou'd float a $20 million linked series of bonds in $1 million lots—each lot for a different hamburger stand in 20 different counties—but all lots backed not just by one stand but also by the credit of the national chain. The bonds holders, in such a case, certainly do not believe they are investing in a part of a single $1 million bond issue. They look to the credit of the national chain and the revenues from all the bond-financed projects for security. Ruling 81-216, and the proposed regulations, would prevent this.

If the substitute is not accepted, we benefit not just the Mom and Pop grocery stores and the little tool and die manufacturer in a dying northeastern city. We help Dow Chemical and McDonalds, too.

In fact, it appears that overriding 81-216 without any limits as the resolution now does, would disproportionately help big business—of the composite or multiple lot issues that have been submitted to the IRS for "grandfather" relief from 81-216, 75 percent are to be used by big business, corporations with nationally known names.

While the IRS cannot disclose the taxpayers' names, they have given us figures and broken down those figures by industry group. There have been requests for relief for $1,093 billion in bonds. Of that $319.8 million are for big, nationally recognizable businesses:

	Millions
Big textile companies	$48.8
Big chemical companies	116.7
Big hotel/motel companies	66.9
Big fast food companies	114.2
Big private hospital operators	25.8
Other big business	445.5

Though the IRS cannot disclose taxpayers' names, commercial sources can, and they confirm that big business was the primary target of 81-216. Moody's Bond Survey, dated August 17, 1981, for instance, shows a number of composite issues for big corporations planned for late August, presumably forestalled by 81-216:

	Millions
Dow Chemical	$21.7
St. Regis Paper	5.5
American Stores Co	17.25
W. R. Grace & Co	4.6
Kimberly Clark	3.0
RCA Corporation	2.0

Other information obtained by the Treasury under circumstances where taxpayers confidentially need not be maintained shows a similar pattern of big business use:

	Millions
International Paper Co	$12.15
J. P. Stevens & Co., Inc	30.3
Spring Mills, Inc	5.7
The Bendix Corporation	12.7
Scott Paper	8.8

Information compiled by the Congressional Budget Office on big business use of composite IDB's is truly eye-opening. Since January 1977 a large number of large corporations have issued millions of dollars worth of composite bonds. Let me read you a few examples:

	Millions
Airco	$10
Armco	17.4
Burlington Industries	17
Colt Industries	24
Container Corp. of America	15.7
Dow Chemical	35.7
General Motors	6.8
B. F. Goodrich	10.1
Hoover Univeral	30.2
International Harvester	11.4
Kroger	10.8
McDonalds	42
Nabisco	6.7
PPG Industries	10
Ralston Purina	12.1
Safeway	14.3
Union Camp	25
Weyerhaeuser	51.4

These companies have done nothing wrong—I do not criticize them for using composite IDE's—I criticize myself and Congress for permitting them to use composite bonds. And I shall continue to press for a substantive change to the code that will stop these companies from using any IDB's—composite issues or otherwise.

The National Federation of Independent Businesses, a leading small business organization, just completed a poll of their membership on the use of small issue IDB's generally. 40,000 to 50,000 members responded. These are true small businesses—the average member has 8 employees and $500,000 annual gross sales—the sort of business that is the backbone of American enterprise—the source of the most jobs and the most new ideas. The results? Only 37 percent were for the continued availability of any small issue IDB's—any small issue bonds, not just composite bonds. Forty-nine percent were opposed to the issuance of any small issue bonds. The real small businessmen know who use this credit subsidy—they know that large- and moderate-sized businesses can use these bonds, particularly composite bonds, easier than they can. They want this abuse stopped.

A vote against the compromise substitute is, quite simply, a vote for big businesses continued exploitation of this program. If we send big business that message today we may as well junk any responsible plans to reform IDB's into an effective, small business capital formation tool. If we send big business that message today we might as well vote for Federal credit subsidies for everybody.

ONLY THE BIGGEST OF BIG BUSINESS ELIMINATED

The compromise substitute would limit big business use of composite bonds and composite bonds only, with a $25 million, 3-year capital expenditure limit; $25 million over 3 years is not much of a limit. It only eliminates the biggest of big business—the Fortune 1,000—the type of corporation that, on the average, has more than $150 million annually in business receipts and that has more than $150 million in total assets. These megacorporations constitute only one-tenth of 1 percent of all corporations. If these companies were prohibited from using any small issue IDB's—and that is not what we are doing today—we would be taking a very small bite, about 16 percent, out of the total small issue IDB program—16 percent out of $9.2 billion of bonds that result, this year alone, in over a billion dollars of lost revenue to the Treasury.

For my taste, this is too small a bite. I would prefer a $10 million limit, or even smaller, to take this credit subsidy away from big business. The top one-tenth of 1 percent—companies with $150 million in annual receipts—seems a pretty select group. My definition of big business goes quite a bit deeper.

I accepted this compromise $25 million figure only because it is a step in the right direction—not because it is where I would like to stop. When the Finance Committee considers substantive IDB legislation I would like to consider a lower limit. I hope the small business community, in the interim, will seriously consider whether we should cut a little deeper than the top one-tenth of 1 percent.

STATE OR LOCAL BACKING

The second message this substitute sends is that State and locally guaranteed or backed bonds are to be favored over bonds that are issued without that backing. In the composite or multiple lot area, this means that State-backed programs such as New York's Job Development Authority or Connecticut's small business program would be permitted if this amended the Code while McDonalds-backed composite bonds are not.

Where a State or locality puts some of its credit on the line, then we are relatively assured that a responsible State or local official will look carefully at the users of these bonds. Where no State or local commitment is required, not even the most responsible public official can withstand the pressure to hand out a Federal credit subsidy to just about anybody—because it does not cost him anything at all. And we cannot blame him, really, since his competition in the neighboring State will be under the same pressure and just may give in.

State or local backing makes it easier to say no—easier for States and localities to target the Federal credit subsidy to those who deserve it.

SUBSTANTIVE LEGISLATION SHOULD GO FURTHER

To eliminate all the abusive uses of IDB's, substantive legislation ought to go further than this amendment would indicate. The limits in this amendment are a step in the

right direction but ought to be much tighter. In addition, we should consider putting a limit on the total amount of bonds any one firm has outstanding at any given time. Further, the combination of the accelerated cost recovery system that we enacted this year, when added to tax-free financing is too rich. Substantive legislation ought to soak up some of the excess gravy and prohibit the full use of both ACRS and IDB's procedural restraints are also necessary.

In sum, then, this substitute sends a message—a little garbled perhaps—but clear in one respect at least: big business should not use IDB's. I wish the message could be stronger but, for the time being this will suffice.

NO PRACTICAL EFFECT

Neither this amendment nor the one it replaces can change substantive law. Neither amendment can restore the so-called status quo of August 23, 1981, the date 81-216 was published. Neither amendment will have a practical effect—this tempest in a teapot is symbolic—and the signals sent are far from clear.

Why will neither have a practical effect? Because no appropriations measure can have a practical effect in the tax-free bond area. Only a change to substantive law, a change to the Internal Revenue ruling 81-216, and substantive law cannot be changed on an appropriations bill or continuing resolution. All we can do here is prohibit enforcement of an interpretation of law for a limited period.

Why will the enforcement prohibition not work? Remember that tax-exempt bonds cannot be sold without a tax lawyer's opinion or a ruling letter from the IRS stating that the bonds are exempt. No tax lawyer will render an unqualified favorable opinion on a multiple lot bond issue just because the IRS cannot enforce their regulations for a few months. Call them—my staff called several reputable bond counsels and all agreed—they could not issue a clean opinion, appropriations rider or not appropriations rider.

An appropriations rider will not give the tax lawyer adequate comfort and unless he's comfortable, the all-important clean tax opinions will not be forthcoming. The result? Nothing—no tax opinions, no bonds. Until the Finance Committee holds hearings on this issue and marks up a bill, and until Congress amends the code, this is as it should be.

RESOLUTION NO. 4

REFORMING SMALL ISSUE INDUSTRIAL DEVELOPMENT BONDS

Whereas, financial markets are inter-related; and

Whereas, some state and local governments find it difficult to compete with the Federal government and private sector for long-term capital funds under current laws permitting federal programs and private sector interests to issue tax-exempt securities; and

Whereas, legitimate and traditional capital investment needs of states and cities are not being effectively met because of the burgeoning use of small issue tax exempt industrial development bonds;

Now, therefore, be it resolved, That the National League of Cities believes that in order to ensure and demonstrate the responsible use of small issue industrial development bonds, Federal laws should require that the elected policy making bodies of state or local governments must:

(a) hold a public hearing to declare the public purpose to be served by tax exempt revenue bonds,

(b) approve each issue,

(c) report all issues to the Treasury,

(d) remain functionally and financially associated with the obligations created.

Mr. D'AMATO. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and neas were ordered.

Mr. ABDNOR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. D'AMATO. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. PACKWOOD. Objection.

The PRESIDING OFFICER. Objection is heard.

The clerk will continue to call the roll.

The legislative clerk resumed the call of the roll.

Mr. D'AMATO. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. D'AMATO. Mr. President, I ask unanimous consent that the order for the yeas and nays be vitiated.

The PRESIDING OFFICER. Is there objection? Hearing no objection, the order for the yeas and nays is vitiated.

Mr. D'AMATO. Mr. President, I ask unanimous consent that there be a showing of hands on the amendment as proposed.

The PRESIDING OFFICER. Does the Senator request a voice vote?

Mr. DECONCINI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ANDREWS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection?

Mr. DECONCINI. I object.

The PRESIDING OFFICER. Objection is heard. The clerk will resume the call of the roll.

The legislative clerk resumed the call of the roll.

Mr. ANDREWS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. Objection.

Mr. PACKWOOD. Objection.

The PRESIDING OFFICER. Objection is heard. The clerk will resume the call of the roll.

The legislative clerk resumed the call of the roll.

Mr. ANDREWS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

● Mr. D'AMATO. In the continuing resolution which Congress adopted last week, and which will become public law tomorrow, an amount of $20 million was transferred from the general postal subsidy to the revenue foregone account to lower mailing costs for libraries, educational publications, and small newspapers. The effect of this transfer was to set the funding level for the revenue foregone account at $639,240,000. I would like to ask the chairman of the Subcommittee on Treasury, Postal Service Appropriations, whether it is his understanding and intent that this level be maintained in conference with the House on this bill.

Mr. ABDNOR. That is the intent of this Senator. Congress has twice voted for that level of funding, and I believe it is something we can and will accomplish in the conference.

Mr. D'AMATO. The transfer of the $20 million is meritorious, and the distinguished Senator from South Dakota is to be complimented for his efforts in this area. I thank the Senator from South Dakota.●

DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS, 1982—CONFERENCE REPORT

Mr. ANDREWS. Mr. President, I submit a report of the committee of conference on H.R. 4209 and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. QUAYLE). The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4209) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1982, and for other purposes have met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of December 14, 1981.)

Mr. ANDREWS. Mr. President, this agreement now directs a reduction of $439,250.000 in budget authority from the the amounts which would otherwise be made available by this conference agreement for the projects or activities provided for in the Department of Transportation and Related Agencies Appropriations Act, 1982. This is the same as in the latest continuing resolution. In making this reduction, the committee directs, that to the maximum extent feasible, the earmarkings and directives contained in the conference report and joint explanatory statement of the committee of conference on the Department of Transportation and Related Agencies Appropriation Act, 1982, will be implemented. Any deviation from the language contained in that report should receive the prior approval of the House and Senate Committees on Appropriations.

The most important point that I wish to bring to my colleagues' attention is that this agreement brings the confer-

ence on the regular annual Transportation Appropriations bill into conformance with the most recently passed continuing resolution. It achieves an estimated further savings of $306 million in outlays from the original conference agreement, representing our fair share of the budget reductions.

It meets the President's criteria for enactment. In essence, Mr. President, the difference between this measure and the recently adopted continuing resolution is that it would extend through the entire fiscal year. Because we itemized the transportation cuts in the continuing resolution, this measure fully reflects congressional priorities and avoids the pitfalls of indiscriminate across-the-board cuts.

I would like to take this opportunity to thank the Senator from Florida (Mr. CHILES), the ranking minority member, and all the other members of the subcommittee for their cooperation and diligent efforts. This has not been an easy year for those of us on the Appropriations Committee, yet each of my colleagues, and their fine staffs, have worked in a bipartisan spirit toward constructive goals. I am proud to be associated with all of them.

The agreement directs, Mr. President, that the reduction for urban discretionary grants appropriations be applied on a pro rata basis for each activity and new start project identified in the statement of the managers accompanying the conference report on the Department of Transportation and Related Agencies Appropriation Act, 1982. The agreement also directs that $58,725,000 of the $64,725,000 reduction in the urban formula grants account be pro rata; the remaining $6,000,000 of the $64,725,000 reduction in this account shall be taken from tier IV only.

Mr. President, in the case of interstate transfer grants, which were specifically earmarked by the conferees on House Joint Resolution 357, the further reductions in this agreement shall be applied on a pro rata basis to the base as specified in the joint explanatory statement of the managers on House Joint Resolution 357. In addition, for the interstate transfer grants-highway program, of the $288,000,000, the funding for Oregon shall be $60,000,000, the funding for northeast Illinois shall be $125,000,000, the funding for Philadelphia shall be $22,000,000, the funding for Omaha shall be $2,000,000 and the remainder of the funding shall be allocated on a pro rata basis among the other earmarked highway projects.

The intention is also that none of the reduction proposed by this amendment for the Federal Railroad Administration, railroad research and development be allocated to the East St. Louis Metropolitan Gateway Area railroad restructuring project. The reduction of $7,000,000 from the funds available for redeemable preference shares shall be derived from the amount not specifically earmarked for any project in the statement of the managers accompanying the conference report on the Department of Transportation and Related Agencies Appropriation Act, 1982.

Also, Mr. President, any personnel reductions in UMTA required by this amendment shall be taken primarily from the Washington, D.C., headquarters office.

The agreement limits the railroad branchline abandonments in the State of North Dakota to 350 miles, and the House and Senate Appropriations Committees understand that the Illinois Central Gulf Railroad has agreed to cooperate with the State in the continued operation of their railroad lines in north Mississippi. We reiterate the language appearing on page 28 of the Joint Explanatory Statement of the Committee of Conference on the Department of Transportation and Related Agencies Appropriation Act, 1982 (H.R. 4209), relating to surcharges, rate increases, and assistance from the section of rail services planning.

Mr. President, the agreement also reiterates the conference agreement and joint explanatory statement of the Committee of Conference on the Department of Transportation and Related Agencies Appropriation Act, 1982, concerning the use of census data in apportioning and allocating funds for section 18 nonurban formula grants for section 5 urban formula grants. We intend that the funds made available by this resolution be apportioned and allocated as soon as possible.

Mr. President, this is a responsible agreement. The dollars are the same as in the continuing resolution. As we all know, we never get anything exactly as we like it, but this is as close as we will ever come. It represents an agreement acceptable to both sides of the aisle, to both the House and the Senate, as well as to the President. It is time to put this bill behind us and move on to the great challenges emerging in the fiscal 1983 budget.

Mr. CHILES. Mr. President, I support the statement just made by Senator ANDREWS, the chairman of the Transportation Appropriations Subcommittee. I compliment him on the excellent bipartisan leadership that he has provided throughout the entire course of this long process that started almost a year ago last January when we began our hearings on the budget requests for the Department of Transportation. I cannot understate my admiration for the work Senator ANDREWS has done. I believe that he has demonstrated himself to be one of the genuine Appropriations Committee experts here in the Senate.

As our time is short and the legislative period is late, I shall not go into any great detail in this matter. I would, however, like to comment on several items. The continuing resolution, House Joint Resolution 370, in section 143(g) exempted a number of Federal activities from any of the reductions made in that continuing resolution. One of the exemptions was for law enforcement activities and specifically included in this list of exemptions were the law enforcement activities for the U.S. Coast Guard.

While there is no specific Coast Guard appropriation account entitled "law enforcement", many of the Coast Guard appropriation accounts do include significant law enforcement activities. It is our intention therefore that none of the law enforcement activities of the Coast Guard should be reduced below the level included in the conference agreement on H.R. 4209, the Transportation bill.

Mr. President, I would like to make one further comment on the Coast Guard. Included in this measure are significant moneys and direction to the Coast Guard to become more actively involved in our war against drugs and specifically to become more involved in drug interdiction at sea.

I would like to call attention to the report language we have on this matter in both our Senate report and the conference report. Senator ANDREWS, the chairman of the subcommittee, and I and others in the House and Senate intend to pursue this matter to insure that our guidance is followed. I would like to reemphasize one point, however, that the moneys we have provided for drug interdiction are also intended to be available and to be used to the extent it is necessary for shore support facilities.

We can no longer let the Coast Guard place their cutters, helicopters, and personnel only in those areas that already have appropriate shore facilities. We must take the Coast Guard to where the problems are, and that means some of these moneys will almost certainly need to be spent for shore support facilities to permit the Coast Guard to cluster a number of its cutters, helicopters, and aircraft in areas where they can be of direct assistance in this Nation's war against the foreign drug invasion.

Mr. President, on another matter in support of the statement made by Chairman HATFIELD last week and Chairman ANDREWS today, all these further reductions shall be made in a totally pro rata fashion, unless otherwise stated, so as to respect and implement as near as possible the earmarkings and guidance provided in the conference report on H.R. 4209. For example, in section 3 of the Urban Mass Transportation Administration we have recommended almost $15 million of additional reductions. There are several small programs and activities that could be totally eliminated or severely crippled if this entire reduction were made to those specific projects. It is our intention, therefore, that this cut, which is approximately 1 percent of the total to section 3, as it relates to the levels of the vetoed continuing resolution, shall be applied in a manner so that no project or activity is reduced by more than 1 percent.

Mr. ANDREWS. Mr. President, I thank the Senator from Florida for his comments and give my full support to them. I think it is important that Senator CHILES has made these comments, as they reemphasize our congressional intent on several important matters.

Mr. President, I ask unanimous consent that a tabular summary of the bill, as agreed to by the conferees, be printed in the RECORD.

There being no objection, the tabular summary was ordered to be printed in the RECORD, as follows:

Mr. ANDREWS. Mr. President, I move that the Senate adopt the conference report on H.R. 4209.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. ANDREWS. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. PACKWOOD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The clerk will state the amendments in disagreement.

The legislative clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 46 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: "That an additional $5,000,000 shall be derived from the National Recreational Boating Safety and Facilities Improvement Fund to implement a program of recreational boat safety, designed by the Secretary pursuant to 46 U.S.C. 1475 and for the purposes set out in Public Law 97-12: Provided further",

Resolved, That the House recede from the disagreement to the amendment of the Senate numbered 7 to the aforesaid bill, and concur thereinwith an amendment as follows:

In lieu of the sum named in said amendment, insert: "$175,000,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 8 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: "$12,000,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 24 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: "$31,700,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 25 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert: "New commitments to guarantee loans shall be exclusively for the purchase of aircraft designed to have a maximum passenger capacity of sixty seats or less or a maximum cargo payload of eighteen thousand pounds or less, and shall not exceed in the aggregate $100,000,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 30 to the aforesaid bill, and concur therein with an amendment as follows:

Restore the matter stricken by said amendment amended to read as follows:

HIGHWAY BEAUTIFICATION

For necessary expenses in carrying out section 131 of title 23 U.S.C. and section 104 (a)(11) of the Surface Transportation Assistance Act of 1978, $2,000,000 to remain available until expended: *Provided*, That, notwithstanding any other provision of law, any determination as to whether any outdoor advertising sign, display, or device is or has been lawfully erected under State law or is entitled to compensation shall not be affected by any waiver of compensation.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 46 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: "$39,000,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 50 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert:

RAIL LABOR ASSISTANCE (TRANSFER OF FUNDS)

For payment of benefits under section 1160 of the Northeast Rail Service Act of 1981, $25,000,000, to remain available until expended, to be derived from the unobligated balances of "Payments for Purchase of Conrail Securities": *Provided*, That such sum shall be considered to have been appropriated under said section 1160.

CONRAIL WORKFORCE REDUCTION PROGRAM (TRANSFER OF FUNDS)

For expenses of the Conrail Workforce Reduction Program as authorized by section 713 of the Regional Rail Reorganization Act of 1973 as added by section 1143 of the Northeast Rail Service Act of 1981, $100,000,000, to remain available until expended, to be derived from the unobligated balances of "Payments for Purchase of Conrail Securities": *Provided*, That, such sum shall be considered to have been appropriated to the Secretary under section 713 of the Regional Rail Reorganization Act of 1973 to be available for the payment of termination allowances under section 702 of that Act: *Provided further*, That, for purposes of section 710 of the Regional Rail Reorganization Act of 1973 as added by section 1143 of the Northeast Rail Service Act of 1981, such sum shall be considered to have been appropriated under section 713 of the Regional Rail Reorganization Act of 1973 and counted against the limitation on the total liability of the United States.

CONRAIL LABOR PROTECTION (TRANSFER OF FUNDS)

For labor protection as authorized by section 713 of the Regional Rail Reorganization Act of 1973 as added by section 1143 of the Northeast Rail Service Act of 1981, $85,000,000, to remain available until expended, to be derived from the unobligated balances of "Payments for Purchase of Conrail Securities": *Provided*, That, such sum shall be considered to have been appropriated to the Secretary under said section 713 for transfer to the Railroad Retirement Board for the payment of benefits under section 701 of the Regional Rail Reorganization Act of 1973, as amended: *Provided further*, That, for purposes of section 710 of the Regional Rail Reorganization Act of 1973 as added by section 1143 of the Northeast Rail Service Act of 1981, such sum shall be considered to have been appropriated under section 713 of the Regional Rail Reorganization Act of 1973 and counted against the limitation on the total liability of the United States: *Provided further*, That, in addition, such sums as may be necessary shall be derived from the unobligated balances of "Payments for Purchase of Conrail Securities" for necessary expenses of administration of section 701 of the Regional Rail Reorganization Act of 1973 by the Railroad Retirement Board.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 54 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: "Notwithstanding any other provision of law, none of the funds appropriated for the benefit of the Corporation pursuant to this Act or the revenues or other assets of the Corporation or any railroad subsidiary thereof shall be available for payment to any State, political subdivision of a State, or local taxing authority for any taxes or other fees levied on the Corporation: *Provided*, That notwithstanding any provision of law, the Corporation shall pay all taxes or other fees appropriately levied on its facilities in Beech Grove, Indiana".

(DISAPPROVAL OF DEFERRAL)

The Congress disapproves in its entirety deferral D82-217 relating to the Federal Railroad Administration, Grants to the National Railroad Passenger Corporation, as set forth in the message of November 6, 1981, which was transmitted to the Congress by the President. This disapproval shall be effective immediately and the amount of the proposed deferral disapproved herein shall be made available for obligation.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 55 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

COMMUTER RAIL SERVICE

For necessary expenses to carry out the commuter rail activities authorized by section 601(d) of the Rail Passenger Service Act (45 U.S.C. 601), as amended, $15,000,000, and for necessary expenses to carry out section 1139(b) of Public Law 97-35, $45,000,000, to remain available until expended.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 58 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert: "for uses authorized for the Fund, in amounts not to exceed $67,500,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 64 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert: "1970 decennial census until March 31, 1982, after which date funds apportioned under this appropriation shall be distributed on the basis of data from the 1980".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 66 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert: "1970 decennial census until March 31, 1982, after which date funds apportioned under this appropriation shall be distributed on the basis of data from the 1980".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 77 to the aforementioned bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: ": *Provided*, That, notwithstanding any other provision of law, none of the funds apropriated by this Act shall be expended under section 406 for services provided after 95 days following the date of enactment of this Act to points which, based on reports filed with the Civil Aeronautics Board, enplaned an average of eighty or more passengers per day in the fiscal year ended September 30, 1981".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 78 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: ": *Provided further*, That, notwithstanding any other provision of law, payments under section 406, exclusive of payments for services provided within the State of Alaska, shall not exceed a total of $14,000,000 for services provided during the period between March 31, 1982, and September 30, 1982, and, to the extent it is necessary to meet this limitation, the compensation otherwise payable by the Board under section 406 shall be reduced by a percentage which is the same for all air carriers receiving such compensation: *Provided further*, That, notwithstanding any other provision of law, payments under section 406 for services provided within the State of Alaska during the period between March 31, 1982, and September 30, 1982, shall not exceed a total of $5,500,000 and, to the extent it is necessary to meet this limitation, the compensation otherwise payable by the Board under section 406 shall be reduced by a percentage which is the same for all carriers receiving such compensation: *Provided further*, That the foregoing limitations shall not apply to payments made pursuant to the requirements of section 419(a)(7)(A) nor shall such payments be reduced by virtue of such provision: *Provided further*, That the provisions of this paragraph shall be effective only until modified by subsequent legislation".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 84 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

DEPARTMENT OF THE TREASURY

OFFICE OF THE SECRETARY

INVESTMENT IN FUND ANTICIPATION NOTES

(Including Transfer of Funds)

For the acquisition, in accordance with section 509 of the Railroad Revitalization and Regulatory Reform Act of 1976, as amended, and section 803 of Public Law 95–620, of fund anticipation notes, $67,500,000, of which $25,000,000 shall be derived from the unobligated balances of "Payments for Purchase of Conrail Securities".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 90 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: "and $15,000,000 for the Bismarck-Mandan Bridge, $4,000,000 for the Steubenville-Weirton Bridge, and necessary funds required during fiscal year 1982 for the Dickey Road Bridge in East Chicago, Indiana, and the U.S. 12 Bridge over Trail Creek in Michigan City, Indiana".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 93 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

"SEC. 311. None of the funds provided in this Act shall be used by the Interstate Commerce Commission to approve railroad branchline abandonments in fiscal year 1982 in any State in excess of 3 per centum of a State's total mileage of railroad lines operated: *Provided*, That this limitation shall not apply to any abandment of Conrail railroad lines: *Provided* further, That exceptions to this limitation shall be made only upon the specific approval of each of the appropriate committees of Congress".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 99 to the aforesaid bill, and concur therein with an amendment as follows:

Restore the matter stricken by said amendment amended to read as follows:

SEC. 324. None of the funds appropriated by this Act shall be used to implement, administer, or enforce Order 81–5–27 of the Civil Aeronautics Board or any other order of the Civil Aeronautics Board which prohibits or has the effect of prohibiting any U.S. air carrier from participating in the International Air Transport Association's North Atlantic Traffic Conference under its existing articles and provisions: *Provided*, That this limitation may be terminated by an appropriate resolution adopted by the House Public Works and Transportation Committee or the Senate Commerce Committee.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 100 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

"SEC. 325. Notwithstanding any other provision of law, the Secretary shall, with regard to the Urban Discretionary Grant Program of the Urban Mass Transportation Administration, promptly issue a letter of intent for the Dade County, Florida, Circulator System for $63,642,666, and, in addition, shall promptly issue a letter of intent for nonrail projects in the Portland, Oregon, Metropolitan region for $76,800,000 and also issue a letter of intent for the Southeast Michigan Central Automated Transit System for 110 million 1981 dollars."

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 101 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the section number named in said amendment, insert: "326".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 102 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the section number named in said amendment, insert: "327".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 103 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the section number named in said amendment, insert: "328".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 104 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

"SEC. 329. As used in section 502(a)(1)(B) of the Rail Passenger Service Act, the term "Amtrak Commuter" shall mean, with respect to the period prior to January 1, 1983, "Conrail".

TITLE IV

SEC. 401. Notwithstanding any other provision of this Act, appropriations made available for the projects or activities provided for in this Act are hereby reduced in the following amounts:

DEPARTMENT OF TRANSPORTATION

Office of the Secretary, salaries and expenses and transportation planning, research, and development, $4,500,000;

Coast Guard, operating expenses, $48,400,000, of which $5,000,000 shall be deducted from the amounts made available for recreational boating safety; acquisition, construction and improvements, $16,000,000; alteration of bridges, $4,000,000; research, development, test, and evaluation, $4,000,000; offshore oil pollution compensation fund, $3,000,000; and deepwater port liability fund, $3,000,000;

Federal Aviation Administration, operations, $125,000,000; facilities, engineering and development, $9,000,000; facilities and equipment (Airport and Airway Trust Fund), $24,000,000; research, engineering and development (Airport and Airway Trust Fund), $16,000,000; and construction, Metropolitan Washington Airports, $5,000,000;

Federal Highway Administration, highway safety research and development, $2,000,000; highway beautification, $1,500,000; territorial highways, $1,000,000; and interstate transfer grants-highways, $37,000,000;

National Highway Traffic Safety Administration, operations and research, $7,000,000;

Federal Railroad Administration, office of the administrator, $500,000; railroad safety, $2,500,000; railroad research and development, $9,000,000; rail service assistance, $4,000,000, of which at least $2,000,000 shall be deducted from amounts made available for the Minority Business Resource Center; Northeast corridor improvement program, $5,000,000; and redeemable preference shares, $7,000,000;

Urban Mass Transportation Administration, administrative expenses, $3,000,000; research, development, and demonstrations and university research and training, $10,000,000; urban discretionary grants, $29,500,000; nonurban formula grants, $4,000,000; urban formula grants, $64,750,000; and interstate transfer grants-transit, $22,000,000;

Research and Special Programs Administration, research and special programs, $9,000,000, of which $2,500,000 shall be deducted from the amounts made available for research and development and $750,000 shall be deducted from amounts made available for grants-in-aid as authorized by section 5 of the Natural Gas Pipeline Safety Act of 1968;

RELATED AGENCIES

Architectural and Transportation Barriers Compliance Board, salaries and expenses, $100,000;

National Transportation Safety Board, salaries and expenses, $2,000,000;

Civil Aeronautics Board, salaries and expenses, $1,500,000;

Interstate Commerce Commission, salaries and expenses, $4,000,000;

Department of the Treasury, Office of the Secretary, investment in fund anticipation notes, ($7,000,000); and

United States Railway Association, administrative expenses, $4,000,000.

SEC. 402. Notwithstanding any other provision of law or of this Act, none of the funds provided in this or any other Act shall hereafter be used by the Interstate Commerce Commission to approve railroad branchline abandonments in the State of North Dakota by the entity generally known as the Burlington Northern Railroad, or its agents or assignees, in excess of a total of 350 miles: *Provided*, That this section shall be in lieu of section 311 (amendment numbered 93) as set forth in the conference report and the joint explanatory statement of the committee of conference on the Department of Transportation and Related Agencies Appropriations Act, 1982 (H.R. 4209), filed in the House of Representatives on November 13, 1981 (H. Rept. No. 97–331).

SEC. 403. Notwithstanding any other provision of law or of this Act, the funds provided for section 18 nonurban formula grants and section 5 urban formula grants in this Act shall be apportioned and allocated using data from the 1970 decennial census for one-half of the sums appropriated and the remainder shall be apportioned and allocated on the basis of data from the 1980 decennial census.

SEC. 404. Notwithstanding any other provision of law or of this Act, of the fiscal year 1982 Highway Trust Fund available for

emergency relief, $17,000,000 shall be made available for damaged highways or for the prevention of damage to highways in the area affected by eruptions of the Mount Saint Helens volcano.

SEC. 405. Notwithstanding any other provision of title 23, United States Code, or of this Act, the Secretary of Transportation shall approve, upon the request of the State of Indiana, the construction of an interchange to appropriate standards at I-94 and County Line Road at the Porter-La Porte County Line near Michigan City, Indiana, with the Federal share of such construction to be financed out of funds apportioned to the State of Indiana under section 104(b)(5)(A) of title 23, United States Code.

SEC. 406. Notwithstanding any other provision of law, or of this Act, any proposal for deferral of budget authority under section 1013 of the Impoundment Control Act of 1974 (31 U.S.C. 1403) with respect to budget authority for expenses related to the Northeast Corridor Improvement Project authorized under title VII of the Railroad Revitalization and Regulatory Reform Act of 1976 (Public Law 94-210), Acquisition, construction, and improvements, Railroad-highway crossings demonstration projects, Grants to the National Railroad Passenger Corporation, Urban discretionary grants and Interstate transfer grants (highway and transit) shall, upon transmittal to the Congress, be referred to the House and Senate Committees on Appropriations and any amount of budget authority proposed to be deferred therein shall be made available for obligation unless, within a 45-day period which begins on the date of transmittal and which is equivalent to that described in section 10011 (3) and (5) of the Impoundment Control Act of 1974 (31 U.S.C. 1401 (3) and (5)), the Congress has completed action on a bill approving all or part of the proposed deferral.

Mr. ANDREWS. Mr. President, I ask unanimous consent that it be in order to consider amendments 5, 7, 8, 24, 25, 30, 46, 50, 54, 55, 58, 64, 66, 77, 78, 84, 90, 93, 99, 100, 101, 102, 103, and 104 reported en bloc and that it be in order to concur in these amendments of the House to the amendments of the Senate en bloc.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. ANDREWS. Mr. President, I move that the Senate concur in the amendments of the House to the amendments of the Senate numbered 5, 7, 8, 24, 25, 30, 46, 50, 54, 55, 58, 64, 66, 77, 78, 84, 90, 93, 99, 100, 101, 102, 103, and 104.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ANDREWS. Mr. President, I move to reconsider the vote by which the amendments were agreed to.

Mr. ABDNOR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ANDREWS. Mr. President, I suggest the absence of a quorum.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. Does the Senator from North Dakota suggest the absence of a quorum?

Mr. ANDREWS. The Senator from North Dakota suggests the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DENTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. PACKWOOD. I object.

The PRESIDING OFFICER. Objection is heard. The clerk will continue to call the roll.

The assistant legislative clerk continued the call of the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded, for the purpose of considering the D'Amato amendment, and that immediately thereafter, the Senator from Oregon be recognized.

Mr. BAKER. Mr. President, reserving the right to object——

The PRESIDING OFFICER. Such a request is not in order. The Senator may request that the order for the quorum call be dispensed with.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection?

Mr. PACKWOOD. I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will continue to call the roll.

The assistant legislative clerk continued the call of the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routine morning business, to extend not past 4:30 p.m., in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

TAX RELIEF FOR OIL ROYALTY OWNERS

Mr. METZENBAUM. Mr. President, I have spoken a great deal on the Senate floor about the unfortunate and unnecessary tax giveways to the major oil companies which were contained in the recently enacted "Economic Recovery Tax Act of 1981"—the tax cut bill.

However, there was a very important category of tax relief contained in the tax cut bill, directed not to the giants of the oil industry, but to the millions of oil royalty owners who rely upon their royalty checks for household income. These small royalty owners need and deserve tax relief from the effects to the windfall profit tax on their royalty income.

The new tax bill, for which I voted in the Senate, makes three important amendments to the windfall profit tax to ease its burden upon the small royalty owner. First, it increases the current $1,000 tax credit to $2,500 and extends it through the end of calendar year 1981.

Second, the new law provides a 2-barrel-a-day exemption from the windfall profit tax for oil royalty owners for calendar years 1982, 1983, and 1984.

And third, beginning in calendar year 1985, the next tax law increases the windfall profit tax exemption to 3 barrels a day.

Mr. President, this set of new provisions is a significant and timely step to ease the burdens that the windfall profit tax imposed upon our 2.5 million royalty owners.

The Treasury Department estimates that this legislation will return $1.2 billion in tax cuts to royalty owners in fiscal year 1982, $947 million in fiscal year 1983, $986 million in fiscal year 1984, and more than $1.1 billion in windfall profit tax cuts in fiscal year 1985.

Mr. President, small royalty owners deserve this tax reduction. A survey by the National Association of Royalty Owners in 15 States indicated that 73 percent of royalty owners were over 61 years of age, 45 percent were on social security, 27 percent were widows, 12 percent were disabled, and nearly 5 percent were in residential health care facilities.

It is simply the case that these small royalty owners were harshly impacted by the windfall profit tax—they average low annual earnings on their royalty incomes, but their tax burden has been very high.

These important tax reductions were distributed over the approximately 2.5 million royalty owners throughout the United States; 80,000 royalty owners live in Ohio.

Mr. President, I have said before that the Economic Recovery Tax Act of 1981 has many questionable tax reduction provisions contained within it, but the exemption for royalty owners is a well-deserved and important section of the act and should not be diminished or tampered with.

It is time that we moved our royalty owners out from under the burden of the windfall profit tax. They deserve the tax reductions guaranteed to them in the tax cut bill.

FOOD STAMP FRAUD IN NORTH CAROLINA

Mr. HELMS. Mr. President, for a number of years, I have sought, with a fair amount of success, to tighten up the food stamp program to eliminate the obvious fraud and abuse in it. At the outset, I was met with hostile condemnation by the national news media which portrayed me as hardhearted, as a Senator who would deprive the truly needy of essential food.

That kind of criticism continues, but it is being muted by truth, Mr. President. Evidence is piling up across the country that the food stamp program may very well be the most corrupted Federal program ever devised, costing the taxpayers untold billions of dollars.

I have at hand a number of news articles which serve as only one example. These articles appeared on November 29 in the Burlington (N.C.) Times-News. An enterprising reporter for that newspaper, Mark Davis, decided to see if he could be successful in establishing a false identity so that he could apply for and

receive food stamps in Alamance County, N.C.

Clearly, the activities in which he was able to engage are all too common, as has been documented before the Committee on Agriculture, Nutrition, and Forestry by numerous witnesses earlier this year.

Additionally, once on the program, the newspaper reporter was successful in negotiating food stamps for beer and other totally ineligible items from several local grocery stores. Stores selling such items are in violation of the Food Stamp Act of 1977.

Abuses from the use of cash change are also cited by Mr. Davis. Change under $1 from food stamp purchases can be received in cash rather than in credit vouchers as was the case prior to 1979. Some recipients use a $1 food stamp to purchase gum or candy, using the change received for the purchase of ineligible items such as beer or cigarettes.

The problem of selling food stamps for cash—trafficking—was also demonstrated by Mr. Davis who was able to trade $110 in food stamps for $30 in cash in one Burlington store.

Food stamps were used to purchase drugs in an unrelated incident in which the city-county vice squad recovered $150 in food stamps along with cash in one recent drug bust involving marihuana, cocaine, and LSD.

More than anything else, however, the Burlington reporter's story points up the often-stated weakness of the present food stamp program—the ease with which citizens can apply for and receive food stamps. Minimal verification is required to establish identity, salary, household size, assets, and so forth.

The point, Mr. President, is that none of the reporter's incorrect information regarding occupation, salary, household size, assets, and so forth, was detected by the county's department of social services. Unfortunately, such oversights are common under the present program. Indeed, the reporter was finally caught in his false identity only because the Postal Service did not forward his second month's food stamp allotment from his temporary address to his permanent address.

Alamance County in North Carolina is by no means unique in food stamp fraud.

According to one of the news articles, food stamp specialists in the county estimated that almost one out of every three food stamp recipients uses the coupons fraudulently—or should not be receiving them at all. If these estimates by local food stamp officials are reasonably accurate, the implications involving the amount of fraud in the program nationally are frightening. The estimate, by the way, corroborates the Inspector General's findings earlier this year that in selected local food stamp projects in several Southeastern States which were audited by the OIG, the percentages of recipients who underreported their income ranged from 10 to 40 percent.

Needless to say, Mr. President, tax dollars channeled to fraudulent recipients who understate their income reduces the amount available to those who are truly in need of assistance. The deserving recipients include the elderly, and others such as the disabled, who are unable to provide for themselves and therefore have little or no income. Those who are able bodied simply should not be allowed into the program in the first place.

Let me add, Mr. President, that Congress has made some improvements in the program this year through the Omnibus Budget Reconciliation Act. Additional remedies are contained in the farm bill which is now pending in the House and thus have not yet been enacted or implemented.

However, even with all of these changes, many of the problems cited by these articles have not been addressed by Congress. The Inspector General of USDA has repeatedly reported that initial verification of applicant information is the most pressing need in the food stamp program in order to thwart recipient fraud. Regardless of the criticism aimed at me, I intend to continue working closely with the Department, the Inspector General, and interested colleagues and citizens to develop solutions to the verification problems which continue to plague the food stamp program. Our committee will be looking into this area considerably next year.

Mr. President, I ask unanimous consent that the articles from the Burlington (N.C.) Daily Times-News be inserted in the RECORD at the conclusion of my remarks.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

A FIRST-HAND SCAM ENDED WITH "GOTCHA"

A $400 free lunch is not only possible but comes courtesy of the federal government in the form of food stamps.

Acting on the motivation supplied by numerous stories of waste and fraud in the food stamp program, two Times-News reporters applied for food stamps to see if it was easy to rip off the system.

Their experience shows ripping off the system is easy and that little lies work better than big ones—but you may get caught.

Reporter Mark Davis played the role of a food stamp recipient until Nov. 12, when the person who approved his applications for stamps caught up with him and his bogus story of need.

The story began Oct. 2 when Davis applied for stamps at the Alamance County Department of Social Services, posing as an unemployed cabinet maker who had fallen on hard times and had two children to feed.

Ardith Shoffner, his social worker, believed everything he said and approved his application.

Four days later Davis' stamps—a packet of stamps worth $183—arrived in the mail for himself and his two nonexistent children.

FALSE ID TRIED

DSS Fraud Investigator Gerald York said lying about employment status and the number of dependents is the most common way to beat the system. Most of those arrested for food-stamp fraud lied about their employment, York says.

Rarer are those who, like reporter Tim Rodriguez, fake their identities to get stamps. Their numbers are fewer and their success rate is not as impressive as those who lie about their jobs.

On Thursday, Oct. 1, Rodriguez, posing as "J. D. Morris" of 426 S. Beaumont Ave., Burlington, applied for stamps. Claiming he was an itinerant painter and fruit picker (two jobs he has in past years held), Rodriguez said he came from Vero Beach, Fla., with a woman and her two pre-teen children to North Carolina in the hopes of finding gainful employment here.

The only items of identification he had were two letters addressed to Morris and delivered to his home, plus a state-issued employment security card, which he had obtained two days earlier at the local Employment Security Commission office. These less-than-substantial "documents" did not carry too much weight.

Claiming he had only $400 and no job, Rodriguez was unable to obtain the stamps because his flimsy identification was unacceptable to DSS intake worker Regina Thomas.

He was unable to produce a Social Security number for the fictitious woman who had come with him from Florida. He promised to return the next day with the woman and her Social Security number.

"J. D. Morris" never darkened Thomas' door again. Exit one would-be fraud . . .

SECOND TRY SUCCESSFUL

Davis tried the next day, relying on the adage that the best way to lie is to stick to the truth as closely as possible. In applying for the stamps, Davis used his real name, his real Social Security number and his real address.

Davis told a tale of unemployment and two hungry children to feed. An aging automobile carried him about Alamance County as he looked in vain for a new job, he added. In better times, he had been a cabinet builder for Dacarlo Cabinets Inc., a Raleigh-based firm that had tried unsuccessfully to open an office in Graham, he said.

The application also contained questions about medical expenses, rent and bills; the answers to these were short and truthful. Davis had moved temporarily to a house near Swepsonville and did not know how much most of the bills would be.

In the end, he handed back a form in which only his employment situation, the number of dependents and the name of his landlord had been falsified; the rest was truth.

APPLICATION SCREENED

Mrs. Shoffner, an intake worker whose job is to screen applicants before deciding whether they should receive stamps, interviewed him.

Davis wove a blanket of lies that included two fictitious young children, 4-year-old Jimmy Edward Davis and 2-year-old Lisa Annette Davis.

"I wondered how many others had made up fake families, paper children who existed only in a file," Davis recalled.

"And where is the mother of these children . . .?" Mrs. Shoffner asked.

"Who knows?" Davis answered bitterly. "Their mother left."

Warming to the tale, Davis added that he was ashamed to be applying for the stamps, "but I have to feed those young'uns."

Clearly sympathetic as the young man squirmed uncomfortably in his chair, Mrs. Shoffner assured Davis the stamps only had to be a temporary aid.

"You don't have to use them long," she said, "only until you get a job."

The only sticking point came when she asked for his address. Though he gave her the right address, he told her "Tommy Stone" was his landlord and would vouch that he had just moved to that address.

As Davis left, Mrs. Shoffner assured him there probably would be no trouble with his application and the stamps should arrive in the mail soon. All that was lacking, she said, was a call from Mr. Stone.

That afternoon Rodriguez, pretending to be landlord "Tommy Stone", called Mrs. Shoffner and assured her that the unem-

ployed cabinet maker and his two children lived at the address.

STAMPS ARRIVED

Four days later on Oct. 6, the stamps arrived in the mail.

He and Rodriguez then used the stamps in an investigation to see what food stamps will buy in Alamance County.

Davis' downfall began developing towards the end of October when he received a letter from Mrs. Shoffner telling him he had to have another interview at DSS Nov. 9 to see if there had been any change in his employment situation. The process is a formality required to determine if a stamp recipient's economic status has changed since he or she began receiving federal aid.

Davis did not visit the office this time; instead, he telephoned. In a brief conversation he told Shoffner his luck had changed. He proudly told her he had secured a job—as a mail-room employee at the Times-News.

Mrs. Shoffner sounded pleased when he said he would start work Dec. 1.

"Well, good," she said. "How much will you be earning?"

When Davis answered he would be making the minimum wage, she suggested that he perhaps should consider remaining on the welfare roll for the sake of his "children." He could receive fewer stamps per month, he said.

"No, I'm going to try it on my own for now," Davis told her. "I can call you back up if I can't do it."

Hanging up the telephone, Davis said he realized the game has rules that are easy to break, guidelines that fail to keep food-stamp customers honest; but that it also has people whose hearts go out to those with the hard-luck stories.

WE CAUGHT YOU

He assumed the game was over—but it was not. Several days later Davis was working on an unrelated story at the Times-News when the telephone rang. It was Mrs. Shoffner.

"Is this Mark Davis?" she asked.

"Yes it is," he answered.

"Mr. Davis, this is Ardith Shoffner, your intake worker," she said. "I've caught you."

Stunned, Davis groped for words for a few seconds before agreeing to see her again at DSS—except this time, he asked the questions.

Mrs. Shoffner, a six-month veteran of DSS, said she began to suspect something was wrong when Davis' second and last food stamp installment was returned. The postal service, according to instructions from DSS, had not forwarded the stamps from his temporary Swepsonville address to his permanent Burlington address.

When she tried to find Davis by contacting the mail room of the Times-News, she recounted, she was told no one named Mark Davis worked there.

Fearing the worst—"I began to think I'd been ripped off"—she contacted the newspaper's business office and was told there was only one Mark Davis at the paper—and he worked in the newsroom, not the mailroom.

Mrs. Shoffner also was told Davis has no children, is not married and has worked at the paper for almost two years.

"That's when I said 'I got you,' " she told Davis.

Mrs. Shoffner admitted she believed Davis' story when he applied a month earlier, and added that the guidelines surrounding food stamp use make it too easy for someone to defraud the system if they are determined.

If Davis had not telephoned Mrs. Shoffner, he probably would not have been caught, the intake worker said. Rather, he would have been placed in an inactive file after efforts to find the young man failed.

According to regulations, a recipient is bound to provide only his or her identification, proof of residence, a Social Security number and any income. Davis, though he lied about his income, met all those criteria.

"About anybody can get food stamps—and that's the sad part about it," Mrs. Shoffner said.

As a result, "I feel like I have to be suspicious of anything a client tells me," she said. "But on the other hand, you try not to harass them."

To keep the record straight, as planned, Davis gave the social services department a Times-News check for $183, the exact amount of the food stamps received.

All of the purchases had been stored. All except those "illegal" items, were given to the local Salvation Army.

FOOD STAMP PROGRAM: ONE IN THREE ABUSE AID, AND VERY FEW ARE CAUGHT

One of every 17 Alamance County residents receives food stamps. The cost in Alamance County is $3 million a year.

And, according to specialists, almost one one of every three food stamp recipients uses the coupons fraudulently or should not be receiving them at all.

Gerald York, the Alamance County Department of Social Services' welfare fraud investigator, estimates $1 million yearly goes to families that do not deserve the help. "I guess it's the easiest program to rip off," he said.

For every person York nails for fraud, 10 go undetected, he adds. So far this year he has filed fraud charges against 17 persons who are accused of trying to bilk the system for $11,796.

Thirteen of the 17 were charged with taking food stamps worth $8,382; the other four were accused of illegally double-dipping, receiving other federal welfare such as Aid to Families with Dependent Children. Eleven of the 13 have been convicted.

INCOME NOT REPORTED

Most often, a fraud case involves a recipient's failure to report income to the social worker, said York.

To apply for stamps, an application must be filed with an intake worker at DSS. The intake worker who reviews an application usually makes no effort to corroborate the claims, said York, adding that workers have too many caseloads to adequately follow up all cases and new applications.

DSS's six workers are responsible for roughly 500 cases each. "We're told not to verify (applicant's claim) unless there's some suspicion, some question," said York.

The government opened new vistas for fraud when it began mailing stamps directly to the home, York said. Before July 1980 a recipient had to pick up the stamps at the post office with an "authorization to purchase" card.

Sometimes the card had a tendency to turn up stolen or lost. To avoid that scam, the government decided to mail stamps directly to homes—and hence, the incidence of thefts from mailboxes skyrocketed.

But many of those "thefts" are not real, York aserts. Some recipients are reporting the stamps "stolen" and using them to buy non-edible items ranging from televisions to tobacco.

Last year DSS replaced $13,000 in "stolen" stamps, York said.

As part of an anti-fraud package, the Reagan administration vows it will not routinely replace the stolen stamps. Last month, Reagan's man in the Agriculture Department promised the USDA "will only replace them if there is evidence they were lost in a disaster such as a fire."

Nationwide, there are 22 million people receiving food stamps—a total bill of about $11 billion. Of that amount, the department estimates, as much as $1 billion a year is lost because of waste, fraud and abuse.

In an attempt to cut down on that waste, Reagan has proposed issuing special photo identification cards and giving Agriculture Department investigators special police powers—to make arrests and carry a gun. Neither of these proposals would have much effect on Alamance County or the rest of the state, officials agree.

Only people in the larger metropolitan areas would get ID cards. And even while Congress wages a battle over a question of special "welfare police," York complains the government will not give local agencies any fraud-detection training. "The feds should be giving us some training," he said.

As a result, a lucrative market has been born in which stamps are used to do more than fill the kitchen cabinets.

Retailers willing to take stamps for non-edible products usually mark up prices by 100 percent, he said. As a result, a six-pack of beer, for example, costs twice what it would with cash, $5 worth of gasoline cost $10 in stamps.

York says most of the illegal trade occurs in what he described as a "network" of recipients who buy and sell stamps in exchange for food, drinks, appliances and hardware. "Most of your buying and selling goes on between your recipients," said York. Nationwide, some food-stamp specialists claim cars, trucks and even guns can be bought with the stamps.

To see how easy it is to make illegal purchases with food stamps, two Times-News reporters went to numerous stores throughout the county with stamps they had received from DSS. What hindered their efforts was their unfamiliarity with the "network" of recipients.

Their findings showed the great majority of storekeepers do abide by the law and food stamp regulations—albeit somewhat grudgingly on occasion. But some did not.

FOOD STAMPS CAN BUY BEER

Want a free beer?

In mid-October two Times-News reporters proved beer can be bought with food stamps, using stamps to buy eight cans of beer.

On Oct. 13, the reporters, working-class young men, traded stamps outright for two beers at a convenience store in Burlington. Three days later they bought beer with stamps at a Graham convenience store.

Their success came easily despite a letter from the U.S. Department of Agriculture being one step ahead of the pair, warning storeowners that both locations of Joe's Shopwell Mini Marts Inc. cannot serve food stamp customers for one year because employees at those stores accepted stamps for non-edible items. Beer, cigarettes, household cleaners and other non-food items had been bought with stamps, the USDA charged.

The two Shopwell locations are the only stores of 139 Alamance County retailers in the food-stamp business caught this year taking coupons for items other than food.

Effective Sept. 19, the two Joe's Shopwell Mini Marts cannot accept food-stamp coupons for a year. U.S. Department of Agriculture officials said Joe L. Wilson, owner of the stores at 1204 Apple St. and 804 S. Mebane St., Burlington, can only accept cash at the stores.

Wilson was caught after undercover agents exchanged food stamps for numerous non-food items at the two stores, the USDA said. Department spokesmen would not say how many agents worked on the case or for how long.

The result was that store owners were on the alert, or, as one proprietory claimed, "They've had people coming around checking on us."

Despite the federal warning, the two reporters went to Rick's Mini Mart at the corner of Ireland and North Church streets on Oct. 13. After selecting pimento cheese, a pack of sliced ham and some frozen biscuits, they

also selected two 16-ounce beers, handing over a $5 food stamp for the total purchase.

It was an easy purchase. Neither the young woman behind the cash register nor the young man beside her said a word as she rang up the purchase, placed it in a bag and asked them to return.

Three days later they bought a six-pack of premium beer from Robert's Mini Mart at the corner of Walker Avenue and Elm Street in Graham.

It was a Friday night. Attired as before, the reporters tried to purchase Dorito chips and two six-packs of beer.

The tall, bearded man behind the counter recognized them—they were infrequent customers at the small store—and nodded hello. But when they produced the stamps to buy the beer, he said he was not allowed to exchange the coupons for the alcohol.

"I wish I could, but . . ." he said, shrugging and ringing up the purchase of chips.

So they paid for the chips with a $5 coupon, leaving the two frosty six-packs on the counter. But then he gave them $3 change in cash—not coupons as required by law.

According to law, any purchase with coupons in which change is handed back to the recipient must be paid back in coupons if the change totals more than $1. In this circumstance, the proprietor should have given them three $1 stamps plus coins.

By giving them three $1 bills plus some silver, he made it possible for them to pick up one six-pack.

"Now you've got it," he said as he rang up the transaction on the cash register.

To see if such a transaction was commonplace, the two immediately went to the King Bee store across from Cannon Mills. Again, they attempted to buy a six-pack, this time adding a can of soup to the purchase.

The young woman refused to sell them the beer, so they bought the soup and left the beer. She handed them four $1 stamps plus some change as required by law.

Merchant Must Face Temptation

Refusing food stamps for non-edible items sometimes is hard to resist, said a young man who manages an area convenience store that deals daily with food-stamp customers.

But "Tony" (not his real name) said he does not cheat the system—though other storekeepers do not always share his scruples.

Tony recently agreed to an interview in which he said there are several ways to circumvent the system and get almost anything you want with stamps, if you're determined.

The most common tactics, he said, is to buy a low-priced food item and use the change to buy non-edible items such as beer or cigarettes. According to law, food-stamp customers must receive change back from their purchases in more stamps if that change totals more than $1. But any change less than $1 is paid back in coins.

That is how customers feed their vices, Tony said.

"They can do it legal," he said. "They can come up here and buy a piece of 20-cent candy and get a beer or cigarettes with the change."

Tony can do nothing about it. As a licensed food-stamp retailer, Tony is bound to sell edible items to any customer who can produce the stamps and proof the stamps belong to them.

Mothers, fathers, brothers and sisters in a food-stamp family can buy cigarettes and wine and keep cars filled with gas—all of it financed by the federal government.

"They can buy anything," he said.

Tony's assertion proved true when a reporter earlier that month managed to buy gas. Using a $1 stamp, he bought a 10 cent piece of bubble gum and used the 90 cents change to put gas in his car's tank. Another reporter, also used change to buy an electrical fuse.

Tony admits he has broken the law by accepting coupons not in a book or in numerical sequence. Regulations require store owners to refuse stamps not in books, though Tony said he does not know of any storeowner who abides by that rule.

"Sometimes we take the coupons when they are not in the book, and we're not supposed to," he said.

Other people do not bother buying a low-priced item for change, offering Tony stamps worth double and triple the price of an article. Sometimes, Tony admitted, the offers are tempting.

"I've been tempted, yeah," he admitted. "I've had a guy offer me $30 worth (of stamps) for a $10 bill. I don't know if he was going to buy beer with it, or cigarettes or what."

"I've had a few people come in and say, 'Will you take food stamps for beer?' and I say 'No,' " Tony said. A possible $10,000 fine and revocation of the store's food stamp license keeps him honest, Tony said.

Loss of the food stamp license could cripple his business, he said. About 15 percent of his small store's trade is with food stamps—and some stores rely on stamps even more, he said.

But most customers make a small purchase and do what they want with the change—a practice that still infuriates Tony even after three years of dealing with customers.

"I'm not as nice to them," he said. "It kind of gets under your skin after a while.

"One man that lives nearby, he must come in here two or three times a day," Tony said, "and each time he buys cigarettes" by purchasing a small piece of candy and using the change to pocket a pack of cigarettes. "He must get five or six packs a day; I don't know what he does with them all."

Tony feels federal regulations should be tightened so that gum, candy and other food of questionable nutritional value cannot be purchased with stamps.

"I think they ought to cut out that candy, that junk food," he said. "It wouldn't bother me none if they tighten it up."

"I've had a few friends tell me they go up there (to the Department of Social Services) and lie to get coupons," he snorted. "Hell, I probably could get them myself."

Surplus Food Stamps Sold for Cash

The adage—"Think of it as money"—once applied only to credit cards. That adage could be expanded now to include food stamps.

On Nov. 19, the last day of an investigation by two Times-News reporters into alleged food-stamp fraud in Alamance County, a reporter sold $110 worth of food stamps for $30 to a storekeeper.

An employee of Judy's Thrift Shop at the corner of James and Mebane streets agreed to the deal, paying $30 for stamps worth almost four times that much.

The store was the fifth call the reporter—posturing as a food stamp client—made that afternoon as he tried to get rid of the stamps.

At first, the reporter tried to purchase a $59 .25-caliber pistol at Burlington Pawn Brokers. The store attendant was shown a $1 coupon; 109 more came with it if he would give the reporter the gun, he was told.

The attendant examined the coupon in silence. He asked the reporter if he had a gun permit. He did not.

The attendant said he needed a permit before any deal could be made. He added that he could not accept the coupons, but he would be glad to accept $110 in "sirloins . . . if you understand me."

The reporter next tried two grocery stores. One did not handle food stamps. At another an employee suggested, "If you don't need them, take them back where you got them."

At another buy-and-trade store, the owner said he would make no such deal. But he suggested selling them to a food-stamp recipient because he or she would surely pay $30 for food stamps worth $110.

At the Judy's Thrift Shop at 502 James St., a man wearing a light-brown corduroy jacket and white shirt was checking his wide assortment of merchandise against a list when the reporter entered.

Asked if he bought "things," he replied, "We're almost all bought out. What do you have?"

The reporter showed him a $1 coupon. "I need $30. I'll give you all 110 of these."

The two went to his desk near the door. The man took a thick wad of bills out of his coat pocket—all $20 bills. Before he counted out the money, he counted the stamps. Anyone could use them to buy food, the reporter claimed. The stamps came from books E53945310A and E53945309A.

The man removed a $20 bill, then some loose bills—a $5 bill and five singles.

"Nice doing business with you," said the reporter. Thirty dollars richer, he left the store.

Chalk up another scam.

Most Fraud Charges Result in Convictions

Persons charged with food stamp fraud apparently have an easier time in Alamance County Superior Court than in District Court, according to court observers.

In the past four years Gerald York, fraud investigator for the Alamance County Department of Social Services, has made 75 arrests and gotten 61 convictions.

While most cases stopped at District Court with suspended sentences, a few—usually involving active prison time—were appealed to Superior Court.

An exemplary case was the $1,500 fraud conviction against Melinda Lee of 825 Ross St., Burlington. On December 1980, she appealed a three-year sentence handed down by District Court Judge J. B. Allen, Jr.

In June, a Superior Court jury found her guilty of the same charges. But the appeal was worth the trouble. Her three-year sentence was reduced to six months by Superior Court Judge D. Marsh McLelland.

Although in prison, Lee's worries are not over, for she faces additional fraud charges. On Nov. 18, Assistant District Attorney Craig Thompson served notice to state prison officials that Lee still needs to be tried on a charge of cheating the federal Aid to Families with Dependent Children program of $235. She was arrested for that charge in October.

Another sample involved Pearl Massey of 403 Popular Road, Burlington. She was convicted in District Court in September 1980 of defrauding DSS of $18,695. The food stamp client owned 42 acres in Virginia, investigators learned, and the court ordered her to sell that land as part of her sentence.

Massey carried her case to Superior Court. On March 5, a deal was struck by Assistant District Attorney William Johnson to drop criminal charges in exchange for the sale of the same property already negotiated in District Court. To date the property has not been sold.

County Attorney Dow Spaulding has been in charge of the land sale in Pittsylvania County, Va. Because "it is very hard to determine the boundaries" of the land, there has been a delay in the sale, he said.

Spaulding had no idea when the land would be sold, but said he is convinced the sale will not recover the $18,695 Massey allegedly stole from taxpayers.

$28,842 in four years

Over the past four years, the court has ordered the welfare cheaters to pay back a total of $28,842. But York figures that plea bargaining in Superior Court has voided collection of at least $1,000 of that money through dropped charges. Six cases amounting to $3,018 are still pending.

According to statistics, the 11 food stamp recipients convicted of fraud this year in District Court all received suspended sentences on the condition they pay back social services. Their sentences vary from six months to two years.

The court can bar a defendant from the food stamp program for as long as two years. DSS also can suspend the cheater for six months if the court does not bar the person from the program.

Judge Allen usually takes the hardest line with fraud defendants, but he said it is unusual to hand down an active sentence in a first offense.

"I'm very satisfied with the sentences in District Court," said York. "But I can't say as I approve of all the plea bargaining in Superior Court."

Assistant DA Johnson said he "takes a practical evaluation to all plea bargains." In determining whether to take a reduced plea, Johnson said, he weighs the chances of conviction against the evidence.

York's 81 percent conviction rate is impressive by any law enforcement standards—but it could be better, the investigator says.

"There is a tremendous amount of fraud in the food stamp program," he said. But, he added, "some high-level federal and state officials will not admit that a real problem exists. I suspect that this is due to over-inflated egos and protection of high-paying jobs."

"Our state bases the food stamp fraud rate on the number of convictions obtained by the county agencies," said York. "Many counties have never prosecuted fraud cases and never will unless they are forced to. There are no agencies in this area that are staffed well enough to catch a high percentage of food stamp cheaters."

York also disagrees with claims that only a low percentage of total food-stamp customers cheat the system. Those claims are based on conviction rates—and that is the tip of a large iceberg, he said.

"Basing the fraud rate on the number of convictions is comparable to basing the murder rate in Alamance County on the number of murder convictions," he said.

According to York's assessment of the fraud problem, the county needs at least two investigators. As the lone investigator, York is not only the watchdog of food stamps but also of Aid to Families with Dependent Children and Medicaid programs—programs with a combined money value of about $6.7 million in Alamance County.

MOST CASES CONVICTED

In four years York has arrested 46 people on AFDC fraud and nine on Medicaid.

Of York's 61 convictions, 38 were the result of failure to report employment and 15 were for giving false information about household members.

Of those convicted during the four-year period, 39 have been black and 22 have been white.

To those who try to run down welfare frauds, a U.S. Supreme Court ruling earlier this month make it no easier. The highest court in the land refused to give state prosecutors the authority to read the files of food stamp recipients in search of welfare cheats. The justices, without comment, left intact a ruling in a Florida case where it was held that such access violates federal law when prosecutors have no reason to suspect cheating by a particular recipient.

ILLEGAL DRUG MARKET MIGHT USE STAMPS

The problem Alamance County's welfare fraud investigator faced four years ago "is larger now or as large as it has ever been."

Just hours after investigator Gerald York made that remark recently, the problem became even larger. The City-County Vice Unit arrested a suspected Burlington drug dealer man who allegedly had taken food stamps in exchange for drugs.

For a long time, vice agents have suspected that food stamps were used in drug trafficking, but the $150 in food stamps reportedly seized along with large quantities of marijuana, LSD and cocaine marked "the first time we've run across it," said vice Agent James Bowland.

In the Nov. 12 raid at the Brooklyn Street residence of Fred L. Allen, agents reported they discovered in an abandoned car in the back yard a bag containing 1½ pounds of marijuana, a gram of cocaine, 32 tablets of LSD and $200.

But there was a twist to this seizure: Agents reported they also seized food stamps worth $150.

Because the food stamps were lumped together with the cash and drugs, vice agents theorized Allen accepted stamps in his alleged drug dealings. Bowland said the stamps probably came from different coupon books since their numbers were not in sequence.

At first vice agents charged Allen with drug and weapon violations, but after talking with York, agents drew up a warrant for accepting federal food stamps "in exchange for controlled substances."

The raid in which Allen was arrested marked the second time this month vice agents had gone to his house with a search warrant. On Nov. 5 agents said they confiscated $32 in food stamps from Allen's residence but did not uncover any drugs. No charges were preferred against him at that time.

To investigator York, whose arrest record for stamp fraud is the best in the state, the arrest illustrated his claim that a "network" of stamp recipients purchase non-edible goods with the stamps. If that is the case, drugs now can be added to the televisions, alcohol, guns and other non-food items that stamps can procure.

Or, as Bowland said, food stamps for drugs is "a way you can get your pot for free."

WHAT THE STATE NEEDS IS MORE BILL HORNERS

Mr. HELMS. Mr. President, on November 22, Bill Horner of Sanford, N.C., celebrated his 80th birthday. Most of us aspire to reach that milestone, but all of us should aspire also the emulate the kind of life that has made this man one of the most remarkable citizens of North Carolina.

I greatly admire Bill Horner, Mr. President, because he is, and always has been, a "do-er." Throughout his life he has been a tireless and unselfish worker for his State and Nation.

A couple of days after Mr. Horner's birthday, another fine friend of mine, Hoover Adams, of Dunn, wrote an editorial for the Dunn Daily Record, of which Mr. Adams is editor and publisher. Hoover headed his editorial, "What the State Needs Is More Bill Horners." I agree with the headline—as far as it goes, but I would amend it to read that what the Nation needs is more Bill Horners.

Mr. President, I ask unanimous consent that the aforementioned editorial be printed in the RECORD at the conclusion of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WHAT THE STATE NEEDS IS MORE BILL HORNERS

Our longtime friend, W. E. (Bill) Horner, Sr., publisher of The Sanford Herald, celebrated his 80th birthday on Sunday.

Ordinarily, when anybody celebrates a birthday, even an 80th, that's a private matter for family and friends.

But when a man like Bill Horner reaches such an important milestone, it's a matter of interest and importance to the whole State because Bill Horner has made such a great contribution not only to the people of the Sanford community but far beyond.

Bill Horner has watched (and directed) the growth of his newspaper from a small semi-weekly to become one of the major and most successful dailies in the State.

He has seen Sanford grow from a small community to a bustling city of over 14,000 people, one of the most highly industrialized cities in the State.

The truth is that Bill Horner and his newspaper have been largely responsible for the growth of Sanford and Lee County. Nothing promotes a community like a good newspaper and The Sanford Herald has always been a leader in that aspect.

Bill Horner's political leadership has also meant a lot to the growth and progress of Sanford and Lee County. As highway commissioner, he paved just about everything in Lee County that concrete would stick to.

Horner Boulevard was named in his honor and in recognition of his outstanding services as one of the ablest highway commissioners this State ever had.

As a newspaperman, Bill Horner is one of the best. He has always done an outstanding job and has always published a good newspaper. He's known throughout the industry and is a former president of the North Carolina Press Association.

He has been successful and has made a lot of money. In fact, he has given away to favorite institutions such as Methodist College and Duke Hospital more money than most people ever made in a lifetime.

Bill Horner is a gentleman of the old school whose ideas are as modern as tomorrow. But he still believes in the old-fashioned virtues of honesty, hard work, integrity and honor. He believes people ought to work for a living instead of taking handouts; he makes no apologies for putting his country first and for believing in the work ethic and Christian principles.

To the rest of us in the newspaper business, he has always been an inspiration.

Even at the ripe young age of 80, he hasn't slowed down much. He's at his typewriter nearly every day and if a word is misspelled in his newspaper he knows about it. He also keeps a keen eye on the cash flow.

At his age, and with his money, most people would be inclined to quit. Not Bill Horner. He keeps active not only in his business but as a community leader and in every other way.

Traveling is his hobby and he just recently returned from a tour of Spain. Already, he's planning for future trips to distant parts of the world.

In the meantime, he has all sorts of other projects going, including a major expansion of his newspaper plant.

We extend heartiest congratulations to fellow publisher Bill Horner on this important milestone of an 80th anniversary.

We've said it before and we say it again: What this country needs is more Bill Horners!

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGE FROM THE HOUSE

At 3:08 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House agrees to the amendment of the Senate to the amendments of the House to the bill (S. 1003) to amend title III of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended, to authorize appropriations for such title for fiscal years 1982 and 1983.

The message also announced that the House disagrees to the amendments of the Senate to the bill (H.R. 4559) making appropriations for Foreign Assistance and related programs for the fiscal year ending September 30, 1982, and for other purposes; agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. LONG of Maryland, Mr. OBEY, Mr. YATES, Mr. MCHUGH, Mr. LEHMAN, Mr. WILSON, Mr. DIXON, Mr. GRAY, Mr. WHITTEN, Mr. KEMP, Mr. EDWARDS of Oklahoma, Mr. LIVINGSTON, Mr. LEWIS, Mr. PORTER, and Mr. CONTE as managers of the conference on the part of the House.

The message further announced that the House disagrees to the amendments of the Senate to the bill (H.R. 4995) making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes; agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon; and appointed Mr. ADDABBO, Mr. CHAPPELL, Mr. MURTHA, Mr. DICKS, Mr. WILSON of Texas, Mr. HEFNER, Mr. GINN, Mr. WHITTEN, Mr. EDWARDS of Alabama, Mr. ROBINSON, Mr. MCDADE, Mr. YOUNG of Florida, and Mr. CONTE as managers of the conference on the part of the House.

The message also announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4209) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1982, and for other purposes; it recedes from its disagreement to the amendments of the Senate numbered 15, 20, 31, 53, 56, 57, and 89 to the bill, and agrees thereto; and has receded from its disagreement to the amendments of the Senate numbered 5, 7, 8, 24, 25, 30, 46, 50, 54, 55, 58, 64, 66, 77, 78, 84, 90, 93, 99, 100, 101, 102, 103, and 104 to the bill, and has agreed to thereto, each with an amendment, in which it requests the concurrence of the Senate.

The message further announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 4910. An act to amend the District of Columbia Self-Government and Governmental Reorganization Act and the charter of the District of Columbia with respect to the provisions allowing the District of Columbia to issue general obligation bonds and notes and revenue bonds, notes, and other obligations; and

H.R. 5139. An act to authorize appropriations for certain insular areas of the United States, and for other purposes.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 215. Concurrent resolution expressing the sense of the Congress with respect to the imprisonment and treatment by the Government of the Soviet Union of Alexander Paritsky and his family.

HOUSE BILL REFERRED

The following bill was read twice by unanimous consent, and referred as indicated:

H.R. 5139. An act to authorize appropriations for certain insular areas of the United States, and for other purposes; to the Committee on Energy and Natural Resources.

HOUSE CONCURRENT RESOLUTION PLACED ON CALENDAR

The following bill was read twice by unanimous consent, and placed on the calendar:

H. Con. Res. 215. Concurrent resolution expressing the sense of the Congress with respect to the imprisonment and treatment by the Government of the Soviet Union of Alexander Paritsky and his family.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-2348. A communication from the Clerk of the United States Court of Claims transmitting, pursuant to law, the court's opinion entering judgment for the plaintiffs in the matter of The American Indians Residing on the Maricopa-AK Chin Reservation v. The United States, No. 235; to the Committee on Appropirations.

EC-2349. A Communication from the Principal Deputy Assistant Secretary of Defense for Manpower, Reserve Affairs and Logistics transmitting, pursuant to law, a report concerning Selective Reserve recruiting and retention incentives; to the Committee on Armed Services.

EC-2350. A communication from the Director of the Federal Emergency Management Agency transmitting, pursuant to law, the Stockpile Report for October 1980 to March 1981; to the Committee on Armed Services.

EC-2351. A communication from the Chairman of the National Transportation Safety Board transmitting, pursuant to law, a copy of the Board's letter to the Office of Management and Budget appealing OMB's proposed budget allowance for fiscal year 1983; to the Committee on Commerce, Science, and Transportation.

EC-2352. A communication from the Acting Vice President of Amtrak for Government Affairs transmitting, pursuant to law, notice that Amtrak's report on the ratio of revenue to operating expenses on all basic systems routes will not be ready until February 1, 1982; to the Committee on Commerce, Science, and Transportation.

EC-2353. A communication from the Secretary of Commerce transmitting, pursuant to law, the report of the Inspector General of the Department of Commerce for the period April 1 to September 30, 1981; to the Committee on Commerce, Science, and Transportation.

EC-2354. A communication from the Secretary of the Federal Energy Regulatory Commission transmitting, pursuant to law, notice of the expiration of a stay relative to paragraph (A-2) of the Commission's Opinion No. 37-A, and a copy of an order issued on November 20, 1981; to the Committee on Energy and Natural Resources.

EC-2355. A communication from the Secretary of the Interior transmitting, pursuant to law, the tenth annual report on the operation of the Colorado River; to the Committee on Energy and Natural Resources.

EC-2356. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Requests for Federal Disaster Assistance Need Better Evaluation"; to the Committee on Environment and Public Works.

EC-2357. A communication from the Chairman of the Nuclear Regulatory Commission transmitting a draft of proposed legislation to help alleviate some of the most significant financial hardships associated with relocating the Commission's resident inspectors to individual nuclear facility sites; to the Committee on Environment and Public Works.

EC-2358. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "GSA's Federal Buildings Fund Fails to Meet Primary Objectives"; to the Committee on Environment and Public Works.

EC-2359. A communication from the Chairman of the Board of Foreign Scholarships transmitting, pursuant to law, its annual report entitled "Fulbright Program Exchanges, 1980"; to the Committee on Foreign Relations.

EC-2360. A communication from the Assistant Secretary of Commerce for Administration transmitting, pursuant to law, a report on a proposed new system of records under the Privacy Act; to the Committee on Governmental Affairs.

EC-2361. A communication from the Secretary of the Panama Canal Commission transmitting, pursuant to law, a report on two new systems of records under the Privacy Act; to the Committee on Governmental Affairs.

EC-2362. A communication from the Assistant Secretary of Commerce for Administration transmitting, pursuant to law, a report on a new system of records under the Privacy Act; to the Committee on Governmental Affairs.

EC-2363. A communication from the Deputy Administrator of the General Services Administration transmitting, pursuant to law, a report on the disposal of surplus Federal real property for historic monument purposes for fiscal year 1981; to the Committee on Governmental Affairs.

EC-2364. A communication from the Deputy Chief of the Army and Air Force Exchange Service transmitting, pursuant to law, a report on the financial condition of the Service's pension plans; to the Committee on Governmental Affairs.

EC-2365. A communication from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of an Act of the Council, D.C. Act 4-120; to the Committee on Governmental Affairs.

EC-2366. A communication from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of an Act of the Council, D.C. Act 4-119; to the Committee on Governmental Affairs.

EC-2367. A communication from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of an Act of the Council, D.C. Act 4-117; to the Committee on Governmental Affairs.

EC-2368. A communication from the Chairman of the Council of the District of Columbia transmitting, pursuant to law, a copy of an Act of the Council, D.C. Act 4-118; to the Committee on Governmental Affairs.

EC-2369. A communication from the Auditor of the District of Columbia transmitting, pursuant to law, a report entitled "University of the District of Columbia President's Discretionary Fund"; to the Committee on Governmental Affairs.

EC-2370. A communication from the Assistant Secretary of the Interior for Indian Affairs transmitting, pursuant to law, a proposed plan for the use and distribution of the Wichita judgment funds; to the Select Committee on Indian Affairs.

EC-2371. A communication from the Chairman of the United States Civil Rights Commission transmitting, pursuant to law, a report on affirmative action; to the Committee on the Judiciary.

EC-2372. A communication from the Assistant Secretary of Education for Civil Rights transmitting, pursuant to law, the annual report on compliance and enforcement activities of the Office for Civil Rights; to the Committee on Labor and Human Resources.

EC-2373. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Regulation of Cancer-Causing Food Additives—Time for a Change?"; to the Committee on Labor and Human Resources.

EC-2374. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Students Receiving Federal Aid are not Making Satisfactory Academic Progress: Tougher Standards are Needed"; to the Committee on Labor and Human Resources.

EC-2375. A communication entitled "Office for Civil Rights Annual Report to Congress", U.S. Department of Education; to the Committee on Labor and Human Resources.

EC-2376. A communication from the Administrator of the Veterans Administration transmitting, pursuant to law, the report on the Exchange of Medical Information program of the Veterans Administration for the fiscal year 1981; to the Committee on Veterans Affairs.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-647. A concurrent resolution adopted by the Legislature of the State of Louisiana, to the Committee on Agriculture, Nutrition, and Forestry.

"HOUSE CONCURRENT RESOLUTION No. 28

"Whereas, the United States Congress has passed many measures to assist many industries in this country; and

"Whereas, in recent years the automotive and construction industries have been the beneficiaries of several measures which have produced jobs for people in these industries and which have improved the availability of housing and personal transportation; and

"Whereas, the farm industry has been adversely affected by the same economic factors which have burdened the automotive and construction industries; and

"Whereas, these economic factors include high interest rates, high fuel costs, high costs of materials, and low prices for finished products: and

"Whereas, these economic conditions have forced many established farmers out of operation and have made it impossible for young farmers to enter the industry; and

"Whereas, the availability of wholesome, nutritious food is at least as important as the availability of shelter and transportation.

"Therefore, be it resolved by the House of Representatives of the Legislature of Louisiana, the Senate thereof concurring, that the United States Congress is hereby memorialized to take such steps as are necessary to provide economic incentives and assistance to farmers in this country.

"Be it further resolved, that a copy of this Resolution shall be transmitted without delay to the presiding officers of both Houses of the United States Congress and to each member of the Louisiana Congressional Delegation."

POM-648. A resolution adopted by the Military Order of Foreign Wars of the United States, favoring an active Selective Service System; to the Committee on Armed Services.

POM-649. A concurrent resolution adopted by the Legislature of the State of Louisiana; to the Committee on Energy and Natural Resources.

"HOUSE CONCURRENT RESOLUTION No. 31

"Whereas, Congress enacted the Natural Gas Policy Act in 1978 to remedy the natural gas shortages which had occurred in those areas serviced primarily by interstate natural gas pipeline systems; and

"Whereas, the Louisiana industrial community is presently experiencing a 20 percent shortfall in supplies of natural gas; and

"Whereas, the availability of adequate and reliable supplies of natural gas is absolutely essential to the continued viability of Louisiana's main industry, the petrochemical industry, and to the jobs created by those industries; and

"Whereas, a few of the large petrochemical plants are already laying off large numbers of employees due to their inability to obtain adequate supplies of affordable natural gas; and

"Whereas, the intrastate natural gas pipeline system, which had been healthy and expanding prior to the passage of the Natural Gas Policy Act, is now being squeezed between the higher prices at which the interstate systems are able to buy gas and the lower prices at which they are able to sell gas, because of their cushion of older, cheaper gas; and

"Whereas, Louisiana's intrastate pipeline system is in danger of being squeezed out of the market in Louisiana, and their customers in the industrial sector are not able to obtain adequate gas supplies from the interstate systems due to complex and unfair federal regulations that require that most of the gas going into the interstate market be sent to other states and areas; and

"Whereas, the deregulation provisions of the National Gas Policy Act do not go far enough to remedy the problems that are occurring in Louisiana and that partial deregulation will not occur soon enough to prevent the severe market disruptions which are taking place now; and

"Whereas, there are indications that drilling for natural gas is being hampered by continuing price and market controls; and

"Whereas, decontrol will encourage increased drilling and production, thereby increasing the supplies available to all consumers of natural gas in the country; and

"Whereas, measures must be taken to deal with the problems relating to existing contract clauses which may cause sharp increases in natural gas prices if not addressed; and

"Whereas, inaction with regard to deregulation will cause even sharper increases in prices of natural gas if partial deregulation is allowed to proceed as presently anticipated in the National Gas Policy Act.

"Therefore, be it resolved by the House of Representatives of the Legislature of Louisiana, the Senate thereof concurring, that the President and the Congress of the United States are hereby memorialized to enact amendments to the Natural Gas Policy Act that would immediately remove all legislative and regulatory barriers to accessibility of natural gas by all purchasers, that would decontrol the price of old gas as well as new gas, that would provide for a legislative interpretation of "area-rate" clauses to equate to "market-rate clauses", and that would revise escalator provisions covering maximum lawful prices of all categories of gas to reach market clearing prices.

"Be it further resolved, that Congress should also, as a companion measure amend the Power Plant and Industrial Fuel Use Act to allow for the most efficient use of natural gas as provided in the market place.

"Be is further resolved that a copy of this Resolution be transmitted to the President of the United States and the members of Louisiana's congressional delegation, the Speaker of the United States House of Representatives, and the President of the United States Senate."

POM-650. A resolution adopted by the Episcopal Diocese of Western Massachusetts, relative to the termination of military aid to El Salvador; to the Committee on Foreign Relations.

POM-651. A petition from a citizen of Clearwater, Fla., relative to use of United Nations funds to support the South West Africa People's Organization; to the Committee on Foreign Relations.

POM-652. A resolution adopted by the Ohio Baptist Bible Fellowship of Pastors and Churches, relative to free literature distribution at State fairs; to the Committee on the Judiciary.

POM-653. A petition from the Ethiopian Zion Coptic Church concerning the abolition of the marijuana laws; to the Committee on the Judiciary.

POM-654. A petition from a citizen of Vienna, Va., relating to collection of recoverable funds into the U.S. Treasury; to the Committee on Labor and Human Resources.

POM-655. A resolution adopted by the House of Representatives of the State of Louisiana; to the Committee on Labor and Human Resources.

"HOUSE RESOLUTION No. 6

"Whereas, there presently exist several programs combined under the name "TRIO" which provide various useful and necessary services to secondary and post secondary students; and

"Whereas, among these services are the following: Upward Bound, Special Services, Educational Talent Search, Educational Opportunity Center, and Training for Special Programs; and

"Whereas, these five programs have been especially recognized as being highly successful in attracting students to college, assisting them in securing the means to enroll in colleges, and retaining them in colleges; and

"Whereas, such successes have been documented in the 32 TRIO programs that currently operate in almost every institution of higher education in Louisiana; and

"Whereas, these programs currently serve more than 9,500 students; and

"Whereas, it appears that the Reagan administration is now suggesting cuts in the funding of these very successful programs; and

"Whereas, such cuts would surely work to the detriment of the students currently benefiting from such programs and could possibly result in the eventual termination of these much needed programs.

"Therefore, be it resolved by the House of Representatives of the Louisiana Legislature

that the House does hereby memoralize the Congress of the United States to continue funding TRIO programs at least at the same level as such programs were funded during the last fiscal year.

"*Be it further resolved* that a copy of this Resolution shall be transmitted to the chairmen of the Congress' two standing appropriations committees, the Speaker of the U.S. House of Representatives, the President of the U.S. Senate, the secretary of the U.S. Department of Education, the President's chief budget advisor, the President of the United States, and to each of the members of the Louisiana congressional delegation."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr THURMOND, from the Committee on the Judiciary, without amendment:

S. 267. A bill to amend title 28, United States Code, to provide that the Federal tort claims provisions of that title are the exclusive remedy in medical malpractice actions and proceedings resulting from federally authorized National Guard training activities, and for other purposes (Rept. No. 97-297).

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, with an amendment in the nature of a substitute:

S. 1402. A bill to establish uniform national standards for the continued regulation, by the several States, of commercial motor vehicle width and length on interstate highways (Rept. No. 97-298).

S. 1879. A bill to amend the Milwaukee Railroad Restructuring Act and the Rock Island Transition and Employee Assistance Act to facilitate the purchase of lines of bankrupt carriers to provide for continued rail service and for other purposes (Rept. No. 97-299).

By Mr. DANFORTH, from the Committee on Governmental Affairs, with an amendment in the nature of a substitute:

S. 1131. A bill to require the Federal Government to pay interest on overdue payments and to take early payment discounts only when payment is timely made, and for other purposes.

By Mr. ROTH, from the Committee on Governmental Affairs:

Special report prepared by the Permanent Subcommittee on Investigations entitled "Witness Security Program" (Rept. No. 97-300).

WITNESS SECURITY PROGRAM

● Mr. ROTH. Mr. President, on behalf of the Senate Committee on Governmental Affairs, I submit a report of its permanent Subcommittee on Investigations entitled "Witness Security Program."

This report reflects the extensive investigation undertaken by the permanent Subcommittee on Investigations last year under the very able chairmanship of Senator SAM NUNN. It analyzes some of the basic problems associated with one of the programs most essential to the overall law enforcement attack on organized crime and narcotics trafficking—the witness security program.

This report makes several recommendations and seeks specific proposals from the Department of Justice on what legislative and administrative changes are necessary to insure that this program is effective. The report stresses that the program must operate in a way which will truly promote the overall ability of the Federal Government to protect those individuals who, with their own personal safety at stake, are required to provide essential testimony against major criminal offenders.●

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. BENTSEN:

S. 1951. A bill to change the penalties for possession of controlled substances under section 401(b) of the Controlled Substances Act; to the Committee on the Judiciary.

By Mr. ZORINSKY:

S. 1952. A bill to authorize the Commodity Credit Corporation to sell corn or other feed grain acquired through price-support operations to persons for conversion into alcohol for use as fuel; to the Committee on Agriculture, Nutrition, and Forestry.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BENTSEN:

S. 1951. A bill to change the penalties for possession of controlled substances under section 401(b) of the Controlled Substances Act; to the Committee on the Judiciary.

PENALTIES FOR POSSESSION OF CONTROLLED SUBSTANCES

● Mr. BENTSEN. Mr. President, I am introducing today to amend the Controlled Substances Act in order to make it a more effective deterrent to traffickers in nonnarcotic drugs.

I would like to explain why this legislation is necessary and what I am trying to accomplish. As currently written, the Controlled Substances Act lists dangerous substances in five schedules and proscribes trafficking in all of them. The most dangerous ones and the ones that are most subject to abuse are listed in schedules I and II. The act, however, distinguishes between narcotic and nonnarcotic drugs in regard to penalties for dealers. Trafficking in narcotic drugs is punishable by imprisonment for a term of up to 15 years or a fine of up to $25,000, or both. By way of contrast, the dealer in nonnarcotic drugs, listed in schedules I and II, is subject to a jail term of not more than 5 years or a fine of up to $15,000 or both.

Mr. President, this historical distinction between narcotic and nonnarcotic substances has lost most of its validity in light of present patterns of abuse. Heroin, for example, is clearly a narcotic; those who deal in it would be liable to severe punishment. But, in recent years we have seen the advent of widespread abuse of substances like LSD, PCP, and speed; none of these is a narcotic.

Many of these dangerous and illicit nonnarcotic drugs are manufactured in domestic clandestine laboratories. The General Accounting Office recently looked into this matter. Citing statistics from the National Narcotics Intelligence Committee, the GAO concluded that these laboratories produced virtually all of the stimulant methamphetamine (speed), hallucinogens, such as phencyclindine (PCP), and lysergic acid diethylamide (LSD) available in this country. In addition, they churned out substantial quantities of amphetamines and methaqualone. It is also important to understand that a substance like PCP is made entirely from synthetic ingredients, which were previously easy to get. A few years ago, unscrupulous individuals were manufacturing PCP in garages and even in vans, and thousands of lives have been destroyed as a result of their efforts. We went on record in 1978 and enacted legislation requiring registeration of purchasers of piperidine, one of the essential ingredients of PCP. This legislation has been helpful in reducing the incidence of PCP abuse. So I think it is important to understand that narcotics are no longer the sole or even the major threat in the area of drug abuse. Nonnarcotic substances pose a menace of equal and potentially greater dimensions.

However, at a time when we have an obvious increasing problem with drug abuse in America and a proliferation of illegal manufacturing centers, the effort to enforce the Controlled Substances Act has been a dismal failure. The GAO study, which I cited earlier, reviewed 68 closed clandestine laboratory cases at 13 Drug Enforcement Administration field offices. These cases involved 153 violators who were convicted in Federal courts for dealing in dangerous drugs.

What happened to these individuals who are the source of much of the illegal mind-destroying substances that found its way to the streets during the 1978–80 period? 44 of them, or 29 percent never went to prison; they were placed on probation, had their sentences suspended, or were simply fined. 56 of them, or 37 percent, received prison sentences of 3 years or less. In other words, Mr. President, even when we catch and convict traffickers under the Controlled Substances Act, two out of three of them either get off scot-free or serve less than 3 years in jail. I think this is an incredible and alarming statistic.

The legislation I am proposing today would eliminate the distinction between the penalties for dealing in narcotic and nonnarcotic substances listed in schedules I and II of the Controlled Substances Act. Dealing in PCP or LSD, for example, would be considered as serious—in terms of potential punishment—as trafficking in heroin.

My legislation would require that all traffickers in dangerous drugs listed under schedules I and II be punished by imprisonment of up to 15 years or a fine of up to $25.000, or both. Dealing in nonnarcotic substances would no longer be a bargain in terms of potential punishment. Second offenders would be sub-

ject to 30 years in jail or a fine of up to $50,000, or both. This legislation would also have the effect of increasing the penalty for trafficking in PCP from 10 to 15 years.

Crime, Mr. President, is a major concern of the American people. The importation, manufacture, and distribution of illegal substances creates much of the criminal activity in America these days. It is not enough to decry crime—we can and we must be prepared to do something about it. The legislation I am proposing today certainly will not eliminate the illegal manufacture of dangerous substances, but it will be a step in the right direction.

It will put those persons who traffic in poisons like PCP, LSD, and speed, on notice that once apprehended, they will be liable for more than a slap on the wrist. It will provide an incentive for law enforcement officials to concentrate on putting these clandestine operations out of business. It will help focus attention on the abuse of nonnarcotic substances.

Mr. President, I hope the Senate will move quickly to approve this legislation and I ask unanimous consent that the text of the bill be printed in the RECORD at the conclusion of these remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1951

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That this Act may be cited as the "Controlled Substances Amendments Act of 1981".

SEC. 2. Subsection (b) of section 401 of the Controlled Substances Act (21 U.S.C. 841)) is amended by—

(1) striking out the first sentence of subparagraph (A) of paragraph (1) and inserting in lieu thereof the following: "In the case of all controlled substances in Schedule I or II, such person shall be sentenced to a term of imprisonment of not more than 15 years or a fine of not more than $25,000, or both.";

(2) striking out the first sentence of subparagraph (B) of paragraph (1) and inserting in lieu thereof the following: "In the case of any controlled substance in Schedule III, such person shall be sentenced to a term of imprisonment of not more than 5 years, a fine not more than $15,000, or both."; and

(3) by striking out paragraph (5) and redesignating paragraph (6) as paragraph (5).●

By Mr. ZORINSKY:

S. 1952. A bill to authorize the Commodity Credit Corporation to sell corn or other feed grain acquired through price-support operations to persons for conversion into alcohol for use as fuel; to the Committee on Agriculture, Nutrition, and Forestry.

USE OF SURPLUS GRAIN FOR PRODUCTION OF ALCOHOL

Mr. ZORINSKY. Mr. President, I am introducing today a bill to facilitate the use of surplus grain for the production of alcohol.

The Department of Agriculture estimates that only 110 million bushels of corn will be used in the production of gasohol in the 1982 marketing year ending next October 1.

We ought to look upon our ability to produce such an abundance as one of our greatest assets, an advantage that should be put to constructive use. My State of Nebraska has been a pioneer in the production of alcohol from grain. The State government has established an agricultural products industrial utilization committee (gasohol). Farm organizations have supported the conversion of grain into motor fuel. Likewise, the people of Nebraska and all citizens of the United States recognize the great potential grain provides in our efforts to obtain energy self-sufficiency, particularly in motor fuel.

The production of alcohol from a renewable resource would lessen our dependence upon foreign sources in the satisfaction of our energy needs and would improve the balance of payments.

According to USDA, we have a grain abundance near record levels in the carryover of corn. Excluding this year's harvest, beginning corn stocks as of October 1, 1981, total 1.034 billion bushels. If one adds to this amount 8.097 billion bushels expected from the 1981 corn production—the November forecast—and 1 million bushels in imports, we have an estimated carry-in supply of 9.132 billion bushels of corn.

Utilization of corn for feed from the 1981 crop is projected at 4.250 billion bushels. Moreover, USDA estimates 800 million bushels for food, seed, and industrial use. Exports are expected to be 2.450 billion bushels and total domestic use is forecast to be 7.500 billion bushels.

If one subtracts 7.500 billion bushels of utilization from 9.132 billion bushels of carry-in stocks, ending stocks will amount to 1.632 billion bushels at the end of the 1981–82 marketing year, unless we employ American ingenuity and imagination. In analyzing these ending stocks, USDA finds that 237 million bushels will be owned by the Commodity Credit Corporation, 650 million bushels are estimated to be held in the farmer-owned reserve, and the remainder will end up as free stocks. These ending stocks will not only be expensive to store, they will also be depressive to market prices.

Market prices for the grains are already reacting to the forecasts of building surpluses. Since January of this year, the average market price for corn has declined 86 cents per bushel, from $3.19 to $2.33 per bushel. The average market price for milo declined from the January level of $5.48 per hundredweight to $3.96 per hundredweight, a drop of $1.52 per hundredweight.

Greater corn and milo utilization would help strengthen market prices while at the same time Government costs for farm and commercial storage of grain could be substantially reduced.

According to USDA, for example, the average per bushel cost of storing grain owned by the Commodity Credit Corporation is 29.15 cents.

The minimal storage cost for the 237 million bushels of corn already owned by CCC at the end of November is $69 million. Any additional corn channeled into CCC ownership would simply increase this cost.

The size and number of facilities to convert corn to alcohol would, of course, determine the amount of grain that could be utilized. I believe, however, that an effort should be made now to increase grain used for alcohol production. Moreover, we should encourage private investment in alcohol production facilities.

My bill would provide that corn would be available for sale if used in the production of alcohol at the fuel conversion price as determined by the Secretary of Arigculture. The bill specifically provides that "the Secretary of Agriculture shall establish the price for corn sold under this act at such level as he determines will permit and encourage the purchase of such grain for conversion into alcohol for use as a fuel either by itself or in combination with another product and will permit such fuel to be competitive in price with petroleum-based fuels, taking into consideration the energy value of corn or other feed grain, the value of byproducts recoverable from corn, and, when applicable, the differences in octane rating, Federal and State tax incentives applicable to alcohol used for fuel, and such other factors and values as the Secretary considers appropriate."

The bill provides that, notwithstanding the provisions of existing law on the release price of CCC-owned grain, the Secretary would sell grain for the production of alcohol at an economically feasible level.

It is obvious that the fuel conversion price would vary, depending upon changes in the costs of production of both gasoline from crude oil and alcohol from grain. Therefore, the bill provides flexibility in determining an economically feasible price.

If this bill becomes law, our Nation will enjoy many benefits: First, greater self-sufficiency in the satisfaction of our energy needs, particularly motor fuel; second, a reduction in Government costs in the storage of grain; third, an improvement in the balance of payments; and fourth, a marketing opportunity for farmers that will hopefully result in profits from the sale of corn.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1952

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That (a) notwithstanding any other provision of law, the Commodity Credit Corporation may sell corn and other feed grain acquired by it through price support operations to any person, upon application, for the conversion of such grain by such person into alcohol for use as a fuel either by itself or in combination with some other product to include gasohol.

(b) The Commodity Credit Corporation shall sell such grain under the authority of this Act at such price as the Secretary of Agriculture shall establish pursuant to sub-

section (d) and on such other terms and conditions as the Secretary shall prescribe by regulations.

(c) The Secretary of Agriculture shall establish such safeguards as he considers necessary to assure that grain sold under the authority of this Act to any person is used by such person only for conversion into a fuel.

(d) The Secretary of Agriculture shall establish the price for grain under this act at such level as he determines will permit and encourage the purchase of such grain for conversion into alcohol for use as a fuel either by itself or in combination with another product and will permit such fuel to be competitive in price with petroluem-based fuels, taking into consideration the energy value of corn or other feed grain, the value of byproducts recoverable from the grain, and, when applicable, the differences in octane rating, Federal and State tax incentives applicable to alcohol used for fuel, and such other factors and values as the Secretary considers appropriate.

ADDITIONAL COSPONSORS

S. 1215

At the request of Mr. PROXMIRE, the Senator from Arkansas (Mr. PRYOR) was added as a cosponsor of S. 1215, a bill to clarify the circumstances under which territorial provisions in licenses to distribute and sell trademarked malt beverage products are lawful under the antitrust laws.

S. 1879

At the request of Mrs. KASSEBAUM, the Senator from Nevada (Mr. CANNON) was added as a cosponsor of S. 1879, a bill to amend the Milwaukee Railroad Reconstructing Act and the Rock Island Transition and Employee Assistance Act to facilitate the purchase of lines of bankrupt carriers to provide for continued rail and for other purposes.

SENATE JOINT RESOLUTION 117

At the request of Mr. BOREN, the Senator from Georgia (Mr. NUNN), the Senator from South Carolina (Mr. (THURMOND), the Senator from Missouri (Mr. DANFORTH), and the Senator from Oklahoma (Mr. NICKLES) were added as cosponsors of Senate Joint Resolution 117, a joint resolution to authorize and request the President to designate the week of January 17, 1982, through January 23, 1982, as "National Jaycee Week."

SENATE JOINT RESOLUTION 118

At the request of Mr. BENTSEN, the Senator from Hawaii (Mr. INOUYE) was added as a cosponsor of Senate Joint Resolution 118, a joint resolution to authorize and request the President to designate the month of January 1982, as "National Cerebral Palsy Month."

SENATE JOINT RESOLUTION 133

At the request of Mr. DECONCINI, the Senator from California (Mr. CRANSTON) was added as a cosponsor of Senate Joint Resolution 133, a joint resolution to authorize and request the President to designate August 14, 1982, as "National Navajo Code Talkers Day."

SENATE CONCURRENT RESOLUTION 53

At the request of Mr. BOSCHWITZ, the Senator from New York (Mr. MOYNIHAN) was added as a cosponsor of Senate Concurrent Resolution 53, a concurrent resolution expressing the sense of the Congress with respect to the policies of the Government of the Soviet Union of anti-Semitism and discrimination against Jewish immigration.

SENATE RESOLUTION 257

At the request of Mr. MATTINGLY, the Senator from South Dakota (Mr. ABDNOR) was added as a cosponsor of Senate Resolution 257, a resolution to express the sense of the Senate that the Secretary of Agriculture should continue Department policy in deferring the repayment of, and foreclosure proceedings on, certain outstanding loans made by the Farmers Home Administration.

AMENDMENTS SUBMITTED FOR PRINTING

TREASURY, POST OFFICE APPROPRIATION, 1982

AMENDMENT NO. 1241

(Ordered to be printed.)

Mr. D'AMATO proposed an amendment to the bill (H.R. 4121) making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain Independent Agencies for the fiscal year ending September 30, 1982, and for other purposes.

NOTICE OF HEARINGS

SUBCOMMITTEE ON CONSUMER AFFAIRS

Mr. CHAFEE. Mr. President, I would like to announce that the Consumer Affairs Subcommittee will hold a hearing on the issue of delayed funds availability.

The hearing will take place on Wednesday February 24, 1982, beginning at 9:30 a.m., in room 5302 of the Dirksen Senate Office Building.

The subcommittee will examine financial practices with regard to restrictions on customers' abilities to withdraw funds represented by checks deposited into their accounts. This will include an examination of the extent of such restrictions, their relation to the institution's check collection experience, and the extent to which such practices are communicated to consumers.

For further information, you may wish to contact Annette Fribourg at 224–2921. Those wishing to testify or who wish to submit a written statement for the hearing record should write to the Senate Committee on Banking, Housing and Urban Affairs, 5300 Dirksen Senate Office Building, Washington, D.C. 20510.

Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of public hearings before the Consumer Affairs Subcommittee of the Senate Committee on Banking, Housing and Urban Affairs.

The hearings will take place on Wednesday, March 3, 1982 beginning at 9:30 a.m., in room 5302 of the Dirksen Senate Office Building. Testimony will be received regarding the extent of the Federal Government's involvement in the operation of the Nation's payment systems.

Over the past decade, the Federal Reserve System has played a major role in the development of electronic funds transfer (EFT) industry, operating all but one of the Nation's automated clearinghouses (ACH's) as well as the Fedwire transfer network. In 1978, the Federal Reserve established a nationwide linking of the individual automated clearinghouses. The Federal Reserve is currently in the process of procuring a new and sophisticated nationwide telecommunications network to be known as FRCS–80 (Federal Reserve Communications System for the 1980's).

Growing concern has been expressed about the Federal Government's increasing operational, as opposed to regulatory, role in the EFT marketplace. The subcommittee will examine the impact of the Federal Reserve service offerings on private sector service providers, depository institutions, and commercial and private consumers. The committee will also explore the costs of the systems being acquired as well as the other costs of providing each of its payments services, and how the explicit pricing of services required by the act will affect the marketplace.

For further information regarding the hearings, you may wish to contact Annette Fribourg at 224–2921.

Those wishing to submit a written statement for the record should write to the Committee on Banking, Housing and Urban Affairs, room 5300, Dirksen Senate Office Building, Washington, D.C. 20510.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON THE JUDICIARY

Mr. BAKER. Mr. President, I ask unanimous consent that the Judiciary Committee be authorized to hold a full committee hearing during the session of the Senate at 2 p.m. on Monday, December 14, to discuss the nomination of Stanley Harris to be U.S. Attorney for the District of Columbia.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

PAKISTAN

● Mr. GLENN. Mr. President, on November 19, the Foreign Relations Committee filed report No. 97–276 to accompany Senate Concurrent Resolution 48, a resolution of disapproval of the proposed sale to Pakistan of F–16 aircraft. The committee voted 10 to 7 to report the resolution unfavorably and I joined the committee majority in opposing the resolution. However, the report as filed does not adequately reflect my views concerning the sale of the F–16's, particularly with respect to the implications for our nonproliferation policy, indeed, on this issue I am more in sympathy with the views of the minority. Unfortunately, for various reasons, I did not file additional views to be included with the report. I should therefore like to take this opportunity to explain my position regarding the Pakistani situation and have

this statement serve as my additional views to report No. 97–276.

Mr. President, I am in favor of assisting Pakistan in meeting its national security needs. That does not mean, however, that even under the best of circumstances I can be totally sanguine about the results which may be obtained through the present sale of F–16 aircraft. Although President Zia has been in his position for 4 years, which is a lot longer than many people would have predicted when he first came in, there are significant elements of instability in Pakistan—and that should give us pause. We have gone down that road in the past a number of times.

The last example was disastrous, not only for us, but for many others as well, including the people of Iran. There are other considerations which need to be taken into account in considering this sale. The ostensible purpose is to provide Pakistan with the ability to withstand Soviet, or Soviet-backed aggression. But what is the Pakistani view of their security situation? In a speech by Foreign Minister Agha Shahi given on June 30, 1981 he says:

> There should be no constraint on the pursuit of an independent foreign policy as we have been pursuing in the past. Whether in regard to Jerusalem or Palestine or support to the Iranian revolution or wanting to bring out a transformation of the whole Persian Gulf region into a nonaligned area free of the military presence of the super-powers, free of the presence of the American rapid deployment force and withdrawal of Soviet forces from Afghanistan.

Mr. Shahi continued:

> We have espoused the cause of Palestinians for 35 years. We stand for the liberation of Jerusalem, we support the Islamic Revolution of Iran. We are totally against military super-power presence in the Gulf.

Mr. Shahi also stated:

> The Soviet Union has assured that we pose no danger to you. We have to take the Soviet Union at her word. Again here, if I were speaking to you off the record, I could tell you something more, but I shall have to confine myself on this issue by saying that an attack by a super-power on another country in the region will not remain confined to the aggressor and the victim . . . and therefore this fear in your mind about the danger of an attack by the Soviet Union should be allayed. And the Soviets have categorically assured us, and this has been stated by President Brezhnev a number of times that we should not take into account this possibility. Any other attack, well this is precisely the reason why we want to get the arms quickly. We should be able to defend ourselves against an attack from any quarter.

Finally, Mr. Shahi states in his speech:

> We will pursue, in spite of this agreement, normalization with India, but on the basis of sovereignty, equality, we will never accept the Indian hegemony or its predominant position.

Mr. President, these statements suggest to me that the Pakistanis are at least concerned about their security, vis-a-vis India, as they are vis-a-vis the Soviet Union. Indeed, I have looked into the deployment of Pakistani military manpower and equipment and I can tell you that since the Soviet invasion of Afghanistan, there has been very little movement of troops and material toward the border with Afghanistan. Two-thirds of the Pakistani Army, and its associated equipment are arrayed on or near the Pakistani-Indian border. The Indians are naturally upset at the prospect of a large-scale arms shipment to Pakistan, including the delivery of F–16's, which at some future date could have the capability of being nuclear weapons carriers. I am tempted to say to the Indians that their own billion dollar deal with the Soviet Union for arms as well as their own nuclear program has not exactly been designed to inspire confidence on the part of their neighbors. On the other hand, we must be realistic about what the impact of an arms shipment to Pakistan might be.

If the result is to spark an arms race on the South Asian subcontinent we will have contributed to insecurity and instability rather than the converse. Moreover, there has been significant comment among high-level Indian leaders that a continuation of the Pakistani nuclear program toward a nuclear weapons capability will drive the Indian program still further in the same direction.

For that reason, Mr. President, it is important that we keep close tabs on the political consequences of this sale and the associated arms and economic aid package, that we take an evenhanded view of our relationships with the Indians and Pakistanis, that we not build up the security of one side at the expense of the other and that we not find ourselves in another Iran-type situation somewhere down the road. For that reason, I believe it is important to examine this program year by year to note what our long-term intent is but not to make commitments that will put us in a situation from which we will find ourselves unable to extricate ourselves later on.

One of the major concerns I have about our involvement in the south Asian subcontinent is that we not push our nonproliferation concerns into the background as a result of dealing with the Soviet threat in that area.

And let me say, Mr. President, that my concerns about the nuclear situation in Pakistan are rising, not subsiding, as time goes by. I would like to review the nuclear situation in Pakistan so that the basis for concerns in this area are clear.

PAKISTAN'S NUCLEAR PROGRAM

It is important to recognize at the outset that Pakistan has no nuclear power program to speak of. It has a 5-megawatt research reactor located at Pinstech, the Pakistani Institute of Technology, and a 137-megawatt nuclear powerplant called Kanupp located near Karachi. These plants are under safeguards, although there have been serious problems over a period of time with the application of safeguards at the larger plant. I will say more about that later. Despite their miniscule program the Pakistanis have worked very hard to obtain advanced nuclear technology and equipment—technology and equipment that would be most useful in obtaining weapons-usable materials for use in a nuclear explosion. For example, in 1961 Pakistan entered into an agreement with Belgo-Nucleaire to set up a hot-cell reprocessing unit at Pinstech. Pakistan has also set up a pilot plant for uranium enrichment. Larger scale enrichment and reprocessing facilities are under construction. The reprocessing facility will be capable of producing 10–20 kilograms of plutonium annually—approximately 5–10 kilograms of plutonium is enough for a Nagasaki-type bomb.

In 1975 Pakistan signed a contract with France for a commercial-scale reprocessing facility that would have had the capacity to produce tons of plutonium per year. As a result of American intervention, the deal did not go through entirely, although the technology in the form of blueprints was transferred by the French. But it is in the area of Pakistani activities in building enrichment capacity that is perhaps the most disturbing story of all. A Pakistani national, Dr. A. Q. Khan, managed to obtain a position in 1974 with the European consortium called URENCO that constructs and operates gas centrifuge enrichment facilities. The consortium consists of Britain, Holland, and Germany, and Khan worked for the main contractor located in the Netherlands.

Over a 3-year period Dr. Khan was able to procure probably all the important information and documents, including blueprints of the URENCO gas centrifuge enrichment plant. He also procured the list of subcontractors in Europe who could provide the required equipment and materials. Through a series of dummy corporations and with the active assistance of Western nuclear business firms who were more concerned about money than about nuclear weapons, Pakistan was able to procure much of the items on its shopping list. It was not until 1978 when questions were raised in the British Parliament about the supply of inverters by Emerson Electric that intelligence agencies throughout the world were alerted to the fact that Pakistan was engaged in a worldwide effort to obtain nuclear enrichment equipment and technology that would give it a substantial weapons-making capability.

Among the materials which the Pakistanis have managed to acquire are 6,500 tubes of a special hard-type steel used for gas centrifuges obtained from a firm in Holland; vacuum valves to regulate streams of uranium hexafloride gas into and out of the centrifuge system from a company in Switzerland; inverters from companies in Great Britain, West Germany, and the United States; electronic equipment used for centrifuges from firms in the United States by way of Canada and Turkey; a gas-feed system for the centrifuge from Kora Engineering of Switzerland; a metal finishing plant from Great Britain; rotors from Holland; rotor parts from West Germany; measuring equipment from Holland; aluminum parts from West Germany; vacuum equipment from West Germany; vessels and tanks for the reprocessing plant from an Italian company; precision equipment for the reprocessing plant from Switzerland.

And most recently, on October 31, of this year, during the time when Congress was debating the issue of aid to Pakistan, the U.S. Government seized a shipment

of 5,000 pounds of zirconium metal—a metal that is used for nuclear fuel rods and other nuclear applications—that was bound for Pakistan via Pakistani Airlines. The shipment of metal came from the West Coast, all the way across the United States, and was checked in the baggage room of the airline as mountaineering equipment. Thus, even while we have been debating the issue of aid for Pakistan, Pakistan's clandestine, illegal activities to build their nuclear facilities goes on.

According to press reports, the materials which Pakistan has imported for uranium enrichment could build a plant large enough to produce sufficient enriched uranium for six weapons per year. Further, according to an Associated Press report by Barry Schweid, a secret State Department cable was sent in June of this year to the American Embassy in Ankara that declared, "We have strong reason to believe that Pakistan is seeking to develop a nuclear explosives capability," and that a "covert purchasing organization" of Turkish companies known to the American, Turkish, and Pakistani Governments, was purchasing American-made electrical equipment and diverting it to Pakistan's nuclear weapons program. The cable which Mr. Schweid had gotten hold of also said:

> That Pakistan is conducting a program for the design and development of a triggering package for nuclear explosive devices.

To put the icing on the cake, Mr. Agha Shahi, Foreign Minister of Pakistan, in his speech of June 30, 1981, in a seminar on Pakistan's foreign policy, organized by the council of Pakistani newspaper editors, declared:

> We told Buckley that our program is only for peaceful purposes . . . and we are fully aware of the concern of the United States over our atomic energy program which we think to be baseless, unwarranted, unjustified. But we understand and we have taken note of this concern. So if we decide to carry out an explosion then we would be prepared to forego this (U.S. aid) program. That is a matter for our judgment, but we have given no undertaking to Mr. Buckley about explosions.

Finally, Mr. President, we have most recently received news of an ominous development in Pakistan regarding the safeguards situation at the Kanupp reactor. In essence, the Director-General of the IAEA has told the Board of Governors of that organization that it will no longer be possible for the IAEA to give assurances that diversions are not occurring within countries containing on-load, continuously fueled reactors with other facilities that are not under safeguards. Both Pakistan and India fall under this category. Indeed, as Senator CRANSTON has pointed out, there is some concern that a diversion may even have occurred in Pakistan, although the evidence to date is not definitive.

It is of interest, Mr. President, to consider what the response of Pakistan has been to the Director-General's report. It is my understanding that at the conclusion of the report, the Pakistani representative to the Board of Governors of the IAEA stated that it was a violation of Pakistan's sovereignty for the IAEA to suggest an upgrading of safeguards and that Pakistan would not agree to any additional safeguards beyond those which were negotiated in 1971, years before Pakistan built its present unsafeguarded fuel fabrication plant, and before it engaged in its worldwide clandestine activities in obtaining the materials for constructing a nuclear enrichment and nuclear reprocessing plant.

Mr. President, on October 21, by a vote of 51 to 45, the U.S. Senate went on record as requiring a cutoff of economic and military assistance to Pakistan or to India if those nations explode a nuclear device. The House-Senate conference has yet to act on that measure, so the final outcome is uncertain. It is important to recognize that my amendment does not apply to the cash sales for F–16's. It is therefore important to understand what the administration's position is on the question of continued assistance to Pakistan whether by military sales or by economic and military aid if the Pakistanis explode a nuclear device. In a hearing before the Foreign Relations Committee on November 12, I asked Secretary Buckley what the policy of the administration is at this point if the Pakistanis explode such a device—will we cut off assistance? Secretary Buckley replied:

> We have left, I think, no doubt in the mind of the Pakistani leadership what those consequences would be. I don't believe anyone in Pakistan expects that assistance would continue in the aftermath of an explosion.

When I repeated the question in the context of the F–16 sale, Mr. Buckley's reply was:

> I cannot see drawing lines between the impact in the case of a direct sale versus a guaranteed sale.

Well, Mr. President, Mr. Buckley essentially has said that the Pakistanis would be surprised if the United States were to continue assistance or continue the cash sales of F–16's in the event of a Pakistani nuclear explosion. Frankly, I see no reason why we cannot be unequivocal about it and declare here and now that there will be no further forthcoming cash sales or aid to the Pakistanis if they indeed go ahead and explode a nuclear device and thereby start a nuclear arms race in the south Asian subcontinent. The bomb lobby in New Delhi is certainly paying close attention to this issue. In an article in the Sunday review of the Times of India dated April 26, 1981 Mr. K. Subrahmanyam, director of the institute for defense studies and analyses in New Delhi, suggests that the making of the bomb is the only appropriate Indian answer to the Pakistanti nuclear program. He quotes Prime Minister Gandhi speaking before the Lok Saba as saying that Pakistan's development of nuclear weapons will have grave and irreversible consequences for the subcontinent and India will respond in an appropriate manner to any such development.

Mr. President, I do not believe we should view the approval of sales of F–16's or of economic or military assistance to Pakistan as being a gesture of the United States, independent of any quid-pro-quo from the Pakistanis as far as their nuclear policy is concerned. It is for that reason that I introduced an amendment to the Foreign Assistance Act requiring the President to send up each year, a classified report detailing Pakistan's nuclear related activities and the status of safeguards on their nuclear facilities.

I hope this amendment is adopted by the Senate-House conference on the foreign assistance bill as well so that it can be put into law. I believe Mr. President, that Congress should look very carefully at that report next year and in future years so that we can understand whether the sales of F–16's and the economic and military assistance package are having an effect on Pakistani policies that can have a direct bearing on U.S. national security.

I believe Congress should take the first step and approve the sales and the economic and military assistance package and put the ball squarely in President Zia's lap and challenge him to act responsibly, not only for the sake of his own people, but for the sake of the international community.

I submit for the RECORD two articles relating to reactor metal attempted shipment to Pakistan.

The articles follow:

[From the New York Times, Nov. 20, 1981]

U.S. STUDYING FOILED BID TO EXPORT A KEY REACTOR METAL TO PAKISTAN

(By Leslie Maitland)

Federal authorities are investigating a shipment of a key metal used in the construction of nuclear reactors that was seized as it was about to be loaded on a passenger flight from Kennedy International Airport to Pakistan.

The United States prohibits the shipment of the metal, zirconium, to foreign countries without a license because of its potential use in reactors. There has been growing international speculation that Pakistan is secretly attempting to develop nuclear weaponry.

The shipment under investigation was seized Oct. 31. It did not have the necessary export license from the Commerce Department, and the exporter, Albert A. Goldberg of the National Tronics Company of Manhattan, never applied for one. Had he applied, the request would have been rejected because Pakistan is ineligible to receive imports of zirconium from the United States, according to Sharon R. Connelly, who heads the compliance division of the Commerce Department's Office of Export Administration.

The Commerce Department, the Customs Service and the office of Edward R. Korman, the United States Attorney for the Eastern District of New York, are examining the roles of Mr. Goldberg and the purchaser, identified by Mr. Goldberg as a retired Pakistani Army colonel and a close friend of President Mohammad Zia ul-Haq.

The authorities are attempting to determine whether the case should be presented to a Federal grand jury or whether to leave the matter with the Commerce Department, which, after a hearing, can impose civil sanctions, including fines and a revocation of export rights.

Mr. Goldberg, who has been questioned under oath by Commerce Department officials, said the metal had been purchased by the Government of Pakistan through a trading company headed by Dr. Sarfraz Mir, the retired Pakistani Army officer. In an interview, Mr. Goldberg said he had not applied for a license for the zirconium—5,000 pounds valued at $153,000—because he was unaware that it was a controlled commodity. He also said he had done business with the Pakistani Government before, shipping electrical ca-

pacitors for which he had obtained the necessary licenses.

Mr. Goldberg, according to the Commerce Department, had been penalized twice before for improperly exporting regulated commodities. In an order signed in 1976, the Commerce Department revoked for three years his right to export controlled commodities.

After the zirconium was seized, Mr. Goldberg said, Federal marshals with a search warrant raided his office at 134 West 32d Street and confiscated his financial records.

Dr. Mir of S. J. Enterprises, the Pakistani trading company has not been located. After the zirconium was discovered at the airport, where it was reportedly checked as baggage and labeled as mountain-climbing equipment, customs agents who had Dr. Mir's photograph unsuccessfully search the Pakistan Airlines plane for him, officials said. He is now believed to have left this country. A call to his home in Islamabad was not returned.

Investigators familiar with the case also said that agents of the airline were questioned because the cargo had been checked as baggage. Mr. Goldberg said that the material was supposed to have been shipped as freight.

Saleem Nisar, assistant general manager of the airline for the Americas, said he would check into the matter, but he otherwise declined comment. He confirmed, however, that his Government was the principal owner of Pakistan Airlines.

ADMINISTRATION SEEKS WAIVER

The Reagan Administration has urged Congress to waive a law that bars aid to Pakistan because of its unmonitored nuclear program. The waiver is needed to move ahead on a planned $3.2 billion military and economic aid program.

James L. Buckley, Under Secretary of State for Security Assistance, Science and Technology, has said that President Zia had assured him that Pakistan would not develop nuclear weapons, but had refused to rule out developing the potential to explode a peaceful nuclear device.

The 5,000-pound shipment of zirconium seized by customs agents is not in itself encugh for a reactor, which normally calls for about 50,000 pcunds of the metal, according to the Nuclear Regulatory Commission.

Dr. Charles Till, associate director for reactor research and development at the Argonne National Laboratory, located near Chicago, explained that zirconium was used in reactors to make the tubes that hold uranium fuel.

James Barrett, a spokesman for Teledyne Wah Chang, which manufactured the zirconium shipped by Mr. Goldberg at its Albany, Ore., plant, said the light metal was also used in aircraft and submarines, among other things. However, James Benham, a lawyer for the company, declined to comment on reports that Teledyne had alerted the Commerce Department to the Pakistani purchase.

Compliance division agents under Mrs. Connelly had kept the cargo under surveillance during its trip from Oregon to Kennedy Airport, where they had customs agents seize it.

William von Raab, Commissioner of Customs, this month announced the start of an intensive program, Operation Exodus, designed to stem the illegal export of critical technology from the United States. Teams of customs agents, inspectors and patrol officers are being specially trained to focus on the problem, he said.

[From the Washington Post, Nov. 21, 1981]

U.S. PENALIZES TWO WHO TRIED TO SHIP METAL TO PAKISTAN

Three weeks after seizing a Pakistan-bound shipment of zirconium, a metal used in construction of nuclear reactors, the government has lifted the export privileges of two men it says were involved with the shipment.

The 5,000-pound shipment, valued at about $153,000, was seized by U.S. Customs agents late last month at Kennedy airport in New York, according to a Commerce Department statement issued yesterday.

The statement quoted government hearing commissioner Thomas Hoya as saying that the two men tried to export the metal "without obtaining export authorization."

One of the men, Albert A. Goldberg, president of National-Tronics Co. of New York City, was quoted in yesterday's New York Times as saying he did not apply for special authorization because he did not know he was dealing with a controlled commodity.

Also denied all U.S. export privileges, according to the Commerce Department statement was Sarfraz A. Mir, managing director of S. J. Enterprises of Islamabad, Pakistan.

The order not only denies the men and their companies direct export privileges, but it also prohibits other firms from dealing in any export transactions with them without Commerce Department authorization, the statement said.

The United States prohibits zirconium shipments to foreign countries without a license because of the metal's potential use in nuclear reactors.

Shipments to Pakistan are particularly sensitive in light of persistent reports that that nation's leaders are trying to develop nuclear weapons.

Pakistan has not signed the international nuclear nonproliferation treaty, and therefore a license for exporting zirconium to that nation would not have been granted, a Commerce Department spokesman said.

State Department spokesman Dean Fischer said that "a central element of this administration's nonproliferation policy is the application of effective controls on the export of nuclear materials."

He said the Commerce and Customs actions "mark an important success in the implementation of this policy."

U.S. officials have talked with officials of Pakistan about the recent case and "expressed our concern about the apparent violation of U.S. laws," Fischer said.●

UNEMPLOYMENT

● Mr. EAST. Mr. President, Benjamin Disraeli once declared that there are three categories of untruth: lies, damn lies, "and then, sir, there are statistics."

Just now we are hearing a great deal about unemployment statistics. We are told that the latest unemployment figures reveal that we are about to relive the worst days of the Great Depression. At a recent public appearance by President Reagan, a bogus soup kitchen was set up to dramatize the point.

While neither I nor any member of my party is satisfied with the present level of joblessness in this country, and while none of us would ever attempt to make light of the very real human suffering it entails, I feel that we must keep this issue in proper perspective and not be deterred from doing the hard but necessary things that must be done if we are to restore genuine prosperity to the Nation.

Those who talk darkly about a return to breadlines and apple selling on street corners are twisting the facts of the situation to suit there own purposes. There are significant differences between unemployment in the 1930's and unemployment today. I recommend to my colleagues an excellent article on the subject by Ed Townsend, labor correspondent of the Christian Science Monitor. I ask that the complete text of Mr. Townsend's article be reprinted in the RECORD.

The article follows:

[From the Christian Science Monitor, Dec. 7, 1981]

HOW TODAY'S JOBLESS SCENE DIFFERS FROM 1930's

(By Ed Townsend)

The steep rise in unemployment in November, to 8.4 percent of the labor force, is causing growing concern about the impact that the deepening recession will have on American hourly paid and salaried workers. There is grim talk of a return to the problems of the 1930s.

The worries are largely unwarranted. Today's conditions are by no means the same as those half a century ago. Then, high unemployment was a major social issue; now, it is more a political issue as a result of government and private safeguards against the misery and despair of unemployment.

With 8.4 percent unemployment, an increase from 8 percent in October, the number of jobless reached just over 9 million of a total work force of 107 million. The totals were the highest since the severe recession of 1974–75, when the rate reached 9 percent before turning down.

If President Reagan's first efforts to end a year-long rift with unions have had any limited successes, the November unemployment report probably wiped them out. AFL–CIO president Lane Kirkland immediately renewed attacks on the Reagan economic program: It is "not solving but aggravating the nation's economic and human crisis," he said.

"It is time to adopt a new antirecession program that will ease human hardship now and build toward a healthy economy," Mr. Kirkland said.

Numerically the total is approaching that in the depression 1930s, when unemployment reached 12,830,000. However, with a smaller work force, 51,590,000 in 1933, the national jobless rate was a grim 24.9 percent; only 38,760,000 were working. These hardships resulted in President Franklin Roosevelt's New Deal measures to ease the impact of unemployment through a benefit system that has been revised through the years until a jobless worker now is able to collect benefits that in many instances exceed one-half of what was earned while working. Paid for a limited period, in most instances six months or more, these benefits have eased hardships considerably.

Another change from the 1930s is the large number of families that now have a hubsand and wife as bread earners; 50 years ago so there was almost total reliance on a husband's wages.

Still another change, in auto and other industries, results from labor contracts that assure workers of partial pay if they are laid off—as much as 90 percent or more through pay and jobless benefits in the case of auto workers with long seniority.

Those who are laid off talk of limited or skipped Christmases this year, reduced living standards, and mounting bills, but the specter of soup kitchens, long bread lines, and apple selling on street corners is not likely to reappear.

Union officials who met with Mr. Reagan earlier in the week sharply opposed the administration's economic program and called for changes. Most left the meeting dissatisfied: Except for a minor concession on the air traffic controllers issue, one that could open other government jobs to some of those fired for striking, the best the unionists could say of the meeting was, "We at least talked face to face, something we hadn't been able to do since last January."

When the Bureau of Labor Statistics released its unemployment figures two days later, President Reagan said that, having grown up and entered the work force in the Great Depression, "I can assure you that I do not take unemployment lightly. It's a great tragedy for the people involved."

Nevertheless, the President and others in his administration remain firmly committed to the policies that labor strongly opposes. They said that rising unemloyment is "the price you have to pay for bringing down inflation." The White House expressed optimism that the Reagan economics program will reverse the unemployment trend next year.

For organized labor, that was not enough.

The November unemployment rise affected nearly all groups in the labor force, but the impact was especially large for those in blue-collar occupations. The rate for adult men rose to 7.2 percent, just below the post-World War II high.●

THE ADDICTION TO CONTINUING RESOLUTION

● Mr. DECONCINI. Mr. President, I voted against final passage of House Joint Resolution 370, the third continuing resolution for fiscal year 1982, despite the fact it contains a number of items in which I have a particular interest. The adoption of another continuing resolution covering 10 of the 13 regular appropriations bills is unwarranted, dangerous, and irresponsible.

It is unwarranted, Mr. President, because it is unnecessary. The normal appropriations process was well along toward completion when it was put on hold in September by the leadership of this body at the behest of the administration. At that point, 10 of the 13 appropriations bills had either cleared the House or were pending on the calendar; one had passed the Senate, two were reported, and the majority of the remainder were awaiting full committee action. The Treasury, Postal Service, and general Government bill, for instance, was marked up July 14 and could easily have been disposed of shortly after the August recess had it not been for the scheduling freeze initiated by the administration.

Thus, the record should be clear as to why we are still enacting continuing resolutions at the end of the first quarter of fiscal 1982. The budgetary disarray reflected in House Joint Resolution 370 has not been the result of congressional dereliction. Nor is it attributable to some incapacity on the part of the Appropriations Committees and their leadership. The real causes, as all of us know, lie elsewhere and are much more fundamental than squabbles over a fraction of 1 percent of the total Federal budget would suggest. The hard fact is that the Congress has enacted the President's economic program. On that much, at least, the Senate Budget Committee agrees in its report accompanying the so-called second concurrent resolution. Unfortunately, that plan has failed to perform as advertised. Far from providing a surge of real GNP growth, rapidly declining unemployment, and sharply dropping interest rates, we are now headed for what will probably be the worst economic crisis since the Great Depression. Furthermore, this crisis will be compounded by unpredecented Federal deficits totaling, according to OMB, in excess of $400 billion over the next 3 years.

Addiction to continuing resolutions and comparable omnibus funding measures is dangerous, Mr. President, because it erodes the independence of this branch of the Government and puts intolerable stress on the delicate constitutional balances at the heart of our political and governmental system. It bears repeating in this context that the most telling power conferred upon the legislative branch is the power of the purse. Upon that power hinges, in one way or another, all other effective congressional authorities. To the degree that Congress abdicates its control of public expenditures—to that extent the constitutional foundations of legislative independence are undermined.

Finally, Mr. President, appropriation via continuing resolution under the threat of a Presidential veto is irresponsible. It puts the Congress in the untenable position of approving without due deliberations unspecified funding changes whose full implications cannot be known. In this most recent case, for example, we were given to understand that no amendments, regardless of their merit, were possible because it was imperative to avoid a repetition of last month's cleverly contrived budget crisis. Thus, even those who took the trouble to identify and correct obvious flaws, errors, and deficiencies were precluded from doing so. That is why, Mr. President, House Joint Resolution 370 contains too much for foreign aid and not enough for veterans services or the maternal and child health program, for instance. Also, it should be noted that in the area of defense expenditures under House Joint Resolution 370 is $197 billion, instead of the $208 billion as was approved by the Senate. By enacting House Joint Resolution 370 we are once again shortchanging our national security by spending for less than the Senate defense appropriation bill and what the President has asked for. How long can we continue not to move forward with increases in defense spending? Our national security deserves better and so do the people of this Nation.

The time has come, Mr. President, to draw the line and begin the process of rebuilding responsible budgetary procedure. Financial management by a combination of Executive fiat and omnibus funding resolutions cannot be allowed to continue.●

THE 10TH ANNIVERSARY OF THE CONNECTICUT STATE PLANNING COUNCIL ON DEVELOPMENTAL DISABILITIES

● Mr. WEICKER. Mr. President, Wednesday, December 16, 1981 will mark the 10th anniversary of the Connecticut State Planning Council on Developmental Disabilities. an agency whose accomplishments in service to the disabled deserve the recognition of our colleagues.

In the first decade of its existence the council has awarded over 75 perecnt of its grant funds to initiate direct service projects in the four priority areas established under the law. Although no grant was for more than 3 years duration, it is significant that today 85 percent of the projects funded are still functioning. As a result of council activities in its most recently concluded year over 3,900 disabled individuals were served.

This record of accomplishments is directly the result of the involvement of a wide range of Connecticut citizens. More than 100 people, the majority of them consumers, have been council members and some 67 public and private agencies have participated in the council's work since 1971.

In addition to an actively involved membership the council has also enjoyed the strong and effective leadership of its chairperson, Mildred S. Adams and its executive director Edward T. Preneta.

Earlier this year the Congress reviewed the developmental disabilities program and reaffirmed its support by reauthorizing DD in the Omnibus Reconciliation Act. The Connecticut council's 10th anniversary affords us an opportunity to reflect on one of the many fine State level agencies who actually perform the challenging and vital job of assisting those with lifelong and multiple handicaps to reach their fullest potential in our society. It is an opportunity I take with pride, particularly in this, the International Year of Disabled Persons.●

ADDRESS BY OSCAR FIELD, PRESIDENT OF THE IDAHO FARM BUREAU FEDERATION

● Mr. SYMMS. Mr. President, in the mire of pessimism that has beleaguered the success of President Reagan's economic recovery plan, it is refreshing to hear from someone who recognizes its necessity, and urges continued confidence in this Nation's ability to address its problems and overcome its adversities. I recently read a speech of such a person, and I was so impressed with his words of commonsense and positivism that I want to share them with the Members of this great body. We should heed the wisdom of these thoughts as we face the difficult economic decisions we must make.

The speech was given before the Idaho Farm Bureau Federation by its president, Oscar Field. In the remarks, Mr. Field notes the adversities currently being faced by farmers throughout the Nation, but reminds us that the Reagan formula is still in its infancy compared to 40 years of economic fiscal irresponsibility. His charge that "The best hope of Agriculture is to continue believing that inflation will be curbed by the President's Program," is testament to his strong conviction that our economic problems have only begun to be reversed by the policies of this administration. Mr. Field calls on America's farmers to reaffirm their commitment to the recovery package despite the short-term discomfort of the recovery efforts.

I hope that the Members of this body remember Mr. Field's strong and courageous words as they deliberate on the next steps of the economic program of

President Reagan. The text of Mr. Field's address follows:

REMARKS OF OSCAR FIELD

It's good to be with you for three days of work and relaxation, at this very important meeting where we will accept the policies which will guide us for the coming year. Policy development is near to my heart. This is where every Farm Bureau member has an opportunity for input. Here, is where the grass roots really work.

I appreciate your abilities and dedication to help move this organization along. Thank you Board of Directors, County Presidents, Women of Farm Bureau, Young Farmers and Ranchers, Staff and members.

We are moving in every area. . . . We are accomplishing much . . . but we must do more. . . .

In looking back over the past year, where are our continued concerns? Where are the silver linings coming through the cloudy skies?

Again, we have had bumper crops. We can really produce, no matter whatever obstacles. Our financial success? That's a different story. Our markets are depressed. High inflation, high interest rates, high overhead have a direct relationship to the depressed farm income.

The government with its projected trillion dollar debt, is still the largest borrower, encouraging higher interest rates.

We cannot afford a trillion dollar debt! Do you know how much a trillion dollars is? If you spent one dollar every second ($86,400.00 every day), it would take you over 31,000 years to spend a trillion dollars. A trillion dollar debt means a $12,500 debt for every American household.

Last year, the American people said, "We want to turn this country around. We cannot survive the philosophy of government spending. We cannot carry this financial burden."

Our organization came out in strong support of President Reagan's economic recovery program, because it was in line with Farm Bureau's policies. We did not make that commitment that we would support it only until it became uncomfortable for us!

The President's program has only been implemented for the past two months and already the news media and others are saying it won't work. It took us 40 years to get this headache and it cannot be overcome in 2 months. Someone has said that it is like ordering an air conditioner for your overheated home and then complain that it hasn't worked even before it has been delivered.

ABC Television's recent poll interested me. ABC selected 1500 people to interview and found that a slight majority felt that the President had not delivered on his promises, so had lost faith in him, or were not as pleased with him as they had been one year ago. There are over 230 million people in the United States and ABC was indicating that 1500 people could project the philosophy of the American people.

INFLATION IS STARTING TO COME DOWN . . . INTEREST RATES ARE STARTING DOWN

The best hope for Agriculture is to continue believing that Inflation will be curbed by the President's program. This would give consumers more spendable income and we could expect an increase in the demand for Agricultural products.

In Idaho we have 831,000 people while New York State has 18 million and California nearly 23 million people. We are proud of our growth in the last 8 years of the Idaho Farm Bureau from 14,000 to 24,000 and our over 3 million American Farm Bureau members.

It's easy to see, however, that with farmers making up only 3 percent of the total population, our work is cut out for us. A little calculating—suppose only ¼ of our membership is really active, that means each of us has the responsibility for informing and telling the story of Agriculture to 374 Americans.

Idaho Farm Bureau, as an organization and its individual members and the American Farm Bureau Federation, as a unit and members have been very active in all legislation, but particularly that affecting Agriculture.

We have those working in the areas of Energy, Water development, Marketing, Natural Resources, Estate Planning, Insurance, but there are still areas of concern.

Let me list some problems that need our immediate attention.

The Congress, pushed by conservationist groups, has mandated that every National Forest must have a forest plan by 1983. The plan must cover all the uses of the forest such as regulating fire wood cutting, grazing, timber cutting, mining, recreation, wildlife and all other general uses of the forest for the next ten years. This sounds harmless and a reasonably good idea, but if you don't become involved, you may be stuck with something that will be far from desirable. On completion, the final plan is fed into computers and from that time forward, the computer will be kicking out the instructions for each forest and each function on that forest.

If you are not involved in the plan during its construction, you cannot appeal it. If your concerns are voiced, you can then appeal, at your own expense, any part of the plan with which you disagree and legally have recourse.

You should continually review this plan while it is in its construction form. Send your name and address to the National Forest Supervisor's office in your area asking to be included on the mailing list for the forest planning. Also, ask to be placed on the list to review environmental reports in your specific area of interest. If you don't understand the plan, contact your nearest forest office. They are required to give explanations to the public.

Each plan will cost the taxpayers from $750,000 to 1 million dollars to write. There are more than 90 national forests. All federal agencies, by law, are going through this process, BLM, Wildlife, Fish and Game, Forest Service, etc.

The Lolo Forest, out of Missoula, Montana has finished its plan. The plan has been appealed as unacceptable. If all the plans prove to be unsatisfactory and must be appealed, the cost to the taxpayer will be staggering, plus the damage to the American economy should these plans not support the multiple use philosophy for use of our natural resources.

We must continue to keep a sharp eye on those who would place stumbling blocks in the paths of energy development.

We must be very aware of the groups who are pledged to advance agitation for animal rights. There is a new book that we should all read. It is Love and Anger by Richard Morgan. It calls for organizing activists in the struggle for animal rights and other progressive political movements. Mr. Morgan states that in struggling to change the way humans treat animals and one another, we are working toward nothing less than the transformation of the world. I am not afraid of change . . . I welcome it . . . but the right kind of changes.

The first cast-iron plow invented in 1797 was rejected under the theory that cast iron poisoned the land and stimulated the growth of weeds. Men have insisted that iron ships could never float, planes never carry hundreds of people safely and now critics of the nuclear age believe that nuclear energy can never be harnessed safely.

Our concerns must be based on facts. We must never be guilty of becoming complacent.

Things are looking up. Economists are saying that gasoline prices next year will rise only slightly, diesel supplies are plentiful and will also increase in cost only a small amount.

Government regulations, in the past, have been like an elephant sitting on a baby bird to keep it warm. This year, there will be relief from government regulations. The Occupational Safety and Health Administration and the Environmental Protection Agency will make fewer inspections and concentrate only on the known "bad apples".

We have a president who is not afraid of political pressures. For the first time in many years, he is being the aggressor with the proposal concerning nuclear missiles in Europe. The monkey is now on Russia's back.

Our president is not afraid to do the things that he feels are right to regain America's greatness.

Can we do Less?

I am reminded of the story of the man who had six sons who continually quarreled among themselves. He called them to him and gave each a stick asking them to each break his stick. The task was easy. Then he gave each a bundle of sticks with the same request. The bundle of sticks could not be broken.

Our strength and weaknesses in Farm Bureau lie in the diversification of the many commodities our umbrella organization represents. We are bound to have differences of opinions, but working together, we are like the bundle of sticks . . . We cannot be bent or broken. We can accomplish everything we desire to help Agriculture remain the most important and necessary industry in the lives of all Americans.

According to a recent Iowa State University Report, I quote, "Farmers are about to enter their most prosperous period of this century".

Hang tough! Be informed! Be willing to share your ideas! Generate excitement! Be actively working in Farm Bureau, the organization that will help to make all of our futures bright! Thank you and God Bless!●

OPPOSITION TO BUDGET CUTS PERTAINING TO SENIOR CITIZENS, THE INDIGENT AND MINORITY GROUPS

● Mr. EXON. Mr. President, in Nebraska, citizens of the grand generation have recently finished the second legislative session of the "Silver-Haired Unicameral." This body of senior citizens addressed themselves to laws and issues which can contribute to a better society.

At the request of the "Silver-Haired Unicameral," whose members are greatly concerned that additional budget cuts will slice a hole in the so-called "social safety net," I ask that their resolution number 4 be printed in the RECORD for each Senator to see. The resolution reads:

SILVER-HAIRED RESOLUTION NO. 4

Now, therefore, be it resolved by the members of the Silver-Haired Unicameral of Nebraska, Second Session:

Whereas, the budget proposals suggested and submitted by the Reagan administration affect mostly the senior citizens, the indigent, and minority groups, and,

Whereas the latest proposals as of October 10 will create more hardships for the aged, the blind, the disabled, and

Whereas the President stated in the Spring these would be exempt from such cuts, and

Now therefore be it resolved That this body of Silver Haired Legislators, State of Nebraska go on record opposing these cuts as proposed, and

Be it further resolved a letter stating our views shall be sent to our representatives in both Houses of Congress, asking them to read it to the bodies, and requesting that it be made a part of the Congressional Record, and a like letter be sent to President Reagan.●

QUORUM CALL

Mr. METZENBAUM. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. WARNER). Without objection, it is so ordered.

ORDERS FOR TUESDAY

RECESS UNTIL 10 A.M.

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 10 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF CERTAIN SENATORS

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the two leaders tomorrow under the standing order, the following Senators be recognized on special orders, for not to exceed 15 minutes each: the Senator from Pennsylvania (Mr. SPECTER), the Senator from Wisconsin (Mr. PROXMIRE), the Senator from Arkansas (Mr. BUMPERS), the Senator from Mississippi (Mr. COCHRAN), and the Senator from Pennsylvania (Mr. HEINZ).

The PRESIDING OFFICER. Without objection, it is so ordered.

TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that on tomorow, after the recognition of Senators under the standing order and the special orders just entered, there be a brief period for the transaction of routine morning business, not to extend longer than 15 minutes, in which Senators may speak for not more than 3 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Mr. President, if there is no further business to come before the Senate, and I see no Senator seeking recognition, I move, in accordance with the order just entered, that the Senate stand in recess until the hour of 10 a.m. tomorrow.

The motion was agreed to; and at 4:09 p.m. the Senate recessed until tomorow, Tuesday, December 15, 1981, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate December 14, 1981:

FEDERAL ELECTION COMMISSION

Danny Lee McDonald, of Oklahoma, to be a Member of the Federal Election Commission for the term expiring April 30, 1987, vice Robert O. Tiernan, term expired.

FEDERAL MEDIATION AND CONCILIATION SERVICE

Kenneth E. Moffett, of Maryland, to be Federal Mediation and Conciliation Director, vice Wayne L. Horvitz, resigned.

Navy nominations beginning Wilbur D. Jones, Jr., to be captain, and ending Frederick A. Albue, to be lieutenant (j.g.), which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on December 1, 1981.

HOUSE OF REPRESENTATIVES—*Monday, December 14, 1981*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Incline Your ear to our prayer, O Lord, and look with favor upon our petitions. We pray for people of every nation who live without the freedoms with which we have been blessed, and especially this day we remember the people of Poland. May not the struggles of that land cause life to be lost and may not the people despair and lose hope for a better day. In this season of light cause us to see more clearly the liberties of the land, that we will be thankful for our gifts and eager to share with those who live in fear and want. In Your name, we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 4559. An act making appropriations for Foreign Assistance and related programs for the fiscal year ending September 30, 1982, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 4559) entitled "An act making appropriations for foreign assistance and related programs for the fiscal year ending September 30, 1982, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. KASTEN, Mr. HATFIELD, Mr. D'AMATO, Mr. RUDMAN, Mr. SPECTER, Mr. INOUYE,, Mr. JOHNSTON, Mr. LEAHY, Mr. DECONCINI, and Mr. PROXMIRE to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1086) entitled "An act to extend and revise the Older Americans Act of 1965, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House with an amendment to a bill of the Senate of the following title:

S. 1003. An act to amend title III of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended, to authorize appropriations for such title for fiscal years 1982 and 1983.

The message also announced that the Senate disagrees to the amendments of the House to the bill (S. 1196) entitled "An act to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for the fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982, and for other purposes," agrees to a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. PERCY, Mr. HELMS, Mr. HAYAKAWA, Mr. LUGAR, Mr. MATHIAS, Mr. PELL, Mr. BIDEN, Mr. GLENN, and Mr. SARBANES for all provisions except title VI of the Senate bill and title IV of the House amendment (relating to the food-for-peace program, Public Law 480); Mr. CRANSTON (in lieu of Mr. BIDEN), as an additional conferee solely for considerations for provisions dealing with the Peace Corps; Mrs. KASSEBAUM as a substitute conferee (for Mr. MATHIAS) on December 11, 1981, only and Mr. HELMS, Mr. DOLE, Mr. HAYAKAWA, Mr. LUGAR, Mr. HUDDLESTON, Mr. LEAHY, and Mr. ZORINSKY, for consideration of title VI of the Senate bill and title IV of the House amendment (relating to the food-for-peace program, Public Law 480) to be the conferees on the part of the Senate.

The message also announced that the Senate had passed bills and a joint resolution of the following titles, in which the concurrence of the House is requested:

S. 1946. An act to provide for the final settlement of certain claims against Czechoslovakia, and for other purposes;

S. 1948. An act to permit to become effective certain Farm Credit Administration regulations which expand the authority of financing institutions, other than Farm Credit System institutions, to borrow from and discount with Federal intermediate credit banks; and

S.J. Res. 123. Joint resolution authorizing and requesting the President to proclaim "National Disabled Veterans Week."

The message also announced that the Senate agreed to the following resolution:

S. RES. 256

Resolved, That the proposed 1982-1983 Needs Analysis Formula for the Pell Grant, the National Defense Student Loan, the College Work-Study, and the Supplemental Educational Opportunity Grant Programs transmitted to the Congress on October 13, 1981, is disapproved pursuant to the provisions of section 482(a) of the Higher Education Act of 1965.

SEC. 2. It is the sense of the Senate that, in addition to the conditions applied to Pell Grants pursuant to the joint resolution entitled, "Joint resolution making further continuing appropriations for the fiscal year 1982, and for other purposes", the family contribution schedule for the 1981-1982 academic year be the family contribution schedule for the 1982-1983 academic year, except that—

(1) the family-size offsets and the dependent-student offsets for both dependent students and independent students used for academic year 1981-1982 be used for academic year 1982-1983 and be increased by the applicable percentage increase in the Consumer Price Index prepared by the Department of Labor;

(2) the assets for the determination of expected family contribution under section 482(b)(5)—

(A) be determined, for families of dependent students and independent students with dependents, by deducting an asset reserve of not less than $25,000 from the net value of all assets,

(B) if net assets include a principal place of residence, be determined by deducting an additional reserve of $25,000 from net assets, and

(C) if net assets include farm or business assets, be determined by deducting an additional reserve of $80,000 from net assets,

except that the total net asset reserve for each family not exceed $100,000;

(3) the assessment rate applied to the discretionary income of families with dependent students be—

(A) 11 percent on the first $5,000 of discretionary income,

(B) 13 percent on discretionary income between $5,001 and $10,000,

(C) 18 percent on discretionary income between $10,001 and $15,000, and

(D) 25 percent on any amount over $15,000;

(4) the same assessment rates applied to the discretionary income of single dependent students, notwithstanding section 482(b), be used as were used in academic year 1981-1982;

(5) the assessment rate for an independent student who has one or more dependents (other than a spouse), notwithstanding section 482(c)(1)(D), be 25 percent of the discretionary income of that student; and

(6) the same assessment rate applied to the discretionary income of single independent students be applied to married independent students (with no dependents other than a spouse) except that if both individuals are students the individuals be treated as if they were single independent students.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair desires to announce that pursuant to clause 4 of rule I, the Speaker signed the following enrolled joint resolution on Friday, December 11, 1981:

H.J. Res. 370. Joint resolution making further continuing appropriations for the fiscal year 1982, and for other purposes.

APPOINTMENT OF CONFEREES ON H.R. 4559, FOREIGN ASSISTANCE AND RELATED PROGRAMS APPROPRIATIONS, 1982

Mr. LONG of Maryland. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4559) making appropriations for foreign assistance and related programs for the fiscal year September 30, 1982, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Maryland? The Chair hears none, and appoints the following conferees: Messrs. LONG of Maryland, OBEY, YATES, MCHUGH, LEHMAN, WILSON, DIXON, GRAY, WHITTEN, KEMP, EDWARDS of Oklahoma, LIVINGSTON, LEWIS, PORTER, and CONTE.

APPOINTMENT OF CONFEREES ON H.R. 4995, DEPARTMENT OF DEFENSE APPROPRIATIONS, 1982

Mr. ADDABBO. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4995) making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

PREFERENTIAL MOTION OFFERED BY MRS. ROUKEMA

Mrs. ROUKEMA. Mr. Speaker, I offer a preferential motion.

The SPEAKER. The Clerk will report the motion.

The Clerk read as follows:

Mrs. ROUKEMA moves that the managers on the part of the House at the conference on the disagreeing votes of the two Houses on the Senate amendments to the House bill H.R. 4995 be instructed to insist upon the total amount appropriated (for "procurement") under the provisions contained in title IV of the House bill, and upon the total amount appropriated (for "research, development, test, and evaluation") under the provisions contained in title V of the House bill.

The SPEAKER. The gentlewoman from New Jersey (Mrs. ROUKEMA) is recognized for 1 hour.

Mrs. ROUKEMA. Mr. Speaker, I yield 30 minutes to the gentleman from New York (Mr. ADDABBO), pending which I yield myself such time as I may consume.

I am offering a motion to instruct our conferees to insist upon the House-passed numbers under titles IV and V of H.R. 4995, the Defense appropriations bill. I do so because of widespread concern that, without the registered, strong support from the full House, the conferees would have no recourse but to accede to the usual practice of meeting halfway on these appropriations—a practice which could result in increases up to $4 billion above the House totals. Specifically, the House figure for procurement is $63.7 billion compared to $66.1 billion in the other body; the House figure for research and development is $19.3 billion compared to $20.8 billion. Remember, these are the two fastest-growing portions of this Defense bill. We must give the conferees a strong hand if we are to be successful in our efforts to promote better management and cost efficiency. Since 1977, procurement has increased 60 percent in real dollars from $39.8 billion to $63.7 billion—Congressional Research Service. Research and development has increased 24 percent in real dollars in that same 5-year period from $15.6 to $19.3 billion. Let me emphasize that these numbers are based upon the House-passed figures; if we use the numbers approved by the other body, these increases in real dollars will be even higher. And let me also emphasize that the House-passed bill already contains procurement and/or R. & D. funds for virtually every new weapons system, including the MX and B-1. We should also note that the other body has increased funding for inflation within these two titles by more than a billion dollars; it has also added a built-in 3 percent cost-overrun allowance on top of that for the MX and B-1 bomber.

Let me state clearly: There is no question that we need to improve our defense. But commonsense tells us that we cannot prudently do so in the space of 1 year. Nor should we. The funding levels appropriated by the other body, and the rapid growth within these two titles is an open invitation to inefficiency and poor management.

Apparently, the other body adopted their figures to "send a signal" to the Soviet Union about our willingness to strengthen our defense. It is difficult to believe that a 20-percent increase, in real dollars, in procurement and R. & D., which is contained in the House bill, is not a sufficient "signal" to the Soviets. Furthermore, the Congressional Budget Office has projected a 95 percent real growth in our defense budget over the next 5 years. This is an ample "signal" by any measurement. But, in consideration of our fragile economic status, what about sending a signal to our Nation's financial markets that we are exercising budgetary restraint? And what kind of signal is being sent about our sense of fairness and our priorities when we urge further reductions in virtually every domestic program?

Mr. Speaker, I am fully aware of some Members' reluctance to instruct the conferees. I would agree that the procedure be reserved for exceptions. However, we are faced in this bill with extraordinary circumstances—as we have been on past occasions when the full House has voted to instruct. To cite but two examples, in 1978 the House instructed its conferees on DOD appropriations to insist on their position in support of consolidation of Army and Navy helicopter training. And on May 13 of this year, we instructed our conferees to insist upon our defense totals within the budget resolution.

Let me remind my colleagues that instructions to conferees are advisory and are not binding in a strict sense (Deschler's Procedure 33 section 10.1). But they do put the full moral suasion of the House behind its own committee's work.

In my opinion, there is ample justification for this motion. We cannot disregard the fact that 3 weeks ago the House come within five votes of passing my amendment to cut 2 percent—$1.65 billion—from these titles. But for five votes we would have demanded reduction. How can we now, without registering protest, accede to the other body?

Many Members, myself included, recognized the diligent and meticulous work of the Defense Appropriations Subcommittee and found the committee case persuasive. Some Members who did not support my amendment did so because they were convinced that solid reductions had already been achieved by the committee.

During that debate, there was substantial agreement by both sides about the long hours and hard work that went into bringing about reductions. It was stated, "we do our homework and we know where the lean is." We were reminded that the committee spends its time "pouring over these figures, listening to witnesses, interrogating people and marking up for weeks at a time."

The point is this: 197 Members supported additional cuts in titles IV and V. Among those who did not, many indicated that they were supportive of the competence of the committee and were satisfied with the fact that their budget came in $4 billion less than the administration's. A motion to instruct

would help the conferees make a very strong case for supporting the committee and retaining these carefully calculated spending levels.

There are compelling reasons to "hold the line" in titles IV and V. First, we will absolutely not affect readiness capability if we adopt this motion. That is, we will not affect personnel expenditures, operations and maintenance, military training. These categories all fall under other titles that would not, in any way, be affected by this motion.

Second, economic reality does not just suggest—indeed, it demands—the House stand firm to keep down additional increases in the deficit for fiscal year 1982. We have seen news reports last week about the White House "worst case" projections of a budget deficit of $109 billion. If we do nothing it is almost a certainty that the $4 billion savings, over which we have agonized in the continuing resolution, will be wiped out in the defense appropriations conference. And this without even speculating on the costs of inevitable supplementals.

From another perspective, how does $4 billion translate in terms of other programs?

Education for the handicapped costs $1 billion per year;

The guaranteed student loan program costs $3 billion per year; and

The social security minimum benefit costs $1.3 billion per year.

Or look at it another way:

Four billion dollars equals one-half the cost of veterans' medical and hospital benefits for 1 year;

It equals one-half the cost of the Federal highway program for 1 year; and

It equals the full cost of senior-citizen community centers, nutrition centers, and Meals on Wheels—all within the Older Americans Act—for 5 years.

In summary, approval of the motion to instruct will do the following: First, it will direct the conferees to develop the strongest possible position and ultimately could lead to a savings of $4 billion over the bill passed by the other body; second, we will make a clear statement to our Nation's financial markets that we are dead serious about preventing unwarranted escalation of annual deficits; third, this modest restraint in defense will be one very small step toward requiring efficiency and effective management within the Defense Department. There are no Federal sacred cows; and fourth, finally, we will not impair our continuing drive for an improved national defense, including new weapons, readiness, capability, personnel, training, and operations.

These are extraordinary circumstances. They require decisive action. I urge your support for this motion.

□ 1215

Mr. BEREUTER. Mr. Speaker, will the gentlewoman yield?

Mrs. ROUKEMA. I yield to the gentleman from Nebraska.

Mr. BEREUTER. Mr. Speaker, I rise in strong support of this motion to instruct the House conferees to insist upon the amount appropriated in the House version of the fiscal year 1982 Department of Defense appropriation for procurement and for research, development, testing, and evaluation, and I commend the gentlewoman from New Jersey for her efforts to insure that the large increases in defense spending will be targeted to those areas which have been neglected in recent years, rather than toward the procurement of ever more sophisticated and expensive weapons systems which we sometimes cannot afford in sufficient numbers to enhance our combat effectiveness.

Mr. Speaker, I want to make it clear that I support increased defense spending, that I have, for example, a "Peace through strength" plaque on my wall too, but I am also concerned that our defense establishment simply does not have the capability to effectively absorb the enormous increases in spending which have been proposed for procurement in the near term. If we are to sustain public support for increased defense spending, and it is important that we do so, then we must spend wisely and prudently. The public sentiment for these increases is indeed still substantial, but I and other Members have come to question its depth. There is little question that we can spend the trillion dollars over the next 5 years for defense, but if we do so and no perceptible or concomitant increase in combat effectiveness results, I can assure my colleagues that an antidefense backlash will develop which will make the post-Vietnam era sentiment pale by comparison. The American public simply will not stand idly by and allow the Pentagon, the President, or the Congress to drain the public treasury on unnecessary or ineffective weapons, and on inappropriate allocations generally, while domestic spending is being subjected to severe cuts and while the budget deficit continues to soar.

There are areas of the defense budget which require immediate and substantial increases. The necessary funds for readiness functions, operations and maintenance, fuel for steaming and flying time, and spare parts shortages must be addressed. These are extremely high priorities, and the increased appropriations for these functions which are provided in the House-passed version of the bill will result in a marked increase in combat effectiveness in a relatively short period of time. The motion which is now before us recognizes the importance of these areas. It is in the areas of procurement and R. & D. where the Congress must closely scrutinize the need for, and effectiveness of, massive increases and exercise its very best and careful judgment. As my colleagues will recall, during earlier consideration of the defense appropriation resolution by the House, an amendment to reduce procurement and R. & D. funding by a mere 2 percent was narrowly defeated. At that time, the committee assured the Members that each of the weapons systems included in the bill was necessary and that the funding levels in the bill would indeed provide an adequate defense for the coming year.

We are now faced with a Senate measure which is $3.9 billion over that which passed the House in these procurement and R. & D. functions. I urge my colleagues to reflect for a moment on the need to continue spending more for procurement when, in terms of constant 1982 dollars, procurement has increased 60 percent over the past 5 years. We need to rebuild the defense of the Nation, but we must do so at a pace and in a manner which will reflect a real enhancement of combat capability without placing an untenable burden upon the national Treasury and with an effectiveness which will preserve the American consensus to correct our serious national defense deficiencies. The motion which is before us is a positive contribution to that effort, and I urge its adoption.

Mr. GUNDERSON. Mr. Speaker, will the gentlewoman yield?

Mrs. ROUKEMA. I yield to the gentleman from Wisconsin.

Mr. GUNDERSON. Mr. Speaker, I rise in strong support of the motion by the gentlelady from New Jersey. And let me begin, by commending her for her outstanding leadership on this issue. It was the gentlelady from New Jersey who offered an amendment 2 weeks ago during consideration of the Defense appropriations bill to cut 2 percent of the money allocated for titles V—research, development, test, and evaluation—and IV—procurement. Now again, she has given this Congress the leadership to at least hold the line on our increase as compared to even larger numbers by the other body.

There exists, I suspect, a large number in this body who have found themselves in the same difficult position regarding our military spending, that I do. Last year, during my campaign for Congress, I was one who made defense spending a major issue. At that time my campaign discussed the needs for major increases in military pay and conventional weapons. In doing so, I mentioned the need of a possible increase in our military budget around $20 billion. This figure was determined by discussions with

various people with much more military expertise than I. In addition, it is not far from the figure both candidates for President used during their campaigns. It is then, a bit uncomfortable to advocate defense increases at one point in time only to later find yourself among those claiming the Defense budget goes too far.

But that is indeed the case. We, the Federal Government, seem intent in going from one extreme of ignoring our defense needs to the other extreme of simply throwing too much money in too short a time.

This country is at a major crossroads in our history; 1981 has been a dramatic year, witnessing an equally dramatic turnaround in our economic program. We are participating in a major change in the role in the Federal Government in our economy, our lives, and our social structure.

The American people have responded with their support for the general concept of the program. They recognize this country, and this Government can no longer live beyond their means. All they ask is that we do not ignore the legitimate role of Government, and that our program for economic recovery be an equitable program for all sectors of the population.

During the past Thanksgiving Day recess, I traveled extensively throughout my district, holding meetings in every one of the 16 counties. The message, I received was very clear. For it came from liberals and conservatives. It came from businessmen and social service directors. They are willing to cut. All they ask is that everyone undergo the same scrutiny. And in that vein, they asked why Congress is neglecting to put the same scrutiny on the Defense and foreign aid budgets that we are asking of everyone else.

That then is the major reason to support the motion by the lady from New Jersey. Frankly, I suspect the entire economic package we have worked so hard to achieve is in danger unless we provide the American people with the credibility and fairness they desire. The bill before us represents about a $25 billion increase in total defense outlays. This combined with other defense bills brings the total increase in outlays for defense purposes to about $33 billion, and the total increase in authorizations to about $50 billion above last year's defense bill. This occurs at the same time we have cut some $40 billion from the other sectors of our Government.

If we quickly look at the numbers in the committee bill brought before us during our consideration of the defense appropriation bill, we can quickly witness the magnitude of the increase. The Army is experiencing a 59-percent increase in aircraft procurement, a 38-percent increase in missile procurement, a 50-percent increase in ammunition procurement. The Navy is experiencing a 43-percent increase in aircraft procurement, while the Air Force witnesses a 33-percent increase in aircraft procurement, a 35-percent increase in missile procurement.

The question before us is the simple one of whether or not these numbers are high enough, or should we make even larger increases as the other body has done. That question does indeed seem a simple one to me, when we recognize that just within the week we have passed the continuing resolution requiring further cuts in our domestic agencies, and programs.

There exists a second reason why we should support the motion before us. And it comes from one who believes in a strong national defense. All year long, as a part of our economic recovery program we have discussed the need to revitalize our American industry. We have talked of the need to provide the tax incentives necessary to allow American business to retool.

You know, I am simply not sure that American industry can handle a $33 billion increase in outlays or a $50 billion increase in budget authority within 1 year. And I fear what will happen within the next 5 years. The headlines will be full of stories about major cost overruns, fraud, and abuse within military procurement.

Such activity will cause the same backlash against military spending we witnessed following Vietnam. That, my friends, is not in the interest of our long-term military needs. The public outcry for defense scrutiny and cuts at that time will be overwhelming. And yet, our contracts will strictly limit the flexibility that we will have to deal with those cuts. As a result, I am afraid that such cuts may occur in areas that none of us desire, such as military pay.

If there is one challenge that transcends everything we have done and will do in this and future Congresses, it is credibility. So often, when asked by the press, what my greatest goal is as a public servant I respond it is to increase the American public's credibility in their Government. For if that does not exist, we can never provide the tough answers to the long-term problems facing our country.

That challenge of credibility is before us today. Do we at least hold the line on the House's spending limits for procurement, research and development? Or do we forsake that credibility by allowing numbers even higher than those to be adopted by the conference committee? I strongly urge everyone to adopt the motion offered by the gentlelady from New Jersey. Thank you.

Ms. SNOWE. Mr. Speaker, I rise in support of the motion to instruct the conferees on the defense appropriations bill. It is a fair and reasonable approach to incorporate some financial sensibility in 1982's defense budget, which as we know, is a prelude to many years of unprecedented defense spending.

In that context, then, it becomes imperative that this Congress make every effort to retain a threshold of spending that is within the realm of reason. That reasonable threshold is the House figures. I supported the defense appropriations bill because I am convinced we need to strengthen our national defense, and I believe the bill does just that. We have appropriated almost $200 billion for the defense of this Nation. This is certainly adequate and in fact admirable. And that is why I think we should retain the House level of spending. The other body has passed a bill which is almost $12 billion more than the House version—a difference which is basically not acceptable in this time of fiscal austerity.

This motion, which instructs our conferees to insist on our levels on title IV—procurement—and V—research, development, test and evaluation—is the least we can do. The gap between the House and Senate versions is almost $4 billion on these two accounts. It is important to remember that the House version has already increased these two programs by a total of $18½ billion, or 20 percent already. I think an increase of $18½ billion is certainly adequate. So we are not talking about a decrease when we instruct our conferees to adhere to the House figures.

It is also worth mentioning that these two accounts, procurement, and research and development, have not been neglected in the last 5 years. In fact they have received the largest increases of any of the accounts over this time period. Surely an $18½ billion increase will suffice.

Although this motion is not binding, I think it will send an important message to our conferees, that unrestrained defense spending is a luxury we cannot afford.

Mr. GILMAN. Mr. Speaker, I rise in strong support of the motion offered by the gentlewoman from New Jersey (Mrs. ROUKEMA) to instruct the House conferees to insist on the House-passed figures for defense procurement and for research and development in the Defense appropriations bill, H.R. 4995.

The other body has seen fit to add huge sums to the budgetary proposals approved by the House and requested by the President. Those amounts, in fact, exceed the House-passed appropriations by $4 billion and the President's request by $2.27 billion.

Mr. Speaker, at a time when we are seeking economy everywhere in Government—when we are, in fact, cutting back on programs that meet essential needs—we cannot totally exempt any substantial portion of the budget from

tough scrutiny. The other body has, unfortunately, fallen into that trap. We must provide an incentive for the Pentagon to economize and set priorities. I very much doubt that either the members of the other body or the Pentagon are in a position to spend the vast increase in the defense budget wisely over the next year.

I supported a prior motion, also offered by the gentlewoman, to cut the amounts for procurement and research and development by a modest 2 percent; that motion failed narrowly by a mere five votes. We should, however, regard the House passed numbers, as they now stand, as ceilings for these accounts, and we should encourage our colleagues on the committee of conference to stand firm in their determination to defend the House position. While I favor a strong national defense, I believe that the proposed $200 billion defense budget can withstand some trimming without jeopardizing our national security.

● Mr. PRITCHARD. Mr. Speaker, I rise in support of the Roukema motion to insist on the House totals for the procurement, research and development titles of the Defense appropriations bill.

We have rightly placed a high priority on strengthening our national defense. At a time when literally hundreds of Federal programs are being reduced, the defense budget is being increased. Substantially increased. However, I do not believe that Congress should simply write blank checks to the Defense Department. The House bill provided for a 22-percent increase in procurement funding, and an 8-percent increase in research and development funding over the previous year, yet the Senate voted an additional $4 billion for these two functions; $4 billion. That is the same amount of money in additional cuts which the President is seeking from the continuing resolution. I submit to you that this additional funding is both fiscally irresponsible and strategically unnecessary. It would set some very bad precedents.

Mr. Speaker, I support this administration's commitment to improving our Nation's defense capabilities. However, instead of seeking ways in which the Pentagon could stretch our defense dollar, improve procurement practices, and eliminate waste, we are presented with a bill which includes $115 million for anticipated cost overruns on the B-1 and MX programs—two projects whose strategic and fiscal wisdom has been questioned by many of us in this body. Furthermore, these two functions of the Defense bill have had a 10-percent rate of inflation factored into their appropriations. The rest of the Federal budget for the next fiscal year has been developed with an 8.7 percent inflation factor. Such efforts to pad expenditures cannot and should not be condoned.

I would like to conclude by reminding my colleagues that when the House considered the Defense appropriations bill just a few short weeks ago, an amendment to lower the appropriation for these two functions by 2 percent was defeated by a mere five votes. Let us not tell the country that we refuse to give military spending the same kind of scrutiny which we have been giving to every other sector of the Federal budget. I urge adoption of the motion.●

● Mr. FRENZEL. Mr. Speaker, I urge support for the motion of the distinguished gentlelady from New Jersey.

Her motion indicates no lack of confidence in our House managers. The motion cannot bind them. We all know that rules of comity will prevail, and that some sort of compromise will occur.

However, the motion is a strong statement in favor of greater scrutiny of defense expenses. It asks the conferees to do better than the usual split between House and Senate figures. It also gives warning that the day of the congressional blank check for military spending may be coming to an end.

I want a strong defense. I believe the gentlewoman from New Jersey does, too. But both of us expect in this motion that all expenses will receive the same careful evaluation and oversight whether they are social or military.●

● Mr. PURSELL. Mr. Speaker, I rise in support of the motion to instruct the House conferees with respect to the fiscal year 1982 Defense appropriations bill—H.R. 4995.

As you know, the Senate version of this legislation provides for considerable increases over the House-passed bill—itself 15 percent above fiscal year 1981 appropriations. A significant portion of those increases involve procurement (title IV) and research and development (title V). The motion before us instructs the House conferees to insist upon the House totals for those two titles.

The House bill already calls for significant increases for titles IV and V over fiscal year 1981 levels. Taking into account the administration's inflation factor (8.7 percent), "real" increases amount to approximately 20 percent. Nevertheless, the Senate went ahead and added almost $4 billion in these areas ($2.35 billion under title IV and $1.61 billion under title V), exceeding the administration's request by $2.35 billion.

In this case, "splitting the difference" with the Senate clearly is not in order. In addition to the feeling by many that the Senate "puffed up" its bill in preparation for such a split, it should be recalled that when the House considered H.R. 4995, an amendment to reduce these two titles by 2 percent was narrowly defeated on a 197-to-202 vote.

The margin of that vote indicates strong concern about the rapid acceleration of funding, along with the need for improved management techniques during this period of intense military buildup. Accordingly, I strongly urge my colleagues to adopt this motion and, thus, strengthen the position of our conference members as they go into negotiations with their Senate counterparts.

Meanwhile, I also would continue to encourage my colleagues to insist that the overall defense budget be given the same degree of scrutiny that has been afforded domestic programs. A strong economy is an essential ingredient in maintaining a strong defense, and gains made through tightening our domestic budget will be lost if defense spending is allowed to increase in a wasteful manner.

In that regard, I would further urge President Reagan to veto any military appropriations measure that exceeds his budget request. This is consistent with his position regarding the continuing appropriations bill passed last week as well as with sound fiscal policy.●

● Mr. WIRTH. Mr. Speaker, I rise in support of Congresswoman ROUKEMA's motion to instruct the House conferees for the fiscal year 1982 appropriations for the Department of Defense to insist on the House passed levels for procurement and research and development.

These are the two areas of the Pentagon budget which historically have the worst records of cost overruns and unproductive investments and which are slated to receive some of the largest increases in the Department. The House of Representatives less than a month ago narrowly defeated an amendment to reduce the funding for these categories and I believe that, at the very least, we should not fund them at levels higher than contained in the final House-passed bill.

Mr. Speaker, I strongly support a strong national defense and believe that certain areas of the Defense budget need to be increased. For example, we need to increase funding for our operations and maintenance categories and the budget categories which will help to improve our readiness capabilities. At the same time however, we must subject the Department of Defense to the same fiscal scrutiny that has been applied to the rest of the budget.

The Department of Defense is replete with examples of waste, mismanagement, and of misguided and poorly planned programs. The past several years alone have yielded examples of billions of dollars squandered on countless questionable ventures, among them: high technology projects

that seem perfect on paper, but fail miserably when tested; $45 million in salaries for public relations specialists; and massive cost overruns for many of the major weapons systems—29 percent above the rate of inflation last year. Besides these dubious expenditures, blatant examples of outright waste exist in the Department of Defense, as in other parts of the Federal bureaucracy, and I strongly believe we must eliminate such waste. The Nation's taxpayers cannot afford $5 million for 300 military servants and $85 million to subsidize dining rooms for officers—including $1.4 million for the dining rooms of the Secretary of Defense and the Joint Chiefs of Staff. Such outlays actually hurt our national defense by sapping money from critical national priorities, and surrounding our military muscle with layers of fat.

The way to approach this waste however, Mr. Speaker, is not through blanket, across-the-board, untargeted reductions, but rather through responsible, and targeted specific proposals. I have consistently opposed this meat-ax approach in the other areas of the budget as irresponsible budget gimmickry; the fact that the defense budget is so much larger than most other budgets is no reason to abdicate the Congress budget responsibilities. The Roukema motion is not an across-the-board reduction, but proposes cuts in two of the Pentagon's specific budget program areas, procurement and R. & D. The chairman of the Defense Appropriations Subcommittee has stated that such a cut would not adversely affect any of the programs and would merely serve to send a message that these units need to improve their administrative practices. Therefore, Mr. Speaker, I rise in support of the Roukema motion and urge my colleagues to support the motion.●

Mrs. FENWICK. Mr. Speaker, I rise in support of the motion to instruct the conferees.

Like my colleagues, I sincerely hope that the Reagan program of reduced Government spending will succeed. If it is to succeed, however, the budget of the Department of Defense cannot escape the serious examination to which the budgets of the other Federal agencies have been subjected.

Last month, the House passed on appropriation bill for the Defense Department which provided an $18.5-billion increase—20 percent above inflation—for the Department's procurement and research and development activities. Many Members of the House felt that even that amount was too great. I joined those Members in supporting the gentlewoman from New Jersey, Mrs. ROUKEMA's amendment to reduce spending in these areas by 2 percent. As you know, that amendment narrowly failed, by the vote of 197 to 202.

In light of that fact, I think it is only appropriate that we instruct our colleagues who will be conferees on the Defense appropriations bill to reject the proposed 34.7-percent increase in procurement and research and development contained in the Senate bill. This increase, 26 percent above inflation as projected by the administration, is unjustifiable. Procurement and research and development are two areas of DOD's budget which have already risen sharply in the last 5 years. Certainly our national defense needs to be strengthened, but the best way to strengthen our defense is to improve our ability to retain quality personnel, to maintain the equipment we already have, and to concentrate on those unglamorous readiness and manpower requirements which we have neglected in recent years. Pouring huge amounts of funds into the accounts for new weapons systems will not solve our national security problems; these increases cannot possibly be absorbed effectively.

I hope that my colleagues will join me in opposing the unnecessarily large increases in Defense procurement and research and development proposed by the Senate. I think that the 28.7-percent increase passed by the House is more than adequate, especially in an era when so many important programs are being reduced substantially, and for that reason, I support the motion to instruct the conferees.

The SPEAKER. The question is on the preferential motion offered by the gentlewoman from New Jersey (Mrs. ROUKEMA).

The preferential motion was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER. The Chair appoints the following conferees: Messrs. ADDABBO, CHAPPELL, MURTHA, DICKS, WILSON, HEFNER, GINN, WHITTEN, EDWARDS of Alabama, ROBINSON, MCDADE, YOUNG of Florida, and CONTE.

GENERAL LEAVE

Mr. EDWARDS of Alabama. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the motion just agreed to.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

PERMISSION TO HAVE UNTIL MIDNIGHT TUESDAY, DECEMBER 15, 1981, TO FILE CONFERENCE REPORT AND MAKING IN ORDER CONSIDERATION OF CONFERENCE REPORT AND AMENDMENTS IN DISAGREEMENT THERETO ON H.R. 4995, DEPARTMENT OF DEFENSE APPROPRIATIONS, 1982

Mr. ADDABBO. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tomorrow, Tuesday, December 15, 1981, to file a conference report on the bill (H.R. 4995) making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes, and that it may be in order to call up the conference report and amendments in disagreement thereto at any time after the report is filed.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

MOTION TO CLOSE CONFERENCE COMMITTEE MEETINGS ON H.R. 4995, DEPARTMENT OF DEFENSE APPROPRIATIONS

Mr. ADDABBO. Mr. Speaker, I offer a motion.

The SPEAKER. The Clerk will report the motion.

The Clerk read as follows:

Mr. ADDABBO moves, pursuant to rule XXVIII 6(a) of the House rules, that the conference committee meetings between the House and the Senate on H.R. 4995, the fiscal year 1982 Department of Defense appropriation bill, be closed to the public at such times as classified national security information is under consideration, *Provided however*, That any sitting Member of Congress shall have the right to attend any closed or open meeting.

The SPEAKER. The question is on the motion offered by the gentleman from New York (Mr. ADDABBO).

Under the rules of the House, the motion offered by the gentleman from New York (Mr. ADDABBO) requires a rollcall vote. Members will record their votes by electronic device.

The vote was taken by electronic device, and there were—yeas 359, nays 1, not voting 73, as follows:

[Roll No. 357]

So the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 4331, OMNIBUS BUDGET RECONCILIATION ACT OF 1981 AMENDMENTS

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that the conferees have until midnight tonight to file the conference report to accompany the bill (H.R. 4331) to amend the Omnibus Reconciliation Act of 1981 to restore minimum benefits under the Social Security Act.

The SPEAKER pro tempore (Mr. MURTHA). Is there objection to the request of the gentleman from Illinois?

There was no objection.

PEACE AND JUSTICE FOR POLAND

(Mr. ANNUNZIO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ANNUNZIO. Mr. Speaker, over 1,000 persons were arrested over the weekend in Poland by that nation's military government, and martial law has been imposed on the entire country, including the occupation by troops of headquarters of Solidarity, the nation's independent trade union formed in 1980. Strict curfews have been imposed, communications within the country and to the outside have been cut off or severely curtailed, and freedom of assembly and the freedom of speech have been banned. Severe penalties of imprisonment and even death have been announced for those in the Government or the army who do not obey orders.

Polish Americans in my own city of Chicago and all over this Nation have expressed their continuing deep concern and worry for the safety of their relatives, their friends, and the future of freedom itself in the Polish nation. Pope John Paul II and Archbishop Josef Glemp, the primate of Poland, have both urged Poles to heed the voices of moderation and continue their search for peaceful solutions to the country's social, economic, and political problems.

For the last 35 years, Polish religious, cultural, and artistic expression has been controlled, the economic sector of the country has been restricted along Communist Party lines, and Poland's policies toward other nations have been directed from Moscow. However, the courageous Polish people have never lost their fervent desire for freedom, and over the generations, they have fought heroically for liberty. It was only through the dedication and sacrifice of Polish patriots and the people's faith in their religious heritage that Poland has been able to win concessions from the Communist tyrants.

I have cosponsored and voted in the past for congressional resolutions encouraging the effective implementation of the agreements by the Polish Government and the Polish workers, making it absolutely clear that the Congress considers the peaceful resolution of the Polish workers' demands, without the interference of foreign nations, a strong contribution to international peace.

Mr. Speaker, as the Christmas season approaches, I know that we all join with the brave people of Poland in their prayers and struggles for a just and peaceful resolution of their beloved country's difficulties.

THE OMINOUS IMPLICATIONS OF MARTIAL LAW IN POLAND

(Mr. MINISH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MINISH. Mr. Speaker, I rise today to call attention to the serious and rapidly deteriorating situation in Poland.

The imposition of martial law by Polish authorities reverses the pattern of resolution of differences through negotiation which has characterized the attitude of the Polish Government. It appears that Prime Minister Jaruzelski and other party authorities have decided that confrontation with

the Polish people and the Solidarity trade union is the only means to assure stability in the country.

Mr. Speaker, this decision could not be more ill-advised or counterproductive. Solidarity leader Lech Walesa, while so far exercising laudable restraint, may be forced by his rank-and-file to take provocative steps of his own.

A head-on, violent confrontation with possible Soviet intervention would have the gravest of consequences for the United States, the Soviet Union, and of course the Polish people themselves. The imposition of martial law, therefore, may be the first step in a tragic course of events.

I urge that Polish authorities seriously reconsider the consequences of their action. Negotiation and compromise between the Polish people and their Government in the past year and a half have kept Poland from plunging into chaos with far-reaching implications for international security. The Polish authorities must continue to follow this course and reverse their decision to impose martial law, a decision from which nothing productive can come.

WORLD MILITARY AND SOCIAL EXPENDITURES

(Mr. PEASE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEASE. Mr. Speaker, as I previously have said on the House floor, military strength is a concern to most Americans. But so are budgets and Federal spending. The study, "World Military and Social Expenditures," by Ruth Sivard, bears out in compelling detail the global investment of resources in the military sector.

Governments continue to spend and spend on sophisticated military weaponry, while one-third of the world's people lack basic necessities of life. Some 800 million live in dire poverty.

Military expenditures definitely and directly have an impact on the social conditions that the world presently faces.

Did you know that the $500 billion now spent in 1 year for arms and armies equals the entire income of 2 billion people living in the poorest countries? As we continue to focus our aims on military priorities, the poor and deprived of the world have steadily grown in record numbers.

Income contrasts are a shocking reminder of how far the global economy must still advance before basic human needs are met in much of the world. Statistics cannot possibly define the crushing poverty in which millions of people live, but I urge my colleagues to reflect on the Sivard study being circulated by MCPL.

MINER DEATHS DRAW REACTION

(Mr. GAYDOS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. GAYDOS. Mr. Speaker, the three recent mine accidents that killed 24 miners in less than a week may have been the early signals of an erosion in hard-won miner safety.

The Mine Safety and Health Administration reduced miner deaths to a 10-year low in 1980, but the figures for this year will show an increase.

For this reason, I have sent a representative of the Subcommittee on Health and Safety to the scenes of the recent disasters to determine whether the best oversight can be had in the field or in Washington.

Meanwhile, newspapers have begun voicing editorial concern about the situation in the mines.

Following here is a reaction from the December 13 Pittsburgh Press:

COAL MINE SAFETY

Nobody questions the fact that coal mining is by its very nature a hazardous occupation.

Even so, one must wonder whether more can't be done to reduce the risk.

The recent deaths of 24 miners in three separate accidents in West Virginia, Kentucky and Tennessee have sparked criticism of President Reagan's budget cuts in mine-safety enforcement programs.

It's hard to say how many, if any, of these latest deaths might have been prevented if more federal inspectors were on the job. After all, inspectors can't catch every neglect of safety precautions by mine owners, nor prevent carelessness by miners, nor preclude the natural and unforseen development of a hazard after they've made their rounds.

Nevertheless, mining has become less hazardous since the federal government enacted comprehensive mine-safety laws and leaned on states to pass their own. So federal budget officials and Congress should make sure they are eliminating only fat and not sinew when they cut back on mine-safety enforcement.

The federal government, however, is not solely responsible for mine safety. Too often the states don't pick up their end of the load. In fact, it was the laxness of states that led to the passage of federal laws.

The severity of penalties for violations of rules also has a bearing on mine safety.

After a major disaster several years ago, it was discovered that the mine had been cited for more than 1,000 safety violations over the previous five-year period but the operators had received little more than a slap on the wrist for most of them. That's indefensible.

The coal-mine death toll for the year now stands at 143, up from last year's total of 133. Obviously this is no time to relax government of mine-safety regulations.

STATEMENT OF CONGRESSMAN CLEMENT J. ZABLOCKI ON CRISIS IN POLAND

(Mr. ZABLOCKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ZABLOCKI. Mr. Speaker, the action by the Government of Poland this past weekend has confirmed the fears of the entire free world. At this time it should be reemphasized that the Polish people and the Polish Government must be permitted to resolve their own problems without outside interference.

Unfortunately, after 16 months of experimentation with increased civil liberties and political reform the imposition of martial law, even if temporary, reverses the process of democratization initiated by the Solidarity movement. It is my fervent hope that the gains made by the people of Poland in the direction of freedom are not lost.

In my opinion, the people of Poland will accept nothing less than the restoration of their hard-won rights which permitted them a limited degree of freedom so long denied by a succession of Communist regimes. I believe that the ruling military council headed by General Jaruzelski recognizes the reality of social, political, and economic reform. What is at issue is the peace, stability, and extent of such reforms.

During this period of crisis, all parties should be patient, and however deep our concern, must understand the difficulty and sensitivity of the situation.

It is essential that discussions between Lech Walesa and representatives of the Government continue with a view toward reaching an accommodation acceptable to Solidarity, the church, the Government, and ultimately, the people of Poland.

Then, and only then, can Poland make progress in resolving the Nation's economic difficulties vital to its survival.

PERMISSION TO FILE CONFERENCE REPORT ON S. 1196, INTERNATIONAL SECURITY AND DEVELOPMENT COOPERATION ACT OF 1981

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (S. 1196) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for the fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

THE PUPPETS ARE IN CONTROL OF POLAND

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, Webster defines a puppet as "one whose acts are controlled by an outside force or influence." The puppets are in control right now in Poland. The question is for how long will the strings be pulled by the Kremlin before they completely take over the act?

The Polish Government has imposed martial law and other repressive measures in response to the Solidarity Labor Movement. Yet, while they may succeed in dampening the flame of freedom ignited by Solidarity—they will never extinguish it. They may have cracked down on Solidarity but they will never crush the movement.

Solidarity and its message of freedom has struck a responsive cord with the Polish people. Unfortunately, as evidenced by the ongoing events—it struck a raw nerve in the Kremlin which has clearly shown its abhorrence for Solidarity and all that it stands for.

The United States should reaffirm in no uncertain terms our support for the goals of Solidarity. We must restate as Secretary Haig did yesterday—our total opposition to any Soviet intervention in the internal affairs of Poland. Above all our policy must continue to be based on support for self-determination for Poland and her people.

□ 1245

DEPOSITORY INSTITUTIONS DEREGULATION COMMITTEE MUST HALT IRRESPONSIBLE AND MISGUIDED ACTIVITIES

(Mr. LUKEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUKEN. Mr. Speaker, my home county has a long and proud tradition of personal thrift. This is demonstrated, among other ways, by the fact that Hamilton County may have more thrift institutions headquarterd there than any other county in the United States. But like thrift institutions nationwide, these enterprises are being victimized by high interest rates—the same high interest rates that have crippled the homebuilding and automotive industries.

While the administration has proclaimed war on high interest rates, a segment of the administration is in fact perpetuating the high rates which you and I and all of our constitutents are forced to pay for home mortgages and automobile loans. I speak of the Depository Institutions Deregulation Committee, which was directed by the 96th Congress to conduct an orderly phaseout of interest rate ceilings over a 6-year period. This phaseout has been far from orderly. And it has not been conducted with the regard for institutional safety and soundness that the 96th Congress specifically directed.

It is time that the DIDC halt its irresponsible and misguided activities, Mr. Speaker. They are heaping unconscionable high costs on depository institutions at a time when those very institutions are suffering earnings problems that rival those of the Great Depression. These costs, of course, are passed on in the form of higher rates. But at those higher rates, no one can afford loans. Housing suffers. The automotive industry suffers. Farmers suffer. And the suffering goes on and on.

It is time for this Congress to stand up to the DIDC and shout "Enough." The DIDC must not take any further action that will add to depository institutions' cost of money, which means the cost of money to every single one of our constitutents.

PROPOSED RULE AFFECTING PURCHASERS OF USED CARS DELAYED

(Mr. MOFFETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOFFETT. Mr. Speaker, it is with a sense of gratitude and relief that many of us have heard today that the sponsors of the discharge petition relating to a proposed rule affecting purchasers of used cars are not going to exercise their right to force action before we go home for the recess. It is quite obvious that such a move would not have borne fruit because the Senate was not going to act on it anyway, but I would like to remind my colleagues that this is a modest rule. It is directed not at the Justin Darts and Bloomingdales of this world. It is directed at 75 or 80 percent of the public that buys used cars as their primary form of transportation.

This is a rule which the used car lobby itself was prepared not too long ago to accept. It is a watered down rule. It is my hope that the Federal Trade Commission will not now bend to pressure to withdraw this rule, but will allow it to come before the Congress again when we return.

DOUBLE STANDARDS IN THE APPLICATION OF SUPPLY SIDE INCENTIVES

(Mr. MITCHELL of Maryland asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MITCHELL of Maryland. Mr. Speaker, as we examine the new economic programs, it is becoming more and more obvious that the Reagan-Stockman supply-side policies put an unconscionably high penalty on poor people who are trying to work their way off of welfare. Benefits are reduced so rapidly as an AFDC mother starts working and earning that there is no monetary incentive to work. Additionally, the loss of AFDC in 20 States means the loss of medicaid. The result is, a mother with two children is faced with two difficult options. She must choose between working for a few extra dollars while losing all benefits, including medical care for her children, or decide to stay out of the work force altogether. Let me cite some very disturbing examples.

In Maryland, an AFDC mother working three-fourths of the time at minimum wage world lose all AFDC benefits under the Reagan policies in this area. Her net gain from working would be 28 cents per hour. Consequently, she would lose benefits and pay payroll taxes equal to 92 percent of her net income.

In Iowa, a mother of two going to work full time would increase her income at a rate of 22 cents per hour, and lose medicaid in the bargain. This mother pays payroll taxes and loses benefits at a rate of 93 cents for each $1 earned.

In California, a mother of two going to work full time at the minimum wage increases her income $15 over not working at all. This amounts to a grand total of 10 cents per hour gained over not staying on AFDC and food stamps. Payroll taxes and benefits losses amount to 97 percent of her net earnings.

By contrast, a family of four with a net income of $154,000 per year can expect to pay an average tax rate of 38 percent and a marginal tax rate of 49 percent once the Reagan package is fully implemented—a total tax reduction of $8,000 over current rates.

The massive business tax cuts have so benefited the large corporations, particularly big oil companies, that they now have the incentive and the cash to engage in bidding wars over the purchase of smaller oil companies.

These policies are a disgrace to America. They tell our most disadvantaged poor that it does not pay to work. Many rational poor people will simply choose not to try to find work under such a system.

Chase econometrics refers to the tax rates on the working poor as disastrously high.

Conservative economists and Nobel prize winner Milton Friedman stated in 1969 that a 50-percent rate on the working poor is the "highest that would allow families a strong enough incentive to work themselves off relief." For once Dr. Friedman is surely right.

If it is sound policy to reduce the marginal tax rate on the richest Americans from 70 to 50 percent to provide an incentive to work and invest, it is sound policy to give the poor an incentive to work.

Surely, the richest country in the world can afford to apply the supply-side incentives to the working poor. Or does the administration have one theory for the rich and another for the poor?

FARM CONFERENCE REPORT MUST BE DEFEATED

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, sometime this week we are going to have the opportunity to finally act on the agriculture conference report. Much is being said about the fact that if we do not pass this report, utter chaos and confusion will take place in the agriculture community.

Well, Mr. Speaker, we have a bill in to extend for 3 months, until March 31, 1982, the present programs, taking care of the situation. So, there are no referendums, nothing new has to be done. The only thing that has to be done is that we have another and better agriculture bill that reflects the thinking of this House, because this bill is the antithesis of what we put out in this House. I just think the House has a stronger role to play in the agriculture decisions of this country, and I am hopeful that we will defeat the conference report this week.

NO VOTE URGED ON FARM CONFERENCE REPORT

(Mr. BEDELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEDELL. Mr. Speaker, this week we will be considering, as my colleague from New York has said previously, the conference report on the farm bill. When that bill came before us, some 400 Members joined me in an amendment to reduce the expenditures by a billion dollars, to get it down so that it met the budget. We did that for 1982, and indeed, there is no argument in that respect.

Now, we are coming back with a bill which I believe will be a disaster, very likely for rural agriculture. I believe in a balanced budget. I believe we need to work for one, but we need to consider revenues as well as expenditures. If all we are doing is saving a penny and losing a dollar by throwing our whole rural economy into such a recession, that we have no tax revenues, we are not helping ourselves, we are hurting ourselves in that regard.

I urge my colleagues to vote it down so that we can go back and bring forth a decent bill and not bring disaster to our rural economy, which will spill over very quickly into all of the country.

POLISH FREEDOM

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, the Soviet Union is in the final analysis responsible for any denial of human and civil liberties in Poland.

The Polish Communist Government is also responsible.

But everyone knows—or should know—that the Polish Communist Government could not establish martial law in Poland without the permission of the Soviet Union.

Solidarity's gains in human and civil rights must not be lost.

If the Soviet Union insists upon imposing its rule through force and violence, our Nation's relationship with the Soviet Government has to be reexamined. The Kremlin rulers must be put on notice that we cannot have a normal relationship if the ghostly spirit of Stalin dictates current Soviet policy.

I hope that before the day is over we will have considered and passed an appropriate resolution expressing the collective sentiments of the Congress in this regard.

POLISH GOVERNMENT OPPRESSION AGAINST SOLIDARITY

(Mr. BROOMFIELD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BROOMFIELD. Mr. Speaker, the latest Polish Government crackdown on Solidarity, in conjunction with the declaration of martial law, must be seen within the broad context of Soviet policies in Eastern Europe. The Polish Government has been under constant Soviet pressure to fight the popular movement toward greater openness and democracy in Poland. Soviet spokesmen and press officials have repeatedly criticized Solidarity for undermining the Soviet-controlled totalitarian regime in Poland. This latest round of repression, which has been publicy endorsed by Moscow, could not have conceivably happened without Soviet advance knowledge and approval.

Because of Soviet military control over the Warsaw Pact, Soviet officials are strategically placed throughout the decisionmaking apparatus in every Eastern European country. While some may prefer to believe the fiction that this recent Polish action is independent of Soviet demands, the truth is clearly that the Soviet Union controls, or at least approves, such strong actions by any of its puppet governments in Eastern Europe.

As a consequence, the Soviet Union, which is a signatory to the Helsinki accords, must be considered ultimately responsible for violations of human rights which occur as a result of the military takeover in Poland.

FREEDOM AND COMMUNISM ARE INHERENTLY INCOMPATIBLE CONCEPTS

(Mr. LIVINGSTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LIVINGSTON. Mr. Speaker, once again the world Communist movement has demonstrated that it is incapable of tolerating dissension and opposing viewpoints. The use of military force to crush the widely celebrated Polish Solidarity effort is only the most recent in a 60-year litany of events which unequivocally proves that freedom and communism are inherently incompatible concepts.

The survival of the Communist state depends entirely on the totalitarian repression of the masses—and the brief tinkering with freedom of speech, press, and assembly in Poland was never expected to have become permanent under such a regime.

But the people of Poland have displayed extraordinary courage and independence under tyrannical conditions. The hopes and prayers of free people everywhere long for a successful, and peaceful, resolution to their struggles. May their free spirit overwhelm their tormentors, and may the Polish People's Republic—an unwieldy and corrupt perversion of authority dispersed in the name of utopia—crumble in the dust at their feet.

SATURDAY NIGHT SICKNESS IN POLAND

(Mr. BETHUNE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BETHUNE. Mr. Speaker, this morning we were treated to a front-page story in the newspaper saying that the Soviets are reacting with restraint while the Polish Government closes the borders, allows no one in and out, conducts a midnight raid and arrests 1,000 people.

What sort of silly fiction is it to suggest that the Polish Government is overreacting while the Soviets are practicing restraint? There are two Soviet divisions, well equipped, inside Poland, with 40,000 troops. In East Germany, a neighboring country, there are 20 Soviet divisions with 300,000 troops.

The Soviet Union has proposed, pushed, demanded, coerced, and threatened the very action that was taken Saturday night. The Saturday night sickness did not come from the Polish people or the puppet Polish Government.

How could it when some 10 million Poles are supporting the freedom sought by Solidarity.

No, Mr. Speaker, Saturday night's sickness comes from the Soviet Union.

HOUSE HAS STATED ITS VIEWS ON SITUATION IN POLAND

(Mr. DAUB asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DAUB. Mr. Speaker, over this past weekend, we have been watching with increased concern the deteriorating situation in Poland.

From behind the closed walls of the Kremlin, Soviet officials are eyeing with approval the imposition of martial law and closely watching world reaction to it.

Let Soviet and Polish officials be reminded that this body has already formalized its views on such developments with House Resolution 124 passed last summer with the support of 410 Members.

As this resolution stated, "the United States could not remain indifferent to any external aggression or internal repression against the people of Poland and such developments would have serious consequences for East-West relations."

As the sponsor of this resolution, I would forcefully remind both Soviet and Polish officials that the eyes of this body and the world are sharply focused on the well-being of the Polish people.

FBI CAN TRACK DOWN STOLEN AUTOMOBILES BUT NOT STOLEN CHILDREN

(Mr. NELLIGAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NELLIGAN. Mr. Speaker, I was distressed to learn that over 50,000 children disappear each year in the United States, and that, in fact, these children are not runaways, but are abducted by adults. I was shocked to learn that the FBI's National Crime Information Center is used to track down stolen automobiles and other stolen property but, because of restrictions, cannot be used to track down missing children or to identify as many as 1,000 bodies of children and adults that are found each year.

I am pleased that the gentleman from Illinois (Mr. SIMON) has introduced legislation which will provide for widened use of the FBI's National Crime Information Center to create a missing children file.

He can certainly count on my support in placing as much emphasis on the children of the Nation as has been placed on automobiles. I urge the Judiciary Committee to act immediately on this legislation.

OUTRAGE EXPRESSED OVER TRAGEDY IN POLAND

(Mr. JAMES K. COYNE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JAMES K. COYNE. Mr. Speaker, I rise to join my colleagues and all Americans in expressing our outrage during these days of terrible tragedy in Poland.

The experiment in democracy that we have watched for the past month has been declared unacceptable by the new totalitarian Communist regime. Martial law is now their new strategy to extinguish the flickering flame of freedom that struggles to survive in a state that was once an economic and cultural leader in Europe.

□ 1300

The imposition of martial law is most frightening now because it opens the door to despicable acts of oppression and possible Russian adventurism. When will the other shoe—or should I say boot—drop.

What terrifying plans do these Polish military tyrants have in store to kill Polish freedom? When will the Polish Communist leaders decide that their martial law is not working? When will they then turn to their coconspirators in Moscow and ask for help from the Red army to crush the Polish people?

When will violence and bloodshed spread through the streets of Warsaw and Krakow?

The question that should instead be on the lips of the Polish people is: When will Poland be free to join the free world?

IN RECOGNITION OF THE ASSOCIATION OF AMERICAN BUSINESS CLUBS

(Mr. JOHNSTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JOHNSTON. Mr. Speaker, today, I rise to recognize an organization with national headquarters located in my district in the city of High Point, and which serves communities in more than 16 States throughout the country. I am speaking of the Association of American Business Clubs, a national service organization whose dedication to building better communities and helping the handicapped is characterized by its principles of Americanism, brotherhood, and character.

The association's national project is scholarships for therapists. This national scholarship program assists worthy students in the fields of physical, occupational, speech, and hearing therapy. This year, each association chapter honored a local therapist for his or her contribution to the handicapped in his or her own community. From this group of honorees, a national honoree was selected. The Therapist of the Year for 1981 is Miss Jody Christman of Enid, Okla.

In acknowledging the accomplishment and fine goals of the American Business Clubs, I wish to recognize the nucleus of this organization in High Point, N.C, and to also congratulate Miss Christman for being selected as the American Business Clubs' Therapist of the Year.

SOVIET POWER BEHIND REPRESSION IN POLAND

(Mr. RITTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RITTER. Mr. Speaker, the world can once again taste the bitter fruits of Soviet communism. Where on Earth could one find the near total economic collapse of a nation steeped in the spirit and the competence of European civilization? Where? In the Soviet sphere, of course.

Where in the world can you find a post midnight police state and military operation that turns against its own people? Why in the Soviet sphere, of course.

While hundreds of thousands in Western Europe were protesting America's willingness to help strengthen Europe's defenses, the Polish Communist Party and their puppeteers in Moscow were plotting this cynical move to destroy the rebirth of freedom.

One wonders whether vast demonstrations will emerge over this repression by Soviet Communist power. Or will demonstrations continue over 572 possible American missiles while 600 very certain Soviet missiles are aimed at the heartlands of Europe? And Poland is crushed under the Soviet boot.

Make no mistake about it, without full backing of their Soviet masters, there is no way any Polish Army or police could move on their own people. Indeed without Soviet backing there is no legitimacy to that army or to those police.

Perhaps Western Europe will see new light during these days of darkness.

A "NO" VOTE URGED ON THE FARM BILL CONFERENCE REPORT

(Mr. JEFFORDS asked and was given permission to address the House 1 minute, and to revise and extend his remarks.)

Mr. JEFFORDS. Mr. Speaker, I rise to urge the Members to vote against the conference report on the farm bill.

When the bill left the House, it was a reasonable one. There was room for negotiation, but the conference report that came back is an insult to the House. What it does is it puts back everything that this house took a strong stand on. It puts peanuts and sugar back in the bill. These were both defeated on the House floor when the farm bill was considered.

The grain part is a disaster to the farmers. The dairy is even worse; there is only a 1-percent increase in dairy each year over the next 3 years.

There are problems in the dairy industry, but this is not a solution; it is a demolition of the best farm program we have had.

There are some who will say that we have got to pass this conference in the Christmas rush, but there is nothing that requires us to do that. We can continue as we have been and extend the existing farm bill provisions until March 31. We have already done that with food stamps in the continuing resolution, and there are no problems there.

In fact, if we do not take action on this conference report, nothing drastic is going to happen. We did not do anything in October for 2 weeks, and we did not have any horrendous problems.

So, Mr. Speaker, let us get a reasonable farm bill. Let us go back and do that.

The impact that the dairy support provisions in the conference report will have is best explained by the "Dear Colleague" that I and several other House Members sent out:

HOUSE OF REPRESENTATIVES,
Washington, D.C., December 9, 1981.

DEAR COLLEAGUE: We urge you to reject the House-Senate Conference Report on the 1981 Farm Bill when it is considered on the House floor. The final Conference Report is a financial disaster for the farm economy of this nation.

Particularly alarming are the dairy provisions as accepted by the conferees. Under the new provisions, as admitted by the Administration, there will be a mere 1 percent increase in the support price over 3 years, from October 1, 1980 until September 30, 1983. Other commodities will get at least a 6 percent increase each year. Reasonable alternatives were offered to the Administration. All were rejected. You supported us twice in defeating floor amendments by Mr. Frank and Mr. Findley which were almost identical to those in the Conference Report. We are asking for you to continue this support.

We do not oppose the diary provisions just because similar language was defeated by wide margins twice on the House floor. We oppose it because we believe that it will lead to serious dislocations in farming areas, and to the financial ruin of many young, beginning and highly leveraged farmers in the nation. The ultimate effect will be that many young farmers will be forced out of business, and milk prices will increase for the consumer. We know this will happen because when the Nixon Administration did the same thing in the early 70's the same occurrences took place. The dairy industry was also used then as an example of fiscal constraint. The ultimate loser was the consuming public as consumer prices rose sharply. In the end, no one profited by this move.

The dairy farmers of this nation have done their part to cut government spending. Since April of this year, the American dairy farmer has accepted a 10 percent reduction in support levels that have reduced government expenditures by some $800 million. These cuts, with additional reasonable adjustments, will bring overproduction under control. If the conference language is accepted, support prices in fiscal year 1983 will again be reduced by 10 percent from what is the historical legislated minimum. What other producing sector has made a similar sacrifice?

Please join us again in preventing the financial ruin of our rural economy. The ultimate losers will be the food-consuming public.

Sincerely,

Ed Jones, Al Swift, Steve Gunderson, David Obey, Bob Kastenmeier, Les Aspin, George C. Wortley, Jim Jeffords, Jim Oberstar, Matt McHugh, Harold L. Volkmer, Toby Roth, Jim Sensenbrenner, Tom Harkin.

TIME FOR RESTRAINT BY THE UNITED STATES AS WELL AS THE SOVIET UNION

(Mr. LEACH of Iowa asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEACH of Iowa. Mr. Speaker, the events in Poland should be taken as a timely reminder of the importance of caution and restraint in world affairs. While the action of the Polish people themselves will be the primary determinant of the Soviet approach to the current crisis, we can hardly expect Soviet decisions to be unaffected by their perception of U.S. actions elsewhere in the world. Whether we like it or not, linkage is a reality in East-West relations.

In this regard it cannot be stressed enough that our actions in Libya and El Salvador are not unrelated to the Polish problem. If we raise an interventionist standard in North American or Latin American, we will not only undercut the moral imprimatur of the West to oppose a Soviet invasion of Poland, but, ironically, we will increase the likelihood of such an invasion.

In this period of extreme delicacy in Poland, the United States should be extremely cautions of doing anything that the Kremlin might put forward as a tradeoff, or justification, for a Soviet move into Poland.

New hopes for arms control and responsible East-West relations should not be jeopardized by an overreaction to irrational potentates like Qadhafi or Castro. Now is the time for restraint by the United States as well as the Soviet Union.

A VOICE FROM THE PAST

(Mr. PHILIP M. CRANE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PHILIP M. CRANE. Mr. Speaker, in last Sunday's New York Times magazine, Zbigniew Brzezinski, President Carter's National Security Adviser, referred to President Reagan's arms reduction speech as "a welcome return to the Carter formula of combining a strategic buildup with a commitment to comprehensive arms control."

It is not immediately clear precisely what Professor Brzezinski means by the Carter "strategic buildup."

That is like talking about the Chicago Cubs victory record.

Perhaps he is referring to the Carter cancellation of the B-1, the delay in building the Trident submarine, the erosion of our Navy, the on-again off-again decisions on the neutron warhead.

That is a letdown, not a buildup.

The Carter years are universally acknowledged as a time of unmitigated and total disaster for American national security.

That Jimmy Carter's National Security Adviser still does not recognize this goes far to explain the air of unreality that marked the Carter national security policies.

ISRAELI ANNEXATION OF THE GOLAN HEIGHTS

(Mr. FINDLEY asked and was given permission to address the House for 1 minute.)

Mr. FINDLEY. Mr. Speaker, if the Israeli Parliament carries through with Prime Minister Begin's recommendation that Israeli law be imposed in the Golan Heights, this is sure to provoke a very serious crisis in which the United States cannot remain silent.

The Golan Heights is Syrian territory. It has been under Israeli military occupation for 14 years.

Imposition of Israeli law is viewed by the wire services as tantamount to annexation. At the very least, it is a big step toward unilateral annexation.

The territory was taken and has been held by force of arms, and the only proper way to settle its future is through negotiation. Imposition of Israeli law on the Golan Heights is con-

trary to the letter and spirit of U.N. Resolution 242.

Mr. Speaker, the United States has always opposed annexation of territory by force of arms. It is a sound and revered principle from which the State of Israel should not be exempt. I hope and trust that the U.S. Government will demand that Prime Minister Begin drop the idea.

A PLEA FOR SUPPORT OF THE FARM BILL CONFERENCE REPORT

(Mr. AKAKA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AKAKA. Mr. Speaker, I rise today to urge my colleagues to support the conference report on the farm bill. As a Member from an agricultural district, I can assure you that I realize that the farm bill is not the best possible bill for our Nation's diminishing farm community. Nonetheless the record of the conference deliberations shows that this bill is the best bill that could have been achieved under the circumstances. If this conference report is defeated, next year's outcome could well be worse.

What disturbs me is that opponents of the sugar provisions of the farm bill have reduced debate on the farm bill to a debate on sugar. This is an injustice to sugar, and an injustice to the other commodities that have an important stake in the farm bill. Despite the unsubstantiated figures predicting a dramatic price rise in sugar that appeared in Saturday's Washington Post, the fact remains that the sugar loan program in the farm bill is modest by any measure. The sugar program offers the consumer what he desires most—long-term insulation from the effects of rapid and dramatic price fluctuations.

If we examine the support levels provided for the major commodities—wheat, corn, peanuts, dairy, cotton, rice, and sugar—in this farm bill compared to the levels provided for in the 1977 farm bill, we find that the increase in the support level for sugar is by far the lowest. Furthermore, the sugar loan program will require no Government expenditure and thus, no cost to the taxpayer.

I want to remind my colleagues that this bill also authorizes the food stamp program which will benefit the needy of our Nation. You will recall that the authorization provided for food stamps in the continuing resolution will only extend until March 31, whereas the authorization provided in the farm bill will extend for 4 years. I hope my urban colleagues will keep this in mind as they consider their support for the bill.

APPROVAL OF 1981 FARM BILL IS NEEDED

(Mr. DE LA GARZA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DE LA GARZA. Mr. Speaker, it has been asserted that passage of the 1981 farm bill is not necessary for carrying out the food stamp program through the 1982 fiscal year. I am quite concerned, because that simply is not the case. The level of funding authorized for the food stamp program by the farm bill for the 1982 fiscal year is $11.3 billion. That figure was arrived at on a bipartisan basis with the approval of the administration. The continuing resolution would fund the program only through August 15 at a level of $10.3 billion. A reauthorization and supplemental appropriation would be required to fund the program for the balance of the year. In the current climate, with unemployment rising and continued suggestions emanating from the administration for further cuts in the program, those who believe in an effective food stamp program would be ill advised to rely on the continuing resolution and then some further possible action by Congress as an adequate safeguard for the program. The farm bill guarantees the program against any further cuts for the balance of the year and a very important proviso protects energy assistance benefits for the poor located in cold weather areas of the country. Further, the farm bill contains a series of provisions fashioned on a bipartisan basis to protect the program from fraud and abuse, particularly on the part of organized crime and through other large-scale illegal activities, which go well beyond recipient fraud.

The farm bill will go far toward protecting the program from those who would rob it, while insuring continued food assistance for those who truly need it. The continuing resolution would, of course, not achieve these worthy objectives.

MARINE PROTECTION, RESEARCH, AND SANCTUARIES ACT OF 1972 AMENDMENTS

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1003) to amend title III of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended, to authorize appropriations for such title for fiscal years 1982 and 1983, with a Senate amendment to the House amendments thereto, and concur in the Senate amendment to the House amendments.

The Clerk read the title of the Senate bill.

The Clerk read the Senate amendment to the House amendments, as follows:

Page 1, line 8, of the House engrossed amendment to the text of the bill, strike out "such sums as may be necessary" and insert "not to exceed $2,235,000".

Mr. JONES of North Carolina (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment to the House amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

Mr. PRITCHARD. Mr. Speaker, reserving the right to object, I shall not object, but I would like to have the chairman of the committee explain the bill, and I yield to the gentleman for that purpose.

Mr. JONES of North Carolina. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, S. 1003 contains authorizations of $2.235 million for each of fiscal years 1982 and 1983 for the implementation of title III of the Marine Protection, Research, and Sanctuaries Act of 1972.

Title III of the act creates the national marine sanctuaries program which requires the Secretary of Commerce, with the President's approval, to designate a marine sanctuary. Specific characteristics such as conservation, recreational, ecological or esthetic value, must be evident in the area. Often these areas are a popular recreation spot or harbor valuable fisheries and oil and gas resources; consequently, a designated sanctuary site can benefit greatly from a well-balanced and integrated management program of research, monitoring, education, recreation, resource exploitation, long-term planning, and regulation. There are presently six such sanctuaries designated which protect unique habitats such as coral reefs, delicate bay and island communities, and a historic Civil War vessel.

On July 13, S. 1003 was amended by the House to provide $2.235 million for fiscal year 1982 and such sums that may be necessary for fiscal year 1983. On Friday, December 11, the Senate amended S. 1003 with the current authorization figures I am presenting today.

Mr. Speaker, I urge my colleagues to join with me in support of this authorization in order that the national marine sanctuaries program may continue its efforts for the balanced protection of the marine environment.

Mr. PRITCHARD. Mr. Speaker, I thank the committee chairman.

Mr. SNYDER. Mr. Speaker, will the gentleman yield?

Mr. PRITCHARD. I yield to the gentleman from Kentucky.

Mr. SNYDER. Mr. Speaker, I rise in support of S. 1003, as passed by the Senate with an amendment.

This bill would reauthorize title III of the Marine Protection, Research, and Sanctuaries Act for fiscal years 1982 and 1983 at a level of $2.235 million.

The marine sanctuaries program, administered by the National Oceanic and Atmospheric Administration—NOAA—establishes a process for designating unique marine areas which deserve varying degrees and types of protection as marine sanctuaries. Two of the early marine sanctuaries designated off the coast of the United States include, first, the U.S.S. *Monitor* site; and, second, the Key Largo Coral Reef Sanctuary. More recently, four additional sanctuaries have been designated.

There has been considerable confusion between the two bodies in efforts to resolve the difference between the two versions of this legislation. The House-passed version contained "such sums as may be necessary" for fiscal year 1983, while the Senate version contained level funding at $2.235 million for fiscal year 1983.

During attempts to resolve this difference, some of the Republican Members have been alleged to be holding up the bill, while this is really not the case. It was Mr. PRITCHARD who offered the compromise amendment which included the "such sums" language during our committee's consideration of the bill. However, to my knowledge, none of the Republicans have objected to level funding this program.

There has, however, been a considerable range of differences between the majority members of our committee. Several would prefer a higher level for the outyear funding. Others would have preferred lower funds for the outyear, and this has led to considerable delay in reaching a compromise on this bill.

I would like to reiterate that I have no problem whatsoever with level funding for this program, and I would support this reauthorization at this time.

Thank you, Mr. Speaker.

Mr. PRITCHARD. Mr. Speaker, I rise in support of S. 1003, as amended by the other body. This bill would reauthorize the title III of the Marine Protection, Research, and Sanctuaries Act for fiscal years 1982 and 1983 at a level of $2.235 million. The House had originally authorized the program for $2.235 million for fiscal year 1982 and for such sums as may be necessary for fiscal year 1983. However, recently officials within OMB have indicated that they support level funding for the marine sanctuaries program for fiscal year 1983. Therefore, I see no problem in concurring with the other body's amendment which would level fund this program for 2 fiscal years.

The marine sanctuaries program provides a mechanism for the designation of unique marine areas which require certain types of protection based on an areawide focus. To some extent, the concept of designating marine sanctuaries for the protection and management of unique marine areas could be compared to our system for the designation of national parks on land.

Examples of marine sanctuaries which have been designated include the Key Largo Coral Reef Sanctuary, a sanctuary for the protection of the U.S.S. *Monitor* site, Looe Key, Grays Reef off Georgia, and the two most recent marine sanctuaries whose regulations are still pending including the Point Reyes and the Channel Islands marine sanctuary off California.

Mr. Speaker, this has been an effective marine resource management program which deserves to be continued at level funding. There may be some additional sites considered for marine sanctuary designation in the future, but I do not believe that this program should get too carried away in designating vast areas of the ocean as marine sanctuaries, as was envisioned during one period of the prior administration. This is an important program for the protection of unique marine characteristics and resources, once a clear need for their protection has been established. Also, it is required by statute that the activities which are to be regulated pursuant to the marine sanctuary designation be spelled out clearly in advance of the actual designation.

Mr. Speaker, if administered wisely, this is an important program which should be reauthorized at this time. Thank you, Mr. Speaker.

Mr. PRITCHARD. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from North Carolina?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that all Members who wish to do so may have 5 legislative days in which to revise and extend their remarks on the Senate bill, S. 1003.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

□ 1315

CONFERENCE REPORT ON H.R. 4209, DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS, 1982

Mr. BENJAMIN. Mr. Speaker, I call up the conference report on the bill (H.R. 4209), making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of November 13, 1981.)

The SPEAKER pro tempore. The gentleman from Indiana (Mr. BENJAMIN) will be recognized for 30 minutes, and the gentleman from Pennsylvania (Mr. COUGHLIN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Indiana (Mr. BENJAMIN).

Mr. BENJAMIN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, we present to the House the conference report on H.R. 4029, the Department of Transportation and Related Agencies Appropriations Act for 1982. Because of the action of the House on the continuing resolution, I will offer a motion which will conform the amounts recommended in our conference agreement to those contained in the OMB substitute offered by Mr. CONTE and passed by the House.

While I did not vote for this substitute bill Thursday, I agree with the statements made by both our full committee chairman, Mr. WHITTEN, and our ranking minority member, Mr. CONTE, that we should pass the regular appropriation bills rather than operate under a continuing resolution. Therefore, I would urge my colleagues to support this conference agreement and the motions which will conform this agreement to the OMB substitute continuing resolution.

I include a summary table:

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY

	New budget authority					Amended conference compared with—			
	Enacted	Estimates	House	Senate	Amended conference	Enacted	Estimates	House bill	Senate bill
TITLE I—DEPARTMENT OF TRANSPORTATION									
Office of the Secretary									
Salaries and expenses	$36,207,000	$35,024,000	$35,193,204	$35,000,000	$31,370,000	−$4,837,000	−$3,654,000	−$3,823,204	−$3,630,000

Mr. Speaker, I reserve the balance of my time.

Mr. COUGHLIN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I certainly concur with the remarks of the chairman of the committee, the distinguished gentleman from Indiana (Mr. BENJAMIN). As he indicated, it is preferable, in fact, to have appropriation bills go to the President and be signed and enacted into law, and that is what we hope to accomplish today.

Mr. BENJAMIN. Mr. Speaker, I yield 1 minute to the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. Mr. Speaker, I thank the chairman for yielding. I would like simply to raise a question and seek the chairman's response about a matter in the conference report dealing with so-called 406 subsidies. As written, the conference report would fund that section of the airline program that provides local airline service to remote areas, small communities, rural areas.

The conference report states the rather broad position of the conference committee that the 406 subsidies should not be financed in the future. The exact language of the conference report states:

> The conferees believe that the section 406 program should be terminated. The funding provided in this conference agreement for section 406 is viewed as the final Federal compensation to be made available in order to facilitate an orderly close-out of this program.

I cannot imagine that the committee of conference intend not to finance such a program should it be authorized in the future. In fact, the House Public Works and Transportation Committee is on the verge of reporting out legislation to continue the 406 subsidy program beyond the administration-proposed date for the termination of the Civil Aeronautics Board. If such legislation in enacted into law, does the Transportation Appropriations Subcommittee intend to continue providing such subsidies in the future beyond the present 1985 expiration date if authorized by law?

Mr. BENJAMIN. Mr. Speaker, I yield myself 2 minutes to respond to the gentleman.

The gentleman raises the question about the future of the 406 program. It is apparently the intent of Congress to phase out the 406 program and to restructure the section 419 program as a commuter type program to make sure that we have continuous air service; particularly to the smaller communities.

Although our conference report has indicated that we intend to continue with the phaseout, if there is intervening action by the Congress, promoted by the gentleman's Committee on Public Works and Transportation, the Appropriations Committee will take full cognizance of that action and will take steps to see that the program is continued.

Mr. OBERSTAR. Is it your understanding then that the language in the conference report is limited only to the present situation under current law?

Mr. BENJAMIN. Our action is limited to the situation we presently have at hand.

Mr. OBERSTAR. That action does not, then, presume to prejudge future legislative action by the House Committee on Public Works and Transportation?

Mr. BENJAMIN. That is true.

Mr. OBERSTAR. I thank the gentleman.

Mr. SNYDER. Mr. Speaker, will the gentleman yield for a question?

Mr. BENJAMIN. I yield to the gentleman from Kentucky.

Mr. SNYDER. Could the gentleman tell me how the committee dealt with the Coast Guard in the conference report?

Mr. BENJAMIN. Yes. We conformed the Coast Guard appropriation to the amount provided in the Conte amendment.

Mr. SNYDER. And that is $50 million less than passed here originally; is that correct?

Mr. BENJAMIN. The largest reduction is $48 million in operations which conforms exactly to the Conte amendment to the Coast Guard account in the recent continuing resolution.

Mr. SNYDER. I thank the gentleman.

● Mr. PURSELL. Mr. Speaker, I rise in support of this conference report on H.R. 4209 and urge the Members to unanimously approve its passage.

As a member of the Transportation Appropriations Subcommittee, I want to commend the conferees, and especially Chairman BENJAMIN and the ranking minority member, Mr. COUGHLIN, for their outstanding effort and the bipartisan cooperation exhibited in constructing this compromise.

I believe this bill adequately addresses the transportation needs of this Nation while accomplishing budgetary restraint. It has not been an easy or thoroughly enjoyable task. However, the economies achieved will permit our transportation system to operate more efficiently while maintaining essential services. I am personally grateful that our past year's work will finally come to fruition and that the conference agreement, as amended to reflect the additional reduction of $493,250,000 called for by the bipartisan Continuing Resolution Act (H.J. Res. 370) will accomplish the necessary degree of fiscal restraint needed to help extricate the economy from the current level of stagflation we are currently experiencing.

Clearly, effective transportation policy and funding holds an essential key to the economic revitalization of our Nation. There are many elements of this conference agreement which provide significant enhancements to the lives and well-being of millions of Americans. As a member of the steering committee of the Northeast-Midwest Congressional Coalition, I have been very concerned about the rapid deterioration of our highways and mass transit systems, especially in the Northeast-Midwest region of this Nation.

Our highway system is experiencing decay and decline in epic proportions. Many mass transit systems are in a similar quality of disrepair and there are areas where new systems are in high demand. Amtrak has been an effective mobility force for many Americans in our region and its continued operation is vital to thousands of commuters and travelers with no other reasonable means of transportation. Our airport/airways system is in need of improvements and further development and to a great extent, this transportation mode holds the key to our economic renaissance and the diversification of American business.

As responsible legislators, we must recognize the importance of these transportation systems to the successful movement of commerce and the mobility needs of this Nation. In addition, we must examine alternative financing to preserve our original investment and provide safe and efficient transportation services. I believe this bill satisfies those demands to the extent possible in these troubled economic times.

Mr. Speaker, I would like to associate myself with the statement of the conferees for the Department of Transportation and Related Agencies Appropriations Act, 1982.

With respect to the reductions agreed to in bringing the conference agreement into accordance with the recently implemented Continuing Resolution Act (H.J. Res. 370), I would like to support the intentions of the conferees and that of the Congress that the reductions called for in urban discretionary grants appropriations be applied on a pro rata basis for each activity and new start project identified in the statement of the managers accompanying the conference report on the Department of Transportation and Related Agencies Appropriations Act, 1982.

With respect to the redeemable preference shares program of the Federal Railroad Administration, it is my hope that the $3.5 million remaining in unobligated funds for meritorious projects be reserved for an application by the Ann Arbor Railroad System.

Finally, with respect to the Urban Mass Transportation Administration's bus procurement policies, it is my strong desire that UMTA work more aggressively in administering congressional directives to change from the low-initial-cost-only system for transit equipment procurements to one which more effectively addresses life cycle costs, performance, standardization, and other factors. These directives have been voiced repeatedly through many different, but consistent vehicles, and there has been no evidence that this congressional intent has been heeded.●

Mr. BENJAMIN. Mr. Speaker, I have no other requests for time, and I yield back the balance of my time.

Mr. COUGHLIN. Mr. Speaker, I yield back the balance of my time.

Mr. BENJAMIN. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will designate the first amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 5: Page 3, line 16, after *"Provided,"* insert "That $10,000,000 of these funds shall be reserved and made available to implement a program of recreational boat safety, designed by the Secretary pursuant to 46 U.S.C. 1475 and for the purposes set out in Public Law 97-12: *Provided further,"*.

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 5 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following: "That an additional $5,000,000 shall be derived from the National Recreational Boating Safety and Facilities Improvement Fund to implement a program of recreational boat safety, designed by the Secretary pursuant to 46 U.S.C. 1475 and for the purposes set out in Public Law 97-12: *Provided further,"*.

Mr. BENJAMIN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 7: Page 4, line 9, after "$391,000,000" insert ": *Provided,* That of the foregoing amount $200,000,000 shall be available only for assets deployed and dedicated in a manner to maximize their contribution to the Coast Guard's drug interdiction program".

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 7 and concur therein with an amendment, as follows: In lieu of the sum named in said amendment, insert "$175,000,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 8: Page 4, line 12, strike out "$17,500,000" and insert "$15,000,000".

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 8 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$12,000,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 15: Page 6, line 22, after "provement;" insert "payments to lenders required as a consequence of any guaranty under Public Law 85-307, as amended;".

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 15 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 20: Page 8, line 14, after *"Provided,"* insert "That of the foregoing amount, $4,000,000 shall be available only for the design, engineering, construction, and equipment for an air traffic control training facility at the University of North Dakota at Grand Forks: *Provided further,*".

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 20 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 24: Page 10, line 22, strike out "$38,900,000" and insert "$34,760,000".

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 24 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$31,700,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 25: Page 11, line 11, strike out all after "1982" down to and including "principal" in line 13 and insert "new commitments to guarantee loans shall be exclusively for the purchase of aircraft designed to have a maximum passenger capacity of sixty seats or less or a maximum payload of eighteen thousand pounds or less, and shall not exceed in the aggregate $100,000,000".

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 25 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert "new commitments to guarantee loans shall be exclusively for the purchase of aircraft designed to have a maximum passenger capacity of sixty seats or less or a maximum cargo payload of eighteen thousand pounds or less, and shall not exceed in the aggregate $100,000,000".

Mr. BENJAMIN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 30: Page 12, strike out lines 16 to 20, inclusive.

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 30 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment amended to read as follows:

"HIGHWAY BEAUTIFICATION

"For necessary expenses in carrying out section 131 of title 23 United States Code and section 104(a)(11) of the Surface Transportation Assistance Act of 1978, $2,000,000 to remain available until expended: *Provided,* that, notwithstanding any other provision of law, any determination as to whether any outdoor advertising sign, display, or device is or has been lawfully erected under State law or is entitled to compensation shall not be affected by any waiver of compensation."

Mr. BENJAMIN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 31: Page 13, lines 8 and 9, strike out "the Federal-Aid Highway Act of 1970," and insert "title 23, United States Code, section 322(b), to remain available until expended, $2,835,000. For necessary expenses of certain railroad-highway crossings demonstration projects as authorized by".

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 31 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 46: Page 16, line 7, strike out "$34,000,000" and insert "$36,000,000".

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 46 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$39,000,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 50: Page 17, strike out lines 13 to 18, inclusive, and insert:

"CONRAIL LABOR PROTECTION

"TRANSFER OF FUNDS

"For labor protection as authorized by section 713 of the Regional Rail Reorganization Act as added by section 1143 of the

Northeast Rail Service Act of 1981, and as authorized by section 1160 of the Northeast Rail Service Act of 1981, $225,000,000, to remain available until expended, to be derived from the unobligated balances of "Payments for Purchase of Conrail Securities": $85,000,000 of which shall be considered to have been appropriated to the Secretary for transfer to the Railroad Retirement Board for the payment of benefits and necessary administrative expenses under section 701 of the Regional Rail Reorganization Act of 1973, as amended, $115,000,000 of which shall be considered to have been appropriated to the Secretary, to be available for the payment of termination allowances under section 702 of that Act, and $25,000,000 of which shall have been considered to have been appropriated under section 1160 of the Northeast Rail Service Act of 1981, for purposes of that section of that Act: *Provided*, That for purposes of section 710 of the Regional Rail Reorganization Act of 1973, as added by section 1143 of the Northeast Rail Service Act of 1981, $200,000,000 shall be considered to have been appropriated under section 713 of that Act and counted against the limitation on the total liability of the United States."

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 50 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert:

"RAIL LABOR ASSISTANCE

"(Transfer of Funds)

"For payment of benefits under section 1160 of the Northeast Rail Service Act of 1981, $25,000,000, to remain available until expended, to be derived from the unobligated balances of "Payments for Purchase of Conrail Securities": *Provided*, That such sum shall be considered to have been appropriated under said section 1160.

"CONRAIL WORKFORCE REDUCTION PROGRAM

"(Transfer of Funds)

"For expenses of the Conrail Workforce Reduction Program as authorized by section 713 of the Regional Rail Reorganization Act of 1973 as added by section 1143 of the Northeast Rail Service Act of 1981, $100,000,000, to remain available until expended, to be derived from the unobligated balances of "Payments for Purchase of Conrail Securities": *Provided*, That, such sum shall be considered to have been appropriated to the Secretary under section 713 of the Regional Rail Reorganization Act of 1973 to be available for the payment of termination allowances under section 702 of that Act: *Provided further*, That, for purposes of section 710 of the Regional Rail Reorganization Act of 1973 as added by section 1143 of the Northeast Rail Service Act of 1981, such sum shall be considered to have been appropriated under section 713 of the Regional Rail Reorganization Act of 1973 and counted against the limitation on the total liability of the United States.

"CONRAIL LABOR PROTECTION

"(Transfer of Funds)

"For labor protection as authorized by section 713 of the Regional Rail Reorganization Act of 1973 as added by section 1143 of the Northeast Rail Service Act of 1981, $85,000,000, to remain available until expanded, to be derived from the unobligated balances of "Payments for Purchase of Conrail Securities": *Provided*, That, such sum shall be considered to have been appropriated to the Secretary under said section 713 for transfer to the Railroad Retirement Board for the payment of benefits under section 701 of the Regional Rail Reorganization Act of 1973, as amended: *Provided further*, That, for purposes of section 710; of the Regional Rail Reorganization Act of 1973 as added by section 1143 of the Northeast Rail Service Act of 1981, such sum shall be considered to have been appropriated under section 713 of the Regional Rail Reorganization Act of 1973 and counted against the limitation on the total liability of the United States: *Provided further*, That, in addition, such sums as may be necessary shall be derived from the unobligated balances of "Payments for Purchase of Conrail Securities" for necessary expenses of administration of section 701 of the Regional Rail Reorganization Act of 1973 by the Railroad Retirement Board."

Mr. BENJAMIN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 53: Page 18, line 22, after "status" insert: *"Provided further*, That notwithstanding any other provision of law, the Corporation shall provide through rail passenger service between Washington, D.C. and Chicago, via Cincinnati."

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 53 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 54: Page 19, after line 3, insert:

"Notwithstanding any other provision of law, none of the funds appropriated for the benefit of the Corporation pursuant to this Act or the revenues or other assets of the Corporation or any railroad subsidiary thereof shall be available for payment to any State, political subdivision of a State, or local taxing authority for any taxes or other fees levied on the Corporation."

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 54 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following: "Notwithstanding any other provision of law, none of the funds appropriated for the benefit of the Corporation pursuant to this Act or the revenues or other assets of the Corporation or any railroad subsidiary thereof shall be available for payment to any State, political subdivision of a State, or local taxing authority for any taxes or other fees levied on the Corporation: *Provided*, That notwithstanding any provision of law, the Corporation shall pay all taxes or other fees appropriately levied on its facilities in Beech Grove, Indiana.

"(Disapproval of Deferral)

"The Congress disapproves in its entirety deferral D82-217 relating to the Federal Railroad Administration, Grants to the National Railroad Passenger Corporation, as set forth in the message of November 6, 1981, which was transmitted to the Congress by the President. This disapproval shall be effective immediately and the amount of the proposed deferral disapproved herein shall be made available for obligation."

Mr. BENJAMIN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 55: Page 19, after line 3, insert:

"COMMUTER RAIL SERVICE

"For necessary expenses to carry out the commuter rail activities authorized by section 601(d) of the Rail Passenger Service Act (45 U.S.C. 601), as amended, $5,000,000, and for necessary expenses to carry out section 1139(b) of Public Law 97-35, $45,000,000, to remain available until expended."

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 55 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

"COMMUTER RAIL SERVICE

"For necessary expenses to carry out the commuter rail activities authorized by section 601(d) of the Rail Passenger Service Act (45 U.S.C. 601), as amended, $15,000,000, and for necessary expenses to carry out section 1139(b) of Public Law 97-35, $45,000,000, to remain available until expended."

Mr. BENJAMIN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The motion was agreed to.

The SPEAKER, pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 56: Page 19, after line 20, insert:

"PAYMENTS TO THE ALASKA RAILROAD REVOLVING FUND

"For payment to the Alaska Railroad Revolving Fund for capital replacements, improvements, operations and maintenance, $6,160,000, to remain available until expended."

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 56 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 58: Page 20, lines 22 and 23, strike out ", for the St. Louis Terminal restructuring project, in amounts not to exceed $50,000,000" and insert "for the uses authorized for the Fund, in amounts not to exceed $60,000,000".

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 58 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert "for uses authorized for the Fund, in amounts not to exceed $67,500,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 64: Page 23, line 1, strike out "1970" and insert "1980".

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 64 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert: "1970 decennial census until March 31, 1982, after which date funds apportioned under this appropriation shall be distributed on the basis of data from the 1980".

Mr. BENJAMIN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 66: Page 23, line 8, strike out "1970" and insert "1980".

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 66 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert "1970 decennial census until March 31, 1982, after which date funds apportioned under this appropriation shall be distributed on the basis of data from the 1980".

Mr. BENJAMIN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 67: Page 24, after line 5, insert:

WATERBORNE TRANSPORTATION DEMONSTRATION PROJECT

(RESCISSION)

Of the funds appropriated under this head in Public Law 96-38, Public Law 96-131 and Public Law 96-400, making appropriations for a waterborne transportation demonstration project for fiscal years 1979, 1980, and 1981, $2,000,000 are rescinded.

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 67 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 77: Page 27, line 10, after "expended" insert ": *Provided*, That, notwithstanding any other provision of law, none of the funds appropriated by this Act shall be expended under section 406 for services provided after the date of enactment of this Act to points which, based on reports filed with the Civil Aeronautics Board, enplaned an average of eighty or more passengers per day in the fiscal year ended September 30, 1981".

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 77 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert ": *Provided*, That, notwithstanding any other provision of law, none of the funds appropriated by this Act shall be expended under section 406 for services provided after 95 days following the date of enactment of this Act to points which, based on reports filed with the Civil Aeronautics Board, enplaned an average of eighty or more passengers per day in the fiscal year ended September 30, 1981".

Mr. BENJAMIN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 78: Page 27, line 10, after "expended" insert ": *Provided further*, That, notwithstanding any other provision of law, payments under section 406 shall not exceed a total of $28,000,000 in fiscal year 1982 and, to the extent it is necessary to meet this limitation, the compensation otherwise payable by the Board under section 406 shall be reduced by a percentage which is the same for all air carriers receiving such compensation".

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 78 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert ": *Provided further*, That, notwithstanding any other provision of law, payments under section 406, exclusive of payments for services provided within the State of Alaska, shall not exceed a total of $14,000,000 for services provided during the period between March 31, 1982, and September 30, 1982, and, to the extent it is necessary to meet this limitation, the compensation otherwise payable by the Board under section 406 shall be reduced by a percentage which is the same for all air carriers receiving such compensation: *Provided further*, That, notwithstanding any other provision of law, payments under section 406 for services provided within the State of Alaska during the period between March 31, 1982, and September 30, 1982, shall not exceed a total of $5,500,000 and, to the extent it is necessary to meet this limitation, the compensation otherwise payable by the Board under section 406 shall be reduced by a percentage which is the same for all carriers receiving such compensation: *Provided further*, That the foregoing limitations shall not apply to payments made pursuant to the requirements of section 419(a)(7)(A) nor shall such payments be reduced by virtue of such provision: *Provided further*, That the provisions of this paragraph shall be effective only until modified by subsequent legislation".

Mr. BENJAMIN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 84: Page 30, line 17, insert:

DEPARTMENT OF THE TREASURY

OFFICE OF THE SECRETARY

INVESTMENT IN FUND ANTICIPATION NOTES

For the acquisition, in accordance with section 509 of the Railroad Revitalization and Regulatory Reform Act of 1976, as amended, and section 803 of Public Law 95-620, of fund anticipation notes, $60,000,000.

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 84 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert:

DEPARTMENT OF THE TREASURY

OFFICE OF THE SECRETARY

INVESTMENT IN FUND ANTICIPATION NOTES

(INCLUDING TRANSFER OF FUNDS)

For the acquisition, in accordance with section 509 of the Railroad Revitalization and Regulatory Reform Act of 1976, as amended, and section 803 of Public Law 95-620, of fund anticipation notes, $67,500,000, of which $25,000,000 shall be derived from the unobligated balances of "Payments for Purchase of Conrail Securities."

Mr. BENJAMIN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 89: Page 36, line 10, strike out "expenses and" and insert "expenses,".

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 89 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 90: Page 36, line 10, after "highways" insert "and $15,000,000 for the Bismarck-Mandan Bridge and $4,000,000 for the Steubenville-Weirton Bridge".

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 90 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert "and $15,000,000 for the Bismarck-Mandan Bridge, $4,000,000 for the Steubenville-Weirton Bridge, and necessary funds required during fiscal year 1982 for the Dickey Road Bridge in East Chicago, Indiana, and the U.S. 12 Bridge over Trail Creek in Michigan City, Indiana".

Mr. BENJAMIN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The motion was agreed to.

□ 1330

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 93: Page 36, after line 16, insert:

SEC. 311. Notwithstanding any other provision of law, none of the funds provided in this Act shall hereafter be used by the Interstate Commerce Commission to approve railroad branchline abandonments in the State of North Dakota by the entity generally known as the Burlington Northern Railroad, or its agents or assignees, in excess of a total of 350 miles.

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows.

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 93 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert:

SEC. 311. None of the funds provided in this Act shall be used by the Interstate Comerce Commission to approve railroad branchline abandonments in fiscal year 1982 in any State in excess of 3 per centum of a State's total mileage of railroad lines operated: *Provided*, That this limitation shall not apply to any abandonment of Conrail railroad lines: *Provided further*, That exceptions to this limitation shall be made only upon the specific approval of each of the appropriate committees of Congress.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 99: Page 40, strike out all after line 19 over to and including line 2 on page 41.

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 99 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment amended to read as follows:

SEC. 324. None of the funds appropriated by this Act shall be used to implement, administer, or enforce Order 81-5-27 of the Civil Aeronautics Board or any other order of the Civil Aeronautics Board which prohibits or has the effect of prohibiting any U.S. air carrier from participating in the International Air Transport Association's North Atlantic Traffic Conference under its existing articles and provisions: *Provided*, That this limitation may be terminated by an appropriate resolution adopted by the House Public Works and Transportation Committee or the Senate Commerce Committee.

Mr. BENJAMIN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 100: Page 41, after line 2, insert:

SEC. 323. Notwithstanding any other provision of law, the Secretary shall, with regard to the Urban Discretionary Grant Program of the Urban Mass Transportation Administration, promptly issue a letter of intent for the Dade County, Florida, Circulator System for $63,642,666, and, in addition, shall promptly issue a letter of intent for non-rail projects in the Portland, Oregon, Metropolitan region for $76,800,000.

MOTION OFFERED BY MR. BENJAMIN

Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 100 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

SEC. 325. Notwithstanding any other provision of law, the Secretary shall, with regard to the Urban Discretionary Grant Program of the Urban Mass Transportation Administration, promptly issue a letter of intent for the Dade County, Florida, Circulator System for $63,642,666, and, in addition, shall promptly issue a letter of intent for non-rail projects in the Portland, Oregon, Metropolitan region for $76,800,000 and also issue a letter of intent for the Southeast Michigan Central Automated Transit System for 110 million 1981 dollars.

Mr. BENJAMIN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 101: Page 41, after line 2, insert:

SEC. 324. (a) The Act entitled "An Act authorizing the State of Maryland, by and through its State Roads Commission or the successors of said Commission, to construct, maintain, and operate certain bridges across streams, rivers, and navigable waters which are wholly or partly within the State", approved April 7, 1938, and the Act of June 16, 1948 (62 Stat. 463, Public Law 654, 80th Congress), as amended by the Act of November 17, 1967 (81 Stat. 466, Public Law 144, 90th Congress) are hereby repealed.

(b) The State of Maryland, by and through the Maryland Transportation Authority or the successors of such Authority, is authorized, subject to all applicable Federal laws, (1) to continue to collect tolls after the date of enactment of this Act from its existing transportation facilities projects, as defined on the date of enactment of this Act in the laws of the State of Maryland, and (2) to use the revenues from such tolls for transportation projects of the type which the State or the Maryland Transportation Authority is authorized to construct, operate, or maintain under the laws of the State of Maryland as such laws exist on the date of enactment of this Act.

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 101 and concur therein with an amendment, as follows: In lieu of the section number named in said amendment, insert "326".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 102: Page 41, after line 2, insert:

SEC. 325. (a) Notwithstanding section 16 of the Federal Airport Act (as in effect on November 25, 1947), the Secretary of Transportation is authorized, subject to the provisions of section 13 of the Suplus Property Act of 1944 (50 App. U.S.C. 1622g) and the provisions of subsection (b) of this section, to grant release from any of the terms, conditions, reservations, and restrictions contained in a deed of conveyance dated November 25, 1947, under which the United States conveyed certain property to the Greater Rockford Airport Authority for airport purposes and in deeds of conveyance dated May 28, 1948, and April 21, 1949, under which the United States conveyed certain property of the city of Liberal, Kansas for airport purposes.

(b) Any release granted by the Secretary of Transportation under subsection (a) shall be subject to the following conditions:

(1) the Greater Rockford Airport Authority or the city of Liberal, Kansas, as the case may be, shall agree that in conveying any interest in the property which the United States conveyed pursuant to the deeds described in subsection (a), the Greater Rockford Airport Authority or the city of Liberal, Kansas, as the case may be, will receive an amount which is equal to the fair market value; and

(2) any such amount so received shall be used for the development, improvement, operation, or maintenance of a public airport.

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 102 and concur therein with an amendment, as follows: In lieu of the section number 325 named in said amendment, insert "327".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 103: page 41, after line 2, insert:

SEC. 326. (a) Notwithstanding section 13(g) of the Surplus Property Act of 1944 (50 App. U.S.C. 1622(g)) and section 4 of the Act of October 1, 1949 (50 App. U.S.C. 1622c), the Secretary of Transportation, if requested, shall, as to the property described in subsection (f), grant a release to the Parish of East Baton Rouge, Louisiana, from all of the terms, conditions, reservations, and restrictions contained in the deed of conveyance dated August 13, 1948, under which the United States conveyed certain property to the Parish of East Baton Rouge, Louisiana, for airport purposes. This provision does not apply to the portion of the property, conveyed by that deed, that is not specified in subsection (f).

(b) In place of the terms, conditions, reservations, and restrictions released under subsection (a), the following conditions shall apply:

(1) The City of Baton Rouge and Parish of East Baton Rouge, Louisiana, shall submit all proposals, policies, and plans for further construction, other development, or changed operating practices (including, but not limited to, policies affecting the size and kind of the inmate population), at East Baton Rouge Parish Prison, to the Secretary for review of airport safety and security prior to such construction, other development, or changed operating practices.

(2) The City of Baton Rouge and Parish of East Baton Rouge, Louisiana, shall construct, develop, operate, and maintain the East Baton Rouge Parish Prison in accordance with proposals, policies, and plans submitted to, and approved by, the Secretary with respect to airport safety and security.

(3) The City of Baton Rouge and Parish of East Baton Rouge, Louisiana, shall construct, develop, operate, and maintain the East Baton Rouge Parish Prison in compliance with applicable Federal, State, and local laws.

(4) The City of Baton Rouge and Parish of East Baton Rouge, Louisiana, shall hold the United States harmless for damage or injury to persons or property, in flight or on the ground, caused by any inmate who has escaped from the East Baton Rouge Parish Prison, or caused by any event occurring at the prison.

(c) Within 90 days after the enactment of this provision, the City of Baton Rouge and Parish of East Baton Rouge, Louisiana, shall demonstrate, to the satisfaction of the Secretary, that the current operating conditions at the East Baton Rouge Parish Prison meet acceptable levels of airport safety and security.

(d) Any action determined by the Secretary to be necessary to achieve acceptable levels of airport safety or security at the prison shall be accomplished by the City of Baton Rouge and Parish of East Baton Rouge, Louisiana, as soon as practicable. Such determinations are "orders" for the purpose of judicial review under section 1006 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1486).

(e) The opinion of the Secretary concerning the airport safety and security implications of any current or proposed conditions involving the prison shall be conclusive as to those matters.

(f) Subsection (a) applies to the following described area:

One certain lot or parcel of ground together with all the buildings and improvements thereon located in the Parish of East Baton Rouge, State of Louisiana and shown by reference to the following two maps:

1. A map entitled "Airport Boundary Maps showing Ryan Airport Property Owned by the Parish of East Baton Rouge, Louisiana, Compiled from Official Records and Maps" prepared by the Department of Public Works in and for the City of Baton Rouge and the Parish of East Baton Rouge and dated October 13, 1978, and signed by Mr. Charles W. Hair, Jr., Engineer (said map being hereinafter referred to as Map numbered 1); and

2. A map entitled "Map Showing Boundary and Topographic Survey of East Baton Rouge Parish Prison Site" dated March 6, 1981, and signed by Mr. Henry K. Schott, Engineer (said map being hereinafter referred to as Map numbered 2).

Said property being more particularly described by starting at point "A" on Map numbered 1; thence proceeding north 00 degrees 27 minutes 37 seconds west a distance of 56.44 feet to a point and corner; thence proceeding east 90 degrees 00 minutes 00 seconds east a distance of 60.08 feet to the point of beginning and corner; thence proceed north 0 degrees 27 minutes 37 seconds west a distance of 549.61 feet to a point and corner; thence proceed north 88 degrees 44 minutes 42 seconds east a distance of 185.66 feet to a point and corner; thence proceed north 1 degree 01 minute 51 seconds west a distance of 222.05 feet to a point and corner; thence proceed north 88 degrees 44 minutes 42 seconds east a distance of 1,120.20 feet to a point and corner; thence proceed south 10 degrees 34 minutes 12 seconds west a distance of 816.23 feet to a point and corner; thence proceed south 89 degrees 24 minutes 21 seconds west a distance of 387.66 feet to a point; thence proceed north 70 degrees 37 minutes 59 seconds west a distance of 186.66 feet to a point; thence proceed south 86 degrees 36 minutes 21 seconds west a distance of 712.28 feet to the point of beginning; all of said measurements being more particularly shown on Map numbered 2.

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 103 and concur therein with an amendment as follows: In lieu of the section numbered 326 named in said amendment, insert "328".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the last amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 104: Page 41, after line 2, insert:

SEC. 327. As used in section 502(a)(1)(B) of the Rail Passenger Service Act, the term "Amtrak Commuter" shall mean, with re-

spect to the period prior to January 1, 1983, "Conrail".

MOTION OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. BENJAMIN moves that the House recede from its disagreement to the amendment of the Senate numbered 104 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

SEC. 329. As used in section 502(a)(1)(B) of the Rail Passenger Service Act, the term "Amtrak commuter" shall mean, with respect to the period prior to January 1, 1983, "Conrail".

TITLE IV

SEC. 401. Notwithstanding any other provision of this Act, appropriations made available for the projects or activities provided for in this Act are hereby reduced in the following amounts:

DEPARTMENT OF TRANSPORTATION

Office of the Secretary, salaries and expenses and transportation planning, research, and development, $4,500,000;

Coast Guard, operating expenses, $48,400,000, of which $5,000,000 shall be deducted from the amounts made available for recreational boating safety; acquisition, construction, and improvements, $16,000,000; alteration of bridges, $4,000,000; research, development, test, and evaluation, $4,000,000; offshore oil pollution compensation fund, $3,000,000; and deepwater port liability fund, $3,000,000;

Federal Aviation Administration, operations, $125,000,000; facilities, engineering and development, $9,000,000; facilities and equipment (Airport and Airway Trust Fund), $24,000,000; research, engineering and development (Airport and Airway Trust Fund), $16,000,000; and construction, Metropolitan Washington Airports, $5,000,000;

Federal Highway Administration, highway safety research and development, $2,000,000; highway beautification, $1,500,000; territorial highways, $1,000,000; and interstate transfer grants-highways, $37,000,000;

National Highway Traffic Safety Administration, operations and research, $7,000,000;

Federal Railroad Administration, office of the administrator, $500,000; railroad safety, $2,500,000; railroad research and development, $9,000,000; rail service assistance, $4,000,000, of which at least $2,000,000 shall be deducted from amounts made available for the Minority Business Resource Center; Northeast corridor improvement program, $6,000,000; and redeemable preference shares, $7,000,000;

Urban Mass Transportation Administration, administrative expenses, $3,000,000; research, development, and demonstrations and university research and training, $10,000,000; urban discretionary grants, $29,500,000; nonurban formula grants, $4,000,000; urban formula grants, $64,750,000; and interstate transfer grants-transit, $22,000,000;

Research and Special Programs Administration, research and special programs, $9,000,000, of which $2,500,000 shall be deducted from the amounts made available for research and development and $750,000 shall be deducted from amounts made available for grants-in-aid as authorized by section 5 of the Natural Gas Pipeline Safety Act of 1968;

RELATED AGENCIES

Architectural and Transportation Barriers Compliance Board, salaries and expenses, $100,000;

National Transportation Safety Board, salaries and expenses, $2,000,000;

Civil Aeronautics Board, salaries and expenses; $1,500,000;

Interstate Commerce Commission, salaries and expenses, $4,000,000;

Department of the Treasury, Office of the Secretary, investment in fund anticipation notes, ($7,000,000); and

United States Railway Association, administrative expenses, $4,000,000.

SEC. 402. Notwithstanding any other provision of law or of this Act, none of the funds provided in this or any other Act shall hereafter be used by the Interstate Commerce Commission to approve railroad branchline abandonments in the State of North Dakota by the entity generally known as the Burlington Northern Railroad, or its agents or assignees, in excess of a total of 350 miles: *Provided*, That this section shall be in lieu of section 311 (amendment numbered 93) as set forth in the conference report and the joint explanatory statement of the committee of conference on the Department of Transportation and Related Agencies Appropriations Act, 1982 (H.R. 4209), filed in the House of Representatives on November 13, 1981 (H. Rept. No. 97-331).

SEC. 403. Notwithstanding any other provision of law or of this Act, the funds provided for section 18 nonurban formula grants and section 5 urban formula grants in this Act shall be apportioned and allocated using data from the 1970 decennial census for one-half of the sums appropriated and the remainder shall be apportioned and allocated on the basis of data from the 1980 decennial census.

SEC. 404. Notwithstanding any other provision of law or of this Act, of the fiscal year 1982 Highway Trust Funds available for emergency relief, $17,000,000 shall be made available for damaged highways or for the prevention of damage to highways in the area affected by eruptions of the Mount Saint Helens volcano.

SEC. 405. Notwithstanding any other provision of title 23, United States Code, or of this Act, the Secretary of Transportation shall approve, upon the request of the State of Indiana, the construction of an interchange to appropriate standards at I-94 and County Line Road at the Porter-La Porte County Line near Michigan City, Indiana, with the Federal share of such construction to be financed out of funds apportioned to the State of Indiana under section 104(b)(5)(A) of title 23, United States Code.

SEC. 406. Notwithstanding any other provision of law, or of this Act, any proposal for deferral of budget authority under section 1013 of the Impoundment Control Act of 1974 (31 U.S.C. 1403) with respect to budget authority for expenses related to the Northeast Corridor Improvement Project authorized under title VII of the Railroad Revitalization and Regulatory Reform Act of 1976 (Public Law 94-210), Acquisition, construction, and improvements, Railroad-highway crossing demonstration projects, Grants to the National Railroad Passenger Corporation, Urban discretionary grants and Interstate transfer grants (highway and transit) shall, upon transmittal to the Congress, be referred to the House and Senate Committees on Appropriations and any amount of budget authority proposed to be deferred therein shall be made available for obligation unless, within a 45-day period which begins on the date of transmittal and which is equivalent to that described in section 1011 (3) and (5) of the Impoundment Control Act of 1974 (31 U.S.C. 1401 (3) and (5)), the Congress has completed action on a bill approving all or part of the proposed deferral.

Mr. BENJAMIN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. BENJAMIN. Mr. Speaker, this amendment conforms the transportation conference agreement to the funding levels contained in the OMB substitute to the continuing resolution passed last week. In proposing this amendment, it is necessary to provide the Department of Transportation with additional instructions on how these reductions are to be allocated.

This motion directs a reduction of $493,250,000 from the amounts which would otherwise be made available by the original conference agreement on the Department of Transportation and Related Agencies Appropriations Act, 1982. In making this reduction, the committee directs that, to the maximum extent feasible, the earmarkings and directives contained in the conference report and joint explanatory statement of the committee of conference on the Department of Transportation and Related Agencies Appropriation Act, 1982, will be implemented. Any deviation from the language contained in that report should receive the prior approval of the House and Senate Committees on Appropriations.

The agreement directs that the reduction for urban discretionary grants be applied on a pro rata basis for each activity and new start project identified in the statement of the managers accompanying the conference report on the Department of Transportation and Related Agencies Appropriation Act, 1982.

The agreement directs that $58,750,000 of the $64,750,000 reduction in the urban formula grants account be pro rata; the remaining $6,000,000 of the $64,750,000 reduction in this account shall be taken from tier IV only.

The agreement directs that the reductions for the interstate transfer-transit program be applied on a pro-rata basis to the allocations specified in the joint explanatory statement of the managers on House Joint Resolution 357. In allocating the $288,000,000 provided for the interstate transfer-highway program, the funding for Oregon shall be $60,000,000, the funding for northeast Illinois shall be $125,000,000, the funding for Philadelphia shall be $22,000,000, the funding

for Omaha shall be $2,000,000 and the remainder shall be allocated on a pro rata basis to the areas specified in the joint explanatory statement of the managers of House Joint Resolution 357.

The agreement directs that none of the reductions proposed by this amendment for Federal Railroad Administration, railroad research and development be allocated to the East St. Louis metropolitan gateway area railroad restructuring project. The reduction of $7,000,000 from the appropriation redeemable preference shares shall be dervied from the amount not specifically earmarked for any project in the statement of the managers accompanying the conference report on the Department of Transportation and Related Agencies Appropriation Act, 1982.

Any personnel reductions in UMTA required by this amendment shall be taken primarily from the Washington, D.C., headquarters office.

The agreement limits the railroad branchline abandonments in the State of North Dakota to 350 miles.

The House and Senate Appropriations Committees understand that the Illinois Central Gulf Railroad has agreed to cooperate with the State of Mississippi in the continued operation of their railroad lines in north Mississippi.

The agreement reiterates the language appearing on page 28 of the joint explanatory statement of the committee of conference on the Department of Transportation and Related Agencies Appropriation Act, 1982 (H.R. 4209), relating to surcharges, rate increases, and assistance from the section of railroad services planning.

The committee also wishes to express its concern that the Urban Mass Transportation Administration is not acting aggressively in administering congressional directives to allow for evaluation of life cycle costs, performance, standardization and other relevant factors when making grant awards for the acquisition of transit equipment. The committee believes that the current UMTA procurement policy emphasizing low-bid acquisition unduly inhibits grantees from making the most cost-effective purchases and offers no incentive for manufacturers to develop better products, offer new components, or invest in research and development programs. This policy seems especially inappropriate since it is inhibiting local transit authorities from considering factors in equipment procurements that might significantly lower their operating costs at the same time that UMTA has proposed to abolish transit operating assistance.

The committee considers the current UMTA effort to administer similar provisions included in both the fiscal year 1980 and 1981 DOT appropriation acts and the 1978 Surface Transportation Assistance Act to be inadequate. Stronger steps must be taken to fulfill congressional intent. UMTA should immediately embark upon a program to insure that the provisions contained in H.R. 4209 with respect to rolling stock procurement are fully implemented in a manner which is not overly burdensome to transit authorities and equipment manufacturers. In particular, existing life cycle cost evaluation procedures should be modified so that fair and reasonably based life cycle cost determinations can be made in cases where detailed cost data is unavailable or difficult to collect.

Mr. COUGHLIN. Mr. Speaker, will the gentleman yield?

Mr. BENJAMIN. I yield to the gentleman from Pennsylvania.

Mr. COUGHLIN. Mr. Speaker, the chairman and I discussed this before, and we are in agreement with the statement the chairman has put in and support it wholeheartedly.

Mr. BENJAMIN. I thank the gentleman.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Indiana (Mr. BENJAMIN).

The motion agreed to.

A motion to reconsider the votes by which action was taken on the conference report and the several motions was laid on the table.

GENERAL LEAVE

Mr. BENJAMIN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report and the amendments in disagreement on the bill, H.R. 4209, and that I may include tabular matter.

The SPEAKER pro tempore. Is there objection to the request of the gentlman from Indiana?

There was no objection.

GENERAL LEAVE

Mr. FAUNTROY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 4910, the District of Columbia Bond Amendments Act of 1981.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from the District of Columbia?

There was no objection.

DISTRICT OF COLUMBIA BOND AMENDMENTS ACT OF 1981

Mr. FAUNTROY. Mr. Speaker, by direction of the Committee on the District of Columbia and on behalf of its chairman, the gentleman from California, Mr. RONALD V. DELLUMS, I call up the bill (H.R. 4910) to amend the District of Columbia Self-Government and Governmental Reorganization Act and the charter of the District of Columbia with respect to the provisions allowing the District of Columbia to issue general obligation bonds and notes and revenue bonds, notes, and other obligations, and I ask unanimous consent that the bill be considered in the House as in the Committee of the Whole.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from the District of Columbia?

There was no objection.

The Clerk read the bill, as follows:

H.R. 4910

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Section 103(8) of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 1-122(8)) is amended to read as follows:

"(8) The term 'capital project' means any physical public betterment or improvement, the acquisition of property of a permanent nature, or the purchase of equipment or furnishings, and includes (A) costs of any preliminary plans, studies, and surveys in connection with such betterment, improvement, acquisition, or purchase, (B) costs incidental to such betterment, improvement, acquisition, or purchase, and the financing thereof, including the cost of any election, professional fees, printing or engraving, production and reproduction of documents, publication of notices, taking of title, bond insurance, and interest during construction, and (C) the reimbursement of any fund or account for amounts expended for the payment of any such costs."

SEC. 2. Section 446 of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 47-224) is amended in the fourth sentence by striking out "No" and inserting in lieu thereof "Except as provided in section 467(d), section 471(c), section 472(d)(2), section 483(d), and subsections (f) and (g)(3) of section 490, no".

SEC. 3. Section 448 of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 47-226) is amended—

(1) by inserting "(a)" after "SEC. 448."; and

(2) by adding at the end the following new subsection:

"(b) Notwithstanding subsection (a), the Mayor may make any payments required by section 483(b) and take any actions authorized by an act of the Council under section 467(b)(5) or under subsection (a)(4)(A), or subsection (e)(6) of section 490.".

SEC. 4. Section 461(a) of the District of Columbia Self-Govenment and Governmental Reorganization Act (D.C. Code, sec. 47-241(a)) is amended in the second sentence by striking out "payable annually or semi-annually, at such rate" and inserting in lieu thereof "payable on such dates, at such rate or rates".

SEC. 5. Section 462 of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 47-242) is amended—

(1) by striking out the title of such section and inserting in lieu thereof the following new title:

"CONTENTS OF BORROWING LEGISLATION AND ELECTIONS ON ISSUING GENERAL OBLIGATION BONDS";

(2) by inserting "(a)" after "Sec. 462.";

(3) in paragraph (6)—

(A) by striking out the comma which appears after "discretion"; and

(B) by inserting "the date of such election," after "holding such election,"; and

(4) by adding after paragraph (6) the following new subsections:

"(b) Any election held on the question of issuing general obligation bonds must be held before the act authorizing the issuance of such bonds is transmitted to the Speaker of the House of Representatives and the President of the Senate pursuant to section 602(c).

"(c) Notwithstanding section 602(c)(1), the provisions required by paragraph (6) of subsection (a) to be included in any act authorizing the issuance of general obligation bonds shall take effect on the date of the enactment of such act.".

SEC. 6. Section 463 of the District of Columbia Self-Government and Govenmental Reorganization Act (D.C. Code, sec. 47-243) is amended to read as follows:

"PUBLICATION OF BORROWING LEGISLATION

"SEC. 463. (a) After each act of the Council of the District under section 462(a) authorizing the issuance of general obligation bonds has taken effect, the Mayor shall publish such act at least once in at least one newspaper of general circulation within the District together with a notice that such act has taken effect. Each such notice shall be in substantially the following form:

" 'NOTICE

" 'The following act of the Council of the District of Columbia (published with this notice) authorizing the issuance of general obligation bonds has taken effect. As provided in the District of Columbia Self-Government and Governmental Reorganization Act, the time within which a suit, action, or proceeding questioning the validity of such bonds may be commenced expires at the end of the twenty-day period beginning on the date of the first publication of this notice.

" '_____ _____,

" 'Mayor.'

"(b) Neither the failure to publish the notice provided for in subsection (a) nor any error in any publication of such notice shall impair the effectiveness of the act of the Council authorizing the issuance of such bonds or the validity of any bond issued pursuant to such act.".

SEC. 7. Section 464 of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 47-244) is amended to read as follows:

"SHORT PERIOD OF LIMITATION

"SEC. 464. (a) At the end of the twenty-day period beginning on the date of the first publication pursuant to section 463(a) of the notice that an act authorizing the issuance of general obligation bonds has taken effect—

"(1) any recital or statement of fact contained in such act or in the preamble or title of such act shall be deemed to be true for the purpose of determining the validity of the bonds authorized by such act, and the District and all others interested shall be estopped from denying any such recital or statement of fact; and

"(2) such act, and all proceedings in connection with the authorization of the issuance of such bonds including any election held on the question of issuing such bonds, shall be deemed to have been duly and regularly taken, passed, and done by the District, in compliance with this Act and all other applicable laws, for the purpose of determining the validity of such act and proceedings; and no court shall have jurisdiction in any suit, action, or proceeding questioning the validity of such act or proceedings except in a suit, action, or proceeding commenced before the end of such twenty-day period.

"(b) At the end of the twenty-day period beginning on the date of the first publication pursuant to section 463(a) of the notice that an act authorizing the issuance of general obligation bonds has taken effect, no court shall have jurisdiction in any suit, action, or proceeding questioning the validity of any general obligation bond issued pursuant to such act if—

"(1) such general obligation bond was purchased in good faith and for fair value; and

"(2) such general obligation bond contains substantially the following statement which shall bind the District of Columbia:

'It is hereby certified and recited that all conditions, acts, and things required by the District of Columbia Self-Government and Governmental Reorganization Act and other applicable laws to exist, to have happened, and to have been performed precedent to and in the issuance of this bond exist, have happened, and have been performed and that the issue of bonds, of which this is one, together with all other indebtedness of the District of Columbia, is within every debt and other limit prescribed by law.' ".

SEC. 8. Section 465 of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 47-245) is amended to read as follows:

"ISSUANCE OF GENERAL OBLIGATION BONDS

"SEC. 465. (a)(1) After an act of the Council authorizing the issuance of general obligation bonds under section 461(a) takes effect, the Mayor may issue such general obligation bonds as authorized by such act of the Council. An issue of general obligation bonds may be all or any part of the aggregate principal amount of bonds authorized by such act.

"(b) The principal amount of the general obligation bonds of each issue shall be payable in annual installments beginning not more than three years after the date of such bonds and ending not more than thirty years after such date.

"(c) The general obligation bonds of each issue shall be executed by the manual or facsimile signature of such officials as may be designated to sign such bonds by the act of the Council authorizing the issuance of the bonds, except that at least one such signature shall be manual. Coupons attached to the bonds shall be authenticated by the facsimile signature of the Mayor unless the Council provides otherwise.".

SEC. 9. Section 466 of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 47-246) is amended—

(1) by striking out the title of the section and inserting in lieu thereof "PUBLIC OR PRIVATE SALE";

(2) by striking out "SEC. 466. All" in the first sentence and inserting in lieu thereof "SEC. 466. (a) Except as provided in subsection (b),"; and

(3) by adding at the end the following new subsection:

"(b) Any issue of general obligation bonds which is sold before October 1, 1984, and which is additionally secured by a security interest created in District revenues under section 467(a) may be sold at either a public sale under subsection (a) or at a private sale on a negotiated basis in such manner as the Mayor may determine to be in the public interest.".

SEC. 10. Subpart 1 of part E of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 47-241 et seq.) is amended by inserting after section 466 the following new section:

"AUTHORITY TO CREATE SECURITY INTERESTS IN DISTRICT REVENUES

"SEC. 467. (a) An act of the Council authorizing the issuance of general obligation bonds under section 461(a) may create a security interest in any District revenues as additional security for the payment of the bonds authorized by such act.

"(b) Any such act creating a security interest in District revenues may contain provisions (which may be part of the contract with the holders of such bonds)—

"(1) describing the particular District revenues which are subject to such security interest;

"(2) creating a reasonably required debt service reserve fund or any other special fund;

"(3) authorizing the Mayor of the District to execute a trust indenture securing the bonds;

"(4) vesting in the trustee under such a trust indenture such properties, rights, powers, and duties in trust as may be necessary, convenient, or desirable;

"(5) authorizing the Mayor of the District to enter into and amend agreements concerning (A) the custody, collection, use, disposition, security, investment, and payment of the proceeds of the bonds and the District revenues which are subject to such security interest, and (B) the doing of any act (or the refraining from doing any act) that the District would have the right to do in the absence of such an agreement;

"(6) prescribing the remedies of the holders of the bonds in the event of a default; and

"(7) authorizing the Mayor of the District to take any other actions in connection with the issuance, sale delivery, security, and payment of the bonds.

"(c) Notwithstanding article 9 of title 28 of the District of Columbia Code, any security interest in District revenues created under subsection (a) shall be valid, binding, and perfected from the time such security interest is created, with or without the physical delivery of any funds or any other property and with or without any further action. Such security interest shall be valid, binding, and perfected whether or not any statement, document, or instrument relating to such security interest is recorded or filed. The lien created by such security interest is valid, binding, and perfected with respect to any individual or legal entity having claims against the District, whether or not such individual or legal entity has notice of such lien.

"(d) The fourth sentence of section 446 shall not apply to any obligation or expenditure of any District revenues to secure any general obligation bond under subsection (a).".

SEC. 11. Section 471 of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 47-247) is amended to read as follows:

"BORROWING TO MEET APPROPRIATIONS

"SEC. 471. (a) In the absence of unappropriated revenues available to meet appropriations made pursuant to section 446, the Council may by act authorize the issuance of general obligation notes. The total amount of all such general obligation notes originally issued during a fiscal year shall not exceed 2 per centum of the total appropriations for the District for such fiscal year.

"(b) Any general obligation note issued under subsection (a), as authorized by an act of the Council, may be renewed. Any such note, including any renewal of such note, shall be due and payable not later than the last day of the fiscal year occurring immediately after the fiscal year during which the act authorizing the original issuance of such note takes effect.

"(c) The fourth sentence of section 446 shall not apply to any amount obligated or expended by the District for the payment of the principal of, interest on, or redemption premium for any general obligation note issued under subsection (a).".

SEC. 12. Section 472 of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 47-248) is amended to read as follows:

"BORROWING IN ANTICIPATION OF REVENUES

"SEC. 472. (a) In anticipation of the collection or receipt of revenues for a fiscal year, the Council may by act authorize the issuance of general obligation notes for such fiscal year, to be known as revenue anticipation notes.

"(b) The total amount of all revenue anticipation notes issued under subsection (a) outstanding at any time during a fiscal year shall not exceed 20 per centum of the total anticipated revenue of the District for such fiscal year, as certified by the Mayor under this subsection. The Mayor shall certify, as of a date which occurs not more than fifteen days before each original issuance of such revenue anticipation notes, the total anticipated revenue of the District for such fiscal year.

"(c) Any revenue anticipation note issued under subsection (a) may be renewed. Any such note, including any renewal of such note, shall be due and payable not later than the last day of the fiscal year during which the note was originally issued.

"(d)(1) Notwithstanding section 602(c)(1), any act of the Council authorizing the issuance of revenue anticipation notes under subsection (a) may take effect on the date of the enactment of such act.

"(2) The fourth sentence of section 446 shall not apply to any amount obligated or expended by the District for the payment of the principal of, interest on, or redemption premium for any revenue anticipation note issued under subsection (a).".

SEC. 13. Section 481 of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 47-251) is amended to read as follows:

"SPECIAL TAX

"SEC. 481. (a) Any act of the Council authorizing the issuance of general obligation bonds under section 461(a) shall provide for the annual levy of a special tax or charge, if the Council determines that such tax or charge is necessary. Such tax or charge shall be levied, without limitation as to rate or amount, in amounts which together with other District revenues available and applicable will be sufficient to pay the principal of and interest on such general obligation bonds as they become due and payable. Such tax or charge shall be levied and collected at the same time and in the same manner as other District taxes are levied and collected, and when collected shall be set aside in a separate debt service fund and irrevocably dedicated to the payment of such principal and interest.

"(b) The Comptroller General of the United States shall make annual audits of the amounts set aside and deposited in each debt service fund pursuant to subsection (a).".

SEC. 14. Subpart 3 of part E of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 47-251) is amended by adding after section 481 the following new sections:

"FULL FAITH AND CREDIT OF THE DISTRICT

"SEC. 482. The full faith and credit of the District is pledged for the payment of the principal of and interest on any general obligation bond or note issued under section 461(a), section 471(a), or section 472(a), whether or not such pledge is stated in such bond or note or in the act authorizing the issuance of such bond or note.

"PAYMENT OF THE GENERAL OBLIGATION BONDS AND NOTES

"SEC. 483. (a) The Council shall provide in each annual budget for the District of Columbia government for a fiscal year adopted by the Council pursuant to section 446 sufficient funds to pay the principal of and interest on all general obligation bonds or notes issued under section 461(a), section 471(a), or section 472(a) becoming due and payable during such fiscal year.

"(b) The Mayor shall insure that the principal of and interest on all general obligation bonds and notes issued under section 461(a), section 471(a), or section 472(a) are paid when due, including by paying such principal and interest from funds not otherwise legally committed.

"(c) If the Mayor determines that no other funds are available to pay the principal and interest due and payable during any fiscal year on any general obligation bond or note issued under section 461(a), section 471(a), or section 472(a), the annual Federal payment appropriated for such fiscal year under the authorization contained in section 502 shall first be used to pay such principal or interest.

"(d) The fourth sentence of section 446 shall not apply to—

"(1) any amount set aside in a debt service fund under section 481(a);

"(2) any amount obligated or expended for the payment of the principal of, interest on, or redemption premium for any general obligation bond or note issued under section 461(a), section 471(a), or section 472(a);

"(3) any amount obligated or expended as provided by the Council in any annual budget for the District of Columbia government pursuant to subsection (a) or as provided by any amendment or supplement to such budget; or

"(4) any amount obligated or expended by the Mayor pursuant to subsection (b) or (c).".

SEC. 15. Part E of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 47-241 et seq.) is amended—

(1) by redesignating subpart 4 as subpart 5; and

(2) by inserting after section 481 the following new subpart:

"Subpart 4—Full Faith and Credit of the United States

"FULL FAITH AND CREDIT OF THE UNITED STATES NOT PLEDGED

"SEC. 484. The full faith and credit of the United States is not pledged for the payment of any principal of or interest on any bond, note, or other obligation issued by the District under this part. The United States is not responsible or liable for the payment of any principal of or interest on any bond, note, or other obligation issued by the District under this part.".

SEC. 16. Section 490 of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 47-254) is amended—

(1) by striking out subsection (a) and inserting in lieu thereof the following new subsection:

"(a)(1) The Council may by act authorize the issuance of revenue bonds, notes, or other obligations (including refunding bonds, notes, or other obligations) to borrow money to finance, to refinance, or to assist in the financing or refinancing of, undertakings in the areas of housing, health facilities, transit and utility facilities, recreational facilities, college and university facilities, pollution control facilities, and industrial and commercial development. Any such financing or refinancing may be effected by loans made directly or indirectly to any individual or legal entity, by the purchase of any mortgage, note, or other security, or by the purchase, lease, or sale of any property.

"(2) Any revenue bond, note, or other obligation issued under paragraph (1) shall be a special obligation of the District and shall be a negotiable instrument, whether or not such bond, note, or other obligation is a security as defined in section 28:8-102(1)(a) of title 28 of the District of Columbia Code.

"(3) Any revenue bond, note, or other obligation issued under paragraph (1) shall be paid and secured (as to principal, interest, and any premium) as provided by the act of the Council authorizing the issuance of such bond, note, or other obligation. Subject to subsection (c), any act of the Council authorizing the issuance of such bond, note, or other obligation may provide for (A) the payment of such bond, note, or other obligation from any available revenues, assets, or property, and (B) the securing of such bond, note, or other obligation by the mortgage of real property or the creation of any security interest in available revenues, assets, or other property.

"(4)(A) In authorizing the issuance of any revenue bond, note, or other obligation under paragraph (1), the Council may enter into, or authorize the Mayor to enter into, any agreement concerning the acquisition, use, or disposition of any funds or property. Any such agreement may create any security interest in any funds or property, may provide for the custody, collection, security, investment, and payment of any funds (including any funds held in trust) for the payment of such bond, note, or other obligation, may mortgage any property, may provide for the acquisition, construction, maintenance, and disposition of the undertaking financed or refinanced using the proceeds of such bond, note, or other obligation, and may provide for the doing of any act (or the refraining from doing of any act) which the District has the right to do in the absence of such agreement. Any such agreement may be assigned for the benefit of, or made a part of any contract with, any holder of

such revenue bond, note, or other obligation issued under paragraph (1).

"(B) Notwithstanding article 9 of title 28 of the District of Columbia Code, any security interest created under subparagraph (A) shall be valid, binding, and perfected from the time such security interest is created, with or without the physical delivery of any funds or any other property and with or without any further action. Such security interest shall be valid, binding, and perfected whether or not any statement, document, or instrument relating to such security interest is recorded or filed. The lien created by such security interest is valid, binding, and perfected with respect to any individual or legal entity having claims against the District, whether or not such individual or legal entity has notice of such lien.

"(C) Any funds of the District held for the payment or security of any revenue bond, note, or other obligation issued under paragraph (1), whether or not such funds are held in trust, may be secured in the manner agreed to by the District and any depository of such funds. Any depository of such funds may give security for the deposit of such funds.";

(2) by striking out subsection (b) and inserting in lieu thereof the following new subsection:

"(b) No property owned by the United States may be mortgaged or made subject to any security interest to secure any revenue bond, note, or other obligation issued under subsection (a)(1).";

(3) by striking out subsection (e) and inserting in lieu thereof the following new subsection:

"(3) Any act of the Council authorizing the issuance of revenue bonds, notes, or other obligations under subsection (a)(1) may—

"(1) briefly describe the purpose for which such bonds, notes, or other obligations are to be issued;

"(2) identify the Act authorizing such purpose;

"(3) prescribe the form, terms, provisions, manner, and method of issuing and selling (including sale by negotiation or by competitive bid) such bonds, notes, or other obligations;

"(4) provide for the rights and remedies of the holders of such bonds, notes, or other obligations upon default;

"(5) prescribe any other details with respect to the issuance, sale, or securing of such bonds, notes, or other obligations; and

"(6) authorize the Mayor to take any actions in connection with the issuance, sale, delivery, security, and payment of such bonds, notes, or other obligations, including the prescribing of any terms or conditions not contained in such act of the Council.";

(4) by striking out subsection (f) and inserting in lieu thereof the following new subsection:

"(f) The fourth sentence of section 446 shall not apply to—

"(1) any amount (including the amount of any accrued interest or premium) obligated or expended from the proceeds of the sale of any revenue bond, note, or other obligation issued under subsection (a)(1);

"(2) any amount obligated or expended for the payment of the principal of, interest on, or any premium for any revenue bond, note, or other obligation issued under subsection (a)(1); and

"(3) any amount obligated or expended to secure any revenue bond, note, or other obligation issued under subsection (a)(1)."; and

(5) by striking out paragraph (3) of subsection (g) and inserting in lieu thereof the following new paragraph:

"(3) The fourth sentence of section 446 shall not apply to—

"(A) any amount (including the amount of any accrued interest or premium) obligated or expended from the proceeds of the sale of any revenue bond, note, or other obligation issued under subsection (g)(1);

"(B) any amount obligated or expended for the payment of the principal of, interest on, or any premium for any revenue bond, note, or other obligation issued under subsection (g)(1); and

"(C) any amount obligated or expended to secure any revenue bond, note, or other obligation issued under subsection (g)(1).".

SEC. 17. Section 602(c)(1) of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 1-147(c)(1)) is amended in the first sentence by inserting "and except as provided in section 462(c) and section 472(d)(1)" after "title IV of this Act".

SEC. 18. The table of contents of the District of Columbia Self-Government and Governmental Reorganization Act is amended—

(1) by striking out the item relating to section 462 and inserting in lieu thereof the following new item:

"Sec. 462. Contents of borrowing legislation and elections on issuing general obligation bonds.";

(2) by striking out the item relating to section 465 and inserting in lieu thereof the following new item:

"Sec. 465. Issuance of general obligation bonds.";

(3) by striking out the item relating to section 466 and inserting in lieu thereof the following new item:

"Sec. 466. Public or private sale.";

(4) by inserting after the item relating to section 466 the following new item:

"Sec. 467. Authority to create security interests in District revenues.";

(5) by inserting after the item relating to section 481 the following new items:

"Sec. 482. Full faith and credit of the District.

"Sec. 483. Payment of general obligation bonds and notes.";

(6) by redesignating subpart 4 of part E as subpart 5; and

(7) by inserting after the item relating to section 483 the following new item:

"Subpart 4—Full Faith and Credit of the United States

"Sec. 484. Full faith and credit of the United States not pledged.".

SEC. 19. (a) Except as provided in subsection (b), this Act shall take effect on the date of the enactment of this Act.

(b) Any revenue bonds, notes, or other obligations authorized by an act of the Council of the District of Columbia enacted subsequent to August 1, 1981, pursuant to section 490(a) of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 47-254(a)) may be secured by a mortgage of real property or a security interest in any revenues, assets, or other property, notwithstanding that such mortgage or other security interest may not have been authorized by such section 490(a) as of the effective date of such act.

COMMITTEE AMENDMENTS

The SPEAKER pro tempore (Mr. GEJDENSON). The Clerk will report the first committee amendment.

The Clerk read as follows:

Committee amendment: Page 3, line 8, strike out "section 483(b)" and insert in lieu thereof "subsection (b) or subsection (c) of section 483".

The committee amendment was agreed to.

The SPEAKER pro tempore. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 3, line 10, strike out "467(b)(5)" and insert in lieu thereof "467(b)".

The committee amendment was agreed to.

The SPEAKER pro tempore. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 3, line 11, strike out "subsection (e)(6)" and insert in lieu thereof "subsection (e)".

The committee amendment was agreed to.

The SPEAKER pro tempore. The Clerk will report the next committee amendment.

The Clerk read as follows:

Committee amendment: Page 7, line 24, strike out "(1)".

The committee amendment was agreed to.

Mr. FAUNTROY. Mr. Speaker, I move to strike the last word.

(By unanimous consent, Mr. FAUNTROY was allowed to proceed for 5 additional minutes.)

Mr. FAUNTROY. Mr. Speaker, I am pleased to rise in support of and advocate for passage of this legislation which is critical to the fiscal health and economic well-being of the District of Columbia.

H.R. 4910 seeks to make certain technical and clarifying amendments to the Home Rule Act with respect to the issuance of general obligation bonds and notes and revenue bonds and notes, as well as other obligations.

Passage of this legislation would accomplish three major and necessary goals. It will—

First, eliminate the legal impediments to a successful public offering of D.C. bonds, notes, and other obligations.

Second, make those technical and conforming amendments which are necessary to resolve several ambiguities relating to the procedures for authorizing and issuing D.C. bonds, notes, and other obligations; and

Third, give the District of Columbia government debt management flexibility comparable to that afforded many other jurisdictions.

From the beginning of home rule, the District has had the authority to issue tax-exempt bonds and notes.

While none have been issued to date, passage of this legislation will place the District well on the road to entry into the bond market.

This proposed legislation does not significantly nor materially alter any provision of the Home Rule Act, but simply removes certain ambiguities and legal hurdles which have been noted by the District government and its excellent bond counsel.

One of the major legal hurdles the District has experienced in contemplating a bond issue is the inability to pay for certain necessary planning costs. This inability is due to the current definition of the term "capital project" in the Home Rule Act.

Section 1 of the bill amends that definition to include certain costs which are not now expressly included. Reimbursement of expenses for planning, payment of incidental financing costs, and expenditure for the purchase of equipment or furnishings is expressly provided in the definition. These costs are typically included in capital projects in the States. The District is simply being placed on equal, and in my view, firmer footing in this area.

Another legal hurdle lies in the appropriations process for the District. Because of the line item congressional review of the District's budget, there is a cloud of doubt on certainty of payment for bond issues. Marketing the bonds would thus be difficult.

The bill removes the annual formality of congressional enactment of debt service appropriations and provides assurance to bondholders that bond proceeds will be available as needed.

Under current law, debt service payments must be made on an equal basis. This rigid requirement results in limited access to the bond market.

Section 8 of the bill deletes the level debt service requirement, thus allowing greater flexibility and improving the prospects for success for District bond issues.

Negotiated sales of bonds is permitted under this legislation. The bill also authorizes the issuance of general obligation notes in anticipation of revenues, thus positioning the District to respond more easily to cash flow problems.

The prohibition in subsection (b) of section 490 of the Home Rule Act against the mortgaging of property as additional security for an issue of revenue bonds is removed by provisions of H.R. 4910.

Removal of these legal hurdles is necessary to assure success of District bond issues.

There are other clarifying and enhancement provisions embodied within H.R. 4910.

One of the important features of this bill is to shore up section 490 of the Home Rule Act which allows, in part, certain classes of organizations, including our local colleges and universities to request the District to issue tax-exempt revenue bonds in their behalf. A new subsection (a) of section 490 would remove a perceived limitation and permit the District to issue revenue bonds or notes for refinancing or assistance in refinancing of undertakings by such organizations.

Whether and how referendums on bond issues is to be conducted is unclear under current provisions of the Home Rule Act. The bill clarifies the process of referendum when issuing general obligation bonds by mandating that the District of Columbia Council establish a firm policy.

Questions have been raised about the Federal Government's obligation to repay the District's debts from a bond issue in the event the District fails to do so.

H.R. 4910 affirmatively states that the full faith and credit of the United States is not pledged to the payment of principal or interest on any bond, note, or other obligation issued by the District.

Because of these impediments to the District's entry into the bond market that I have described, the District government has had no alternative but to continue to borrow funds at a premium from the U.S. Treasury to finance its capital improvements.

This borrowing authority will expire on October 1, 1982, or on the date of enactment of the D.C. Appropriations Act for Fiscal Year 1983, whichever is later. If the Congress is to avoid a further extension, the District must be given the legal means of accessing the municipal bond market.

Passage of H.R. 4910 will remove the impediments and will facilitate less dependence by the District on the U.S. Treasury, a goal which all of us share.

The provisions of H.R. 4910 will in no way relieve the District from adequately addressing and resolving all financial problems and satisfying the creditworthiness tests of the municipal bond market.

Bond ratings will be necessary and the District must convince potential investors that it will sustain balanced annual budgets and develop and pursue an acceptable method of eliminating the existing accumulated operating deficit. In short, the market will ultimately determine whether the bonds can be sold or not.

It should also be noted that the 14-percent limit on the use of bonds as contained in the Home Rule Act remains in place.

On November 12, 1981, following the hearing, the subcommittee met to mark up H.R. 4910. The bill was approved without objection and ordered favorably reported to the full committee, together with any technical amendments deemed necessary by counsel.

On November 17, 1981, the Committee on the District of Columbia met to mark up H.R. 4910. The bill was approved with four technical amendments by unanimous vote and ordered reported to the House.

H.R. 4910 is a bipartisan effort to further assist the District of Columbia to achieve a level of financial responsibility and independence commensurate with that of many other jurisdictions.

While this bill does not dramatically change existing provisions of the Home Rule Act, it enactment could cause a dramatic result. The amendment and repealer provisions of this bill are not major, are noncontroversial, but are desperately needed.

You may note that some of the provisions of this bill are similar to provisions contained in H.R. 1807, the so-called deficit financing bill which has also been passed by the House District Committee. Passage of this bill, however, does not forestall the pressing need for passage of H.R. 1807, and I remain hopeful that this Congress will soon take up that legislation.

H.R. 4910, together with H.R. 1807, can mean a healthy economy for the District of Columbia.

Thank you.

□ 1345

Mr. PARRIS. Mr. Speaker, I move to strike the last word.

Mr. Speaker, a situation exists in the District of Columbia which causes an unnecessary burden on the District and on the Federal Treasury. It is a burden that could easily be remedied by the passage of the legislation sponsored by my colleague from Virginia, Mr. BLILEY. H.R. 4910 is a bill that addresses technical problems contained within the District of Columbia Home Rule Act affecting the borrowing authority of the District.

As the Home Rule Act is now written, the District is unable to obtain the unqualified favorable opinion of its bond counsel which it needs to attract buyers for its bonds. In order that the District may enter the private bond market as soon as possible, thereby saving money on its interest payments and terminating the present practice of borrowing from the Treasury, the Home Rule Act must be amended. Thus, when the District's financial situation permits it to go to the bond market there will be no technical obstacles in the way.

One must keep in mind that H.R. 4910 does not grant the District any authority that it was not granted in the Home Rule Act. The bill does not allow the District to pay off past deficits by selling bonds. The provisions of H.R. 4910 are designed simply to enable the District to use general obligation and revenue bonds for capital and revenue-producing projects.

In addition to general obligation bonds, this bill would enable the District to begin to use its revenue bond authority to enhance the prospects for business expansion in the District. Through the use of this method, the local private colleges and universities will be able to finance long delayed and needed new construction projects.

H.R. 4910 does not remove the congressional review period for the D.C. Bond Act nor does it remove the citizen's right to initiative and referendum on bond matters. I sincerely believe that this legislation would benefit both Congress and residents of the District of Columbia.

Mr. Speaker, I want to compliment the committee staff for their efforts, and particular, Margaret Wright, the minority counsel. Her background as bond counsel has proven invaluable. The legislation we have before us is in no small part a result of her efforts.

Mr. BLILEY. Mr. Speaker, I move to strike the last word.

Mr. Speaker, I would like to take this opportunity to thank my colleagues who have cosponsored this important legislation. They have been of considerable help to me in seeking passage of this bill.

The Members of this Congress are all well aware of the fiscal difficulties facing our cities today. We are also aware that the District of Columbia has its share of these difficulties. There are several causes for the financial problems of the District, including the Congress itself. I hope my colleagues agree with my feeling that it is our responsibility to rectify problems that we have caused and to clear unnecessary obstacles from the path of the District in its attempts to put its own financial house in order.

Acting on this belief, I have introduced H.R. 4910 in order that we may remove a number of technical and procedural obstacles in the way of the District's ability to use the borrowing authority that it was granted in the Home Rule Act. H.R. 4910 was favorably reported on a unanimous vote by the committee and there was no testimony in opposition to this bill.

I would like to emphasize to my colleagues and to others who may have concerns about this bill that it does not grant the District any new or expanded authority. The purpose of H.R. 4910 is simply to permit the implementation of the Home Rule Act. The borrowing authority of the Home Rule Act is similar to the authority which most jurisdictions in this country have. Unfortunately, because of technical problems in the act, the District is presently unable to obtain the unqualified opinion of its bond counsel which is necessary to attract buyers for District bond issues of any type.

In order to properly plan and carry out a capital improvement programs the District must be able to issue general obligation bonds. This is the normal way to fund capital projects and the District is allowed to do this in the Home Rule Act. However, the District is presently only able to obtain these funds from the Treasury. To provide funds for continuing operating expenses when many of the District's revenues are only collected once or twice a year it is customary to issue revenue anticipation notes which are redeemed as the revenues are collected. At this time the District is also obliged to obtain these funds from the Treasury. This authority, along with other traditional borrowing authorities have been granted to the District, yet at this time the District is only able to borrow from the Treasury.

The third type of obligation which would be aided by this bill is revenue bonds. Revenue bonds are one of the major sources of funding for public projects which produce revenue in their own right and for private projects which earn or contribute to their own financing. The District, private businesses, and colleges and universities which desire to relocate or expand in the District are currently faced with great difficulties in financing their ventures. Many of these projects will be of great benefit in economic and cultural terms to the District and should be encouraged. The proper use of revenue bonds for these projects would facilitate their construction and enhance the business climate of Washington. Again, the District has the legislative authority to issue these bonds, but is currently restrained from doing so because of the Home Rule Act errors. H.R. 4910 would remove these errors and obstacles to the financial progress of the District of Columbia. The bill would also clear the way for revenue bonds to be secured with mortgages or other security in order to obtain the lowest possible interest rates.

I have stated before that I am a firm proponent of fiscal responsibility and I have urged, and I continue to urge, the District to get its financial house in order. All of us were concerned earlier this year when we approved another extension of the District's unique authority to borrow money directly from the U.S. Treasury. I do not wish to be asked to grant a further extension when that authority expires in 1984. The District is now almost ready to conduct a bond sale from a financial standpoint, but is, and will continue to be restrained from doing so until the Home Rule Act is amended to clarify its language and procedures. Passage of this legislation would signal to the bond market that the Congress supports this step and is encouraging the District to submit itself to the scrutiny and discipline required by the private sector.

I would point out to my colleagues who may still have some concerns, that all bond acts passed by the District Council will still be submitted to the Congress for its review and approval and that this congressional authority is in no way lessened or abridged by this bill, although I must say that I hope the Congress never feels compelled to exercise this power.

I feel that this bill is a step forward for the Congress and for the District. The time to make these necessary changes is now, as the District is nearing the stage where it can sell bonds, rather than later when the ability is there but the proper authorizing legislation is not.

In closing I would like to pay special thanks to Margaret Wright, the minority counsel of the District Committee who contributed no small amount of time, effort, and expertise to this bill. I feel that if it were not for her we would not be here today with this legislation.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. BLILEY. I yield to the gentleman from Pennsylvania.

The SPEAKER pro tempore. The time of the gentleman from Virginia (Mr. BLILEY) has expired.

(By unanimous consent, Mr. BLILEY was allowed to proceed for 5 additional minutes.)

Mr. WALKER. Mr. Speaker, I have a couple of questions to try to clarify some aspects about the bill.

Does the bill allow the District of Columbia to pay off its past operating deficits by selling bonds?

Mr. BLILEY. Absolutely not. I have been and remain firmly opposed to selling bonds for operating debt financing.

Mr. WALKER. Will the Congress or the Federal Government be obligated by the bonds that are to be sold?

Mr. BLILEY. No, they will not. The bill specifically states that the Congress or the Government are not to be held responsible for these bonds.

Mr. WALKER. Why is it necessary to remove the debt services payments from the yearly appropriations process of the Congress?

Mr. BLILEY. That is a very good question. The reason is to make it like a continuing appropriation. This year, for example, the first appropriation bill we passed and sent to the President for signature was signed November 25. Had the District had a bond payment due on October 1, they would have been in technical default because we had not acted, and I do not think Congress would want that.

Mr. WALKER. Will this bill help the District's colleges and universities to get financing for their construction projects?

Mr. BLILEY. Yes, it will. It will make it easier for them and also free up other funds that they currently have to use as collateral that would

enable them to use the proceeds hopefully to grant more scholarships.

Mr. WALKER. I think probably the most important question on the minds of many of our colleagues is whether this bill is going to cost us anything.

Mr. BLILEY. No. It could conceivably cost us less money because when the District goes to the Treasury window to borrow money, the Treasury has to go out into the market. The less the District has to go to the Treasury window, the less the Treasury has to go to the market for, and it frees up funds for the private sector.

Mr. WALKER. I thank the gentleman.

● Mr. McKINNEY. Mr. Speaker, I rise in strong support of H.R. 4910, and urge my colleagues to pass this necessary legislation. The bill addresses the ambiguities and omissions in the section of the Home Rule Act dealing with bonds, notes, and other borrowing. It does not grant any new authority to the District of Columbia government that was not intended when Congress passed the Home Rule Act in 1973.

I want to commend the distinguished gentleman from Virginia (Mr. BLILEY) who initiated this bill which has bipartisan support within the Committee on the District of Columbia. His perception of the problems facing the city of Washington is accurate, and his remedies, as evidenced in H.R. 4910, are thorough.

As may be remembered, earlier this year our committee reported on H.R. 1807, a bill which on the surface may seem very similar to the measure now before the House. In fact, the titles of the two bills are very similar. I remain strongly opposed to H.R. 1807, the District of Columbia Bond Authorization Act of 1981, which would allow the city to issue bonds to finance its operating deficit.

I want to make it very clear, however, that this bill, H.R. 4910, will not allow the city to market bonds to pay off its operating deficit. As I mentioned earlier, it grants no new borrowing authority to the city—it merely clarifies the original intent of the appropriate sections of the Home Rule Act and clears up certain ambiguities.

The second point I wish to make is that enactment of this legislation will not cost the Federal Government 1 red cent. This is confirmed by a letter from the Congressional Budget Office which is printed in the report of the bill.

Section 15 of the bill further clarifies this point by stating that the full faith and credit of the United States is not pledged in any way, and the United States is in no way liable for payment of principal or interest on any District of Columbia bonds.

There are certain safeguards in the Home Rule Act which will not be changed by this legislation that I feel are worth mentioning. The District government's overall debt service payments will still be prohibited from exceeding 14 percent of revenues. The council will be required to authorize each bond issuance by an act, which will still be subject to the 30-day congressional review period. Finally, and perhaps most importantly, this legislation will not exempt bond proposals from the initiative and referendum process.

Mr. Speaker, I urge my colleagues to support this legislation as a further step toward Home Rule for the Capital City. Without it, the city will never be able to reduce its dependence on the Federal Treasury.●

● Mr. DELLUMS. Mr. Speaker, H.R. 4910, as reported by the full Committee on the District of Columbia, is being offered to revise and amend certain provisions of part E or title IV of the District of Columbia Self-Government and Governmental Reorganization Act—the Home Rule Act—to:

First, eliminate certain legal impediments to a successful public offering of general obligation bonds and notes and revenue bonds, notes and other obligations by the District of Columbia government;

Second, make those technical and conforming amendments to the Home Rule Act which are necessary to resolve several ambiguities relating to the procedures for authorizing and issuing general obligation bonds and notes and revenue bonds, notes, and other obligations; and

Third, give the District of Columbia government debt-management flexibility comparable to that existing in many other jurisdictions.

The Home Rule Act, a originally enacted, provided the District of Columbia government with the statutory authority to issue municipal bonds, notes, and other obligations. However, to date, no such obligations have been issued due in substantial part to omissions, ambiguities, and restrictions contained in the act. These deficiencies have created a serious legal impediment to the District's ability to structure a marketable issue and has resulted in the District having no alternative but to continue to borrow funds, at a premium, from the U.S. Treasury to finance its capital projects under the interim borrowing authority provisions of the Home Rule Act which will soon expire. If the Congress is to avoid a further extension of this authority, allow the District to compete for more favorable interest rates, and insure for the District the capability to achieve a level of financial independence commensurate with that of many other jurisdictions, then the Congress must provide the District with the legal means for access to the municipal bond market. H.R. 4910 provided the legal means.

H.R. 4910 constitutes a major item in the Mayor's legislative program presented to the Congress for consideration during the 1st session of the 97th Congress. The bill was developed through the bipartisan efforts of the majority and minority parties with the assistance of the District of Columbia's Bond Counsel and Financial Adviser.

H.R. 4910 expressly provides that the full faith and credit of the United States is not pledged for the payment of any principal of or interest on any bond, note, or other obligation issued by the District. No cost will be incurred by the Federal Government as a result of the enactment of this bill.

The enactment of H.R. 4910, this session together with the enactment, next session, of H.R. 1807, a bill to authorize the District to issue and sell general obligation bonds for the purpose of paying certain accumulated liabilities will lead directly to the District's long-awaited and long-overdue entry into the municipal bond market. Both of these bills are essential to the economic health and viability of the District of Columbia, our Nation's Capital.

Mr. Speaker, I invite and encourage your support of both of these bills.●

Mr. FAUNTROY. Mr. Speaker, I move the previous question.

The previous question was ordered.

There was no objection.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ASHBROOK. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 375, nays 6, not voting 52, as follows:

□ 1400

Mr. BROWN of Colorado changed his vote from "yea" to "nay."

Mr. QUILLEN changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

□ 1415

COAST GUARD AUTHORIZATION, FISCAL YEAR 1982

Mr. JONES of North Carolina. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 2559) to authorize appropriations for the Coast Guard for fiscal year 1982, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from North Carolina (Mr. JONES).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 2559, with Mr. BRINKLEY in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee of the Whole rose on Tuesday, December 8, 1981, all time for general debate had expired.

Pursuant to the rule, the Clerk will now read the committee amendment in the nature of a substitute recommended by the Committee on Merchant Marine and Fisheries, now printed in the reported bill as an original bill for the purpose of amendment.

The Clerk read as follows:

H.R. 2559

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That funds are authorized to be appropriated for necessary expenses of the Coast Guard for fiscal year 1982 as follows:

(a) for the operation and maintenance of the Coast Guard, including expenses related to the Capehart housing debt reduction: $1,450,000,000;

(b) for the acquisition, construction, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto: $425,000,000;

(c) for the alteration or removal of bridges over navigable waters of the United States, constituting obstructions to navigation: $17,500,000; and

(d) for research, development, test, and evaluation: $33,000,000.

SEC. 2. For fiscal year 1982, the Coast Guard is authorized an end-of-year strength for active duty personnel of 42,224. This end-of-year strength shall not include members of the Ready Reserve called to active duty under the authority of section 712 of title 14, United States Code.

SEC. 3. For fiscal year 1982, average military training student loads for the Coast Guard are authorized as follows:

(a) recruit and special training: 3,660 student-years;

(b) flight training: 118 student-years;

(c) professional training in military and civilian institutions: 655 student-years; and

(d) officer acquisition: 1,038 student-years.

SEC. 4. The Act of March 4, 1915, c. 143, § 1 (38 Stat. 1084), as amended (31 U.S.C. 686), is amended by inserting "United States Coast Guard," in the first proviso after "Federal Aviation Administration," and before "and".

SEC. 5. Title 14, United States Code, is amended as follows:

(a) Subsection (a) of section 41a is amended to read as follows:

"(a) The Secretary shall maintain a single active duty promotion list of officers of the Coast Guard on active duty in the grades of ensign and above. Reserve officers on active duty, other than pursuant to an active duty agreement executed under section 679 of title 10, United States Code, retired officers, and officers of the permanent commissioned teaching staff of the Coast Guard Academy shall not be included on the active duty promotion list.".

(b) Subsection (d) of section 41a is amended by striking the word "extended".

(c) Section 41a(b) is amended by striking the period at the end of the second sentence and substituting ", except that the rear admiral serving as Chief of Staff shall be the senior rear admiral for all purposes other than pay.".

(d) Section 290(a) is amended by inserting "or in the position of Chief of Staff" in the second sentence immediately after the words "vice admiral".

(e) Section 711 is amended by striking the first sentence.

(f) Item 711 in the analysis of chapter 21 is amended to read as follows:

"711. Exclusiveness of service.".

(g) Section 93(p) is amended by inserting the following clause after the phrase "of such lines and cables,": "including the installation and use of telephones in residences leased or owned by the Government of the United States when appropriate to assure efficient response to extraordinary operational contingencies of a limited duration,".

SEC. 6. The Act of October 3, 1980 (94 Stat. 1509) is amended as follows:

(a) In paragraph (1) of the first section by striking "$1,248,367,000;" and substituting "$1,337,207,000;".

(b) In section 2 by striking "39,600:" and substituting "39,819:".

SEC. 7. Before the close of fiscal year 1982, the Commandant of the Coast Guard shall carry out a study to determine if the use of cycloidal propulsion systems in appropriate types of Coast Guard vessels will result, at reasonable cost, in operating characteristics that are superior to those that can be obtained with propeller systems. The Commandant shall submit a copy of such study to the Committee on Merchant Marine and Fisheries of the House of Representatives together with his recommendation regarding whether vessels equipped with cycloidal propulsion systems should be considered for future Coast Guard procurement.

SEC. 8. (a) The original and periodic inspections or examinations of a vessel documented or to be documented as a vessel of the United States, both in the United States and in foreign countries, may be delegated to the maximum extent practicable by the Secretary of the department in which the Coast Guard is operating to the Amercian Bureau of Shipping, or similar American classification society, or agent thereof, who may issue certificates of inspection, attesting to compliance with existing Coast Guard regulations, and such other certificates as are essential to documentation.

(b) The Secretary of the department in which the Coast Guard is operating may also contract or enter into agreements with or utilize the American Bureau of Shipping, or similar American classification society for the review and approval of vessel hull, machinery, piping, and electrical plans.

(c) The Secretary of the department in which the Coast Guard is operating shall report to the Congress in the implementation of the foregoing provisions within 6 months of the date of enactment of this Act and annually thereafter for 3 years. Such report shall include the views of the affected industry on the implementation of these provisions.

SEC. 9. Nothing in this Act shall be construed to authorize or provide funds for removing facilities of Coast Guard Group Port Angeles from Ediz Hook.

SEC. 10. Paragraphs (1) and (2) of section 104 of the Vessel Documentation Act (Public Law 96-594, 94 Stat. 3453) are amended to read as follows:

"(1) an individual who is a citizen of the United States, or an association, trust, joint venture, or other entity capable of holding title to a vessel, under the law of the United States, or any State, territory, or possession thereof, or of the District of Columbia, or the Commonwealth of Puerto Rico, all of the members of which are citizens of the United States;

"(2) a partnership whose general partners are citizens of the United States."

SEC. 11. (a) The third sentence of section 707(a) of title 14, United States Code, is amended to read as follows: "For benefit computation, regardless of pay or pay status, the member is considered to have had monthly pay of the monthly equivalent of the minimum rate of basic pay in effect for grade GS-9 of the General Schedule on the date the injury is incurred.".

Mr. JONES of North Carolina (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

AMENDMENT OFFERED BY MR. CONTE

Mr. CONTE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. CONTE: Page 6, after line 25, insert the following:

SEC. 12. Subsection (a) of section 475 of title 14, United States Code, is amended by inserting after the first sentence thereof the following new sentence: "The Secretary is also authorized to lease housing facilities for assignment as public quarters, without rental charge, to military personnel who are on sea duty or duty at remote offshore Coast Guard stations and who do not have dependents; and such authority shall be effective for any fiscal year only to such extent or in such amounts as are provided in appropriation Acts.".

Mr. CONTE. Mr. Chairman, I am offering this amendment today to rectify a situation I have personally observed over the years, and a situation which has been less than adequately addressed since it became apparent. Mr. Chairman, I am talking about the subject of living accommodations for sea duty and offshore remote installation personnel in the Coast Guard who have no dependents.

Over the years, I have had numerous conversations with Coast Guard officers and enlisted personnel at various ports and installations throughout the country. In every discussion on Coast Guard problems, the in-port living quarters problem for sea duty personnel has surfaced. The basic complaint is that Coast Guard sea duty personnel without dependents must, when not at sea, live on board their vessels in cramped, overcrowded conditions which consist primarily of a bunk, a locker, and a sea bag. These accommodations are necessary while at sea, but in my opinion, they should not have to be endured while in port.

Under present law, the Commandant of the Coast Guard is permitted to hire quarters for personnel assigned to sea duty when these members are deprived of their shipboard quarters due to repairs or other conditions which may render them uninhabitable. This authorization is intended only to afford temporary relief when sufficient, temporary Government quarters are not available. It does not address the problem of permanent quarters.

My amendment would simply authorize the leasing of housing facilities on a more permanent basis by the Secretary of the Department under which the Coast Guard is operating. This in turn would allow for individuals who, because of sea duty or dependent status do not qualify for quarters allowance, to be eligible for assignment to this leased housing.

Mr. Chairman, I have given considerable thought to this situation over a period of time. We all know that the Coast Guard faces many problems in trying to stretch resources in the face of considerable mission requirements, many of which I might add have been placed on them by the Congress. We all know that the Coast Guard is having problems with its personnel retention rates, as alluded to in the reprint of an article on Coast Guard problems in the October 21 edition of the CONGRESSIONAL RECORD. There are problems with deteriorating vessels and the list goes on and on.

As one who has been close to these problems over a good many years, I know that they are not going to be solved overnight, if for no other reason, because of a lack of funds. But I think that if we expect to get the Coast Guard on a course where they can deal adequately with their mission requirements in a way the public wants, we need to have competent and willing manpower with experience. The only way we are going to attract that manpower is to address personnel needs—and living conditions represent a personnel need. If we can provide decent living accommodations for sea duty Coast Guard personnel, we might start to see an improvement in morale, and a subsequent rise in retention rates. Coast Guard officials have identified this need, I and others in this body have seen the need and the officers and enlisted personnel have complained about it. I think it is time we do something about these in-port living conditions here in the Congress where the responsibility rests by adopting this simple change in the law.

Mr. JONES of North Carolina. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from North Carolina.

Mr. JONES of North Carolina. Mr. Chairman, this side of the House has had an opportunity to examine this carefully. We concur, and have no objection to the amendment whatsoever.

Mr. CONTE. I appreciate that.

Mr. STUDDS. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Massachusetts.

Mr. STUDDS. Mr. Chairman, I say to the gentleman from Massachusetts (Mr. CONTE), we certainly do, as the gentleman from North Carolina (Mr. JONES) has indicated, support the thrust of your amendment.

I would like to take this opportunity to extract the closest thing to a blood oath that I can from the gentleman. The gentleman's amendment authorizes but does not direct the Coast Guard to provide funding for housing for bachelor personnel assigned to vessels, particularly to small vessels. the gentleman, I think, is right on target in attempting to remedy a very serious problem, but I am sure the gentleman would like to assure us that he does not expect the Coast Guard to divert existing, already short funds for this purpose, but that the gentleman will help us as best he can to secure additional funding for this purpose in the next fiscal year.

Mr. CONTE. I can assure the gentleman. Certainly it is discretionary. I want to thank the gentleman from Massachusetts and the gentleman from Alaska for allowing me to offer this amendment, because I want to run downstairs where we are in conference with the Senate, and I am trying to get $300 million in the defense bill for the Coast Guard.

The gentleman is absolutely right. They are in desperate need of money. I would not want to force them to divert anything.

Mr. STUDDS. I thank the gentleman. I wish the gentleman godspeed on the way to the conference.

Mr. YOUNG of Alaska. Mr. Chairman, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Alaska.

Mr. YOUNG of Alaska. Mr. Chairman, I have no objection to the amendment. I commend the gentleman for offering the amendment at this time, and I support it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts (Mr. CONTE).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. SNYDER

Mr. SNYDER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SNYDER: On page 2, line 5, strike "$1,450,000,000" and insert in lieu thereof "$1,356,355,927".

On page 2, line 9, strike "$425,000,000" and insert in lieu thereof "$384,000,000".

On page 2, line 12, strike "$17,500,000" and insert in lieu thereof "$8,000,000".

On page 2, line 14, strike "$33,000,000" and insert in lieu thereof "$18,000,000".

Mr. SNYDER. Mr. Chairman, the purpose of this amendment is to conform to the conference report on the appropriations for the Department of Transportation which we adopted an hour or so ago here on the floor of the House. I want this bill signed downtown once it is enacted into law. Whether this amendment is adopted or not will not affect the amount of money expended for Coast Guard purposes in fiscal year 1982. It will assure that the bill will be signed, and certain other provisions of the bill that I think are good that should be enacted will then become law.

Now, the response to this amendment is going to be that the Coast Guard is already short funded; that they need more money. But there is no reason to argue that issue today, because that has already been decided. It was decided by the conference committe, the Appropriations Committee for the Department of Transportation, and by this House just within the hour or so.

Mr. Chairman, the amendment I offer to the authorization bill is designed to restore the Coast Guard's fiscal year 1982 authorization to a level consistent with the conference just adopted. The total amount involved in the reductions I am proposing is $158,700,000.

I am certain that our consideration of this bill will generate a great deal of discussion of numbers. I submit to you that the most telling comparison to be made is between the conference report for Coast Guard fiscal year 1982 programs and actual 1981 fiscal year appropriations to the Coast Guard. The conference report totaling $1,766.8 billion for the programs included in H.R. 2559, reflects an increase of over $54.8 million above the 1981 appropriations to the Coast Guard for those same four categories. H.R. 2559, the authorization bill reported from the Committee on Merchant Marine and Fisheries, is over $158 million above the conference report and 100 million above the Reagan March budget.

It is tempting, I know, to quibble over whether the increase over 1981 appropriations levels represents a real dollar boost for the Coast Guard. My amendment will provide the Coast Guard a 2.5 percent increase over fiscal year 1981 levels at a time when many Federal programs and agencies have had to undergo reductions in their 1982 budgets. The Coast Guard has not fared badly in its budget treatment by this administration. The dollar levels for two of the four categories contained in this bill are greater than 1981 appropriations—even after the reductions which my amendment would impose.

The Congress recently tested the President's resolve to veto budget-busting bills. I need not remind anyone of what that outcome was. H.R. 2559, if enacted without the amendment I have proposed, must be considered a prime target for yet another Presidential veto. My amendment is designed to avoid a totally unnecessary confrontation between the President and this Congress.

The issue before us today is not whether to grant a budget increase to the Coast Guard for fiscal year 1982; the real issue is how much of an increase is to be granted. The House faced this same question on September 10, during consideration of the 1982 DOT appropriations bill, and overwhelmingly rejected a proposal to bring Coast Guard appropriations up to the levels authorized in H.R. 2559. I urge the Members to follow suit today, by adopting my amendment.

As an aside, I cannot help but wonder how much, if any, increase in the Coast Guard budget would be necessary if the Coast Guard made more efficient use of its manpower and other resources. For example, my good friend, Mr. TAYLOR, the gentleman from Missouri, has brought to my attention that the Coast Guard requires sport fishing guides on Table Rock Lake in Missouri and Arkansas to pass the same operator's license exam as inland river towboat operators. In addition, the Coast Guard has marked future exams to include questions on oil pollution prevention. I suppose an outboard engine must have been deemed a serious pollution threat, what with a few gallons of oil/gas mixture aboard as fuel. To top it all, Coast Guard officers help the guides answer the questions, to guarantee that everyone passes but then never enforce the license requirement. Why do they bother to prepare and administer the test? The point is this: Better management and elimination of waste can help the Coast Guard function quite capably on the President's requested increase.

With a Coast Guard budget increase already built into the President's request, and the conference report, there are other compelling reasons to adopt the funding levels which my amendment would provide. The administration is currently concluding a comprehensive Coast Guard roles and missions study, in which the entire range of Coast Guard programs and responsibilities is being extensively reviewed. It is reasonable to assume that from that study will come recommendations for major change in Coast Guard operating responsibilites. If changes in the Coast Guard's roles and missions are brought about, we will see significant shifts in the funding support which might be required for Coast Guard program, as well.

The Subcommittee on Coast Guard and Navigation has recently completed its own comprehensive series of oversight hearings and developed a record upon which equally major changes in Coast Guard responsibilities may be proposed. While the subcommittee's oversight report is not the final word on Coast Guard matters, it is important to note that the very report, which has also been adopted by the Committee on Merchant Marine and Fisheries, makes reference to the likelihood of major shifts in Coast Guard program and budgeting priorities. The report speaks of, and I quote:

Increased funding for selected Coast Guard missions and a reduction of responsibilities in other areas * * *

Change is clearly on the way. The measure of that change may very likely be a major restructuring of Coast Guard responsibilities and programs, accompanied by budget requests sufficient to meet those responsibilities and programs. Such fiscal support, when viewed in an overall context, need not require any actual increase in total Coast Guard budget levels. It seems clear that there is widespread agreement that more money is not necessarily the answer to the Coast Guard's ills.

I anticipate that major legislation to implement the Coast Guard Subcommittee's recommendations will be introduced early in the next session of this Congress. In the face of such a prospect, why should we now want to authorize 1982 budget levels for the Coast Guard above the increases already built into the conference report just adopted and President's budget request? I urge the Members to support my amendment and thereby avoid needless further conflict with the President over excessive Federal spending levels.

Mr. JONES of North Carolina. Mr. Chairman, I move to strike the last word, and rise in opposition to the amendment.

Mr. Chairman, I am very reluctant to rise to oppose my good friend, the gentleman from Kentucky (Mr. SNYDER) the ranking minority member of our committee, but I feel compelled to do so.

The gentleman has stated that the figure which the Coast Guard will have to operate, the amount of money, has already been established. Nobody can question that. The conference report adopted, as he said, an hour or so ago establishes that. But I would like to point out to the Members, if I might, that the Coast Guard Subcommittee chaired by the able gentleman from Massachusetts, and our full committee deal with facts regarding the Coast Guard. On the other hand, the Appropriations Committee is dealing with figures. We happen to know the Coast Guard's needs, I think, far better than does the Appropriations Committee. That is no reflection on the Appropriations Committee, because they have so many other financial demands to cope with. But as a matter of principle, I would like to see the committee figures, figures contained in this bill, be retained as evidence of good faith and appreciation of what the Coast Guard is doing, and contrary to some criticism I have heard here on the floor this afternoon, I am one of those who happens to think the Coast Guard does an outstanding job 24 hours around the clock in many cases in search and rescue, the foreign refugee responsibilities, the 200-mile fishing limit, and on and on.

All of these are duties, my friends, we have added to the Coast Guard in the last few years. At the same time, it is my opinion that the appropriations allowed or approved have not kept pace in any degree with the responsibilities we have handed to them. And to show our appreciation, if nothing else, the congressional appreciation, of the fine job the Coast Guard is doing, I would beg that this amendment be voted down and we leave the figure as originally brought out by our authorizing committee.

This amendment reduces the Coast Guard authorization by $159 million, and that is a sizable amount for such a limited budget with which the Coast Guard operates.

□ 1430

Mr. BIAGGI. Mr. Chairman, I rise to speak against the amendment.

Mr. Chairman, I symphathize with the maker of the amendment because I know his heart cannot possibly be within it, because he serves on the Merchant Marine and Fisheries Committee and knows full well the true nature and undertaking and responsibility and dedication that the Coast Guard has clearly displayed throughout history. I understand also the responsibility he has as a senior member of the Republican Party, and closely affiliated with the administration, and hence we offer all our sympathy to my good friend, a man whom I respect and have deep affection for, Mr. SNYDER.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. BIAGGI. I yield to the gentleman from Kentucky.

Mr. SNYDER. I wonder if the gentleman would want to send flowers?

Mr. BIAGGI. I would love to—not immediately. But, I take issue with the gentleman on a number of points. One I think is clearly a significant point, the most significant, I believe, because he states that we should not attempt to test the resolve of the President. I agree. I do not think we should. That resolve has been tested time and time again. He has emerged victorious, but I do not think the President would regard this as an issue of contest. I really believe the President and the administration is most supportive of the Coast Guard. I really believe that the Coast Guard involves the President's respect and regard and concern, especially in the light of the Coast Guard response in many of its missions; and even more importantly, perhaps, because of the President's own enunciation at the outset of his administration where he included the Coast Guard as part of the entire defense picture.

We have had hearings in that connection, and it is inescapable that the Coast Guard is an integral part of the national defense picture. What concerns me here is that the gentleman's amendment, if enacted, would bring us even below the President's own original budget request, which was $1.825 billion. The gentleman's amendment would bring us to $1.66 billion, and I do not understand the logic, especially when I look and listen to the gentleman's laudatory comments with relation to the Coast Guard. I would suggest that the gentleman give vent and give way to his emotion rather than his intellect in this regard.

Let us talk about the Coast Guard and what it does. We witnessed just last week the memorialization of the Pearl Harbor tragedy. We had a vessel here from the Coast Guard, a vessel that was 45 years old and still in operation, the *Taney*. It is still in operation, 45 years old, and after the ceremonies were completed it went back to Norfolk ostensibly to go back and perform missions. But, I would like to inform the Members today that it could not perform missions because there was not enough money for fuel. It is tied up.

That is not the first time that has happened with the Coast Guard. We found when the Coast Guard was involved with drug interdiction in the Caribbean area and off Florida, we found that under the Carter administration—I am not fixing one or the other, just talking about the facts as they relate to the service the Coast Guard provides—we found that the Coast Guard had had to tie up their vessels. No policing permitted; helicopters and other aircraft required to remain landside, just giving open sesame to all the traffickers in contraband.

To exacerbate the situation, the Coast Guard was required to patrol and monitor the seas affecting the Cuban flotilla, and now an additional dimension, the Haitian problem. There are so many—so many missions that the Coast Guard has undertaken, and I can tell the Members that I have supported national defense, Navy, Army, the Air Force, but I suggest that none is superior to the Coast Guard in its dedication and its team play. They are not moaners and groaners. They respond to the situation no matter how much they have to take out of their hide, how much they must sacrifice, and how much they must endure.

They are an important portion of our entire national defense picture, and I urge you, ladies and gentlemen, to defeat this amendment, not because my good friend, JAMES SNYDER, has offered it, but simply because I know where his heart is, it is with the Coast Guard. It is with all us who urge the defeat of this amendment.

Mr. YOUNG of Alaska. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, with some reluctance I rise in opposition because it is my ranking member of the committee, the gentleman from Kentucky (Mr. SNYDER), his leadership, and the knowledge he has used over the years for the improvement of the Coast Guard. I will associate myself with the remarks of the gentleman from New York. I cannot believe his heart is truly in this effort. I understand what he is trying to do, but in the authorizing subcommittee led by the able Mr. STUDDS, and myself as the ranking member, we have reviewed what the Coast Guard needs, where it should be today and why we are supporting the present bill and why I am opposing the amendment.

Although it may sound small in numbers as far as actual dollars, there is something more that lies in this amendment. If this amendment is adopted just because of the Appropriations Committee's recommendation, it appears to me that the authorization committee loses its jurisdiction. I think it is up to this committee to make a decision where the money should be spent, how much is necessary, and if the Appropriations Committee disagrees, so be it.

But we do recognize, and the gentleman from New York has mentioned in his presentation, that we of the Congress have charged the Coast Guard time after time, year after year, with more reponsibilities and never funded it adequately. The gentleman mentioned the celebration of Pearl Harbor and the 45-year-old ship. We have ships in Alaska that are 45 years old that are trying to chase Russian and Japanese ships off the 200-mile limit area, and we are frankly undermanned and underprovided for as far as hardware goes.

I truly believe that as long as this Congress charges the Coast Guard with drug control, oil pollution control, refugee problems, safety and rescue, implementation of the 200-mile limit, then this Congress has the responsibility of funding it adequately. I truly believe that this proposal of the committee is in fact not enough, but it is better than what is being proposed by the gentleman from Kentucky.

Mr. JONES of North Carolina. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Alaska. I will be glad to yield.

Mr. JONES of North Carolina. Mr. Chairman, I think I am correct, and the gentleman can correct me if I am wrong, that the Senate has already passed the authorizing bill for the Coast Guard, and the Senate version, dominated by the Members of that side of the aisle, has approved $62 million more than our authorization provided.

Mr. YOUNG of Alaska. The gentleman is absolutely correct. The Senate sees the wisdom of funding the Coast Guard adequately. I would like to add to that figure, but if not at this time, I want to stick with the committee bill that came from the committee.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman from Kentucky.

Mr. SNYDER. Mr. Chairman, I cannot help but comment upon the gentleman's observation and that of the gentleman from New York, that they believe my heart is not really in this. The truth of the matter is that it is.

I am known for being all heart around here. I have got enough heart to go around, on all of the issues. Jack Anderson's column notwithstanding, I am one of the most kind and gentle and heartful fellows around. I have just got enough to go around.

Mr. YOUNG of Alaska. I recognize the gentleman's wisdom and great work on the committee, and compliment him in the support which he has given us.

Mr. Chairman, I urge defeat of the amendment.

Mr. OBERSTAR. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I rise in opposition to the amendment of the gentleman of Kentucky. I think it is a misplaced amendment. It certainly is one that would do enormous harm to the Coast Guard, quite in contrast to the record of this Subcommittee on the Coast Guard which has worked steadfastly over the years to strengthen the Coast Guard and increase its funding, even against the recommendations of preceding administrations, both Democratic and Republican alike, which have been very restrained, to say the least, in providing funding for the Coast Guard.

I think that dollar for dollar, the U.S. taxpayer gets more out of this money from the Coast Guard performance than he does from any of the military services of the United States.

In fact, if the military budget were as parsimonious, as cost-effective as the Coast Guard is in its budget, we would have plenty of money to spare for the Coast Guard and a good many other Government programs.

I would like to compliment the chairman of the subcommittee, the gentleman from Massachusetts (Mr. STUDDS) for the extraordinary efforts that he has made; the gentleman from New York (Mr. BIAGGI), who just spoke, for the efforts he made as the preceding chairman of that subcommittee to strengthen the Coast Guard and to keep it operating efficiently and economically, but effectively, in carrying out substantial responsibilities that the Congress has given to the Coast Guard over the years, particularly in the 200-mile limit bill, drug enforcement, and law enforcement off our coasts.

The chairman of the Subcommittee on the Coast Guard has concluded extensive hearings into the operation of the Coast Guard, and just concluded a report which the subcommittee adopted earlier this month entitled, "Semi-Paratus," which pretty well describes the role of the Coast Guard—semiprepared, semifunded, semiadequately operated—not through any will or desire of the Coast Guard, but simply through failure of successive administrations and of successive Congresses, to fund the operations of the Coast Guard adequately.

It is overburdened with responsibilities and not adequately funded to conduct the many activities the Coast Guard has to shoulder. One of those is search and rescue. Now, if the amendment of the gentleman from Kentucky is adopted, the Coast Guard will have to proceed with the closing of the Grand Marais, Minnesota, Coast Guard Search and Rescue Station. The Coast Guard has already announced it is reviewing this decision. That's just in my district; there are numerous other search and rescue stations elsewhere in the United States which will be similarly affected.

I would like to dwell on that one example for a moment. Here is a 115 mile stretch of the north shore of Lake Superior between Duluth and the Canadian border. There will be no regular Coast Guard search and rescue operation along that entire stretch of shoreline. In addition, the Coast Guard is now proposing to reduce 19 positions at their Coast Guard station in Duluth, which has administrative authority for the whole of western Lake Superior, where from up to 43 million tons of iron ore essential to the Nation's steel industry, to our national security, is shipped to lower lake ports. The western end of Lake Superior is a major shipping area for coal on the Great Lakes. Nearly 6 million tons of coal move down lake and in the international trade. It is a major point of origin for grain moving to the seven seas. Ships carrying those cargoes must pass through some of the most treacherous water and most punishing weather that exists in any of the coastal areas of the United States.

These actions of the Coast Guard would leave the western end of Lake Superior, indeed a vast area of that enormous lake, unprotected and uncovered with search and rescue capability. That is not in the history, in the tradition of the Coast Guard. The search and rescue station, for example, was reopened just 4 years ago

after being closed for several years. Within 3 weeks of opening, it had saved two lives in the waters just off the city of Grand Marais. Two youngsters were in a boat that capsized in the bay of Grand Marais Within 15 minutes the Coast Guard was there to pick them out of the water. Thirty minutes exposure in that 39° water in Lake Superior means virtually certain death from hypothermia.

Who will die? Whose lives will be threatened when that station is closed? Who will be at risk when the amendment of the gentleman from Kentucky is accepted and the funds are cut? Are cut even further than they have already been cut by President Reagan's past budget proposals. Whose lives will be at risk when the Coast Guard is not there to carry on the responsibilities the Congress has handed it?

The Coast Guard Subcommittee report, "Semi-Paratus," dramatically describes the effects of underfunding the Coast Guard. Since 1970, the calls for search and rescue assistance have increased by over 70 percent and yet the personnel dedicated to this life saving mission remains exactly the same as it was in 1970. In May 1981, the Coast Guard was forced to shut down 90 percent of its Pacific area drug law enforcement program, 20 percent of its Pacific fisheries enforcement, and 60 percent of its Atlantic area fisheries enforcement program due to a shortage of funds. Numerous scheduled Coast Guard patrols have had to be canceled, delayed, or prematurely terminated due to vessel condition or maintenance problems. The September 24 revision in the administration's budget would necessitate an additional $228 million cut and would result in a decrease in military readiness, the closing of two dozen search and rescue missions, reduced maintenance of aids to navigation, reduced levels of fisheries and drug law enforcement, the release of 1,000 Coast Guard reservists, and the possible loss of 3,000 military personnel. It is my hope that a majority of this House will agree with me that these reductions are unacceptable.

Even more alarming are the indications that the Coast Guard may close more facilities serving Lake Superior and the entire Great Lakes region. The effect of leaving the Lakes with minimal Coast Guard services, including ice breaking and aids to navigation, would be disastrous for commerce and cost hundreds, maybe even thousands of lives.

The subcommittee's oversight report adopted on December 3 states,

> The Coast Guard should give its highest priority to the performance of its at-sea operational missions. Funds should be authorized and appropriated for the Coast Guard so that it can fully meet its program goals for search and rescue, while making steady progress toward achieving its law enforcement and military readiness objectives.

In light of this statement, I find it deplorable that the Coast Guard wants to save money by closing search and rescue stations.

I have asked the Commandant to review the proposal regarding Grand Marais and he has agreed to do this. I am sure that the gentleman from Massachusetts will agree with me that this search and rescue station should not be closed without the most rigorous scrutiny of the closing's effect on the safety of the citizens of Duluth, northern Minnesota, and Grand Marais in particular.

I urge the defeat of the amendment of the gentleman from Kentucky.

□ 1445

Mrs. FENWICK. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I yield to nobody in my respect and affection for the Coast Guard. In fact, they rescued me once, and I spent the night in a Coast Guard station in the middle of Long Island Sound. So I have some knowledge of their efficiency and kindness.

However, I honestly think that we should realize that this appropriation, even with the amendment, is more money than they had last year; $1,766-000 is not a pittance. Everything else is getting cut, and the Coast Guard is being improved by getting more money than last year. I cannot see why we have to add that extra $150 million or so. I think it would be better to deduct it, as indeed this amendment proposes.

Mr. Chairman, I support the amendment, and I yield back the balance of my time.

Mr. STUDDS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, there have been a lot of comments here and there and there will be a lot more, and it can be very confusing. But this issue is very simple and straightforward.

If you think the Coast Guard has enough money now, you should vote for this amendment. If you think the Coast Guard does not have enough money, you should vote against this amendment.

It is not true that the Coast Guard would have more money than it did last year unless the Members know nothing about a phenomenon called inflation. Between fiscal year 1981 and fiscal year 1982 inflation has risen by a rate of roughly 12 percent. The numbers that have become lower in the continuing resolution and that are about to become lower in the DOD conference report passed a few minutes ago are preserved in the numbers offered by the gentleman from Kentucky, and they represent roughly a 3-percent increase in fiscal year 1981, that is to say a cut in real terms of 9 percent for the U.S. Coast Guard.

The fact of the matter is that the Coast Guard ran out of money 5 months before the end of the last fiscal year, and the fact of the matter is that the Coast Guard is now operating under that budget which will be cut an additional 9 percent with the addition of the figures offered by the gentleman from Kentucky.

The Coast Guard for 5 months of the last fiscal year shut down 90 percent of its drug enforcement in the Pacific, 20 percent of its fisheries enforcement in the Pacific, and 60 percent of its fisheries enforcement in the Atlantic, and they have not since conducted even routine environmental controls. That is before the numbers offered by the gentleman from Kentucky. They represent an additional 9-percent cut in those figures.

If any Member thinks those numbers are adequate, that Member ought to vote and vote enthusiastically for the amendment offered by the gentleman from Kentucky.

We are not in this bill proposing an increase in funding for the Coast Guard. We ought to be, and we would if we thought there was a chance in the world we could get one under this administration and this Congress in its present mood.

The numbers in the bill that the gentleman from Kentucky seeks to reduce by this amendment represent that increase in funding for the Coast Guard necessary to keep it even at the same inadequate level that it operated under last year. That is to say it is an increase in authorization of roughly 12 percent, which roughly keeps pace with inflation and which keeps us at the same god-awfully inadequate levels we were operating under last year and are operating under at the moment.

The numbers in the bill provide at least a symbol of congressional support for a strong Coast Guard. The substance of support for the Coast Guard, however, must be demonstrated through the appropriation process.

On September 10 of this year I offered an amendment to bring the appropriation figures up to the level contained in the bill before us at the moment. That amendment failed by a vote of 360 to 129 on this floor.

The figures in this bill will, as I say, not result in any additional outlays, and it seems silly for anyone, even the Office of Management and Budget, to get excited about them or for the President to threaten a veto. The one practical advantage of leaving this language intact is that it provides some room for the Appropriations Committee to include supplemental funds for the Coast Guard to get it through the end of the fiscal year. If no such funds are forthcoming, the Coast Guard will have to close up shop sometime next summer.

The revenues of the pay raise which is now law and the reduction contained in the continuing resolution, which is now or is about to become law, will make supplemental appropriations absolutely necessary, and every single member of this committee knows that. By using numbers somewhat higher than those now included in the appropriation bill, we will be able to absorb a supplemental request without the need for additional authorizing legislation.

Finally, I, as chairman of the Subcommittee on the Coast Guard, am determined that every issue relating to Coast Guard funding, as long as I am chairman of this subcommittee, will be determined from now on by a record vote in this House.

The Coast Guard is not a perpetrator of fraud, waste, and abuse. It is perhaps the most cost effective agency in the Federal Government, with the possible exception of the Internal Revenue Service. The Coast Guard intercepts $1.6 billion worth of marihuana each year. It saves more than a billion and a half dollars of private property each year. That is more than its operating budget.

What other agency of this Government can state that? We save more than we spend on operating expenses every year.

The Coast Guard saves 5,500 human lives every year. Perhaps the Office of Management and Budget would like to attach a dollar figure to that. I certainly would not.

The Coast Guard operates the largest system of aids to navigation in the world. It is a vital contributor to our national security apparatus. It is called upon time and time again by the Federal Government, by States, and by localities and, most importantly, by the people of this country for emergency assistance day and night, in fair weather and foul. Coastguardsmen die every year in the line of duty, and they work 70, 80, 90, 100 hours a week. Their vessels are cramped, crowded, old, and they are wearing out, as the gentleman from Alaska (Mr. YOUNG) pointed out. Their work grows more difficult every year. The demands of the public are growing greater with every single year, and their resources are growing fewer, older, and less adequate to their needs.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. STUDDS) has expired.

(By unanimous consent, Mr. STUDDS was allowed to proceed for 5 additional minutes.)

Mr. STUDDS. Mr. Chairman, I say to the supporters of the amendment that you cannot have it both ways. If additional resources are not given to the Coast Guard, Coast Guard stations will begin closing around this country. The Coast Guard has no choice. They have reached the breaking point.

I have no desire to be melodramatic, but the fact is that the issue is one of life or death for the maritime community. Coast Guard search and rescue operations have become progressively less effective in recent years, and this year's budget, as adopted in the appropriations from the Department of Transportation conference report, will literally cripple the service.

I say to my colleagues, if you think you were elected to get Government off the backs of polluters and drug smugglers and foreign fisherman, the Snyder amendment is just the amendment for you. If you think the Coast Guard can fuel its vessels with salt water and train its people with correspondence courses, this is your amendment. If you honestly believe that after 200 years the United States is suddenly unable for the first time in its history to afford an effective Coast Guard, then you ought to support this amendment and you will then have an opportunity to defend your belief before the people of this country.

If, however, you believe, as I do, that the Coast Guard has earned our support and that it already has the support of the vast majority of the American people, then I hope you will reject this amendment, and then you will make a determination right now to continue to give the Coast Guard the resources it needs to do its job in future years.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. STUDDS. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Chairman, if we could, I would like to put this matter of funding the Coast Guard in some perspective. Is it not right that the Coast Guard's total annual budget is less than half of the cost of a new nuclear aircraft carrier?

Mr. STUDDS. The gentleman is correct.

Mr. OBERSTAR. And if this amendment is adopted, it would make the Coast Guard's budget rather similar to the Russian economy, not as good as last year but better than next year?

Mr. STUDDS. Mr. Chairman, the gentleman makes an intriguing point. I thank the gentleman for his contribution.

Let me point out that according to the Coast Guard's own figures, it is hard to put it into numbers, as I say, but the effectiveness of search and rescue has declined from 85 to 69 percent over the last 4 years. That represents lives that in the judgment of the Coast Guard could have been saved and would have been saved had they had adequate resources.

At this very moment—and some of the Members on this floor know this, and some have made reference to it—the Coast Guard is deciding which stations it will now have to close because of the numbers contained in the appropriations which are about to become law and which are contained in the continuing resolution.

At my request, I will be briefed later this week on precisely which stations—and they are search and rescue stations for the most part, I dare say—will be closed by the time the Coast Guard because this Congress has adopted figures which are identical to those offered in this amendment by the gentleman from Kentucky.

Let me finally say, Mr. Chairman, that if the Members think the Coast Guard's goals for search and rescue are too high, if they think they are trying to save too many lives, if their goals for the interdiction of drugs are too high—and the Coast Guard now is interdicting about 3 out of 20 or about 15 percent of the illegal drugs and narcotics smuggled into this country—if the Members think the goals of the Coast Guard are too high in trying to contribute to the national security and the national defense of this country, they will love the amendment offered by the gentleman from Kentucky and they ought to support it.

Mr. Chairman, I yield back the balance of my time.

Mr. SHAW. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment.

Mr. Chairman, since coming to the Congress just a little less than a year ago, I have supported the administration in every single bill that has come to the floor of this House which constituted a cut in the Federal budget. I cannot, however, and will not support the administration in this particular cut.

I do believe that an error, a grievous error, is being committed with this recommendation to this body. I think no doubt that there are some significant modifications that can be made with innovative thinking. I think that there are some responsibilities of the Coast Guard that could possibly be handled in other ways, perhaps even more economically.

However, that plan has not come to this body, that plan has not come to the Subcommittee on Coast Guard on which I serve, and, therefore, I cannot support this particular cut.

We are at this time finding drug smugglers moving through the Caribbean into my own State of Florida almost without being stopped. As the gentleman from Massachusetts (Mr. STUDDS) pointed out, we are at this time only stopping approximately 15 percent of the illegal drugs being smuggled into this country by water.

We have recently followed with a great deal of concern the events happening with regard to the Libyan Government and some of its threats that it has made, and perhaps they are

even trying to carry out those threats against the lives of some of the top executive leaders in this country. In doing so, we have thought and we have debated and we have concerned ourselves as to whether these hit men have entered our country or not. Sad as it may seem, they would certainly enter almost without challenge if they came in with a boatload of marihuana or if they came across some of our borders with some of the illegal aliens who are coming into this country at this time. Our borders are virtually unprotected.

I think that this cut is a movement in the wrong direction, and it is one that we should not support. I think what we need to support, however, is new and innovative uses of existing military personnel in order to assist in some way the Coast Guard in its abilities to protect our shores. This has not happened, and we have not seen this underway at this time.

Therefore, Mr. Chairman, I would vigorously ask all of my colleagues in the House on both sides of the aisle to oppose this amendment.

Mrs. BOGGS. Mr. Chairman, will the gentleman yield?

Mr. SHAW. I yield to the gentlewoman from Louisiana.

Mrs. BOGGS. Mr. Chairman, I want to thank the gentleman from Florida (Mr. SHAW) for his magnificent statement and to associate myself with his remarks.

Those of us who live in the coastal areas, particularly in the area of the Gulf of Mexico, and the Atlantic coastal areas, know full well the magnificent qualities that the Coast Guard has exhibited in protecting us in every conceivable manner.

As one Member of this House who has been intimately associated in the search and rescue efforts in the Alaskan area, I would like also to join other Members in commendation of the search and rescue operations of the Coast Guard. I thank the gentleman from Florida (Mr. SHAW) for taking this stand.

Mr. SHAW. Mr. Chairman, I thank the gentlewoman from Louisiana (Mrs. BOGGS) for those remarks, and I yield back the balance of my time.

AMENDMENT OFFERED BY MR. STUDDS TO THE AMENDMENT OFFERED BY MR. SNYDER

Mr. STUDDS. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. STUDDS to the amendment offered by Mr. SNYDER: On page 2, line 5, change the semicolon to a comma, and add the following: "provided that none of these funds may be used to operate Coast Guard facilities in Mobile, Alabama; Pine Bluff, Arkansas; Rio Vista, California; Santa Barbara, California; Peoria, Illinois; Michigan City, Indiana; Morgan City, Louisiana; Annapolis, Maryland; Gulfport, Mississippi; Marblehead, Ohio; Marietta, Ohio; Grand River, Ohio; Lorain, Ohio; Erie, Pennsylvania; Georgetown, South Carolina; Nashville, Tennessee; Galveston, Texas; Freeport, Texas; Chincoteague, Virginia; Norfolk, Virginia; Portsmouth, Virginia; Kennewick, Washington; or Huntington, West Virginia."

□ 1500

Mr. STUDDS. Mr. Chairman, I think the purpose and impact of this amendment is self-evident. It seems to me always important for Members to be able to appreciate the consequences of their positions and of their votes.

This amendment will permit those tempted to vote for the pending Snyder amendment to have the satisfaction of knowing in advance the impact of their opposition to adequate levels of funding for the Coast Guard. The facilities cited in my amendment to the amendment are located in areas represented by Members of this body who voted against the amendment which I offered on September 10 to increase Coast Guard appropriations to the level of funding now included in this bill before us, levels which would be reduced by the amendment offered by the gentleman from Kentucky.

It seems to me only proper that those who are concerned about the Coast Guard should be exempted from the consequences stemming from the votes of those who apparently are not. This amendment would permit the Coast Guard to save millions of dollars by closing down facilities in areas where they are apparently not considered necessary in order to pay full attention to those areas where the services are desperately needed and a good deal more appreciated.

Although this amendment may seem somewhat unusual I am very serious in the point I am trying to make. When we talk about Coast Guard funding we are not, as I said in my earlier remarks, talking about waste, fraud, and abuse. We are not talking about supply side economics or the nuances of neoconservative ideology. We are not talking about Milton Friedman or the Atlantic Monthly's chance for a Pulitzer Prize. We are talking about the ability of the Coast Guard to save human lives, to enforce the laws of this country, and in a manner which I believe is strongly supported by the majority of the American people, I dare say by the majority within every single constituency represented by a Member of this body, coastal or noncoastal, to protect against spills of oil and hazardous substances, to maintain a state of military readiness, and to do all of the other essential things which the Coast Guard is daily called upon to do.

We cannot continue to permit the Coast Guard to deteriorate and still expect it to provide quality service to all parts of this country. It cannot be done. Those of you who favor cutting back on the Coast Guard, which will be the effect in spades of the amendment offered by the gentleman from Kentucky, should go ahead and vote for that amendment, but to do so in full knowledge of the consequences of the adoption of that amendment.

In the past week a number of Members have come to me, as chairman of the subcommittee, alarmed by rumors of the imminent closing of Coast Guard facilities in their Districts. I regret to inform the Members of the House that in many instances these rumors will turn out to be of substance. While this Member of Congress, obviously, and no other Member, for that matter, is in a position to determine which facilities ultimately will be closed and which will not, Members ought to know and to know with absolute certainty that starting this week, as a result of the action of this Congress, most particularly as a result of the refusal of this House to adopt the amendment which I offered in September to the appropriations bill, which would have allowed the Coast Guard to maintain equal levels of funding, not greater, just the same as last year, that due to that action, due to the adoption of the continuing resolution last week in Congress, due to the adoption about an hour ago of the conference report of the Department of Transportation, the Coast Guard will be determining which facilities will be closed for the duration of this fiscal year and beyond.

Members of this body who have supported those cuts can be determining for themselves the explanation they will make to their constituents when search and rescue services and other critical services of the Coast Guard disappear for an indefinite period of time thanks to our unwillingness as a Congress to stand up and say there are some areas of this budget which are important, which are critical, and which deserve our support.

I yield back the balance of my time.

Mr. YOUNG of Alaska. Mr. Chairman, it is with great reluctance that I rise in opposition to the gentleman's amendment.

I understand what the gentleman is trying to do and I commend him for what he is trying to bring to this body, the action of some of those that do not recognize the consequences. But in all reality I think the amendment has served its purpose. It has been printed in the RECORD. It is before this body. I think, without asking the gentleman to withdraw it, I would hope everybody would oppose it so that the gentleman and I can work together and see if we can solve these problems that face the Coast Guard. I ask the amendment be defeated.

Mr. SNYDER. Mr. Chairman, I move to strike the requisite number of words and rise in opposition to the amendment of the gentleman from Massachusetts.

Mr. Chairman, I am sorry to see the gentleman offer this kind of amendment. He has been very honest in his explanation of it. He said in effect if you are one of the 260 Members of this House who voted against his amendment on Rollcall 196 on September 10 when he wanted to increase the appropriations over and above what the Appropriations Committee recommended to this House, if you are one of those and you have a Coast Guard facility, then he wants to reprimand you for voting against him on that amendment.

That is not the way to legislate. The gentleman has 24 Coast Guard facilities in his own District. If he says if you are going to live by the level of the appropriations bill that has been adopted and the continuing resolution and the conference report on transportation appropriations, if you are going to live by that, which I guess we will have to do, it has been adopted, and my amendment just conforms to it, do not cut any of the 24 facilities in his District, but cut the 23 in those Members' districts who voted amongst the 260 against the gentleman's amendment.

Mr. Chairman, we do not legislate like that around here. It is not the proper thing to do. If the gentleman wants a substitute for my amendment, we could have it offered, which cuts out the 24 facilities in his district, but it is not the honorable thing to do and we should not, we should not legislate that way. We should legislate based upon what the facts are, what we have to face in the budgetary situation as we have it today.

The facts are that the Appropriations Committee has already given us a conference report. We have adopted it, both bodies have adopted a continuing resolution, and perhaps it has been signed at this point. All we want to do is conform to that in an orderly fashion, not go around attempting to penalize those people who happen to vote for fiscal responsibility.

The amendment affects, and I think it ought to be clear for the record, Messrs. EDWARDS of Alabama, ANTHONY, FAZIO, LAGOMARSINO, MICHEL, HILER, TAUZIN, Mrs. HOLT, Messrs. LOTT, LATTA, MILLER of Ohio, STANTON of Ohio, PEASE, MARKS, NAPIER, BONER of Tennessee, FIELDS, PAUL, TRIBLE, WHITEHURST, DANIEL, MORRISON, and RAHALL.

I would just say to my colleagues I like all of those people and I think they ought to have to take their cuts the same as the rest of us in this country take their cuts, but they ought not be pointed out as our colleagues who just did not vote the way the gentleman from Massachusetts thought that they ought to vote and, therefore, he will stick in an amendment against them to really cut them to the bone and see that they are penalized for doing what they thought was right under the facts.

Mr. YOUNG of Alaska. Mr. Chairman, will the gentleman yield?

Mr. SNYDER. I am happy to yield to the gentleman from Alaska.

Mr. YOUNG of Alaska. I would again stress that I oppose this amendment and would also stress let us not lose sight of the original amendment of the gentleman from Kentucky. What we are trying to do on the committee, the gentleman from Massachusetts and myself, is to make sure the committee retains its position as the authorization committee with the amount of money the Coast Guard should have.

I do commend the gentleman on this statement, but let us not lose sight of what we are really talking about, and that is the committee as a whole.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. SNYDER. I am glad to yield to the gentleman from California.

Mr. ROUSSELOT. Does the gentleman mean our colleague from Massachusetts with his substitute or whatever he calls it——

Mr. SNYDER. It is an amendment to my amendment.

Mr. ROUSSELOT. He is trying to punish those who did not vote with him?

Mr. SNYDER. That is right.

Mr. ROUSSELOT. That is cute. That is really cute.

Mr. JONES of North Carolina. Mr. Chairman, I move to strike the requisite number of words.

Mr. STUDDS. Mr. Chairman, will the gentleman yield?

Mr. JONES of North Carolina. I yield to the gentleman from Massachusetts.

Mr. STUDDS. I thank the gentleman for yielding.

First of all I want to say that the amendment has accomplished about 101 percent of its purpose. I have never seen as many Members drift onto the floor for discussion of the Coast Guard authorization in the decade, roughly, that I have served here.

I note that there does not appear to be a station in the district represented by the gentleman from California on this list.

Mr. ROUSSELOT. No; there certainly is not. But I would ask the gentleman, what does that have to do with the cuteness of the gentleman's amendment?

Mr. STUDDS. I apologize profusely to the gentleman. I am sorry we do not have something to cut from his district.

Mr. ROUSSELOT. If the gentleman would like to abolish the Santa Anita Racetrack, that facility is in my district and it would make about as much sense to include an amendment to knock out the Santa Anita Racetrack.

Mr. STUDDS. I do not think we have jurisdiction, I will say to the gentleman, or I certainly would have given that consideration.

I am stunned by the attention this amendment seems to have drawn. The majority whip has just raced down the aisle to discuss a station with me in the State of Washington. I hope the gentleman will notice that this is a wonderfully bipartisan list of stations and they appear in districts represented by both parties and in every conceivable, and several, may I say from my parochial point of view, inconceivable parts of the country. So it has accomplished its purpose, obviously. I certainly hate to see the gentleman from Kentucky upset. There is no need to lecture about this.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. STUDDS. I certainly yield. Is not the gentlewoman's district represented either?

Mrs. FENWICK. I do not think it is a question of being upset, and if you will forgive a little rough language, I do not think this is the way to fool around with the people's business. It was, as the gentleman from California has said, "cute" but we are not supposed to be cute on this floor we are supposed to be serious.

Mr. STUDDS. I would say to the gentlewoman that she is delaying the purpose for which I rose, which was to withdraw the amendment, it having made its point, it seems to me, very, very effectively.

I gather alerts have gone out to several dozen offices on the Hill this afternoon with respect to the potential consequences of the adoption of the amendment offered by the gentleman from Kentucky.

It is my intention at this time to ask unanimous consent to withdraw my amendment to the gentleman's amendment. But it does seem to me, if I may resume seriousness for a moment, that while I would not argue for one moment that one ought to legislate by retribution, nor do I ever intend to close a station needed to save human lives because I disagree with the vote cast by a Member of Congress who happens to represent that district, the fact, however, is that the basic substance underlying the amendment offered by the gentleman from Kentucky is brought home, it seems to me, abundantly clearly by the reaction to this amendment because, believe me, while this may not be the list of districts, there will be stations closed around this country and they will be closed because this Congress refused adequately to support funding for the Coast Guard.

Mr. Chairman, I ask unanimous consent to withdraw my amendment to the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

Mr. ASHBROOK. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

The question is on the amendment offered by the gentleman from Massachusetts (Mr. STUDDS) to the amendment offered by the gentleman from Kentucky (Mr. SNYDER).

The question was taken; and the Chairman announced that the ayes appeared to have it.

Mr. ASHBROOK. Mr. Speaker, I demand a recorded vote and, pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the committee appears. Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1515

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Ohio (Mr. ASHBROOK) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 0, noes 389, answered "present" 2, not voting 42, as follows:

[Roll No. 359]

□ 1530

Messrs. PERKINS, STATON of West Virgina, ATKINSON, ROYBAL, PORTER, D'AMOURS, and MARKEY changed their votes from "aye" to "no."

So the amendment to the amendment was rejected.

The result of the vote was announced as above recorded.

□ 1545

Mr. HUGHES. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I wonder if I could have my colleagues' attention for just a couple of minutes.

Mr. JONES of North Carolina. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to my distinguished chairman.

Mr. JONES of North Carolina. I thank the gentleman for yielding.

I would like to clarify the situation for the benefit of Members who were not on the floor about 20 minutes ago. The vote which we just cast was on the rhetorical amendment offered by the gentleman from Massachusetts (Mr. STUDDS), who attempted to withdraw that amendment, but the gentleman on the other side of the aisle objected and demanded a rollcall vote.

Mr. Chairman, I repeat for those who did not hear, the last vote which we cast was on a rhetorical amendment by the gentleman from Massachusetts, who attempted to withdraw the amendment, but it was objected to by a member on that side and therefore necessitated a rollcall vote.

Now, the next amendment is a really truly important amendment. It is the one offered by the gentleman from Kentucky which reduces the authorization $159 million from the authorization approved by our subcommittee and our full committee.

As chairman, I would appreciate a very sincere "no" vote.

Mr. HUGHES. Mr. Chairman, let me just say, If I might, that the $159 million that is to be cut from the Coast

Guard authorization is going to impact one program in particular, drug interdiction in this country.

If you are concerned about the fact that we have a bumper crop of heroin in this country right now from Southeast Asia, we have little interdiction effort in the Golden Crescent area because of what has happened to Afghanistan and Iran in particular, and the reality that we are swimming today in marihuana and cocaine in this country, you will vote against this amendment. It is $159 million below the bare bones requirements of the Coast Guard for drug interdiction.

It is disgraceful. In this country we stopped 90 percent of our drug interdiction on the Pacific Coast about 5 months ago because the Coast Guard ran out of fuel. We were interdicting less than 15 percent of the cocaine and the marihuana coming in from Colombia and other parts of South America before we diverted one additional cruiser.

Now we are down to two ships. We are interdicting a pittance of the cocaine and marihuana coming into the country and we are going to cut it even further. Why?

Is that what our constituents want? Certainly not. Look at the public opinion polls. The people of this country equate the importance of drug interdiction and anticrime programs with that of national defense. The American public is willing to spend as much money on anticrime programs as they are on our defense. We are not even spending, first of all, what we spent last year or the year before. We are retreating in our anticrime efforts.

The Coast Guard is the first line of defense when it comes to drug interdiction. It is crazy what we are doing.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I would be happy to yield to my colleague, the gentleman from Ohio.

Mr. SEIBERLING. Mr. Chairman, I commend the gentleman for the statement he has just made. A couple of months ago, the House voted to allow the Armed Services to aid in the enforcement of the drug laws on the high seas, and thereby approved a major departure from the law that has been on the books for over a hundred years. We did it because we were so concerned about the flood of illegal drugs coming from overseas. The gentleman from Florida (Mr. BENNETT) made a strong case for action to combat this dreadful menace. However, in the course of the debate, a general consensus emerged concerning the importance of increasing the Coast Guard authorization and appropriation if we are ever going to get control over this terrible drug trade. To go in the opposite direction, as the pending amendment would do, would be a tragic mistake.

Mr. HUGHES. I thank the gentleman. I could not agree with the gentleman more.

Mr. GILMAN. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to my colleague, the gentleman from New York.

Mr. GILMAN. Mr. Chairman, I thank the gentleman for yielding. I want to commend the gentleman from New Jersey (Mr. HUGHES) for espousing the cause of the Coast Guard in this extremely important law enforcement effort. I believe that the majority of this House is fully convinced of the need to impose stricter enforcement in narcotics trafficking.

In this regard, the Coast Guard has been doing an outstanding job in interdicting narcotics trafficking originating from Latin America and Southeast Asia.

During fiscal year 1981, the Coast Guard seized 198 vessels, compared to 93 seized in fiscal year 1980; it nearly doubled the amount of marihuana seized—in fiscal year 1981. Nearly 6 million dosage units of quaaludes were seized by the Coast Guard in fiscal year 1981, compared to the 4.7 million dosage units of this deadly drug seized in the previous fiscal year.

If the Coast Guard is to perform its numerous responsibilities, including the difficult and hazardous task of interdicting drug traffickers, then it needs sufficient vessels, adequate equipment, personnel and funds. We can no longer afford to provide our frontline troops with limited, antiquated equipment and expect them to effectively interdict the drug traffickers who possess high-speed vessels and highly sophisticated equipment to avoid detection. Accordingly, Mr. Chairman, I urge my colleagues to support H.R. 2559, the Coast Guard authorizations for fiscal year 1982, and to defeat the amendment offered by the gentleman from Kentucky (Mr. SNYDER), cutting the Coast Guard authorization by $159 million.

Mr. DOWNEY. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to my colleague, the gentleman from New York.

Mr. DOWNEY. Mr. Chairman, I think there is a tendency to look at the Coast Guard from a parochial concern, if you have a district that borders the ocean or not. The fact is as the gentleman has correctly pointed out, without the active interdiction of the Coast Guard drugs come into this country in the shoreline districts and make their way inland with one or two trips by automobile or by truck.

I happen to represent a district in Long Island. If we have more money reduced from this bill, the amount of drugs will increase dramatically. They will wind up in Ohio. They will wind up in Pennsylvania. They will wind up in Kansas.

If anything, and the gentleman has already pointed this out, the people want this drug traffic stopped and the only way it is going to stop is if we spend the money to give the Coast Guard the ability to be able to get these people.

Mr. HUGHES. I thank my colleague.

We are up to our eyeballs in this country in drugs, so if we really want to do something about it, the right way to do it is to vote against the Snyder amendment.

Mr. FASCELL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the Snyder amendment to reduce funding for the Coast Guard by $160 million. This is indeed a foolhardy, budget-cutting gesture.

The Coast Guard has been woefully underfunded for many years and is experiencing increasing difficulty in meeting many of its mandates due to a severe lack of funds. Recently, the agency has even been forced to cancel some of its routine law enforcement patrols because of its inability to pay for additional fuel.

With the growing narcotics traffic in south Florida as well as the continued illegal immigration to our shores by sea, the resources and expertise of the Coast Guard are critically necessary if we are ever to be able to deal with these two urgent problems. Instead of attempting to reduce funds for the Coast Guard, we should be increasing the modest funding this important agency receives for its law enforcement responsibilities.

In the strongest possible terms, I urge our colleagues to oppose this amendment, which would cut $160 million from the Coast Guard authorization.

Mr. SAWYER. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to my colleague, who has been trying to get some order.

Mr. SAWYER. Mr. Chairman, I merely want to endorse the statement of the gentleman from New Jersey (Mr. HUGHES).

There is just no question that we are a sieve as far as incoming drugs go and the traffic has now grown to some $65 billion a year and is probably the singlemost cause of the big uprise in violent and other crimes being brought about to sponsor these habits and to defend turfs.

It just seems to me that a little imagination could develop a type of vessel that would meet the wartime needs of the Navy and would meet the interim needs of the Coast Guard so that instead of just being out drilling and patrolling in peacetime, it could be used to interdict this drug traffic and yet in the event of hostilities will immediately become a part of the U.S.

Navy and/or the Defense Establishment.

While we have to some extent diluted the impact of posse comitatus, we are far from rid of it; so that the utility of ships is much greater in the drug traffic that we desperately need in the hands of the Coast Guard, rather than in the hands of the Navy.

As I said, in time of war, with the correct kind of thinking and design, we could utilize the small craft requirements of the Navy.

I thank the gentleman for yielding.

Mr. PHILIP M. CRANE. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from Illinois.

Mr. PHILIP M. CRANE. Mr. Chairman, I would like to comment simply on Mr. Stockman's letter to my distinguished colleague, the gentleman from Kentucky, who introduced this amendment, wherein he applauds him for the effort to reduce the authorization $100 million for the U.S. Coast Guard, an indisputably national function, and at the same time this administration fought to preserve an estimated $200 million in the IDA giveaway. When you compare tradeoffs, I will willingly support the effort to maintain our Coast Guard and simultaneously maintain ongoing efforts to cut our foreign aid giveaway.

Mr. FASCELL. Mr. Chairman, I thank my colleagues for their comments.

I think this amendment is going to be overwhelmingly defeated, because it is logical and sensible to do so; but I just wanted to get on record my strong opposition to the amendment.

My feeling is that we have just kicked the Coast Guard around, one of the best Federal services that we have. We have given them almost an impossible task. It is a surprise to me that they have any morale left. The least we could do is give them the money so that they can get the men and equipment to do the job that we have asked them to do.

We cannot enforce the law if we cut back on the FBI, if we merge or cut back the DEA, and if we cut the budget of the Coast Guard. How can the Federal Government do all the things that the United States is supposed to do in enforcing the law? It just does not make sense.

Mr. STUDDS. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the chairman of the subcommittee.

Mr. STUDDS. Mr. Chairman, just very briefly, if I may explain to Members, had it been my idea that we would have been disrupted for a vote on the amendment which bore my name, you would not be here. That amendment was offered for rhetorical purposes. I asked unanimous consent to withdraw it. Objection was made and a request for a vote was made on the other side; however, it did achieve its purpose. It got a great deal of attention for something that we think is very, very important.

The amendment before us now, the amendment of the gentleman from Kentucky (Mr. SNYDER) cuts some $160 million from the Coast Guard. It would get the Coast Guard off the backs of drug smugglers, foreign fishermen, and illegal aliens and people who are drowning. If that is what you want the Government off the backs of, I suggest that you vote for this amendment.

I thank the gentleman for yielding.

Mr. SCHEUER. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from New York.

Mr. SCHEUER. Mr. Chairman, I do not ordinarily rise on this floor to wrap myself in the flag. But I urge my colleagues to think of what the concept of nationhood means to the United States of America. Surely, the first and foremost characteristic of nationhood—of sovereignty is control of a nation's borders, the establishment and maintenance of safe, secure borders. It is a disgrace that our borders are a sieve, and are perceived by the world at large as not be taken seriously.

The same pitiable condition of underfunding that prevails with the Coast Guard, also prevails with the Immigration and Naturalization Service. It is high time that we looked at our Nation the way every other nation perceives itself, namely, that safe and secure borders are the first characteristic of nationhood.

Let us make our borders real, let us commence at long last a serious, high-priority, well-funded effort to enhance and strengthen our borders against the invasion of a continuing avalanche of drug traffickers and illegal immigrants, and defeat this amendment.

Mr. MICA. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. Mr. Chairman, I will yield to my colleague, the gentleman from Florida.

Mr. MICA. Mr. Chairman, I would just like to point out to my colleagues that I took the time to visit some Coast Guard facilities and I think if any Member of this body were to do that, you can see that this amendment should be soundly defeated.

We have one cutter in south Florida that is 28 years old, that must cover 200 miles of coastline for drug interdiction.

Mr. LUJAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I cannot understand really what I am hearing here today. Everything is pinpointed that we are cutting money for the curtailment of drug traffic. I do not see anywhere in this amendment that that is the purpose of it.

□ 1600

Mr. Chairman, I would like to yield to the chairman of the committee to explain exactly what it is, because I think we are talking about not increasing rather than decreasing the amount of this authorization.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I yield to the gentleman from Kentucky.

Mr. SNYDER. I thank the gentleman for yielding.

Mr. Chairman, I think it is only fair that the gentleman let me set the record straight. I have been accused of all these evil things here today.

This amendment, whether it is adopted or not adopted, is not going to get us one more or one less nickel for the Coast Guard. What we have done is to offer an amendment to make the authorization conform penny for penny what this House adopted in the continuing resolution, what they adopted in the conference report this morning on the Department of Transportation appropriation bill. It is an effort to get the bill signed downtown because there are other things in this bill that also need to be enacted besides the money level.

There will be no more money; no less money. This cuts the authorization, but makes it conform penny for penny to exactly what you voted for today on the conference report, what you voted for on the continuing resolution. As a matter of fact, if the amendment is rejected it will be the opposite of what you voted for on rollcall 196 on September 10 when the gentleman from Massachusetts attempted to raise the appropriation and was defeated by rollcall 129 to 260.

Mr. YOUNG of Alaska. Mr. Chairman, will the gentleman yield?

Mr. LUJAN. I will be happy to yield to the gentleman from Alaska.

Mr. YOUNG of Alaska. Mr. Chairman, I again want to restate that the Committee on the Coast Guard objects to this amendment. We are the authorizing committee. It is true you voted on the appropriations. It is also true that the Coast Guard will have to come back for supplemental appropriations. I want that latitude, and I ask for a no vote on this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Kentucky (Mr. SNYDER).

The amendment was rejected.

AMENDMENT OFFERED BY MR. ANDERSON

Mr. ANDERSON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ANDERSON: Page 6, after line 25, insert the following:

SEC. 12. (a) The Congress, in recognition of the heroic efforts that resulted in the

saving, under extremely adverse conditions, of the lives of all 510 passengers aboard the motor vessel Prinsendam which caught fire off the coast of Alaska on October 4, 1980, hereby honors and expresses its thanks to the members of the United States Coast Guard, the individuals of the United States and Canadian Air Forces, and the crew of the tanker Williamsburg and all others who participated directly in this valiant undertaking, as well as the crew of the Prinsendam.

(b) The Commandant of the United States Coast Guard shall determine the names and addresses of those individuals honored under subsection (a), and provide the names and addresses to the Clerk of the House who shall convey in appropriate language the appreciation of Congress to each such individual for his or her actions in connection with the Prinsendam rescue.

Mr. ANDERSON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ANDERSON. Mr. Chairman, today I offer an amendment to express the thanks of Congress to those individuals directly involved in the rescue of all passengers and crew of the Netherlands Antilles cruise ship *Prinsendam.*

On October 4, 1980, the *Prinsendam,* with 510 people on board, sustained an engineroom fire about 360 miles east of Kodiak, Alaska. The majority of the passengers were elderly. When it became evident the blaze could not be contained to the engineroom, the order to abandon ship was given. The first rescue ship to arrive on the scene was the U.S. tanker *Williamsburg.*

The U.S. Coast Guard, working in conjunction with the United States and Canadian Air Forces, labored around the clock in hazardous conditions to save the lives of the hundreds of people in life boats and liferafts. A doctor and paramedics were flown to the scene of the disaster in order to treat the survivors. Rescue efforts were hampered by strong winds and high waves, as well as the fact that some of the *Prinsendam's* lifeboats were continually losing power. I am proud to say, Mr. Speaker, that there was no loss of life either among the passengers or among those rescuing them.

Mr. Speaker, my amendment thanks those of all nationalities who were directly involved in this outstanding rescue mission.

Further, my amendment requires the Commandant of the Coast Guard to furnish the Clerk of the House the names and addresses of the individuals directly involved.

The Clerk of the House is requested to transmit the following appropriate message of appreciation to all those involved:

The Congress, in recognition of the heroic efforts that resulted in the saving, under extremely adverse conditions, of the lives of all 510 passengers aboard the motor vessel Prinsendam which caught fire off the coast of Alaska on October 4, 1980, hereby honors and expresses its thanks to the members of the United States Coast Guard, the individuals of the United States and Canadian Air Forces, and the crew of the tanker Williamsburg and all others who participated in this valiant undertaking, as well as the crew of the Prinsendam.

(1) on early Saturday morning, October 4, 1980, the motor vessel Prinsendam, a Netherlands Antilles registered four hundred and twenty-seven-foot passenger vessel with five hundred and ten people onboard, the majority of whom were elderly United States citizens, sustained an engineroom fire about three hundred and sixty miles east of Kodiak, Alaska;

(2) the fire could not be contained and was completely out of control after about four hours and the evacuation of the burning vessel was commenced utilizing lifeboats and liferafts;

(3) the one-thousand-and-ninety-five-foot tanker Williamsburg was diverted to the scene and commenced picking up survivors from rafts and lifeboats, even though its efforts were hampered by the fact that lifeboats from the motor vessel Prinsendam continually lost power and by deteriorating weather conditions;

(4) the winds, which increased from twenty to forty-five knots with ten- to twenty-five-foot seas before subsiding after passage of a weather front, posed grave hazards to rescue;

(5) the United States Coast Guard, and United States Air Force, and Canadian Air Force helicopters, working continuously, rescued survivors from rafts and boats and transferred most of them to the Williamsburg, although some were returned to shore when the helicopters returned to base for fuel and supplies;

(6) a doctor and paramedics were flown to the scene to assist with medical problems among the survivors;

(7) the United States Coast Guard Cutter Boutwell arrived on the scene late Saturday evening at which time the fifty-man firefighting party was evacuated from the burning vessel when it assumed a ten-degree list;

(8) by early Sunday morning all were accounted for except for those in the one lifeboat which was still missing, but the cutter Boutwell, with helicopters, continued the search and about eight hours later located the lifeboat and recovered the survivors onboard; and

(9) due to the valiant and untiring efforts of the United States and Canadian crews manning helicopters, surface ships, and shore stations, and the crew of the tanker Williamsburg, as well as due to the efforts of the captain and the crew of the Prinsendam, there were no lives lost or serious injuries sustained during this heroic and unprecedentedly successful operation in the cold and stormy seas off the Alaskan coast.

Mr. YOUNG of Alaska. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from Alaska.

Mr. YOUNG of Alaska. I thank the gentleman for yielding.

Mr. Chairman, I am pleased to be able to join with my colleague, Mr. ANDERSON of California, in adding this amendment to the Coast Guard authorization bill. As he has pointed out, this is the Congress opportunity to recognize those individuals who carried out the rescue of passengers onboard the cruise vessel *Prinsendam.*

By adopting this amendment we are recognizing three groups who carried out this heroic rescue. The first group is made up of the military units of the United States from the Coast Guard and the Air Force. In addition, we are recognizing the Canadian search and rescue units which were dispatched to help assist in this effort. The final group are those members of our U.S. merchant marine onboard the tank vessel *Williamsburg* which was diverted to the scene and served as the staging platform from which to execute the successful rescue of all 510 passengers onboard the burning and sinking cruise liner in unusually severe weather conditions. The crew were members of MEBA 2—AMO and the SIU.

I think it is a tribute to all involved that this rescue was performed in concert by these divergent units. The selfless and untiring efforts of all involved epitomize the type of heroic feat that we in Congress should recognize. No lives were lost in this rescue. It will no doubt rank as the most dramatic and miraculous rescue in the history and tradition of the sea.

As the Representative from Alaska, I have long been concerned about search and rescue coverage in the Gulf of Alaska region. Thus, I followed this rescue with deep concern. As successful as this rescue was, the Coast Guard is not always to respond. Additional resources are needed which this bill is intended to provide.

Therefore, I urge all of my colleagues to support the adoption of this amendment to recognize the people who carried out this rescue and vote for the passage of this bill to insure adequate funding for the Coast Guard.

Mr. JONES of North Carolina. Mr. Chairman, will the gentleman yield?

Mr. ANDERSON. I yield to the gentleman from North Carolina.

Mr. JONES of North Carolina. Mr. Chairman, I would like to commend the gentleman for this thoughtfulness in this matter.

We have examined the amendment on this side. We wholeheartedly support the amendment and have no objections to it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California. (Mr. ANDERSON).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. OBERSTAR

Mr. OBERSTAR. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. OBERSTAR: Page 6, line 18, strike "." and insert the following: ", and the controlling interest in the

partnership is owned by citizens of the United States.

Mr. OBERSTAR. Mr. Chairman, this is a technical amendment to clarify one that I offered to the bill in subcommittee, to provide for increased construction of vessels in the United States with the use of funds from other sources. The necessity for the amendment was simply to place partnerships which are increasingly involved in vessel construction on the same basis as corporations.

The amendment had some technical question about it as I offered it in subcommittee, and in full committee. At that time I made a commitment that if there were any question, that counsel would work on the language and we would clarify it on the floor. That is the purpose of this amendment. I would hope that the language can be accepted.

Mr. JONES of North Carolina. Mr. Chairman, will the gentleman yield?

Mr. OBERSTAR. I yield to the chairman of the full committee, the gentleman from North Carolina.

Mr. JONES of North Carolina. Will the gentleman's amendment change the Shipping Act of 1916? Specifically, will the gentleman's amendment change the U.S. citizenship requirements of section 2 of the Shipping Act?

Mr. OBERSTAR. No. This amendment changes the Vessel Documentation Act dealing only with documentation. It does not change the ownership and citizenship requirements in section 2 of the Shipping Act. It does not change the Shipping Act at all.

Mr. JONES of North Carolina. Will the gentleman's amendment change the 75 percent U.S. citizenship requirement for coastwise trade?

Mr. OBERSTAR. No, this amendment addresses only the requirements for a partnership to be documented in the United States. Section 111 of the Vessel Documentation Act covers coastwise licenses, and specifically requires, in section 111(a)(3), that vessels eligible for documentation must also qualify under all other U.S. laws in order to be employed in the coastwise trade. Therefore, the 75-percent U.S. citizenship requirement will still apply and is not changed by my amendment to the Vessel Documentation Act.

Mr. JONES of North Carolina. I thank the gentleman.

Mr. Chairman, this side of the aisle has no objection to the amendment. We accept it.

Mr. OBERSTAR. I thank the chairman.

Mr. YOUNG of Alaska. Mr. Chairman, will the gentleman yield?

Mr. OBERSTAR. I yield to the gentleman from Alaska.

Mr. YOUNG of Alaska. Mr. Chairman, the amendment proposed by Mr. OBERSTAR is a modification of section 10 of H.R. 2559. Section 10 amends section 104 of the Vessel Documentation Act to permit unincorporated entities, trusts, and joint ventures to document vessels as they have traditionally done while enabling partnerships to document vessels provided their general partners are citizens of the United States. This eliminates a disparity in existing law between the treatment of corporations and partnerships. Currently all partners must be citizens of the United States, whereas in a corporation only the corporate officers and managers must be citizens of the United States while the shareholders may be foreign citizens.

The modification made by Mr. OBERSTAR in this amendment is to insure that, in addition to the general partners, a controlling number of all partners would be U.S. citizens. These citizenship requirements would be in addition to, and not in abrogation of, those in section 2 of the Shipping Act, 1916, or required through other provisions of the Vessel Documentation Act.

I have no objection to the enactment of this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota (Mr. OBERSTAR).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. GEJDENSON

Mr. GEJDENSON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GEJDENSON: Page 2, line 14, change the period to a comma, and add the following new clause: "of which sufficient funds shall be made available to continue in operation a Coast Guard research and development center through the end of the 1982 fiscal year."

Page 6, at the end of the bill, add the following new section:

"SEC. 12. Notwithstanding any other provision of law, the fiscal 1982 end of year civilian personnel strength of the Coast Guard shall be at least 5,484."

□ 1610

Mr. GEJDENSON. Mr. Chairman, my purpose in offering this amendment is to keep in operation a research and development center within the U.S. Coast Guard. My views are admittedly somewhat parochial because the Coast Guard's present R. & D. center is located in my district, in Groton, Conn. However, the accomplishments of the center are recognized nationally and internationally, and I would be here today supporting the continuation of a Coast Guard R. & D. center no matter where it was located.

Some of the R. & D. center's achievements include the development of an analytical system to identify the source of mystery oil spills. This system was used in numerous successful court tests of the system including the first Federal criminal jury trial involving the Clean Water Act. Seven research chemists received the Silver Medal of the DOT Secretary's Award for their development of the system. This process has been studied and commended throughout the world, resulting in chemists from the R. & D. center being invited to discuss this topic in Hungary, Spain, Norway, Poland, and Canada, as well as visits from scientists from Australia and Japan.

The R. & D. center has also developed a pollution response mobile laboratory designed to respond to all of the EPA "priority pollutants," and the Coast Guard's own list of hazardous chemicals, which numbers close to 1,000 compounds. The center has been successful in designing methods and equipment for use in preventing and reducing discharges of hazardous chemicals—including petroleum products—from endangered vessels. It has also developed a solar photovoltaic energy system for use on lighted navigational aids.

These developments that I have just named all have something in common. They will all save money. The "oil fingerprinting" project cost 2.6 million dollars. Its application has already generated more than twice that amount in payments to the Water Pollution Control Act oil spill fund. It does not take much imagination to see how the implementation of methods to plug leaking oil tankers, and to replace expensive battery operated buoys with solar cells will also save much more than the cost of their design. These are examples of why I believe the R. & D. center's work should continue. Closing this facility would be penny wise and pound foolish. It would not save money over the long run.

I am not trying to restrict the Coast Guard which is facing hard choices in trying to perform difficult and varied services on a shamefully insufficient budget. The 22 million dollars earmarked for Coast Guard R. & D. in the Transportation appropriations conference report, however, should easily be able to provide sufficient funds to operate and maintain the R. & D. center through the end of the year. The cost of running the center was 6.3 million in fiscal year 1981. In light of the fact that R. & D. funds are likely to be appropriated sufficient to keep the center operating, it makes little sense to disband this group of experts; to remove the highly technical and sometimes unique equipment that they have acquired, and to dissolve this highly successful unit. Certainly, the work they have accomplished can not be acquired in a more cost-effective manner. In addition, the cost of putting together such a group again would be enormous, in both time and money.

My amendment not only requires that sufficient funds be used to keep

the R. & D. center operating, it also requires that Coast Guard civilian personnel strength be at least 5,484 at the end of fiscal year 1982. This figure represents civilian personnel at the end of fiscal year 1981. Almost half of the personnel at the Coast Guard R. & D. center are civilians. Regardless of budgetary considerations the center would probably be forced to close if OMB directives to cut civilian personnel are followed. Many of the civilian positions at the R. & D. center cannot currently be filled by military personnel. There are simply not enough military members of the Coast Guard with Ph. D.'s in chemistry, and oceanography, and physics to replace these people.

In addition, cutting civilian personnel strength is a problem throughout the Coast Guard. Civilian personnel do highly technical work, such as that done at the R. & D. center, but, more often, they do support work. This means that the more civilian personnel that is cut, the more military personnel that will have to be used to do clerical and maintenance work. With the Coast Guard so overworked and underbudgeted now, it is very possible that these support functions may have to be performed at the expense of national security or law enforcement duties.

In conclusion, I believe that the adoption of this amendment will provide for the continuation of a very valuable and necessary program—the Coast Guard R. & D. center. I urge its passage.

Mr. JONES of North Carolina. Mr. Chairman, will the gentleman yield?

Mr. GEJDENSON. I yield to the gentleman from North Carolina.

Mr. JONES of North Carolina. Mr. Chairman, the committee is happy to accept this amendment. We have examined it carefully, and it fits with this committee's purpose.

Mr. GEJDENSON. I thank the gentleman.

Mr. YOUNG of Alaska. Mr. Chairman, will the gentleman yield?

Mr. GEJDENSON. I yield to the gentleman from Alaska.

Mr. YOUNG of Alaska. Mr. Chairman, this side has no objection to the amendment as proposed. I commend the gentleman for offering the amendment. The chairman of the committee and I have been holding hearings on the issue, but I believe the amendment is appropriate at this time.

Mr. GEJDENSON. I thank the gentleman.

Mr. MOFFETT. Mr. Chairman, will the gentleman yield?

Mr. GEJDENSON. I yield to my colleague from Connecticut.

Mr. MOFFETT. Mr. Chairman, I thank the gentleman for yielding, and I congratulate the gentleman on offering this amendment. I offer my strong support and urge its passage.

Mr. GEJDENSON. I thank the gentleman.

AMENDMENT OFFERED BY MR. EVANS OF DELAWARE TO THE AMENDMENT OFFERED BY MR. GEJDENSON

Mr. EVANS of Delaware. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. EVANS of Delaware to the amendment offered by Mr. GEJDENSON: On page 2, line 14, change the period to a comma, and add the following new clause: "*Provided*, That the Coast Guard submits its research, development, test, and evaluation program plan, including the continuation or operation of a research and development center, for Fiscal Year 1982 to the Committee on Merchant Marine and Fisheries of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate for approval prior to implementation.".

Mr. EVANS of Delaware (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Delaware?

There was no objection.

Mr. EVANS of Delaware. Mr. Chairman, my amendment is merely a supplement to the amendment of the gentleman from Connecticut. He and I have discussed it. It is a compromise which preserve the flexibility of the administration and the Congress. It does no unduly restrict the administration, nor does it permit then to precipitously eliminate a vital program without approval of the authorizing committee.

The amendment parallels the language which the Senator from Connecticut (Mr. WEICKER) inserted in the conference report on the DOT appropriations. The only difference is that my amendment, quite properly, I believe, requires the approval of the authorizing committees—in this instance the Committee on Merchant Marine and Fisheries and the Commerce Committee in the Senate. Senator WEICKER's language requires approval from the Appropriations Committee.

My amendment will allow the Coast Guard Subcommittee to work closely with the administration in allocating scarce Coast Guard dollars, and I believe it does place in proper focus the authorizing committees in the House of Representatives and in the Senate. I think the Appropriations Committees at times, and the Budget Committee at times, have exceeded their originally intended authority and responsibility. When it comes to oversight in a situation like this, the appropriate committee is not the Appropriations Committee, but the Committee on Merchant Marine and Fisheries.

Mr. GEJDENSON. Will the gentleman yield?

Mr. EVANS of Delaware. I yield to the gentleman from Connecticut.

Mr. GEJDENSON. Mr. Chairman, we have had an opportunity to review the amendment, and are in full support of it.

Mr. EVANS of Delaware. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Delaware (Mr. EVANS) to the amendment offered by the gentleman from Connecticut (Mr. GEJDENSON).

The amendment to the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Connecticut (Mr. GEJDENSON), as amended.

The amendment as amended, was agreed to.

AMENDMENT OFFERED BY MR. SAVAGE

Mr. SAVAGE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SAVAGE: at the end of the bill, add the following new section: "None of the funds authorized under any provision of this bill and no coast guard personnel, facilities or equipment may be used in any manner to either train or facilitate the training of the coast guard of South Africa or any military personnel of South Africa.".

Mr. SAVAGE. Mr. Chairman, this is just to point up a matter that many of my colleagues may not know about, and that is that the U.S. Coast Guard has been engaged in training members of the Coast Guard of South Africa. It trained 3 or 4 members just this past August. It did so also last year, and also a couple of years before that.

Now, the Coast Guard is the only one of America's five military services that has been engaged in training South African military personnel. The Coast Guard in South Africa, of course, is a part of the military there as the U.S. Coast Guard is here.

So, unquestionably, such training, military training, has political implications, particularly in light of the attitude of the overwhelming majority of the world's nations regarding fascism in South Africa.

I had an opportunity just a few months ago to see fascism's face, look into its ugly face, in a trip to South Africa. Any good American would certainly not want to have us involved, we who symbolize freedom in the world, to be involved militarily on the side of fascism.

We have heard here today some pleas about the problems represented by the Solidarity labor movement in Poland, and have heard also about the problems in other parts of the world, the supposed terrorism supported by Libya, and we have expressed such concern about the danger to freedom in the world just here today, but we should recognize that our concern should start right at home.

Therefore, I propose this amendment to H.R. 2559, the Coast Guard authorization bill for fiscal year 1982, to ban the use of any funds, personnel, facilities, or equipment of the U.S. Coast Guard for training any South African Coast Guard or military personnel.

Mr. JONES of North Carolina. Mr. Chairman, will the gentleman yield?

Mr. SAVAGE. I yield to the gentleman from North Carolina.

Mr. JONES of North Carolina. Mr. Chairman, in the interest of time let me say that, to set the record straight, this side of the aisle will accept the gentleman's amendment. We have no objection to it, but I think it is important to point out that the so-called training of South Africans consisted of some three or four who had been trained in search and rescue, and not in any military sense of the word whatsoever.

Nevertheless, we will accept the gentleman's amendment, and I commend the gentleman for introducing it.

Mr. SAVAGE. I thank the gentleman.

May I just add that the training of any military personnel of a fascist regime, however described, has a tremendous negative political connotation, if not military, in its impact. And because of the status of freedom and democracy in the world today and the concerns we are presently expressing, I urge that we continue to see that our own Coast Guard does not engage in any further military training, regardless of how few the number of trainees involved.

□ 1620

Mr. STUDDS. Mr. Chairman, will the gentleman yield?

Mr. SAVAGE. I yield to the gentleman from Massachusetts.

Mr. STUDDS. Let me say I do not intend to quarrel with the statement of the full committee chairman that he will accept this amendment, but I would like to have the record reflect that the subcommittee is aware of this training. I raised the question myself with the Commandant of the Coast Guard in our hearings.

The reason for which we did not ourselves strike or prohibit the use of funds for this is the assurance given us by the Commandant that, No. 1, an infinitesimal number of people, I believe three in the current fiscal year, are involved and, No. 2, the training is solely in search and rescue alone, only search and rescue. It was only semifacetiously that I asked the assurances of the Commandant about discrimination exercised in choosing who would be searched for and rescued by the South African Coast Guard.

Notwithstanding that, there may be some question with respect to "military" relations of any kind of a formal nature between our Government and that of South Africa. I do not need to assure the gentleman, I suspect, that every Member, I hope every Member of this House, feels as he does about the current regime in South Africa.

But I do want the record to reflect that the subcommittee was aware of this and, because of the assurances by the Coast Guard that this training was solely in the humanitarian enterprise of search and rescue, that we chose not to offer the amendment which the gentleman has chosen to offer.

Mr. SAVAGE. I thank the gentleman.

May I just conclude, however, if I may, and insist that any military training, any training of military personnel by any Department of our Armed Forces, any such training is an involvement contrary to the tenets of democracy and the principles of freedom for which this great Nation stands.

Whatever that training may be, if it is to train military personnel in how to cook, it has negative implications because if you learn how to cook in the Army you relieve someone else from cooking to go out and engage in some other military enterprise.

The point is there is a training relationship that has developed between one of our armed services with the armed services of South Africa. If the Coast Guard does not intend to continue that, and I hope that it does not, then there can be no objection to saying that none of the funds and the personnel and equipment and facilities of this service that we are about to authorize today can be used for that purpose.

Mr. YOUNG of Alaska. Mr. Chairman, I rise in opposition to the amendment. This is the first time that I have seen the amendment today and we did consider this subject in the subcommittee and the committee as a whole. I will tell you right now in 1978 we trained one Air Force major and in 1981, 1982, and 1983 there are two.

I want this body to think of one thing. Let us forget about everything else, but one thing, the Coast Guard is training to rescue and to search for those that are lost. In my State in the waters which my State borders it is absolutely occupied by Russians, Japanese, Chinese, Poles, and whatever there may be in the fishing industry, and not once has our Coast Guard ever turned down someone that was lost, hurt, or needed help.

I am not going to get into the political ramifications of South African politics, but I know this: there must be all types of people lost off that coast. There must be people that need help. When we offer training, that is reimbursed to this Nation, training to the people that are involved in search and rescue, and I think that should be the main effort.

I think this body has a responsibility to train people to rescue people.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman from Ohio.

Mr. ASHBROOK. Is South Africa the only foreign country that has nationals trained by the Coast Guard?

Mr. YOUNG of Alaska. No; I would say to the gentleman we train many, many different nations across the world in the field of search and rescue for those that are lost.

Mr. ASHBROOK. I guess I wonder, since my colleague is on his feet, whether he has a checklist of the nations that he is not going to allow, if his amendment would prevail, or the concept of his amendment would prevail. Is he talking about the Republic of China?

Mr. SAVAGE. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Alaska. I would yield to the gentleman to answer the question.

Mr. SAVAGE. I have a question for the gentleman from Alaska. Will the gentleman yield?

Mr. YOUNG of Alaska. I do not yield at this time. The gentleman was asked a question and if he would like to answer the question then I yield for that purpose.

Mr. SAVAGE. I have no complete list.

Mr. ASHBROOK. I wonder if the gentleman has just singled out South Africa or if there is a whole list.

Mr. SAVAGE. If the gentleman will yield, I would not be opposed to the training of Coast Guardsmen of all nations in the world. I single out South Africa because I know South Africa to be a fascist, racist regime.

Would the gentleman from Alaska yield for a question, please?

Mr. YOUNG of Alaska. If I may reclaim my time, may I say I am not arguing the political ramifications. I am talking about how we trained 31 nations' last year in search and rescue. I do not have the complete list of what those nations encompass, but they were 31 nations where we helped train personnel.

Again I want to stress I do not know how many people, how many Russians we have rescued off the coast of Alaska in the last 25 years. That is part of our gesture of good will of the sea. I am not talking about military, I am talking about search and rescue of people in South Africa of both races.

Mr. SAVAGE. Would the gentleman from Alaska favor at this moment American military forces training military forces of Libya?

Mr. YOUNG of Alaska. That is not what we are talking about and the gentleman knows I do not favor that.

Mr. SAVAGE. If the gentleman does not favor Libya, how can he justify

training of military personnel from the most fascist regime on the face of the earth?

Mr. YOUNG of Alaska. My good friends, and I will tell you again, we are talking about the role of the Coast Guard worldwide, and that is to rescue those that are lost, regardless of race and beliefs.

I urge you to defeat this amendment regardless of what the gentleman said, defeat this amendment. It should not be in this bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. SAVAGE).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. SAVAGE. Mr. Chairman, I demand a recorded vote and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears. Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1630

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The pending business is the demand of the gentleman from Illinois (Mr. SAVAGE) for a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. YOUNG OF ALASKA

Mr. YOUNG of Alaska. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. YOUNG of Alaska: Page 6, after line 25, add the following new subsection:

(b) The amendment made by subsection (a) shall apply only with respect to payments for benefits under section 707(a) of title 14, United States Code, for months beginning on or after the date of the enactment of this Act.

□ 1640

Mr. YOUNG of Alaska. Mr. Chairman, section 11 of this bill amends section 707(a) of title 14, United States Code, to provide a more equitable level of disability pay for members of the Coast Guard auxiliary who are injured while engaged in duties on behalf of the Coast Guard. This provision would raise the current $600 per month base rate to the equivalent of that which would be received by a GS-9 civil service employee.

The amendment I am proposing addresses a concern that has been voiced by the administration and others since this bill has been reported from the Merchant Marine and Fisheries Committee. During the course of our deliberation on H.R. 2559 the administration expressed no position on section 11.

The concern is over the effective date of this amendment. The concern basically is that this provision be applied to persons currently on the disability rolls only for benefits received prospectively, rather than from the date of injury. Further, I understand that without an effective date provision, provisions such as in section 11 have been interpreted by the General Accounting Office and others as not applying to persons already receiving the benefit. This interpretation has been made even though the legal basis of the payment has been changed and the prior authority has essentially been repealed and would, therefore, no longer be available as a basis for payment. Clearly the provisions of section 11(a) are to be applied to all beneficiaries whether they are those currently receiving the benefit under this provision or those who may receive it in the future.

My amendment insures that the benefits will be paid prospectively and also applied to beneficiaries currently receiving disability payments. Although this may be unnecessary I am offering it so that no question is left regarding the application of this amendment.

I urge the adoption of this amendment so that the men and women of the Coast Guard auxiliary who give of their time voluntarily are adequately covered should they incur disability or death while performing their duties with the Coast Guard.

Mr. STUDDS. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman from Massachusetts.

Mr. STUDDS. Mr. Chairman, this amendment is, so far as we know, without controversy and acceptable on our side.

Mr. O'BRIEN. Mr. Chairman, will the gentleman yield?

Mr. YOUNG of Alaska. I yield to the gentleman who is the real author of this amendment.

Mr. O'BRIEN. Mr. Chairman, I rise in serious support of this amendment.

Mr. Chairman, a Coast Guard Auxiliarist is a volunteer. He receives neither compensation nor credit for retirement purposes. However, while on an authorized "in writing" mission their expenses are covered. If the auxiliarist is injured, the Coast Guard will pay his medical expenses but, if an auxiliarist becomes totally and permanently disabled from an injury sustained while on a Coast Guard mission, the law only allows for a $600 a month disability benefit.

Let me explain the inequity here. If a regular member of the Coast Guard were similarly injured or on an identical mission performing identical duties, the disability compensation would be three to four times greater than the above. This is quite a significant disparity between the two especially when the facts show that the auxiliarists make up approximately 81 percent of the Coast Guard. Obviously, the auxiliarists are relied upon heavily and are its key element in its excellent record in efficiency. There are numerous occasions when a search and rescue case would not have been pursued in a timely manner if it were not for the auxiliary. Much too often these days the Coast Guard has found itself unable to respond with its own personnel and assets because its equipment is too far away, committed to another mission or immobilized for repair and/or maintenance.

Let me state further that in the entire history of the auxiliary organization, only two men have become permanently and totally disabled. If this bill were enacted into law today, it would only apply to them. Their disability incomes would be raised from $7,200 a year to a GS-9, step 1 level or $19,477 a year. It would not provide for any retroactive compensation—only an increase in disability payments from the day the law is enacted.

I do not believe this is too much to ask for an individual who donates his service and equipment to the Government and in turn only asks for compensation at a reasonable rate if and only when he becomes totally and or permanently disabled—a rarity at that.

The Coast Guard is an organization of vital importance to the security of our Nation. The auxiliarists, one of the most outstanding and commendable groups of people in our Nation, do not ask much in return for what they give. Considering the value the public is getting from the auxiliarists, legislation of this sort is but a small token of our appreciation.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alaska (Mr. YOUNG).

The amendment was agreed to.

● Mrs. SCHNEIDER. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Kentucky (Mr. SNYDER) to reduce the authorization of the Coast Guard from $1.9 billion, approved by the Merchant Marine and Fisheries Committee, to $1.8 billion, a reduction of $100 million.

Mr. Chairman, this represents a $47.1 million reduction for operating expenses, a $50 million reduction for acquisition, construction, and improvements, and a $3.3 million reduction for research, development, testing, and evaluation.

These are cuts we can ill afford. In recent years, we have expanded the missions of the Coast Guard. We have mandated the Coast Guard to interdict illegal drugs and the Haitian refugees. We now rely on the Coast Guard to enforce our ocean dumping laws and to clean up oilspills. At the same time, we require the Coast Guard to continue its more traditional missions of search and rescue, ice breaking, promoting safety and security in ports and waterways, and maintaining readiness to function as part of the Navy in time of war.

Yet while mandating that the Coast Guard fulfill these and other responsibilities, we have not provided the Coast Guard with adequate funding. Our scrimping in previous years has forced the Coast Guard to reduce necessary vessel maintenance to the point that some ships are not able to provide their programed number of days at sea. Coast Guard personnel are undertrained for their required tasks and are forced to work excessive overtime.

Mr. Chairman, the $1.9 billion authorized by H.R. 2559 is not extravagant. It reflects a barebones budget which was arrived at after many hearings, debates, and compromises. Anything less will lead to a further deterioration in the effectiveness of the Coast Guard.

Mr. Chairman, I oppose the amendment by Mr. SNYDER to cut the authorization for the Coast Guard from the levels provided in H.R. 2559. I urge my colleagues to oppose this amendment.●

● Mr. MOFFETT. Mr. Chairman, the Coast Guard Research and Development Center in Groton, Conn., has contributed enormously not only to safety within U.S. territorial waters, but also to the environmental integrity of our oceans. The Center made an invaluable breakthrough for environmental protection when it discovered a means of detecting the source of individual oilspills. Before this development, the prosecution of those responsible for such spills was virtually impossible. The Coast Guard facility's method of fingerprinting oilspills has already generated revenue, in the form of fines from violators, equal to twice the $2.6 million cost of the research project itself. The excellent work of the Coast Guard Research Center continues, as it studies means of counteracting the effects of hazardous pollutants in the oceans.

Directives from David Stockman's Office of Management and Budget threaten to eliminate the Research and Development Center in Groton. It would be shortsighted and irresponsible for the Congress to allow this important facility to be dismantled. I urge all Members of the House of Representatives to support the amendment offered by my colleague from Connecticut (Mr. GEJDENSON) which will insure the continued operation of the Coast Guard Research and Development Center.●

● Mrs. SCHNEIDER. Mr. Chairman, I rise in support of final passage of H.R. 2559.

This bill authorizes our Coast Guard to continue its vital services to the American public. These services range from search and rescue missions, which protect human lives, to enforcement of U.S. fishery laws, which protect our valuable fishery resources. We now rely on the Coast Guard to enforce our ocean dumping laws and to clean up oilspills to protect our health and environment.

H.R. 2559 authorizes funding levels which, while parsimonious, will allow the Coast Guard to carry out its missions. This bill also authorizes an increased level of active duty personnel. This will help relieve some of the excessive overtime Coast Guard personnel have been required to work. Coast Guard personnel now average 110-hour workweeks. Finally, H.R. 2559 contains several provisions which will further increase the efficiency of our already cost efficient Coast Guard.

Mr. Chairman, I support H.R. 2559 and I urge my colleagues to do the same.●

The CHAIRMAN. Are there further amendments to the bill?

If not, the question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose, and the Speaker pro tempore (Mr. FOLEY) having assumed the Chair, Mr. BRINKLEY, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2559) to authorize appropriations for the Coast Guard for fiscal year 1982, and for other purposes, pursuant to House Resolution 276, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

Mr. STUDDS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 391, nays 2, not voting 40, as follows:

□ 1650

The Clerk announced the following pairs:

Mr. Mattox with Mr. Jeffords.
Mr. Wright with Mr. Beard.
Mr. McDonald with Mr. Dougherty.
Mr. Russo with Mr. Kemp.
Mr. Shelby with Mr. McKinney.
Mr. Moakley with Mr. Goldwater.
Mr. Frost with Mr. Kindness.
Mr. Garcia with Mr. McCloskey.
Mr. AuCoin with Mr. Conable.
Mr. Hubbard with Mr. Frank.
Mr. Mollohan with Mr. Donnelly.
Mr. Murphy with Mr. Bonior of Michigan.
Mr. Roe with Mr. Dellums.
Mr. Rahall with Mr. Crockett.
Mr. Brooks with Mr. Fithian.
Mr. Biaggi with Mr. Hatcher.
Mr. John L. Burton with Mr. Gray.
Mr. Walgren with Mr. Holland.
Mr. Patterson with Mr. Hartnett.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

□ 1700

Mr. JONES of North Carolina. Mr. Speaker, pursuant to the provisions of House Resolution 276, I call up from the Speaker's table a similar Senate bill (S. 831) to authorize appropriations for the Coast Guard for fiscal year 1982, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

MOTION OFFERED BY MR. JONES OF NORTH CAROLINA

Mr. JONES of North Carolina. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. JONES of North Carolina moves to strike out all the enacting clause of the Senate bill, S. 831, and to insert in lieu thereof the provisions of the bill, H.R. 2559, passed, as follows:

That funds are authorized to be appropriated for necessary expenses of the Coast Guard for fiscal year 1982 as follows:

(a) for the operation and maintenance of the Coast Guard, including expenses related to the Capehart housing debt reduction: $1,450,000,000;

(b) for the acquisition, construction, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto: $425,000,000;

(c) for the alteration or removal of bridges over navigable waters of the United States, constituting obstructions to navigation: $17,500,000; and

(d) for research, development, test, and evaluation: $33,000,000, of which sufficient funds shall be made available to continue in operation a Coast Guard research and development center through the end of the 1982 fiscal year: *Provided*, That the Coast Guard submits its research, development, test, and evaluation program plan, including the continuation or operation of a research and development center, for Fiscal Year 1982 to the Committee on Merchant Marine and Fisheries of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate for approval prior to implementation.

SEC. 2. For fiscal year 1982, the Coast Guard is authorized an end-of-year strength for active duty personnel of 42,224. This end-of-year strength shall not include members of the Ready Reserve called to active duty under the authority of section 712 of title 14, United States Code.

SEC. 3. For fiscal year 1982, average military training student loads for the Coast Guard are authorized as follows:

(a) recruit and special training: 3,660 student-years;

(b) flight training: 118 student-years;

(c) professional training in military and civilian institutions: 655 student-years; and

(d) officer acquisition: 1,038 student-years.

SEC. 4. The Act of March 4, 1915, c. 143, §1 (38 Stat. 1084), as amended (31 U.S.C. 686), is amended by inserting "United States Coast Guard," in the first proviso after "Federal Aviation Administration," and before "and".

SEC. 5. Title 14, United States Code, is amended as follows:

(a) Subsection (a) of section 41a is amended to read as follows:

"(a) The Secretary shall maintain a single active duty promotion list of officers of the Coast Guard on active duty in the grades of ensign and above. Reserve officers on active duty, other than pursuant to an active duty agreement executed under section 679 of title 10, United States Code, retired officers, and officers of the permanent commissioned teaching staff of the Coast Guard Academy shall not be included on the active duty promotion list.".

(b) Subsection (d) of section 41a is amended by striking the word "extended".

(c) Section 41a(b) is amended by striking the period at the end of the second sentence and substituting ", except that the rear admiral serving as Chief of Staff shall be the senior rear admiral for all purposes other than pay.".

(d) Section 290(a) is amended by inserting "or in the position of Chief of Staff" in the second sentence immediately after the words "vice admiral".

(e) Section 711 is amended by striking the first sentence.

(f) Item 711 in the analysis of chapter 21 is amended to read as follows:

"711. Exclusiveness of service.".

(g) Section 93(p) is amended by inserting the following clause after the phrase "of such lines and cables,": "including the installation and use of telephones in residences leased or owned by the Government of the United States when appropriate to assure efficient response to extraordinary operational contingencies of a limited duration,".

SEC. 6. The Act of October 3, 1980 (94 Stat. 1509) is amended as follows:

(a) In paragraph (1) of the first section by striking "$1,248,367,000;" and substituting "$1,337,207,000;".

(b) In section 2 by striking "39,000:" and substituting "39,819:".

SEC. 7. Before the close of fiscal year 1982, the Commandant of the Coast Guard shall carry out a study to determine if the use of cycloidal propulsion systems in appropriate types of Coast Guard vessels will result, at reasonable cost, in operating characteristics that are superior to those that can be obtained with propeller systems. The Commandant shall submit a copy of such study to the Committee on Merchant Marine and Fisheries of the House of Representatives together with his recommendation regarding whether vessels equipped with cycloidal propulsion systems should be considered for future Coast Guard procurement.

SEC. 8. (a) The original and periodic inspections or examinations of a vessel documented or to be documented as a vessel of the United States, both in the United States and in foreign countries, may be delegated to the maximum extent practicable by the Secretary of the department in which the Coast Guard is operating to the American Bureau of Shipping, or similar American classification society, or agent thereof, who may issue certificates of inspection, attesting to compliance with existing Coast Guard regulations, and such other certificates as are essential to documentation.

(b) The Secretary of the department in which the Coast Guard is operating may also contract or enter into agreements with or utilize the American Bureau of Shipping,

or similar American classification society for the review and approval of vessel hull, machinery, piping, and electrical plans.

(c) The Secretary of the department in which the Coast Guard is operating shall report to the Congress on the implementation of the foregoing provisions within 6 months of the date of enactment of this Act and annually thereafter for 3 years. Such report shall include the views of the affected industry on the implementation of these provisions.

SEC. 9. Nothing in this Act shall be construed to authorize or provide funds for removing facilities of Coast Guard Group Port Angeles from Ediz Hook.

SEC. 10. Paragraphs (1) and (2) of section 104 of the Vessel Documentation Act (Public Law 96-594, 94 Stat. 3453) are amended to read as follows:

"(1) an individual who is a citizen of the United States, or an association, trust, joint venture, or other entity capable of holding title to a vessel, under the law of the United States, or any State, territory, or possession thereof, or of the District of Columbia, or the Commonwealth of Puerto Rico, all of the members of which are citizens of the United States;

"(2) a partnership whose general partners are citizens of the United States, and the controlling interest in the partnership is owned by citizens of the United States."

SEC. 11. (a) The third sentence of section 707(a) of title 14, United States Code, is amended to read as follows: "For benefit computation, regardless of pay or pay status, the member is considered to have had monthly pay of the monthly equivalent of the minimum rate of basic pay in effect for grade GS-9 of the General Schedule on the date the inquiry is incurred.".

(b) The amendment made by subsection (a) shall apply only with respect to payments for benefits under section 707(a) of title 14, United States Code, for months beginning on or after the date of the enactment of this Act.

SEC. 12. Subsection (a) of section 475 of title 14, United States Code, is amended by inserting after the first sentence thereof the following new sentences: "The Secretary is also authorized to lease housing facilities for assignment as public quarters, without rental charge, to military personnel who are on sea duty or duty at remote offshore Coast Guard stations and who do not have dependents; and such authority shall be effective of any fiscal year only to such extent or in such amounts as are provided in appropriation Acts.".

SEC. 13. (a) The Congress, in recognition of the heroic efforts that resulted in the saving, under extremely adverse conditions, of the lives of all 510 passengers aboard the motor vessel Prinsendam which caught fire off the coast of Alaska on October 4, 1980, hereby honors and expresses its thanks to the members of the United States Coast Guard, the individuals of the United States and Canadian Air Forces, and the crew of the tanker Williamsburg and all others who participated directly in this valiant undertaking, as well as the crew of the Prinsendam.

(b) The Commandant of the United States Coast Guard shall determine the names and addresses of those individuals honored under subsection (a), and provide the names and addresses to the Clerk of the House who shall convey in appropriate language the appreciation of Congress to each such individual for his or her actions in connection with the Prinsendam rescue.

SEC. 14. Notwithstanding any other provision of law, the fiscal 1982 end of year civilian personnel strength of the Coast Guard shall be at least 5,484.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

A similar House bill (H.R. 2559), was laid on the table.

AUTHORIZING CLERK TO CORRECT SECTION NUMBERS, CROSS REFERENCES, AND PUNCTUATION MARKS IN ENGROSSMENT OF HOUSE AMENDMENT TO S. 831

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that in the engrossment of the House amendment to the Senate bill, S. 831, the Clerk be authorized to correct section numbers, cross references, and punctuation marks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina (Mr. JONES)?

There was no objection.

TO SUBCOMMITTEE ON COAST GUARD—"WELL DONE"

(Mr. JONES of North Carolina asked and was given permission to address the House for 1 minute.)

Mr. JONES of North Carolina. Mr. Speaker, at this time I would like to commend the chairman of the subcommittee, the gentleman from Massachusetts (Mr. STUDDS), for a job well done, as well as other members of the subcommittee, and the ranking minority member and the staff for the hard work they have put into this bill, the results of which the Members just saw on the voting tally. I am very pleased with that which they have done.

GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous matter on the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 4503, FEDERAL WATER POLLUTION CONTROL ACT AMENDMENTS OF 1981

Mr. NOWAK. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation may have until midnight tonight, December 14, 1981, to file the conference report on the bill (H.R. 4503), to amend the Federal Water Pollution Control Act to authorize funds for fiscal year 1982, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

PERMISSION FOR COMMITTEE ON MERCHANT MARINE AND FISHERIES TO HAVE UNTIL 5 P.M., DECEMBER 31, 1981, TO FILE REPORTS ON H.R. 3620, H.R. 3637, AND H.R. 4627

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that the Committee on Merchant Marine and Fisheries may file its reports on H.R. 3620, H.R. 3637, and H.R. 4627 after the House adjourns, and to have until 5 p.m., December 31, 1981, to file said reports.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

REPORT ON RESOLUTION WAIVING POINTS OF ORDER AGAINST THE CONFERENCE REPORT ON S. 884, AGRICULTURE AND FOOD ACT OF 1981

Mr. BEILENSON, from the Committee on Rules, submitted a privileged report (Rept. No. 97-407) on the resolution (H. Res. 303) waiving certain points of order against the conference report on the Senate bill (S. 884) to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes, which was referred to the House Calendar and ordered to be printed.

PROVIDING FOR CONSIDERATION OF H.R. 4700, STANDBY PETROLEUM EMERGENCY AUTHORIZATION ACT OF 1981

Mr. BEILENSON. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 288 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4700) to amend the Energy Policy and Conservation Act to authorize the President to control oil supplies and prices in the event of a severe petroleum supply interruption, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the

chairman and ranking minority member of the Committee on Energy and Commerce, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Energy and Commerce now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and said substitute shall be read for amendment by titles instead of by sections. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions. After the passage of H.R. 4700, it shall be in order to consider, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, the bill S. 1503 in the House, and it shall then be in order in the House to move to strike out all after the enacting clause of the said Senate bill and to insert in lieu thereof the provisions contained in H.R. 4700 as passed by the House.

The SPEAKER pro tempore. The gentleman from California (Mr. BEILENSON) is recognized for 1 hour.

Mr. BEILENSON. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Arizona (Mr. RHODES), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 288 is an open rule which provides for the consideration of H.R. 4700, the Standby Petroleum Emergency Authority Act of 1981. The rule provides for 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce.

The rule further provides that the amendment in the nature of a substitute recommended by the Committee on Energy and Commerce now printed in the bill be considered as original text for purpose of amendment and that the amendment shall be read by titles instead of by sections. In addition, the rule waives points of order against the bill for failure to comply with the provisions of section 402(a) of the Congressional Budget Act which prohibits the consideration of any bill which authorizes the enactment of new budget authority for a fiscal year unless that bill has been reported on or before May 15 preceding the beginning of such fiscal year. The bill requires a report to be prepared by the President for submission to the Congress on an emergency preparedness plan and the waiver is necessary to authorize the preparation of the report since this bill was not reported by the Energy Committee until December 3 of this year.

The rule also provides that upon conclusion of consideration of the bill for amendment, any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. A motion to recommit with or without instructions is also provided in the rule.

Finally, the rule waives points of order against the consideration of S. 1503, the Senate companion measure to H.R. 4700, for failure to comply with the provisions of section 402(a) of the Budget Act and provides that it shall be in order to consider that bill in the House. House Resolution 288 provides that it shall be in order in the House to strike out all after the enacting clause of the Senate bill and to insert in lieu thereof the provisions of H.R. 4700 as passed by the House.

Mr. Speaker, the provisions of this bill replace the Emergency Petroleum Allocation Act which was originally passed by the Congress during the energy crisis of 1973 and which expired on September 30 of this year. The Standby Petroleum Emergency Authority Act requires the President to develop a standby oil allocation plan and grants him the discretion to promulgate mandatory price and allocation regulations any time during the 3-year life of the act. Both types of regulations would be subject to congressional review and would be effective only during periods designated by the President at times of severe petroleum supply disruption.

Mr. Speaker, I know of no controversy on the rule and I would urge my colleagues to adopt the rule so that we may proceed to the consideration of H.R. 4700.

□ 1710

Mr. RHODES. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 288, as the gentleman from California so ably stated, provides an open rule for consideration of H.R. 4700, the standby petroleum authorization, which authorizes a standby program for the allocation and price controls of crude oil and petroleum products. I am absolutely opposed to this rule for the following reasons.

First, I do not believe the House should be adopting rules for the consideration of additional legislation, particularly controversial legislation, at this point in time. Such action will only exacerbate the time constraints facing us at the end of this session and will result in haste and poor legislation. It is not wise, and I do not think it is even proper to consider a rule under these considerations.

Further I am opposed to the legislation which this rule allows to be considered. Previous experience with petroleum allocation and price controls, twice tried and twice failed, has demonstrated that rather than insuring equity and supply, they make a difficult situation worse by locking the Nation into a bureaucratically imposed, inflexible system.

Moreover, the existence of such a program, even on a standby basis, tends to make the Nation less prepared to deal with a disruption in supply. These controls would act as a strong disincentive for conservation and oil stockpiling, and the securing of long-term contracts between producers and independent suppliers which, along with the stragetic petroleum reserve, are the most effective means of protecting the Nation against future energy supply disruptions.

H.R. 4700, by maintaining an elaborate system of entitlements to priority allocations of oil, would benefit special interest groups while the average American consumer waits endlessly in gasoline lines.

Standby controls scare people. They scare them into raising prices because they feel that the standby controls might be someday imposed and they want to have a price base as high as possible just in case they will be imposed.

So, a standby price control system is actually a self-fulfilling prophesy. It causes prices to rise, which then makes it seem necessary to impose some sort of Federal action. Allocations and price controls are not in the best interests of the Nation, and they should not be undertaken, certainly not at this time.

Also, adequate authority already exists under the Energy Policy and Conservation Act and other laws to deal with energy emergencies.

Mr. Speaker, we do not need additional legislation on our agenda at this time, and I do not believe we need the legislation in question. Consequently, I urge a no vote on this rule, and as one member of the Rules Committee, I can serve notice right now that I do not intend to support any more rules unless they are on conference reports or on some legislation which obviously has a chance to become law, or on which there is some emergency involved.

In past years the Rules Committee would close down at an appropriate time prior to the adjournment on sine die of any session of the Congress. That was a very sensible rule, and we need to go back to it. I sincerely hope that the chairman of the Rules Committee and our leadership on the majority side will take my advice, for whatever it is worth, and be certain that if other rules are called up, they will be opposed. Loading up our agenda at this time is not a responsible way to proceed.

Again, Mr. Speaker, I urge a "no" vote on this rule.

Mr. Speaker, I have no further requests for time, and I reserve the balance of my time.

Mr. BEILENSON. Mr. Speaker, I yield 2 minutes for the purpose of debate only to the gentleman from New York (Mr. OTTINGER).

Mr. OTTINGER. Mr. Speaker, I rise in support of the rule and in support of the legislation. The need to have emergency legislation in the event of a cutoff of oil is urgent, it is vital. We certainly ought to act on it before we leave, because at any time an oil supply emergency could well take place. Indeed, we are facing a very great prospect of a cutoff of Libyan supplies at the present time. To say that we are going to leave a severe energy supply emergency to the marketplace and not have any tools in hand to be able to cope with a supply emergency is just foolish.

The price of oil in the case of a cutoff by one or more major suppliers would skyrocket, and we would face a situation where critical users within our society might well not have the supplies of oil that they need to keep hospitals going, to keep essential public services going, to keep our transportation system going, to keep our farms running and producing food and for many other vital services within our society.

The legislation before us is the mildest legislation one could imagine. It gives the President maximum flexibility, but it does require him to address the issue.

Mr. RHODES. Mr. Speaker, will the gentleman yield.

Mr. OTTINGER. I will be glad to yield.

Mr. RHODES. I just want to ask if it is not the situation that in existing law, under emergency powers, the President can act to allocate scarce supplies and control?

Mr. OTTINGER. I think not. The gentleman from Indiana will be able to address that question more directly.

Mr. RHODES. Would the gentleman yield to the gentleman from Indiana for that purpose?

Mr. OTTINGER. I yield.

Mr. SHARP. Mr. Speaker, I appreciate the gentleman yielding. The fact is that there are a number of authorities on the books. The difficulty is, they are not clear, comprehensive, and coherent, and it is very likely that if the President tried to act under some of these authorities, he would find himself in court challenged by various private interests.

The SPEAKER pro tempore. The time of the gentleman from New York has expired.

Mr. BEILENSON. Mr. Speaker, I yield 3 additional minutes to the gentleman from New York.

Mr. OTTINGER. I thank the gentleman for his generosity.

As I understand it, there is no provision at the present time for either allocation of supplies or for price controls. I find fault with this legislation because I think there ought to be some standby provisions which would not have to go into effect only upon arrival of emergency conditions, and which this President is clearly not inclined to use except in the severest of emergencies, but the standby authorities and requirement that these matters be thought through, ought to be in place.

I would like to endorse very strongly the separate views that were provided in the report on this legislation by the gentleman from Connecticut (Mr. MOFFETT) and the gentleman from Massachusetts (Mr. MARKEY), in which they point out their concern that H.R. 4700 provides authorities for use only at a time of severe petroleum supply disruption. There are many things that ought to be thought out in advance that could prevent a crisis if they were put into effect, such as refinery controls, inventory management, limited crude sharing. These could solve supply problems before public panic hits, and could forestall more serious disruptions, and kinds of price escalations that inevitably come.

H.R. 4700 provides too little guidance to the President as to what measures should be included in the contingency plan. The only requirement is that the emergency plan include a crude sharing measure. It could ignore measures such as inventory controls—labeled by the General Accounting Office as the single most important emergency measure—standby price and allocation controls, required by the Senate-passed bill; antihoarding provisions; coordination with existing authorities; information collection and a number of other matters, one of the most important of which is some kind of protection for dealers to be provided nondiscriminatory protection in the event of a shortage. Unlike the Senate bill, H.R. 4700 does not include language requiring that refiners receiving protection provide nondiscriminatory treatment to their customers. This language is critical in assuring that retailers and end users are treated fairly. It is exceedingly important.

□ 1720

I understand it is the intention of the gentleman from Indiana (Mr. SHARP) that these matters are covered in this legislation. I hope some of the more explicit Senate protections will be adopted in conference.

I just would like to express my hope that the President in implementing this legislation, will, indeed, follow-through thoroughly and carefully in doing advance planning to cope with a future energy supply emergency.

At the bottom line, I think this is the minimum legislation that is required and that it is tremendously urgent that we pass it.

Let me give my colleagues a word of due warning: The chance of an oil supply emergency in the next few years is great. Any Member who votes against this limited authority can expect to be blamed, in the event of emergency for failure to authorize the emergency planning necessary to cope with the emergency.

Mr. BEILENSON. I thank the gentleman from New York for his supporting comments. I would point out to our colleagues a very similar bill, S. 1503, was passed by the other body about 6 weeks ago by a vote of 85 to 7, so there is every likelihood, apparently, of a conference committee report being reported back to this House later this week.

I have no further requests for time under the resolution.

Mr. RHODES. Mr. Speaker, I yield myself 1 additional minute.

Mr. Speaker, I take this minute to quote from a letter of July 23, 1981, from the Office of the Secretary of Energy signed by the Honorable James B. Edwards. He says these words:

> The administration believes that in the event of future energy supply interruptions it possesses sufficient authorities, without resorting to price and allocation controls, to respond rapidly and effectively if some level of Federal intervention is necessary.

Again I repeat, in my opinion the worst possible response would be allocations and price controls. I feel that the Secretary of Energy and the President of the United States probably agree with that.

The administration is against this bill. There were various minority reports against the bill. It is extremely controversial. In my opinion it should not have been brought up but since it is I hope that we may find in our hearts to vote no on the rule and not waste the time of the House in debating a bill which will not become law.

Mr. Speaker, I yield back the balance of my time.

Mr. BEILENSON. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. RHODES. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 272, nays 113, not voting 48, as follows:

[Roll No. 361]

□ 1750

The Clerk announced the following pairs:

Mr. Lantos with Mr. Dougherty.
Mr. Wright with Mr. Badham.
Mr. AuCoin with Mr. Kemp.
Mr. Brooks with Mr. McKinney.
Mr. Crockett with Mr. Shuster.
Mr. McDonald with Mr. Marriott.
Mr. Moffett with Mr. Kindness.
Mr. Patterson with Mr. Hartnett.
Mr. Walgren with Mr. McCloskey.
Mr. Rose with Mr. Davis.
Mr. Murphy with Mr. DeNardis.
Mr. Williams of Montana with Mr. Beard.
Mr. Moakley with Mr. Conable.
Mr. Roe with Mr. Fithian.
Mr. Waxman with Mr. Frost.
Mr. Rahall with Mr. Downey.
Mr. Mattox with Mr. Hubbard.
Mr. Garcia with Mr. Gray.
Mr. Russo with Mr. Frank.
Mr. Shelby with Mr. Hatcher.
Mr. Sabo with Mr. Holland.
Mr. Biaggi with Mr. John L. Burton.
Mr. Donnelly with Mr. Dellums.

Mr. MADIGAN and Mr. LOWERY of California changed their votes from "yea" to "nay."

Mr. EMERSON, Mrs. SCHNEIDER, and Mr. WEBER of Minnesota changed their votes from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

(Mrs. MARTIN of Illinois asked and was given permission to address the House for 1 minute.)

Mrs. MARTIN of Illinois. Mr. Speaker, I was unavoidably detained this morning and therefore missed rollcalls No. 357 and 358. Had I been present, I would have voted "aye" on both rollcalls.

STANDBY PETROLEUM EMERGENCY AUTHORITY ACT OF 1981

Mr. SHARP. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4700) to amend the Energy Policy and Conservation Act to authorize the President to control oil supplies and prices in the event of a severe petroleum supply interruption, and for other purposes.

The SPEAKER pro tempore (Mr. FOLEY). The question is on the motion offered by the gentleman from Indiana (Mr. SHARP).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 4700, with Mr. SMITH of Iowa in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Indiana (Mr. SHARP) will be recognized for 30 minutes, and the gentleman from Illinois (Mr. CORCORAN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Indiana (Mr. SHARP).

Mr. SHARP. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, on September 30, 1981, the Emergency Petroleum Allocation Act of 1973 (EPAA) expired. With its expiration, the President lost his broad standby authority to impose oil price or allocation controls in a severe oil import emergency.

The purpose of H.R. 4700 is to provide flexible new standby authority to help meet an oil crisis.

The provisions of H.R. 4700 grant discretionary, emergency price and allocation powers to the President. Controls on crude oil and refined products could be imposed only by the Presi-

dent, only during a severe oil import crisis. Controls could last only for 150 days at most. Congress enjoys a one-House veto review over any Presidential decision to use controls. General guidelines for the President's discretion are set out, urging consideration of oil needs of vulnerable sectors such as agriculture, home heating, energy production, independent marketers, and refineries, transportation, and public services like fire and police protection.

The President could not use these standby powers to impose coupon gas rationing, or to boost oil prices with surcharges, duties, and fees. And he cannot allocate certain oil stockpiles held by end-users.

The bill's standby authority to allocate oil expires on December 31, 1984.

Finally, a new drawdown plan for the strategic petroleum reserve (SPR) must be submitted in 6 months. And Congress would gain one-House veto review power over any future drawdown of SPR oil.

Certain international energy program authorities would also be extended until 1985.

By enacting suitable legislation now, during the current worldwide glut of oil, the Congress can act while stocks are relatively high, and passions are low. And there is time for us to make preparations.

Mr. Chairman, there are a number of reasons why we ought to act. First, the United States remains extremely vulnerable to an oil import disruption and will remain vulnerable for the foreseeable future.

Second, existing authorities do not provide clear, comprehensive, and flexible powers to control oil supplies if they are needed to prevent catastrophic consequences for agricultural producers; oil-dependent electric utilities; essential public services such as hospitals, police, and fire protection; and some refineries; the needs of home-heating oil consumers; and other vulnerable sectors.

Third, the use of comprehensive Federal authorities could prevent a maze of conflicting responses to a severe crisis by 50 different States.

Fourth, broad, discretionary, and flexible legislation could be restricted by the President to only those severe disruptions where some action was clearly warranted.

Fifth, standby controls, though hardly an ideal solution to an extended crisis, could give the President an extra option in an uncertain and dangerous world: In light of the other less-than-ideal options—such as complete reliance on the free market, military intervention in the Mideast, or reliance on limited and declining private stocks or on a strategic petroleum reserve that is about 70 percent empty.

Mr. Chairman, this is not intended to the be-all and end-all of an emergency response program. Our Government has available to it the ability to require fuel switching, the ability to engage in demand restraint or conservation measures, the ability to engage in various social ordering mechanisms.

Mr. Chairman, this is only one of the possible arrows that is necessary in the Presidential quiver.

While the EPAA has expired, there has been no fundamental change in the underlying circumstances that led to the EPAA—the significant dependence of the United States on large quantities of imported oil, and the continuing turmoil in the Mideast, which remains a major supply of oil for both the United States and its heavily import-dependent allies in Japan and Europe.

□ 1750

Despite the commendable recent declines in U.S. oil imports, the Nation still imports about one-third of its total petroleum needs. During October of 1981, for example, 5 million barrels per day out of a total U.S. consumption of 15.8 million barrels per day were imported. And this Nation's chief allies remain far more dependent on Middle Eastern oil and reinvested petrodollars than is the United States. The result is that under current oil sharing agreements among the United States and its allies, a large shortfall in U.S. imports could even be magnified as the remaining uninterrupted U.S. imports, and even domestic U.S. oil supplies, are allocated abroad to alleviate worse shortages in Japan and Europe.

Finally, as the administration reported to Congress and testified during hearings on this measure, a severe disruption "remains a very likely possibility * * * there is a substantial chance that a large cutoff will occur sometime in the next decade * * * and allocation measures could be warranted in a severe crisis to ensure that essential functions and services continue"—of the administration.

Mr. Chairman, this legislation has garnered widespread support. A similar measure has passed the U.S. Senate, the other body, S. 1503, by a vote of 85 to 7.

The full Energy and Commerce Committee passed the measure before us by a 2-to-1 vote.

It has won bipartisan support, Mr. Chairman, and I urge my colleagues today to adopt the measure.

Mr. HUCKABY. Mr. Chairman, will the gentleman yield?

Mr. SHARP. I would be happy to yield to the gentleman from Indiana.

Mr. HUCKABY. Mr. Chairman, I wonder if the gentleman could explain to me what is the significant shortfall and who determines when a significant shortfall occurs?

Mr. SHARP. The President will determine the shortfall; however, his implementation will not occur without the approval of Congress. There will be a 15-day delay in which the Congress has the right to veto if he decides to implement. If it is a situation in which we realize that he must act immediately, a concurrent resolution could be passed by Congress and avoid the 15-day delay.

The problem is, no one has been able to come up with a trigger mechanism that objectively can be determined as to what the situation actually is in the marketplace and therefore write it into law and say that at 2 million barrels or 1 million barrels a day you shall have such authority. Most of the people who testified before our committee recommended that it ought to be at the discretion of the President, with a check on that power in the hands of the Congress.

Mr. HUCKABY. But surely the gentleman must have some parameters in mind. Is the gentleman talking in the neighborhood of 5- to 20-percent shortfall?

Mr. SHARP. Well, I think any time you get into a million barrels of oil a day shortage, you are beginning to have problems in this country.

Now, the fact is, however, you may have problems in a region and that is one of the reasons to leave this to the President's discretion. It is quite possible that all the President would ever want to do under this act is issue one order to a major oil producer to supply an independent refiner in a part of the country that is not, for one reason or another, being served; so it might be a very limited response to a situation that one would not want to develop into a major oil crisis.

Mr. CORCORAN. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, let me say at the outset, I am in strong opposition to H.R. 4700. During the course of this debate I think that the opponents of this legislation will be able to spell out in considerable detail the reasons why we think that this proposal, emanating from our committee, is ill advised.

First of all, in that respect, I would like to call the attention of the Committee of the Whole House to the current figures with respect to the U.S. dependence on foreign oil. We checked this earlier this afternoon with the Department of Energy in order to be as current as we possibly could be. Their data indicated that in 1981 we are relying on foreign imports for 33 percent of our oil. In contrast, during 1977 we had to rely on foreign imports for 47 percent of our oil. OPEC oil is now accounting for only 20 percent of our total oil demand. And, furthermore, whereas OPEC oil accounted for 72 percent of our imported oil in 1977, OPEC oil now accounts for only 62 percent of our imported oil.

The point is that the recent trend certainly indicates that the United States is becoming less and less reliant on foreign imported oil, especially OPEC oil; so those who would justify this legislation on the grounds that we have to have it in order to counter the dependence that we had at one time, on OPEC oil, can no longer, in my judgment, develop the facts to support their case.

Second, with respect to the general legislation, I want to make one comment.

The impression that this legislation has created, and I want to commend the sponsors for the superb lobbying job they have done on this, is that we are going to give the President of the United States the authority to develop a plan because we have to have an emergency preparedness plan in the event of a shortage; but the facts are quite otherwise and those who will take the time to read H.R. 4700 will find that we are not just asking the President to develop a plan and send that so-called emergency preparedness plan to the Congress for approval, we are not asking the President simply to send to us his plan and be in a position through various procedures and evaluation stages to comment or perhaps change that plan, but rather, we are telling the President of the United States that in the event of a shortage, there is only one plan, there is only one option that you can exercise and that is the option that we have tried before, that is the option of price and allocation controls. I think it is instructive in this regard to call to the attention of the members of the committee section 273 of the legislation, because it spells out all the things the President cannot exercise in developing that emergency preparedness plan. So, in fact, what we are saying is that the U.S. response to a shortage has to be price and allocation controls.

Mr. Chairman, we have tried that before. The expired Emergency Petroleum Allocation Act with its release on price and allocation controls made a good deal worse the shortages that we had back in 1973 and 1974 as well as in 1979. We do not need to repeat those mistakes.

I would hope that the members of the committee would reject H.R. 4700.

Mr. Chairman, I yield 5 minutes to our distinguished friend, the gentleman from Ohio (Mr. BROWN) who will give us the details about what went wrong in the EPAA and what we do not want to see happen again.

Mr. BROWN of Ohio. Mr. Chairman, as my colleagues know, the Emergency Petroleum Allocation Act of 1973 expired on September 30 of this year; and with it expired the authority of the President to control the prices and the allocation of crude oil and petroleum products: The tried-twice and failed-twice ideas of the past. Controls on prices and on allocations were in effect during both the 1973 oil embargo and during the shortfall in 1979 precipitated by the Iranian revolution. Both times, the evidence now clearly shows, these Federal regulations made matters worse.

But more importantly, the expiration of the EPAA will come at a time when this Nation is far more prepared to weather an energy emergency than ever before. Let me explain.

Since this administration took office, the strategic petroleum reserve has been filled at an aggressive rate with a record of 16 million barrels of oil put in the fill during the month of May 1981 alone, an average of 513,000 barrels a day that month. The SPR office at DOE has informed me that since President Reagan took office the average daily fill has been between 300,000 and 400,000 barrels a day, not as great as in May, but a far cry from the previous rate of fill during the previous administration, which only under congressional pressure brought the rate of fill from zero barrels a day to 100,000 a day.

We did not, however, have a strategic petroleum reserve when we wrote the EPAA. So perhaps when we wrote the EPAA we had the excuse of, if not ignorance, then innocence, or if not innocence, then an overconfidence in this Congress and in the Federal Government. We do not have those excuses today. We ought to be wise enough now to not make the same mistakes we made before.

How can I be so sure that any bill, no matter how simple, is predestined to evolve into another complicated EPAA, with a long and growing list of priorities? Because that is exactly what happened to EPAA itself and is what has happened to this bill in the U.S. Senate and has happened here.

Mr. Chairman, if you and my colleagues would permit a short history of how we first got into price and allocation controls, that might shed enough light to keep us out of the dark this time.

During the Arab oil embargo in 1973, the price controls on petroleum, imposed under the wage and price freeze pursuant to the Economic Stabilization Act of 1970, turned a modest decrease in world oil supplies into a major product distribution crisis in the United States because prices were unable to rise under the price controls, a shortage of product, especially motor gasoline, developed. This shortage led to long gasoline lines and new legislation, the EPAA. Since the price freeze authority had failed, it was believed by many that a scheme of general price and allocation regulations would solve a future crisis and also help to keep consumer prices low.

□ 1800

Mr. Chairman, the EPAA began with the bill, S. 1570, introduced by Senator JACKSON on April 13, 1973, entitled "The Emergency Fuels and Energy Allocation Act of 1973."

It was four pages short.

It granted broad discretion to the President to allocate crude oil and fuels but only when he declared that an "extraordinary shortage or dislocation" existed or was imminent.

It contained not one priority classification although it stated that such protection was within the discretion granted to the President.

It contained no price control authority.

It was due to expire September 1, 1974.

That bill grew into what was passed in November 1973, the Emergency Petroleum Allocation Act, the EPAA. And the EPAA contained a certain section chock full of priority classifications, section 4(b)(1). I could read off this list, but I know my colleagues are familiar enough with all the various interest groups which won—or did not win—a priority over other users.

But let me point out that the one major group not provided for is the average American automobile driver.

The EPAA, as originally passed, did not work as we planned. The shortages, the gasoline lines, and the frustrations of our constituents were not being remedied, they were being compounded. We could not, evidently, legislate the shortages to fit our preconceived plan. But that did not stop us.

So we amended the EPAA time and again.

We prevailed upon the executive branch, under both Republican and Democratic administrations, to improve its regulations. Create a new department. Create the Office of Hearings and Appeals.

Mr. Chairman, I want to show you just exactly how successful we were in keeping a simple piece of legislation extremely simple. From that four pages, Mr. Chairman, we have the result of the legislation that you see before you in terms of regulation, regulations heaped upon regulations in the years that followed.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. BROWN of Ohio was allowed to proceed for 2 additional minutes.)

Mr. BROWN of Ohio. Mr. Chairman, the regulations poured out of the Federal Government. And the appeals from our citizens poured into the Government. Middle-class America was sitting in gas lines, but K Street in Washington was swarming with Energy lawyers. The Economic Regulatory Administration received 110,000 applications for motor gasoline allocation adjustments.

These volumes consist of 80,000 pages of hearings and appeals decisions—only a fraction of the total of 33,000 decisions. But all of this only indicates the burden on the Federal Government as it attempted to adjust these regulations to the real world.

Now, bear in mind this was a four-page piece of legislation. The Office of Hearings and Appeals case files of applications for exception relief and enforcement cases fills 27 standard 5-drawer filing cabinets; 9 larger shelf cabinets; and 573 record boxes. Most of this paper was prepared by private attorneys at great expense to the applicants—thousands of whom were gasoline station dealers.

And I might say there is a considerable expense to the taxpayers in all this, because all that had to be dealt with by the Federal Government.

From the relatively concise, discretionary program of the original EPAA—which would be temporary, only temporary—came reams of regulations, 8 years in existence.

And somehow, over the course of 8 years, the emergency stayed with us. Why? The reason was the EPAA itself.

Mr. Chairman, the original EPAA I voted for. I even signed the conference report. I crossed my fingers, but my sincerity did not help. I am embarrassed that I did that.

I am firmly convinced that we cannot reconsider the EPAA without recreating the EPAA.

And I would like to give my colleagues some advice. Why do you not save yourself the future embarrassment of having to do what I do: Expiate your guilt by showing what happens when we are goodhearted about trying to regulate things and just simply vote against this turkey. Unless we want to bring back the gasoline lines of the Carter energy program, vote down H.R. 4700. And if you do, you will save all this paperwork and all this expense and all those lawyer fees and all those taxpayer bills.

Mr. Chairman, I am opposed to the bill.

Mr. CORCORAN. Mr. Chairman, I yield 7 minutes to the gentleman from Texas, (Mr. COLLINS).

Mr. COLLINS of Texas. Mr. Chairman, I am opposed to H.R. 4700 because it is an irrelevant exercise in legislative obsolescence. The conditions that prompted passage of the Emergency Petroleum Allocation Act in 1973 have disappeared; conservation has caused U.S. oil imports to fall 19 percent between 1979 and 1980 and is much more evident in the market than in the 1970's; and the strategic petroleum reserve, a resource only contemplated in the early 1970's, is being filled at the rate of 300,000 barrels of oil per day. Most importantly, our constituents do not want a repeat of gasoline lines and regulation-induced shortages that are the inevitable accompaniments of price and allocation controls, which only make a bad situation worse. Let us examine the case against passage of a replacement petroleum price and allocation statute.

As my colleagues argue in our minority views on H.R. 4700, this bill is actually a recreation of EPAA. There are two central problems with this kind of price and allocation regulation. First, price controls do not allow prices to react by rising and falling in response to supply. Indeed, price controls imposed pursuant to the Economic Stabilization Act of 1970 provided the original price cap on petroleum that led to artificial shortages of gasoline and to calls for passage of the EPAA. The architects of the new price and allocation statute reasoned that since price controls had created shortages, the solution would be Government allocation of supplies. This leads to the second major problem with H.R. 4700: its proclivity to grow into a statutory monster that feeds on big government and voluminous regulations.

We are told that this legislation is limited—it will expire at the end of 1984, it is short, broad discretion is given the President, and it does not provide for gasoline rationing. In fact, we heard these same arguments about EPAA, which grew into a statute that generated applications for relief and enforcement that fill 27 filing cabinets, 9 shelf cabinets, and 573 record boxes. What would have otherwise been a relatively temporary fuel shortage turned into an 8-year crisis, ended only when the President lifted the final controls on oil in January of this year.

It can be argued that H.R. 4700 will be worse than EPAA. EPAA did not start out with priority classifications when it was introduced as S. 1570 by Senator JACKSON in September 1973. H.R. 4700 literally begins with supply prioritization by mandating that regulations promulgated under it are to be consistent with the 4(b)(1) guidelines of EPAA, which sets out what national activities and industries are to receive priority in the supply of fuel needs. Again, as we point out in our minority views, 4(b)(1) places pharmaceutical and the utility industry over national defense. Such a prioritization is good for nothing except market distortion at the pleasure of political expediency.

Another reason for my opposition to this legislation is that the original bill passed from the Fossil and Synthetic Fuels Subcommittee was weakened in the full committee by adoption of a substitute. The substitute locks the President into the development of emergency contingency plans within 180 days of passage of the act. The promulgation of a specific plan evidences an a priori intent not to rely on the market during an emergency and weakens the executive's discretionary ability to respond to a crisis with the maximum amount of flexibility.

The substitute also requires a crude oil sharing plan that must be designed by the President. An oil sharing plan is a recreation of the old entitlement program that led to the small refiner bias and amounted to a bailout of inefficient refineries in the name of equitable access to crude oil. It is true that an oil-sharing plan is the logical extension of passage of EPAA—like legislation, because price controls create refiners who have access to price-controlled domestic crude while others would have to buy oil on the highly prices world market. This is an excellent example of the slippery slope Congress enters upon when it passes price control legislation. When one part of the market is manipulated, for example, oil price controls, another has to be manipulated to fix the distortions of the first, for example, crude oil sharing. The result is bigger Government, more regulations, and exacerbated shortages and fuel lines.

Having looked specifically at H.R. 4700, I want to examine and expand on some other generic arguments about why replacement legislation is not needed.

The Department of Energy, in a report published in July 1981, analyzed a number of domestic and international energy emergency preparedness issues in preparation for debate on H.R. 4700. The conclusion was that a free market during supply emergencies is the best mechanism for national economic adjustment to a serious interruption because "(c)onservation, fuel switching, and domestic oil production will be maximized as millions of individuals and firms respond to rising oil prices. These decisions can best be made on a decentralized basis at the grass roots level by the millions of consumers and producers who are most knowledgeable about their own circumstances and the alternatives available." I agree with DOE's conclusion completely. Look now at eight good reasons new law is not needed.

First, there is adequate statutory authority to allow the President to respond to an emergency. Pursuant to the Defense Production Act, the President can allocate oil supplies for the purposes of national defense. Demand restriction, increased domestic production, fuel switching, fuel efficiency increases, and private stock drawdown incentives are all provided for by the following authority: Sections 106 and 202 of the Energy Policy and Conservation Act (EPCA), title II of the Emergency Energy Conservation Act of 1979, sections 202 (c) and (d) of the Federal Power Act, section 404 of the Powerplant and Industrial Fuel Use Act, the waiver authority under section 110(f) of the Clean Air Act, and

section 473 of the Internal Revenue Code.

Second, petroleum supply and demand patterns have changed. When price controls were imposed on crude oil during the first major supply interruption of the 1970's, imports began to rise: between 1974 and 1979, total imports rose by one-third even though supplies from Alaska provided 1.2 million barrels a day. Compare this with present market conditions. Total U.S. energy production rose 1.3 percent in 1980 from 1979, while our energy use in 1980 dropped 3.8 percent to the equivalent of 35.9 million barrels per day from 1979's equivalent of 37.3 million barrels per day U.S. oil consumption dropped 8 percent from 18.5 million barrels per day in 1979 to 17 million barrels per day in 1980, which represents the largest 1-year decline in history. Further, our oil imports dropped by over 19 percent from 8.4 million barrels per day in 1979 to 6.8 million barrels per day last year—another historic record.

Third, the strategic petroleum reserve: The SPRO was not around to a significant extent during the three significant shortages of the 1970's. Now, SPRO is being aggressively filled at over 300,000 barrels per day. By the end of this year, the size of SPRO will have doubled to over 220 million barrels of crude. We currently have over 200 days worth of SPRO supplies—a margin of safety that will continue to grow.

Fourth, development of private stocks: Business and industry should not rely on Government to bail them out of a supply emergency for which they could have planned. Price and allocation controls are major disincentives to private preparation. The Economic Tax Act, passed last summer, permits 5-year depreciation and investment tax credit treatment for petroleum storage facilities. Industry can, does, and should take part in preparing for an emergency.

Fifth, natural gas deregulation: Natural gas that is half its value under the Natural Gas Policy Act of 1978 is inefficiently used in current energy markets. Absent deregulation, we will spend $27 billion in 1981 dollars for foreign oil by 1985 that could be saved. DOE suggests that oil imports can be reduced between 530 to 790 million barrels per day in 1983, 130 to 370 million barrels per day in 1985, and 0.4 to 1.8 billion cumulative by 1995, the range contingent upon the policy scenario chosen. The entire economy could increase its efficiency by $5 billion between now and 1985 with natural gas deregulation. The energy security benefits of deregulation are much greater than could be expected through price and allocation controls on oil; it is better to conserve via the market than to allocate through the Government.

Sixth, interruptions inevitably lead to problems. Because oil is so significant to our economy and way of life, a serious interruption cannot help but result in losses of output, employment, and income. The mistake must not be made in thinking such dislocations can be avoided through Government programs. Congress must recognize the inherent vulnerability of any industrialized economy when forced to adjust to sharp increases in oil prices and allow the market to perform its natural allocative functions.

Seventh, legislation exacerbates the problem. Price controls preempt price signal functions which leads to allocation regulation which in turn insulates existing purchasers from the pressures of competition. Shortages, and 4(b)(1) like provisions are the inevitable consequence. In short, the market is messed up.

Eighth, economic policy can blunt inflationary impact. Proponents of replacement legislation argue that price controls are essential to prevent inflationary price flyups. It has already been shown that price functioning is essential to connect supply with demand and encourage conservation and efficient allocation of existing supplies. The July DOE study referenced earlier suggests that the rate of inflation during an interruption will be largely determined by monetary policy. As this administration adheres to a steady money supply growth rate to contain inflation, this same policy during an oil shock should prove prudent. A steady money supply growth rate policy—steady growth in nominal income—in an emergency will allow oil prices to escalate such that inflation will be somewhat lower under a market strategy compared to price and allocation controls.

In summary, this Congress should not enact a statute that is no longer relevent in contemporary energy market conditions where the President already has the essential statutory authority to allocate crude for national security reasons. I would urge my colleagues to vote against passage of H.R. 4700.

Mr. MOFFETT. Mr. Chairman, will the gentleman yield?

Mr. COLLINS of Texas. I yield to the gentleman from Connecticut.

Mr. MOFFETT. Mr. Chairman, just briefly, the gentleman, as usual, has made a good case for getting the Government out of our lives. I wonder if he would agree that if we really want a free market in energy, we should take back these tax breaks we just gave of $12 billion to the companies, on top of the other tax breaks they have?

Mr. COLLINS of Texas. Mr. Chairman, I would tell the gentleman, and I certainly think we should review taxes, and one we both would agree on is the windfall profit tax.

Mr. MOFFETT. I am talking about the breaks we have given them.

□ 1810

Mr. COLLINS of Texas. I would say that the biggest problem in the energy business is taxation, and taxation is certainly, as Chief Justice Marshall said, "taxation is the power to destroy." We have the most absurd tax in the energy business where we tax American oil 70 percent and OPEC zero percent. If we would really move to get rid of that taxation—I thank the gentleman from Connecticut for raising the issue of taxation.

Mr. SHARP. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Iowa (Mr. TAUKE).

Mr. TAUKE. Mr. Chairman, I rise in support of the legislation before us. I believe it is very important that we recognize why this legislation is needed. First, this legislation is needed because sometime in the foreseeable future there will apparently be a shortage of petroleum products in the United States. During the many hearings before our subcommittee, the message came through loud and clear, time and again, that although we have improved our energy situation, the fact remains, nevertheless, that we are likely to face a very serious oil shortage sometime in the next several years.

The gentleman from Illinois and others have suggested that we really do not have a problem today because we are not importing as much oil as we once did.

I am sure the gentleman is aware, as I am, that one of the reasons imports are down is because we have a serious economic recession in the country. I have enough faith in the Economic Recovery Act, which the gentleman and I support, to know that there will be economic recovery in the next year, and that will cause our demand for energy to increase. I think it would be a mistake for us to hide behind the temporary security that we find in the world oil glut and the temporary economic downturn of this country. Despite the rosiness of the moment, we are likely to experience another energy shortage.

The second reason we need this act is because we ought to prepare now, rather than later, for that shortage. I can assure the Members that if a shortage occurs, there will be legislation enacted. The question is if we are going to enact that legislation now, when we have time to think it through carefully, or if we are going to wait until we have a crisis on our doorsteps, with gasoline lines in our districts and farmers in the fields without fuel, and before we enact legislation. I think it makes a great deal of sense to attempt to try to deal with this potential prob-

lem now, before there is a crisis situation.

Although there has been a lot of discussion about all of the authority the President has, time and again in committee, when we asked the witnesses what law or statute it was that gives the President the authority to do the things he would need to do in an emergency, we were unable to get clear answers. While there are a number of potential laws on the books that could be called upon in an emergency, it is relatively clear that none of these grant explicit authority to the President, and therefore his actions would undoubtedly be challenged in the courts.

Third, I think we need to recognize that this legislation is designed to prevent minor shortages from becoming major shortages. The problem we have had in the past is that we have allowed small regional shortages to develop into major national crisis. That certainly was the case in 1979 when we supposedly had a shortfall of Iranian oil but in fact we had almost as much oil coming in as during the previous year. But the problem was, we allowed panic and hoarding to set in.

This legislation is designed to prevent that kind of occurrence from happening again by insuring that the small regional shortage does not become a major national shortage.

Fourth, this legislation will prevent State controls from being enacted. For whatever reason, the opponents of this legislation seem to want to forget that if we do not enact this kind of legislation each State will be able to enact its own price control law, its own allocation law, any kind of law that it wants to regulate petroleum products. That would cause chaos in the marketing of petroleum products, and I think we should recognize the need for some kind of national legislation to prevent that.

This bill is not the EPAA revisited. I think virtually all of us recognize the failings of the EPAA, and none of us is anxious to reenact that legislation. This measure is different; this legislation relies on the free market. This bill has no permanent controls on price or allocation. This legislation prevents allocation and price controls by giving us the ability to use the strategic petroleum reserve and use crude oil sharing to prevent those small shortages from becoming major ones.

This legislation has no binding priorities. There is guidance, but no mandate as to where the oil will flow.

Finally, this legislation gives maximum flexibility to the President. Ronald Reagan is not known as a President who is going to hang his hat on Government controls and use them excessively. This legislation expires at the end of his term. For all these reasons, I urge the Members' support for this bill.

Mr. SHARP. Mr. Chairman, I yield 1 minute to the gentleman from Hawaii (Mr. HEFTEL).

Mr. HEFTEL. Mr. Chairman, I would appreciate if you would clarify for me the matter of Presidential designation of regional and State disruptions.

As you know, my State of Hawaii is uniquely vulnerable to energy supply disruptions. The combination of a remote location and no indigenous fossil fuels gives Hawaii an unusual set of energy needs. In spite of this, the Government has in the past put Hawaii in the same region as the west coast States, known as PAD V. However, the energy needs of Hawaii are far different from those of California or Alaska.

In recognition of Hawaii's energy needs, strategic military importance, and mid-Pacific location, is the President authorized to determine that a disruption or oil cutoff with severe impacts on Hawaii could be a regional disruption and a severe petroleum supply interruption warranting controls under this bill?

Mr. SHARP. Yes. The President could so designate a disruption or oil cutoff affecting Hawaii as a regional disruption and could use this bill to impose controls.

Mr. HEFTEL. I thank the gentleman from Indiana for his clarification and for his leadership in this important energy issue.

Mr. SHARP. Mr. Chairman, I yield 1 minute to the gentleman from Nevada (Mr. SANTINI).

Mr. SANTINI. Mr. Chairman, I thank the gentleman for yielding.

For all of us in the House who represent districts that are dependent in one fashion or another on tourism and travel, this legislation has obvious impact and importance.

One question that was reoccurring, and I will share with the Chairman at this point, relates to the allocation guidelines where it includes provisions for transportation facilities and services which serve the public at large. Is it the Chairman's and the Committee's intention that such guidelines would include by definition rental cars and taxicabs?

□ 1820

Mr. SHARP. Mr. Chairman, if the gentleman will yield, clearly under this bill, the regulators could and the President could find it appropriate to include rental cars and taxis as such transportation facilities.

Mr. SANTINI. And is that the intention of the Committee?

Mr. SHARP. The gentleman is correct.

Mr. SANTINI. Mr. Chairman, I appreciate the comments of my colleague, the gentleman from Indiana (Mr. SHARP), and I want to thank him for his assistance in clarifying this matter which could have a critical impact on tourism and the travel industry and, incidentally, on one of the most important States in the Union, Nevada.

Mr. SHARP. Mr. Chairman, I yield 1½ minutes to the gentleman from Louisiana (Mr. TAUZIN).

Mr. TAUZIN. Mr. Chairman, I thank the gentleman for yielding this time to me.

Is the distinguished chariman of the subcommittee aware of a potential problem that could result if kerosene-based jet fuel were to be placed under State set-aside programs?

Mr. SHARP. Mr. Chairman, will the gentleman yield?

Mr. TAUZIN. I yield to the gentlemen from Indiana.

Mr. SHARP. Yes; the airline industry has brought this to the attention of the subcommittee. Would the gentleman care to elaborate his concern?

Mr. TAUZIN. Yes; as you are aware, commercial air transportation is of essential national and international nature and is not primarily conducted within State boundaries. My concern arises from the possibility that a set-aside of kerosene-based jet fuel could create a competitive disadvantage for some air carriers. If States were to adopt differing set-asides or if only some States establish programs, one air carrier could conceivably obtain access to a greater volume of jet fuel than another. This would allow that carrier to offer greater capacity to the public, thereby increasing the possibility of receiving greater market shares and profit. This could be achieved at the expense of a competitor whose services have been restricted by governmental action limiting jet fuel availability. Therefore, I would urge the States to consider set-asides of jet fuel only as an absolute last resort.

Mr. SHARP. Mr. Chairman, if the gentleman will yield further, this legislation was not meant to dictate to the States how to run their programs, or even whether they should establish emergency State set-asides, but I believe the gentleman and the industry have raised a legitimate concern, and I, too, would hope that the States would consider this thoroughly and only take set-aside action over jet fuel as an absolute last resort.

Mr. TAUZIN. Mr. Chairman, I thank the gentleman for his comments.

Mr. SHARP. Mr. Chairman, I yield 1½ minutes to the gentleman from Pennsylvania (Mr. BAILEY).

Mr. BAILEY of Pennsylvania. Mr. Chairman, I thank the gentleman for yielding this time to me.

Mr. Chairman, section 273(d) of H.R. 4700 provides that regulations under this bill shall be consistent, to the maximum extent practicable, with the discretionary guidelines specified in section 4(b)(1) of the EPAA. Section

4(b) of the EPAA listed a variety of specific users and objectives which the President was directed to protect to the maximum extent possible, including, in subsection (F), "all users." Since H.R. 4700 incorporates the EPAA priorities, I would like to obtain some clarification of the users who would be included in these priorities, particularly as it relates to manufacturing industry, such as the steel, aluminum, automobile, paper, and textile industries.

Manufacturing industry is the very backbone of our industrial economy. Last year our employment totaled approximately 18 million workers. Without adequate supplies of oil, these essential industries could be forced to shut down.

Because of the critical importance of manufacturing to our economy, I want to be sure that the requirements of manufacturing industry have not been inadvertently overlooked. Am I correct that the reference to "all users" in subsection (F), as incorporated by H.R. 4700, should be read to include manufacturing industry and that such users are entitled to be protected by the President in a shortage on the same basis as all other users listed in these statutory priorities?

Mr. SHARP. Mr. Chairman, will the gentleman yield?

Mr. BAILEY of Pennsylvania. I yield to the gentleman from Indiana.

Mr. SHARP. Mr. Chairman, the gentleman is correct. While the EPAA guidelines as incorporated in H.R. 4700 do not mention manufacturing industries by name, they obviously are users and hence are covered by H.R. 4700. If the President implements this program, he is authorized to, and should, administer the program in a manner which assures users, including manufacturers, with equitable access to crude oil at equitable prices to the maximum extent practicable.

Mr. BAILEY of Pennsylvania. And that is the subcommittee's intention?

Mr. SHARP. The gentleman is correct.

Mr. BAILEY of Pennsylvania. Mr. Chairman, I thank the gentleman from Indiana (Mr. SHARP).

Mr. SHARP. Mr. Chairman, I yield 1 minute to the gentleman from Puerto Rico (Mr. CORRADA).

Mr. CORRADA. Mr. Chairman, I thank the gentleman for yielding me this time.

I would like to address a question to the distinguished chairman of the Subcommittee on Fossil and Synthetic Fuels. In Puerto Rico, we have serious economic problems and high levels of unemployment. These would become more serious in the event of a severe petroleum supply interruption. In such a situation, we would be most concerned with maintaining the highest practical level of employment under the circumstances. Am I correct that this bill would provide the President with sufficient flexibility to take such economic and unemployment factors into account?

Mr. SHARP. Mr. Chairman, will the gentleman yield?

Mr. CORRADA. I yield to the gentleman from Indiana.

Mr. SHARP. The gentleman is correct. This bill would leave the President with the flexibility and discretion to protect the public health, safety and welfare, and economic efficiency. Indeed, we would expect him to do so in appropriate circumstances.

Mr. CORRADA. Mr. Chairman, I thank the gentleman for his clarification.

Mr. SHARP. Mr. Chairman, I yield 1 minute to the gentleman from California (Mr. COELHO).

Mr. COELHO. Mr. Chairman, I note that the allocation guidelines include the maintenance of exploration, production, and extraction of essential minerals. In view of the importance of minerals to the agricultural community, our economy and the Nation's welfare, I applaud the committee's retention of the maintenance of these operations.

As we both are aware the agricultural community is dependent on numerous minerals for fertilizer, such as phosphate and potash, and in order to meet agriculture's phosphate and potash requirements it is necessary that the mining, production, and distribution of these minerals be assured petroleum.

In this regard, is it the committee's intent that the mining, production, and distribution of phosphate and potash be included within the guidelines as minerals essential to the requirements of the United States and agricultural operations?

Mr. SHARP. Mr. Chairman, if the gentleman will yield, the gentleman's understanding is correct. Phosphate and potash minerals are included within the bill's allocation guidelines. These minerals are essential to both the United States mineral requirements as well as agricultural operations. In the event a petroleum shortage occurs, it is our intent that, to the maximum extent practicable, fuel be available in a timely manner to meet the needs of the mining, production, and distribution of potash and phosphate to the maximum extent practicable.

Mr. SHARP. Mr. Chairman, I yield such time as he may consume to the gentleman from Iowa (Mr. BEDELL).

Mr. BEDELL. Mr. Chairman, I rise in strong support of H.R. 4700, the Standby Petroleum Emergency Authority Act of 1981, a bill that would assure that our Government has the emergency powers it would need to cope with a repeat of the oil supply disruptions which we experienced in the 1970's. As the sponsor of H.R. 2244, a bill that would require the President to devise a plan for allocating gasoline and middle distillates for essential agricultural uses, I am particularly pleased to note that the bill before the House today requires the President to draw up a similar, if broader plan, and designates agriculture as an essential segment of our economy deserving of an assured supply of energy.

The need for new emergency energy allocation authority is obvious in light of the traumatic energy supply disruptions which the United States experienced in 1973 and 1979 and essential in view of the administration's action earlier this year to end all price and supply controls on crude oil and petroleum products.

In 1979, Mr. Chairman, I chaired hearings in a Small Business subcommittee at which we heard from officials with the Departments of Energy and Agriculture who made clear in their testimony that the Government was not prepared to assure critical segments of our economy the fuel they needed in the event of an energy crisis. In fact, as we witnessed in the spring of 1979, petroleum product distributors in many areas of the country came perilously close to being unable to supply farmers with the minimum amount of fuel they needed to plant their crops.

It is particularly important that agriculture be guaranteed the fuel which it needs in the event of an emergency. Although agriculture accounts for just 3 percent of the energy consumed nationally, inadequate fuel supplies during the critical planting and harvesting periods could endanger our entire agricultural production system and threaten our Nation's food supply.

Most farmers in the United States receive their fuel from farmer cooperatives and independent petroleum product refiners and distributors who do not have access to their own supplies of crude oil. Often they must purchase crude for their refineries on the spot market, and thus they are very susceptible to the hardships caused by a disruption in world oil trade.

The bill before us, H.R. 4700, would give the President the authority to allocate crude oil among refineries or refined petroleum products among distributors. The President would be required to develop a standby plan for crude oil sharing within 180 days of enactment of the bill.

Clearly, Mr. Chairman, this bill is necessary and its provisions are reasonable. Therefore, I was rather disappointed to note that the administration has stated repeatedly and in no uncertain terms that it is opposed to both the concept and the language embodied in the bill. The administration has made it clear that it is willing

to rely solely on the free market to allocate supplies of crude and refined products should our country be confronted with another energy emergency.

Mr. Chairman, I hope that my colleagues will recognize that there is a role for our Government to play in assuring the equitable distribution of energy when another crisis occurs, and I also hope that they will realize that the best time to develop an emergency petroleum allocation plan is now, and not when we are threatened with long gas lines and idle tractors in the field.

I urge by colleagues to join me in supporting H.R. 4700.

Mr. SHARP. Mr. Chairman, I yield 1 minute to the gentleman from Texas (Mr. DE LA GARZA), the distinguished chairman of the Committee on Agriculture.

Mr. DE LA GARZA. Mr. Chairman, I thank the gentleman for yielding this time to me.

Mr. Chairman, I take this time to ask the gentleman how the agriculture sector, the producing part of agriculture, would be handled under the legislation which the gentleman is bringing before us.

Mr. SHARP. Mr. Chairman, if the gentleman will yield, the legislation, as the gentleman may know, includes a guideline for agricultural producers out of special recognition that there are special times of the year when it is critical to have fuel on the farm, and it is expected that the administration, in the development of any allocation program, would develop rules related to this important sector of the economy.

Mr. DE LA GARZA. Mr. Chairman, I thank the gentleman for his explanation, and I appreciate it.

I hope that this will, of course, be part of the legislative history, recognizing that agriculture is our most important function, because if we do not have food, everything else would go for naught. Hopefully, the explanation the gentleman has given will make an impression on the administration as they work on the regulations.

Mr. SHARP. Mr. Chairman, I yield 1 minute to the gentleman from Texas (Mr. GRAMM).

Mr. GRAMM. Mr. Chairman, I have sat here and listened to what is in essence the basic flaw in this bill. We have heard that we are going to take care of tourism; we are going to get people there whether we can get them back or not.

We have heard that we are going to take care of potash and all users and manufacturers, including agriculture.

Now, the point is, if all these people are going to be priority users, who are we going to take all this gasoline away from? The bottom line is that we cannot give it to somebody unless we take it away from somebody else, and we are back today, as we were in the 96th Congress, talking about spreading misery rather than getting on with the job of producing energy and distributing it effectively.

The final point I would like to make, Mr. Chairman, is this: We have a record of allocation and price controls. Virtually every example that has been brought up here of regional shortages had to do with the ability of the independent refiner to get crude, such as the ability of Hawaii to compete for petroleum.

Mr. Chairman, virtually all these problems were the product of allocation and the product of price controls, and we are not going to solve those problems by bringing back the system which caused them.

Mr. SHARP. Mr. Chairman, I yield 3 minutes to the gentleman from Connecticut (Mr. MOFFETT).

Mr. MOFFETT. Mr. Chairman, I thank the distinguished subcommittee chairman for yielding me this time.

Mr. Chairman, I am rather surprised at the remarks of some of our colleagues here in terms of their position.

The position of the opponents, it seems to me, by and large is that either they want nothing at all in place, as some have expressed it, or they surmise that in an emergency something will happen and the Congress will act and somehow the job will get done.

I think the speech given by the gentleman from Iowa (Mr. TAUKE) was an excellent one. It said many of the things that many of us believe about why we have to have something in place.

Why would Secretary Haig be meeting with the Nigerians now to try to insure that they will make up any shortfall should we decide not to import Libyan oil or, because of another kind of unfortunate circumstance, we were cut off from foreign oil from another source? Why would Secretary Haig be showing such a sense of urgency about that if in fact he did not see and various experts did not see the fragility of the energy supply?

There are Khomeini-like governments lurking on the horizon. The energy supply is not at all stable, and it is rather astounding that with virtually every witness coming before the committee and saying we need to have the Government centrally involved in planning for an emergency, we are taking instead the view of some of the people in the administration who wish basically to set up a 19th-century laissez-faire laboratory.

□ 1830

My friend from Illinois, who is on his feet, I cannot believe wants to set up a 19th-century laissez-faire laboratory to deal with a situation that is near a 21st-century situation.

This is a watered-down bill and the gentleman knows that. Some of us who submitted additional views said you do not have any antihoarding provisions, you do not have any provisions for inventory control. There is little guidance given to the President as to what we would like him to do. The control some of us would prefer to last longer lasts for a rather brief period.

We watered this thing down, given amendments and so forth, even to the point of taking out a 5-year effort on rationing which my good friend from Texas helped to craft, and S. 1030, which my good friend from Texas (Mr. GRAMM) helped to craft, and was a strong proponent of for emergency planning by the States, and now I think our constituents would be amazed. Every single one of us, I think our constituents, of all of us, would be amazed if they knew that we had taken a rationing plan that is on the shelf in the event of an emergency, taken it down and burned it. It may thrill some of the Members but I do not think that is what most of our constituents wanted us to do. That is gone now.

All we are talking about here is a bare minimum amount of protection. I do not believe for a moment that the gentleman from Illinois believes that the market is going to do that. I have had Exxon and other people come to me and say, "Do not let us decide who is a high priority customer in an emergency; please, Congressman, do not put us in that position."

So what are we doing here? What are we trying to prove? Why are we plunging back into the 19th century and saying the marketplace will work it out?

Mr. CORCORAN. Mr. Chairman, I yield myself 1 minute just to respond to my friend from Connecticut (Mr. MOFFETT).

Mr. Chairman, there are three important programs contained in H.R. 4700. One has to do with price and allocation controls; a second is the crude oil sharing program; and the third involves drawing down the U.S. strategic petroleum reserve.

But the problem in the case of all three, I would say to my friend from Connecticut, is that if this legislation goes into effect, the President would not have the flexibility to respond to the problem the gentleman from Connecticut raised with respect to Nigeria. The President of the United States, were this legislation in effect today, would not have the authority to respond to a Libyan cutoff or any of the other kinds of problems for this very important reason: The plan has to be sent down to Congress. Then we have 15 days for the Congress to consider it in the event the President wants to implement the plan. And before it can be activated—and I would call this to the attention of my friend from Connecticut—before it can be activated it

has to be submitted to a congressional veto. And there is a window there of 15 days in this legislative process during which time the President cannot act to respond to an oil emergency.

I would say to my good friend from Connecticut, the President ought to have flexibility with the strategic petroleum reserve, which by the end of this year will contain 250 million barrels of crude oil. The President ought to be able to get that into the marketplace to counter the impact of any serious shortage immediately, not after waiting 15 days or so.

I would say to my friend he is tying the President's hands at an important time potentially, and I think the gentleman ought to reconsider his position on this very restrictive and ill-advised legislation before us.

Mr. Chairman, I yield 5 minutes to the distinguished gentleman from California (Mr. DANNEMEYER).

Mr. DANNEMEYER. Mr. Chairman, as a member of the Energy and Commerce Committee I was privileged to hear the testimony on this bill. The question that came to my mind from the beginning and still is: Is it not prudent for our Government to have some type of legislation in being in the event we get into a crisis in our country where we have a severe shortfall of petroleum supplies?

I think that is a very profound question and I answer this question that yes, we should have a law available for our authorities to act in the event, when push comes to shove, that we have to take emergency action.

But I will tell my colleagues that on the basis of the evidence that was presented to our committee, we have adequate laws on the books. Let me recite to the Members just briefly the existing laws that will serve this Nation in time of a crisis, in the event of a shortfall. We have the Defense Production Act of 1950, the Trade Expansion Act of 1962, the International Emergency Economic Powers Act, the Export Administration Act, the Energy Policy and Conservation Act, the Emergency Energy Conservation Act of 1979, the Natural Gas Policy Act, the Public Utilities Regulatory Policy Act, the National Gas Act and, finally, the Federal Power Act.

These laws have been cited to our committee as being the basis on which the President can act to allocate supplies, to act in the national interest in the event of an emergency.

On a final note, let me make this observation: We have spent a lot of time here in this Chamber deliberating for what we believe to be the national purpose. But let me suggest to the Members that I hope sooner rather than later we get on with a concern about how we can expand supplies of energy in this country rather than talking about allocating a shortage.

There are various studies around, but one that this Member from California has read that was published just 4 or 5 months ago by a professor at the University of Michigan indicates that we would have a dramatic increase in natural gas in this country if we would only have the courage to deregulate natural gas prices. Professor Lowery made certain conclusions that if we deregulated natural gas prices tomorrow, these are the benefits we would sustain in our economic system within the next 4 years. First, we would back out of usage the oil that we are currently consuming to the tune of 2.83 million barrels of oil per day. Please bear in mind we are currently importing about 5 million barrels a day, so we would reduce our imports by about 60 percent.

Second, we would increase the supply of natural gas by 25 percent, or about 6 trillion cubic feet a year.

By backing out the quantity of oil that I have related, we would drive down the price of oil on the international market that we currently pay about $34 a barrel by $10 per barrel. Think of the dramatic impact this would have on the stranglehold that OPEC nations have on our economic system. We would no longer be sending $40 billion a year to the OPEC nations of the world for the purchase of the oil that we are now importing.

Our consumers would have an increase in their natural gas prices of perhaps as much as 50 percent of what they are now paying. Although this has an adverse initial reaction on consumers, it would promote solar energy.

My friends, how are we going to promote solar energy in this country? I will tell you how. We are going to do it when the marketplace fixes the cost of natural gas in southern California and in this country, and in so doing, we begin to bring into economic utility solar energy. If we continue to hide the true cost of natural gas from our consumers, we are just delaying the shift to solar energy.

For all of these reasons I hope the House and the Congress will take up soon the issue of natural gas deregulation so we can increase supply rather than concern ourselves with the allocation of shortage.

I yield back the balance of my time.

Mr. CORCORAN. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, I want to inform my colleagues in the Committee of the Whole House that the Reagan administration is very much opposed to this legislation for two principal reasons. First of all the market conditions today are far different from the market conditions for oil that existed in the last decade and we do not need the repetition of what we had when we tried to put the controls on and then allocate the scarcity across this country and, in fact, exacerbate the problems that the two shortages we did have brought upon us.

Second, it seems to me that the Government preparedness, the Government authority to respond, as the gentleman from California has pointed out, is far different today from what it was back in 1973. The principal difference is this: We will have at the end of this calendar year 250 million barrels of crude oil in the strategic petroleum reserve. That is more than equal to 2 months' foreign imports of oil. I would just say to my friends in the House that there is no question about the fact that we are prepared, we have reorganized the Department of Energy in this respect with an Assistant Secretary for Environmental Protection, Safety, and Emergency Preparedness. We have the oil for 2 months' supply to put in the marketplace. We are ready to respond to any emergency both from the standpoint of improved oil market conditions in the United States and from the vantage point of the proper role for the Federal Government in an oil emergency.

Mr. Chairman, I oppose H.R. 4700, the Standby Petroleum Emergency Authority Act of 1981. Everyone agrees that the Emergency Petroleum Allocation Act and the massive scheme of regulations developed pursuant to the EPAA were a mess. Artificial shortages were created. Real shortages were made worse rather than better. And the EPAA encouraged companies and individuals to forgo planning for oil disruptions and instead rely on Government bailouts. To return to price and allocation controls administered by the Federal Government as H.R. 4700 would have us do is to ignore the costly lessons we learned from the EPAA.

Certainly we should all plan for possible disruptions in supplies of imported crude oil. Maximum production of our own energy resources should be encouraged by removing constricting regulations. In the past week, we have been presented with the best possible evidence of the benefits of decontrol: For the first time in a decade, domestic production has increased. OPEC, meanwhile, is meeting to lower crude oil prices. In light of these developments, it is folly to consider yet another scheme of petroleum price and allocation regulations.

Indeed, H.R. 4700 seems determined to repeat the mistakes of the past. The GAO, in a 1980 report entitled, "Gasoline Allocation: A Chaotic Program in Need of Overhaul" reported that State set-aside programs were generally abused, poorly managed, and resulted in inequitable and inefficient distribution of petroleum products. Remarkably, although H.R. 4700 is justified, in part, by the need to prevent a maze of conflicting responses to a severe crisis by 50 different States, this legis-

lation would permit States to make just such conflicting responses by allowing them to conduct set-aside programs for residual fuel and refined petroleum products. These set-aside programs may be implemented at any time, regardless of whether the President has determined that an emergency exists, and are wholly exempt from any Federal supervision. During the committee hearing at which this provision was introduced, I asked what amount of petroleum products would be subject to the Governors' set-aside authority. I also asked who would make that decision? I recieved no answers then and I have received none since. I suspect that it will be Exxon or some other prime supplier which ends up making the operative decision as to how much product is available for these set-aside programs.

What else does this legislation do? It puts the Government back in the business of equitably distributing crude oil among refiners. I would have thought that the entitlements program, and the subsidy of imported crude oil which it provided, would have shown all of us how counterproductive these crude oil sharing programs are.

Finally at a time when the President needs maximum flexibility to deploy approximately 250 million barrels of crude oil now stored in the strategic petroleum reserve, this legislation would require him to prepare a new, more detailed plan as to how and when the SPR will be used. And, after having prepared this new plan and sent it to Congress, the President still my not actually use the SPR until Congress has approved that use in accord with the one-House veto procedures of the Energy Policy and Conservation Act. These constraints on the President's discretion are more than counterproductive; they impair the value of the SPR as a weapon with which to deal with problems such as those currently posed by Colonel Qadhafi of Libya.

We need not repeat the mistakes of the past. We should continue to focus our efforts on preventing a crisis rather than reacting to one. By rejecting H.R. 4700, we can keep the Federal Government out of the business of petroleum price and allocation regualtion—as it should be.

□ 1840

Mr. SHARP. Mr. Chairman, I yield 1 minute to the gentleman from Colorado (Mr. WIRTH), who has played a very important role in this legislation.

Mr. WIRTH. Mr. Chairman, the cover story of the November issue of Harper's magazine announced proudly to the Nation in bold black letters: "The Energy Crisis Is Over!"

The article, by William Tucker, set out what is becoming a disturbingly familiar refrain—that somehow, since domestic oil price controls were lifted in January, the free market has produced a miracle and brought the energy problems of the past decade to an end.

On the surface—for those who do not choose to look ahead—the argument is compelling. U.S. oil imports have fallen to 3.9 million barrels per day, less than one-half of their peak level in 1978. Oil prices have moderated during 1981, providing a small measure of relief for American consumers from the dizzying price increases of 1979 and 1980. And the United States is experiencing an almost unprecedented oil exploration boom, with completed oil producing wells up 41.6 percent in the first six months of this year over the same period in 1980.

In short, the oil market in 1981 appears benevolent.

Just as it did in 1973, before the Arab oil embargo.

The simple fact is this: Our Nation's apparent energy security today is as much a mirage as it was 8 years ago.

And we are as unprepared today to deal with the potential economic catastrophe of a major oil cut-off as we were in 1973 or in 1979, after the fall of the Shah of Iran.

When the Arab oil embargo was declared in 1973, the Nation was completely unprepared. The result was the Emergency Petroleum Allocation Act of 1973, the complex, contradictory regulatory statute under which three Presidents, of both parties, imposed price controls on domestic crude oil production for 7 years.

Despite our increasing dependence on foreign oil imports, we allowed ourselves to be lulled to sleep by the apparent security of a world oil glut in the late 1960's and early 1970's. And when Congress was rudely awakened in 1973, it responded with a major, long-term regulatory program.

If there is one lesson this body should have learned from that experience, it is that we should take extraordinary care to avoid acting in a hasty, ill-advised way during a crisis.

And that crisis will come. Despite the rosy prognostications of those who believe that decontrol of domestic crude oil prices has provided a magic cure for our energy ills, the United States remains dangerously dependent on Middle East oil—so dependent, in fact, that the administration has based much of its rationale for massive defense spending increases on that dependence. Despite the tremendous increase in oil exploration investments over the past 2 years, we have increased our domestic oil production only some 200,000 barrels per day over 1979 levels. And despite those increases, every major U.S. oil company projects that domestic crude oil supplies will once again begin their slow decline within the next several years. And finally, and most importantly, we must recognize that the oil glut of 1981 is very rapidly disappearing. U.S. inventories are declining at near-record rates, and OPEC has finally achieved the price unity which has eluded it for the past 3 years—a price unity which, accompanied by major production cuts by Saudi Arabia, is aimed at wiping out the worldwide oil glut and reestablishing OPEC's control of world oil markets.

It is almost a certainty that we will face, within the next 5 years, a major oil cutoff similar to those we faced in 1973 and 1979. We should have learned much from those experiences—above all, that careful advance planning like that required by H.R. 4700 is critical to protecting our economy.

As chairman of the House majority leader's task force on decontrol, having organized the 1979 effort to bring those controls to an end, my colleagues know that I have no desire to see the complex regulatory schemes of the EPAA recreated. In my view, H.R. 4700 goes as far as any legislation can to guarantee that the Federal Government will not return to intrusive, long-term intervention in the oil marketplace.

At the same time, the bill does require the President and the administration to plan, in advance, to protect our economy and our citizens in the likely event of an oil cutoff.

H.R. 4700 has four critical components:

First. The bill provides the President with broad discretionary authority to act in a crisis—but only with congressional approval.

Second. The bill requires the President to prepare and transmit to the Congress an emergency preparedness plan, making clear to the Congress and to key industries, for their own planning purposes, the steps the Federal Government might take in a crisis.

Third. Any use of pricing and allocation authority under H.R. 4700 is strictly limited to 150 days, unless Congress specifically authorizes continuation of the President's emergency program.

Fourth. H.R. 4700 would integrate the strategic petroleum reserve into our Nation's emergency planning for the first time. The Reagan administration has undertaken an aggressive program of oil acquisition for the SPR—something that many of us in the Congress unsuccessfully urged upon the previous administration. The current SPR distribution plan, prepared in 1979, is extremely vague, and provides neither industry nor the public with any clear idea of how the Federal Government would use the over 220 million barrels of oil now in the SPR in the event of an emergency. H.R. 4700 would require the President to submit

to Congress, for approval under the regular SPR procedures, a new distribution plan 6 months from now.

Mr. Chairman, H.R. 4700 provides a sound basis for both Federal planning for oil emergencies and would provide clear guidance for the private sector in its own emergency planning. I urge my colleagues to join me in supporting this legislation.

Mr. SHARP. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, let me just very quickly indicate to my colleagues that I think they should vote for this legislation. It is an effort to try to legislate now while stocks of oil in this country and around the world are high and our passions are low. We have discovered from hard experience that it is very difficult for the Congress to reach a consensus, and not mandate all kinds of things that perhaps upon better reflection we would not want to do, when we are under the gun of a crisis.

Mr. Chairman, let me say that much has been made of the strategic petroleum reserve. I and our subcommittee are very strong supporters of a rapid fill of that reserve, we applaud the administration for what it has been doing this year on that. Our concern is that it may not be enough if we have a severe crisis, and it is wise to have these unambiguous additional authorities available to the President.

We hope—I think most of us do—it would not be necessary to exercise allocation authorities, but none of us can know what events will occur in the Middle East, and we are wise to be prepared.

● Mrs. HECKLER. Mr. Chairman, I rise in support of H.R. 4700.

Despite the fact that we are not now as dependent upon foreign oil as we were when the EPAA was enacted, it is nonetheless true that we are vulnerable to a potential cutoff. It is not realistic to assume, even with our increased conservation and use of other energy sources, that we are currently able to meet our energy needs without imported oil. This fact should be kept in mind throughout this debate—that we do not have the ability to go it alone, and that a loss of those imports, regardless of the reduced level, could cripple our economy and endanger our national security.

A cutoff would not effect all parts of this country equally, although the daily lives of the entire Nation will be altered signficantly. In New England, for example, over 50 percent of the energy products are supplied by independent marketers and refiners. These marketers and refiners would be affected first and most severly by a severe disruption of our oil supply. With the crude oil sharing-plan, however, this regional difficulty could be alleviated, and with a minimum of government interference.

Without a unified emergency standby policy, we would also be faced with the prospect of the Federal Government, the 50 State governments, and thousands of local governments each contending with the disruption in a different way. A national problem must be addressed at a national level, particularly during a period of crisis: we have the responsibility of meeting this need.

Opponents of this measure proudly point to the strategic petroleum reserve as a major solution to any potential disruption of imported oil. But what if, as is the case, there is not enough oil in the reserve to meet even the critical needs of the country? Perhaps down the line, the SPR will be able to provide sufficient oil—and, equally important, an effective distribution network for the oil—but until then, we cannot simply rely upon the volatile freemarket system to sustain this country during the staggering crisis a disruption could cause.

Further, it is not even clear whether the current statutory provisions, which opponents cite as authority enough, even provide the President with adequate authority needed to keep this Nation functioning in the event of a cutoff. As is stated in the committee report on this legislation, both the Departments of Justice and Energy recommended that a unified measure be passed that provided clear-cut authority to the President. The last thing we need in a time of crisis is haggling over legal technicalities and legislative fine points.

It is also significant that this bill does not tie down the President to a detailed plan of action, or only permit him to invoke the authorities of the act under specific circumstances. With this flexibility, the President will be able to react—and react quickly—to the precise nature of the disruption.

Mr. Chairman, there simply are too many "if's" without this legislation. If the President has the authority, if the SPR can last long enough, if the free market system works. In the event of a severe disruption of our oil supply, we will need to have a dependable structure in place. The time to enact emergency legislation is now, not when the furor of a crisis is upon us.●

● Mrs. COLLINS of Illinois. Mr. Chairman, I rise in support of H.R. 4700, the Standby Petroleum Emergency Authority Act of 1981. I support this legislation not so much for what it contains in the form of specific authority but rather as an affirmation of the committee's concern for the fate of this country, given the complacency and disinterest of the administration.

In taking a position which stresses "primary reliance on market forces to determine the price and allocation of energy supplies even in an emergency," the administration is adopting a business-as-usual approach to one of the most serious threats to our Nation's security. While for the major oil companies, an oil supply disruption may indeed mean business—that is profits—as usual, it means economic ruin and severe deprivation for many of our Nation's comsumers.

For this reason, I am glad that the committee has seen fit to adopt my amendment which directs the President to compare the economic impact of a severe oil disruption when managed by: First, reliance on so-called free market allocation and pricing; and second, reliance on the emergency preparedness plan called for in this legislation. In so doing, the President must examine the impacts of different policies on various types of businesses and households of diverse income levels. One purpose of this provision, is to educate this administration as to the disastrous consequences of its business-as-usual policy, particularly for the Nation's low-income consumers.

I have provided to the committee my separate views on the inventory management question. I strongly believe that the committee should have included specific antihoarding language in the legislation, as contained in section 16 of the EPAA. The language in section 271, noting the virtues of "prudent inventory management," covers a multitude of sins that are not expiated by the language of the report. I, for one, wish to go on record as being opposed to the industry practice—as followed in previous disruptions—of releasing stocks only after prices have risen to the maximum levels the market will bear.

Having said this, I wish to commend the subcommittee chairman Mr. SHARP, for recognizing the necessity and importance of this legislation.●

● Mr. GUNDERSON. Mr. Chairman, I am in strong support of H.R. 4700 which is similar to H.R. 4313 that I have cosponsored along with 69 other Members.

This legislation is crucial to the welfare and security of our national economy, as we are now without a responsible and effective emergency energy preparedness policy to respond to future crude oil supply disruptions.

By granting the President temporary limited authority, we will insure an orderly handling of any sudden oil supply cutoff. In addition, due to the temporary nature of the authority, we will prevent long-term disruptions in the marketplace.

The U.S. petroleum industry should be allowed to operate unfettered by Government controls during normal market periods. However, another crude oil disruption could result in severe national or regional shortages and result in oil prices doubling again—absent appropriate action—with the OPEC cartel making these

economic injuries permanent. This single event can destroy all progress in our tough economic recovery battle.

H.R. 4700 lays down broad guidelines for emergency energy planning. It would require the President to draw up plans for first, the drawdown of the strategic petroleum reserve (SPR); and second, crude oil sharing among refiners for use in the event of a severe national or regional petroleum supply disruption. H.R. 4700 also gives the President broad allocation and price authority which is similar to that in the Senate bill S. 1503.

It has been little more than 2 years since our last oil shortage with its long lines, short tempers, and skyrocketing prices. Let us learn from that recent bit of unfortunate history by preparing for any future shortfalls now. I urge my colleagues to give their full support to H.R. 4700.●

Mr. SHARP. Mr. Chairman, I yield back the balance of my time.

Mr. CORCORAN. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. All time has expired.

Pursuant to the rule, the Clerk will now read by titles the substitute committee amendment recommended by the Committee on Energy and Commerce not printed in the reported bill as an original bill for the purpose of amendment.

The Clerk read as follows:

H.R. 4700

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE; TABLE OF CONTENTS

SECTION 1. This Act may be cited as the "Standby Petroleum Emergency Authority Act of 1981".

TABLE OF CONTENTS

Sec. 1. Short title; table of contents.

TITLE I—STANDBY PETROLEUM ALLOCATION AND PRICE CONTROL AUTHORITY

Sec. 101. Amendment to the Energy Policy and Conservation Act.

"PART C—STANDBY PETROLEUM ALLOCATION AND PRICE CONTROL AUTHORITY

"Sec. 271. Findings and purpose.
"Sec. 272. Definitions.
"Sec. 273. Emergency allocation and price authority regulation.
"Sec. 274. Implementation of regulations.
"Sec. 275. Preemption and contract liability.
"Sec. 276. Crude-sharing plan.
"Sec. 277. Delegation.
"Sec. 278. Expiration.".

Sec. 102. Strategic Petroleum Reserve Distribution Plan.

TITLE II—EXTENSION OF CERTAIN INTERNATIONAL ENERGY PROGRAM AUTHORITIES

Sec. 201. Extension.

TITLE I—STANDBY PETROLEUM ALLOCATION AND PRICE CONTROL AUTHORITY

AMENDMENT TO THE ENERGY POLICY AND CONSERVATION ACT

SEC. 101. (a) Title II of the Energy Policy and Conservation Act, relating to standby energy authorities, is amended by adding at the end thereof the following new part:

"PART C—STANDBY PETROLEUM ALLOCATION AND PRICE CONTROL AUTHORITY

"FINDINGS AND PURPOSE

"SEC. 271. (a) FINDINGS.—The Congress finds that—

"(1) past petroleum product supply interruptions have caused serious national and regional disruptions in domestic energy markets which have threatened the public health, safety, and welfare;

"(2) while such threats should be responded to by reliance to the maximum practicable extent upon the free market, temporary regulatory authority should be available to the President in a severe crisis to enable the President to minimize potentially devastating economic impacts and lessen public hardships; and

"(3) prudent development and use of petroleum product inventories furthers the public interest by affording protection against the adverse effects of supply interruptions and reducing the need for the exercise of such regulatory authority.

"(b) PURPOSE.—It is the purpose of this part—

"(1) to provide that the pricing and allocation of petroleum products shall be determined by the market, and shall not be subject to price and allocation regulation by the Federal Government except in the event of a Presidential determination of a severe petroleum supply interruption, and

"(2) to grant the President discretionary, temporary authority to respond to such interruptions in order to minimize their adverse impacts on the American people and the domestic economy and to ensure the public health, safety, and welfare.

DEFINITIONS

"SEC. 272. As used in this part—

"(1) the term 'severe petroleum supply interruption' means a national or regional petroleum product supply interruption which the President in his discretion determines will or may—

"(A) be of such magnitude or duration as to seriously diminish domestic petroleum product inventories;

"(B) not be reasonably manageable under other Presidential authorities or by reliance on free market pricing and allocation;

"(C) threaten the public health, safety, and welfare, the economy of the United States or of any region of the United States, or the national security; and

"(D) result from the interruption of significant amounts of petroleum product imports or from sabotage or an act of God; and

"(2) the term 'regulation' means a rule, regulation, or order.

"EMERGENCY ALLOCATION AND PRICE AUTHORITY REGULATION

"SEC. 273. (a) GENERAL AUTHORITY.—In accordance with the purposes of this part, the President may, by regulation, provide for mandatory allocation of any petroleum product—

"(1) in amounts specified in (or determined in a manner prescribed by) such regulations, and

"(2) at prices specified in (or determined in a manner prescribed by) such regulations.

Such regulations may apply to any petroleum product produced in or imported into the United States.

"(b) MANDATORY AND STANDBY REGULATIONS.—Regulations under this section may be—

"(1) mandatory emergency regulations which are effective upon promulgation (hereinafter in this part referred to as 'mandatory regulations'), or

"(2) standby contingency regulations which are effective contingent on later circumstances (hereinafter in this part referred to as 'contingency regulations'), but any regulation under this part may be implemented only in accordance with section 274.

(c) EMERGENCY PREPAREDNESS PLAN.—(1) Not later than 180 days after the date of the enactment of this part, the President shall promulgate an emergency preparedness plan consisting of contingency regulations under this section, and shall transmit the text of such plan to the Congress. This subsection shall not be construed to limit the authority of the President to amend or revoke such regulations after their promulgation.

"(2) The President shall analyze, and compare the impacts on the domestic economy and on consumers in the United States of—

"(A) complete reliance on free market allocation and pricing, and

"(B) reliance on the emergency preparedness plan during a severe petroleum supply interruption.

Such analysis and comparison shall examine the equity and efficiency of such alternatives and distinguish between the impacts of such alternatives on various categories of business (including small business) and on households of different income levels.

"(3) Within one year after the date of the enactment of this part, the President shall submit a report to the Congress containing the analysis and comparison required by paragraph (2) along with such recommendations as the President deems appropriate.

"(d) DISCRETIONARY GUIDELINES.—Regulations under this section shall be consistent, to the maximum extent practicable, with the discretionary guidelines specified in section 4(b)(1) of the Emergency Petroleum Allocation Act of 1973.

"(e) LIMITATIONS.—The President shall have no authority under this part—

"(1) to prescribe minimum prices for any petroleum product;

"(2) to impose any tax, tariff, or user fee;

"(3) to provide for allocation of any motor gasoline or diesel fuel among end-users through any system involving the issuance of ration coupons or other similar evidences of right; or

"(4) to provide for the allocation of consumer petroleum inventories, impose restrictions on the use of such inventories, or consider or take into account the existence or size of such inventories in determining the amount of petroleum products to be allocated to consumers.

For purposes of paragraph (4), 'consumer petroleum inventories' means inventories of refined petroleum products held by and in the custody of a consumer for its own use which do not exceed the quantity of refined petroleum products held by and in the custody of that consumer 30 days before the President declares that a severe petroleum supply interruption exists.

"IMPLEMENTATION OF REGULATIONS

SEC. 274. (a) REQUIREMENTS FOR IMPLEMENTATION.—Regulations under this part may be implemented only if—

"(1) there is in effect a determination by the President of a severe petroleum supply interruption; and

"(2) notice of such determination, notice of the President's intent to implement such regulations, and the text of such regulations have been transmitted to the Congress in accordance with section 551, and neither House of Congress has disapproved (or both

Houses have approved) implementation of such regulations in accordance with the procedures specified in section 551.

"(b) DURATION; TERMINATION.—Regulations implemented under this section may not remain in effect after the 90-day period which begins on the date on which the authority to implement such regulations first becomes effective, except that such regulations may be extended by the President for up to 60 additional days, upon his express finding that the severe petroleum supply interruption continues in effect, and that the implemented regulations must be continued to meet the purposes of this part. Thereafter, the authority of the President to implement any regulation under section 273 shall terminate, unless pursuant to subsection (a) the President makes a new determination and new transmittal to Congress of mandatory regulations, which are not disapproved by the Congress under subsection (a).

"PREEMPTION AND CONTRACT LIABILITY

"SEC. 275. (a) PREEMPTION.—Except as provided in subsections (b) and (c), the enactment of this part supersedes and preempts any provision of any law or regulation adopted or promulgated by a State or any political subdivision thereof to the extent that such law or regulation provides for the pricing or allocation of any petroleum product.

"(b) EXEMPTION.—(1) The President may, by rule, exempt from the operation of subsection (a) classes or categories of laws or regulations which would otherwise be preempted under subsection (a), to the extent that the President determines that such laws or regulations would—

"(A) preserve a significant State or local interest;

"(B) not unduly burden interstate commerce; and

"(C) not significantly conflict with or impede operation of this part, achievement of the purposes of this part, or achievement of the objectives of the regulations under section 273.

"(2) Rules under paragraph (1) shall not be subject to the implementation requirements of section 274.

"(c) CERTAIN STATE SET-ASIDE PROGRAMS NOT PREEMPTED.—Notwithstanding subsection (a), a set-aside program for residual fuel oil or any refined petroleum product administered by a State shall not be preempted under subsection (a) if—

"(1) the Governor determines that such a program is required to meet a petroleum supply disruption within the State which will significantly impair essential public services or essential economic activity,

"(2) the set-aside program does not continue in effect for more than 90 days, except that, if the Governor determines that continued implementation is required by such disruption, the program may be continued for an additional 90-day period, and

"(3) the Governor determines that the program does not result in the creation of a residual fuel oil or refined petroleum product set-aside which requires any prime supplier to set aside more than 5 percent of the prime supplier's estimated portion of its total supply for that month which will be sold into the State's distribution system for consumption within the State.

For purposes of this subsection, the term 'prime supplier' with respect to any State means the supplier which makes the first sale of any product subject to the State set-aside into the State distribution system for consumption within the State.

"(d) CONTRACT DEFENSE.—There shall be available as a defense to any action brought for breach of contract in any Federal or State court arising out of delay or failure to provide, sell, or offer for sale or exchange any petroleum products, that such delay or failure was caused solely by compliance with the provisions of any regulation under this part.

"CRUDE-SHARING PLAN

"SEC. 276. (a) STANDBY CRUDE-SHARING PLAN.—The President shall include a standby refinery crude-sharing plan in the Emergency Preparedness Plan required under section 273(c)(1).

"(b) PLAN PROVISIONS.—(1) To the maximum extent practicable, the plan established under subsection (a) shall—

"(A) fairly distribute the burdens of any international allocation of petroleum products by United States corporations to foreign countries participating with the United States in the International Energy Program;

"(B) aid in the equitable distribution and sharing of crude oil, at equitable prices, among efficient refineries of all sizes in the United States;

"(C) encourage the maintenance by all refineries of crude oil inventories, and the acquisition of secure supplies of crude oil;

"(D) help offset partially the disproportionate impact of supply disruptions on efficient refineries of all sizes;

"(E) minimize the adverse impacts of severe petroleum supply interruptions upon the customers of disproprotionately impacted refineries of all sizes; and

"(F) help avoid more intrusive and comprehensive petroleum product price and allocation controls.

"(2) Such plan shall provide for the allocation among efficient refineries of crude oil—

"(A) in amounts specified in (or determined in a manner prescribed by) such plan, and

"(B) at prices specified in (or determined in a manner prescribed by) such plan.

"(3) Such plan may be implemented only in accordance with section 274.

"DELEGATION

"SEC. 277. The President may delegate all or any portion of the authority granted to him under this part to such officers, departments, or agencies of the United States, or to any State (or officer thereof), as the President may deem appropriate; except that the President may not delegate the authority to determine any severe petroleum supply interruption.

"EXPIRATION

"SEC. 278. (a) IN GENERAL.—All authority under this part, and any regulation issued pursuant to such authority, shall expire at midnight of December 31, 1984.

"(b) SAVINGS PROVISION.—The expiration of authority under this part, or any regulation issued pursuant to such authority, shall not affect any action or pending proceedings, civil or criminal, not finally determined at the time of such expiration, or any action or proceeding based upon any act committed prior to such expiration.".

(b) The table of contents for such Act is amended by inserting after the items relating to part B of title II the following new items:

"PART C—STANDBY PETROLEUM ALLOCATION AND PRICE CONTROL AUTHORITY

"Sec. 271. Findings and purpose.
"Sec. 272. Definitions.
"Sec. 273. Emergency allocation and price authority regulation.
"Sec. 274. Implementation of regulations.
"Sec. 275. Preemption and contract liability.
"Sec. 276. Crude-sharing plan.
"Sec. 277. Delegation.
"Sec. 278. Expiration.".

STRATEGIC PETROLEUM RESERVE DISTRIBUTION PLAN

SEC. 102. Section 161 of the Energy Policy and Conservation Act (42 U.S.C. 6241) is amended—

(1) by striking out subsection (c) and inserting in lieu thereof the following:

"(c) Not later than 180 days after the date of the enactment of the Standby Petroleum Emergency Authority Act of 1981, the President shall submit a Distribution Plan as an amendment to the Strategic Petroleum Reserve Plan in accordance with sections 159 (d) and (e). Effective beginning 195 days after the date of enactment of such Act, the Distribution Plan previously in effect may not be implemented."; and

(2) by striking out the period at the end of subsection (d) and inserting in lieu thereof the following: "and the Secretary has transmitted such finding to the Congress in accordance with section 551 and neither House of Congress has disapproved (or both Houses have approved) such finding, in accordance with the procedures specified in section 551.".

Mr. SHARP (during the reading). Mr. Chairman, I ask unanimous consent that title I be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Indiana?

There was no objection.

AMENDMENT OFFERED BY MR. RAILSBACK

Mr. RAILSBACK. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RAILSBACK: In the matter proposed to be added by section 101 of the bill, add at the end of section 273 the following new subsection:

"(f) INFORMATION.—For purposes of this part, the President shall collect information on the pricing, supply, and distribution of petroleum products at the wholesale and retail levels, on a State-by-State basis. Such information shall be substantially of the same type as was collected during September 1981 by the Energy Information Administration pursuant to the Emergency Petroleum Allocation Act of 1973.

Mr. RAILSBACK. Mr. Chairman, for a long time I have been concerned that if we are going to have a Federal energy policy, that policy ought to be based on information gathered by the Government, rather than by the American Petroleum Institute, and I am offering an amendment to the Petroleum Emergency Authority Act, H.R. 4700, which would in effect require the Energy Information Administration (EIA) to maintain its petroleum price and marketing program. During the past year, I and the Northeast-Midwest Congressional Coalition have been concerned about the availability of a central energy data bank.

Data gathered by 9 EIA forms provides Members of Congress, State and local governments, universities, foreign governments, trade associations, and others with important price, supply, and distribution information. Much of the information is available on a State-by-State basis.

The Office of Management and Budget (OMB) is considering five of nine petroleum price and marketing forms. I understand OMB may propose retaining only two of the five forms, one providing State-level supply data and another providing domestic and foreign acquisition costs of crude oil on a national level. We need the information. But, it will not be complete without distribution data and petroleum product prices at the national level.

OMB states that by requesting extention of these forms, EIA is violating the President's January 28 Executive order, "Decontrol of Crude Oil and Refined Petroleum Products", by not eliminating forms unnecessary for emergency planning and information required by law. I disagree.

EIA is already making strong efforts to streamline forms to minimize duplication while maintaining the ability to acquire crucial statistical information. Twenty-three forms and a total of 1.2 million burden hours per year have been eliminated. Seventeen other forms, including nine petroleum price and marketing forms, are being consolidated. EIA published a completed version of the so-called superform, EIA-740, on June 5, but the hastily put together form was not acceptable to industry or other users and another 2 years is needed for development. In the meantime, authority for five price and supply forms expired on September 30. The OMB published a notice of agency forms under review in the September 24 Federal Register. The matter should have been routine, but OMB is considering a draft information system submitted by the American Petroleum Institute (API).

The API draft as originally submitted would have eliminated six of the nine EIA forms collecting price and supply data on the national, regional and State levels, information of particular interest to members of the Northeast-Midwest Congressional Coalition, as well as all Members of Congress. Although API has since indicated an interest in retaining supply data on the State level, price data and market share information, may not be retained. The percentage of the market distributed by retailers, wholesalers, and refiner-marketers. EIA now has the most complete energy price data on a comparative basis for the States. State policymakers need price and supply information for planning and budgeting. Distribution data is used for analysis of refiner-marketer practices, monitoring changes in market shares and refiner distribution patterns, and planning.

Because so many States rely on the information, at least 36 of them contacted OMB when they learned the forms may be eliminated. The National Governors' Association and several research institutions also supported retaining the forms. The only comments in opposition were from the oil industry.

Industry criticism that the information is not needed for emergencies is simply not valid. If the President's authority provided in H.R. 4700 is needed, State-level price, supply and distribution information will be crucial. Congress recognized the need for information not dependent on industry sources when shortages and price increases caused constituents to clamor for unbiased data proving a shortage was, in fact real. Collection of data pertaining to petroleum price, supply, and distribution—especially of home heating fuel is required in the Federal Energy Administration Act of 1974 and the Emergency Energy Conservation Act of 1979.

I would therefore urge support of my amendment, since it would require current data to be continued to be collected, but would not require additional reporting or revive old forms. None of us hopes for a serious shortage. But, if a major supply disruption should occur, we must have adequate information that is not entirely dependent on industry sources.

Mr. TAUKE. Mr. Chairman, will the gentleman yield?

Mr. RAILSBACK. I yield to the gentleman from Iowa.

Mr. TAUKE. Mr. Chairman, I commend the gentleman for his leadership on this issue and I strongly support this amendment to H.R. 4700, the Standby Petroleum Emergency Authority Act, to require the Energy Information Administration to continue the collection of State-level information on oil prices, supply, and distribution.

It hardly needs saying that accurate, comprehensive information is vital in any emergency. In a petroleum emergency, information about petroleum shortages on a State-by-State basis will be critical to the effective exercise of the President's authority under H.R. 4700. The bill recognizes that a petroleum emergency may arise within a region, as well as nationally; but it will be difficult to determine whether an emergency exists, or to define its scope, if State-level information is not available.

Moreover, H.R. 4700 recognizes the validity of State set-aside programs; the administration of such programs will be vastly more difficult if State-level information is no longer available.

The reporting burden on the petroleum industry has already been sharply reduced, and I applaud the administration's actions in this area. But in its commendable zeal to reduce paperwork, the administration is now about to cross the line that separates information that is merely useful from information that is essential.

Mr. RAILSBACK. I thank the gentleman.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. RAILSBACK. I yield to the gentleman from Vermont.

Mr. JEFFORDS. Mr. Chairman, I also want to commend the gentleman for the amendment. I believe it is an important addition to the bill and I certainly will support it.

Mr. RAILSBACK. I thank the gentleman.

Mr. CORCORAN. Mr. Chairman, I rise in reluctant opposition to the amendment.

Mr. Chairman, let me just point out that the administration opposes this amendment, and I oppose this amendment, not because we are in disagreement with the objective of the gentleman from Illinois (Mr. RAILSBACK), in terms of the authority that would be granted under his proposed amendment, but simply because we feel it would be redundant.

I have talked with the Office of the General Counsel in the Department of Energy, and they point out that the authority that would be granted in the pending amendment is already provided for in two separate sections of the law that governs the Department of Energy with respect to information-gathering. First of all, we have sections 13 and 52 of the Federal Energy Act of 1974 and, second, section 11 of the Energy Supply and Environmental Coordination Act of 1974. And in both cases there is adequate subpena power involved with this data collection. And as a matter of fact, in the latter case, there is also the authority for civil penalties in this connection.

So, I would urge the rejection of this amendment, simply because I think that the authority already exists for the Department and is not needed at this time.

□ 1850

Mr. SHARP. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I applaud the gentleman from Illinois and rise to support the amendment of the gentleman from Illinois (Mr. RAILSBACK). The other gentleman from Illinois (Mr. CORCORAN) is correct that authority does exist to do this. Unfortunately, however, we are having a little difficulty getting the Office of Management and Budget to understand what the law is and what ought to be done.

This amendment has very strong bipartisan support within the National

Governors Conference and also with the Northeast Coalition.

If you want to do anything about energy policy, you have to know what is happening. The only way to know what is happening is to collect information and this will do it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. RAILSBACK).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to title I? If not, the Clerk will read title II.

The Clerk read as follows:

TITLE II-EXTENSION OF CERTAIN INTERNATIONAL ENERGY PROGRAM AUTHORITIES

EXTENSION

SEC. 201. Subsection (j) of section 252 of the Energy Policy and Conservation Act (42 U.S.C. 6272(j)) is amended by striking out "April, 1, 1982" and inserting in lieu thereof "June 30, 1985".

Mr. SHARP (during the reading). Mr. Chairman, I ask unanimous consent that title II be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The CHAIRMAN. Are there amendments to title II?

If not, the question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose, and the Speaker pro tempore (Mr. FOLEY) having assumed the chair, Mr. SMITH of Iowa, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4700) to amend the Energy Policy and Conservation Act to authorize the President to control oil supplies and prices in the event of a severe petroleum supply interruption, and for other purposes, pursuant to House Resolution 288, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on the amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. CORCORAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 244, nays 136, not voting 53, as follows:

□ 1900

The Clerk announced the following pairs:

On this vote:

Mr. Rahall for, with Mr. Nichols against.

Mr. Mattox for, with Mr. McDonald against.

Mr. AuCoin for, with Mr. Vander Jagt against.

Mr. Lantos for, with Mr. McCloskey against.
Mr. McKinney for, with Mr. Madigan against.
Mr. Horton for, with Mr. Badham against.

Until further notice:

Mr. Udall with Mr. Hartnett.
Mr. Zeferetti with Mr. Kemp.
Mr. Brooks with Mr. Smith of Pennsylvania.
Mr. Wright with Mr. Conable.
Mr. Chappell with Mr. Beard.
Mr. Dellums with Mr. John L. Burton.
Mr. Edgar with Mr. Hatcher.
Mr. Hubbard with Mr. Roe.
Mr. Gray with Mr. Patterson.
Mr. Shelby with Mr. Russo.
Mr. Garcia with Mr. Walgren.
Mr. Waxman with Mr. Rose.
Mr. Pease with Mr. LaFalce.
Mr. Traxler with Mr. Brown of California.
Mr. Solarz with Mr. Holland.
Mr. Peyser with Mr. Moakley.
Mr. Murphy with Mr. Fithian.
Mr. Biaggi with Mr. Crockett.
Mr. Frank with Mr. Dougherty.
Mr. Donnelly with Mr. Frost.

Mr. BAILEY of Missouri changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

□ 1910

Mr. SHARP. Mr. Speaker, pursuant to House Resolution 288, I call up from the Speaker's table the Senate bill (S. 1503) to authorize the President to allocate supplies of crude oil, residual fuel oil, and refined petroleum products during a severe petroleum supply shortage, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

MOTION OFFERED BY MR. SHARP

Mr. SHARP. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. SHARP moves to strike out all after the enacting clause of the Senate bill, S. 1503, and to insert in lieu thereof the provisions of the bill (H.R. 4700) as passed, as follows:

SHORT TITLE; TABLE OF CONTENTS

SECTION 1. This Act may be cited as the "Standby Petroleum Emergency Authority Act of 1981".

TABLE OF CONTENTS

Sec. 1. Short tile; table of contents
TITLE I—STANDBY PETROLEUM ALLOCATION AND PRICE CONTROL AUTHORITY
Sec. 101. Amendment to the Energy Policy and Conservation Act.
"PART C—STANDBY PETROLEUM ALLOCATION AND PRICE CONTROL AUTHORITY
"Sec. 271. Findings and purpose.
"Sec. 272. Definitions.
"Sec. 273. Emergency allocation and price authority regulation.
"Sec. 274. Implementation of regulations.
"Sec. 275. Preemption and contract liability.
"Sec. 276. Crude-sharing plan.
"Sec. 277. Delegation.
"Sec. 278. Expiration."
Sec. 102. Strategic Petroleum Reserve Distribution Plan.
TITLE II—EXTENSION OF CERTAIN INTERNATIONAL ENERGY PROGRAM AUTHORITIES
Sec. 201. Extension.

TITLE I—STANDBY PETROLEUM ALLOCATION AND PRICE CONTROL AUTHORITY

AMENDMENT TO THE ENERGY POLICY AND CONSERVATION ACT

SEC. 101. (a) Title II of the Energy Policy and Conservation Act, relating to standby energy authorities, is amended by adding at the end thereof the following new part:

"PART C—STANDBY PETROLEUM ALLOCATION AND PRICE CONTROL AUTHORITY

"FINDINGS AND PURPOSE

"SEC. 271. (a) FINDINGS.—The Congress finds that—

"(1) past petroleum product supply interruptions have caused serious national and regional disruptions in domestic energy markets which have threatened the public health, safety, and welfare;

"(2) while such threats should be responded to by reliance to the maximum practicable extent upon the free market, temporary regulatory authority should be available to the President in a severe crisis to enable the President to minimize potentially devastating economic impacts and lessen public hardships; and

"(3) prudent development and use of petroleum product inventories furthers the public interest by affording protection against the adverse effects of supply interruptions and reducing the need for the exercise of such regulatory authority.

"(b) PURPOSE.—It is the purpose of this part—

"(1) to provide that the pricing and allocation of petroleum products shall be determined by the market, and shall not be subject to price and allocation regulation by the Federal Government except in the event of a Presidential determination of a severe petroleum supply interruption, and

"(2) to grant the President discretionary, temporary authority to respond to such interruptions in order to minimize their adverse impacts on the American people and the domestic economy and to ensure the public health, safety, and welfare.

"DEFINITIONS

"SEC. 272. As used in this part—

"(1) the term 'severe petroleum supply interruption' means a national or regional petroleum product supply interruption which the President in his discretion determines will or may—

"(A) be of such magnitude or duration as to seriously diminish domestic petroleum product inventories;

"(B) not be reasonably manageable under other Presidential authorities or by reliance on free market pricing and allocation;

"(C) threaten the public health, safety, and welfare, the economy of the United States or of any region of the United States, or the national security; and

"(D) result from the interruption of significant amounts of petroleum product imports or from sabotage or an act of God; and

"(2) the term 'regulation' means a rule, regulation, or order.

"EMERGENCY ALLOCATION AND PRICE AUTHORITY REGULATION

"SEC. 273. (a) GENERAL AUTHORITY.—In accordance with the purposes of this part, the President may, by regulation, provide for mandatory allocation of any petroleum product—

"(1) in amounts specified in (or determined in a manner prescribed by) such regulations, and

"(2) at prices specified in (or determined in a manner prescribed by) such regulations. Such regulations may apply to any petroleum product produced in or imported into the United States.

"(b) MANDATORY AND STANDBY REGULATIONS.—Regulations under this section may be—

"(1) mandatory emergency regulations which are effective upon promulgation (hereinafter in this part referred to as 'mandatory regulations'), or

"(2) standby contingency regulations which are effective contingent on later circumstances (hereinafter in this part referred to as 'contingency regulations'), but any regulation under this part may be implemented only in accordance with section 274.

"(c) EMERGENCY PREPAREDNESS PLAN.—(1) Not later than 180 days after the date of the enactment of this part, the President shall promulgate an emergency preparedness plan consisting of contingency regulations under this section, and shall transmit the text of such plan to the Congress. This subsection shall not be construed to limit the authority of the President to amend or revoke such regulations after their promulgation.

"(3) The President shall analyze, and compare the impacts on the domestic economy and on consumers in the United States of—

"(A) complete reliance on free market allocation and pricing, and

"(B) reliance on the emergency preparedness plan during a severe petroleum supply interruption.

Such analysis and comparison shall examine the equity and efficiency of such alternatives and distinguish between the impacts of such alternatives on various categories of business (including small business) and on households of different income levels.

"(3) Within one year after the date of the enactment of this part, the President shall submit a report to the Congress containing the analysis and comparison required by paragraph (2) along with such recommendations as the President deems appropriate.

"(d) DISCRETIONARY GUIDELINES.—Regulations under this section shall be consistent, to the maximum extent practicable, with the discretionary guidelines specified in section 4(b)(1) of the Emergency Petroleum Allocation Act of 1973.

"(e) LIMITATIONS.—The President shall have no authority under this part—

"(1) to prescribe minimum prices for any petroleum product;

"(2) to impose any tax, tariff, or user fee;

"(3) to provide for allocation of any motor gasoline or diesel fuel among end-users through any system involving the issuance of ration coupons or other similar evidences of right; or

"(4) to provide for the allocation of consumer petroleum inventories, impose restrictions on the use of such inventories, or consider or take into account the existence or size of such inventories in determining the amount of petroleum products to be allocated to consumers.

For purposes of paragraph (4), 'consumer petroleum inventories' means inventories of refined petroleum products held by and in the custody of a consumer for its own use

which do not exceed the quantity of refined petroleum products held by and in the custody of that consumer 30 days before the President declares that a severe petroleum supply interruption exists.

"(f) INFORMATION.—For purposes of this part, the President shall collect information on the pricing, supply, and distribution of petroleum products at the wholesale and retail levels, on a State-by-State basis. Such information shall be substantially of the same type as was collected during September 1981 by the Energy Information Administration pursuant to the Emergency Petroleum Allocation Act of 1973.

"IMPLEMENTATION OF REGULATIONS

"SEC. 274. (a) REQUIREMENTS FOR IMPLEMENTATION.—Regulations under this part may be implemented only if—

"(1) there is in effect a determination by the President of a severe petroleum supply interruption; and

"(2) notice of such determination, notice of the President's intent to implement such regulations, and the text of such regulations have been transmitted to the Congress in accordance with section 551, and neither House of Congress has disapproved (or both Houses have approved) implementation of such regulations in accordance with the procedures specified in section 551.

"(b) DURATION; TERMINATION.—Regulations implemented under this section may not remain in effect after the 90-day period which begins on the date on which the authority to implement such regulations first becomes effective, except that such regulations may be extended by the President for up to 60 additional days, upon his express finding that the severe petroleum supply interruption continues in effect, and that the implemented regulations must be continued to meet the purposes of this part. Thereafter, the authority of the President to implement any regulation under section 273 shall terminate, unless pursuant to subsection (a) the President makes a new determination and new transmittal to Congress of mandatory regulations, which are not disapproved by the Congress under subsection (a).

"PREEMPTION AND CONTRACT LIABILITY

"SEC. 275. (a) PREEMPTION.—Except as provided in subsections (b) and (c), the enactment of this part supersedes and preempts any provision of any law or regulation adopted or promulgated by a State or any political subdivision thereof to the extent that such law or regulation provides for the pricing or allocation of any petroleum product.

"(b) EXEMPTION.—(1) The President may, by rule, exempt from the operation of subsection (a) classes or categories of laws or regulations which would otherwise be preempted under subsection (a), to the extent that the President determines that such laws or regulations would—

"(A) preserve a significant State or local interest;

"(B) not unduly burden interstate commerce; and

"(C) not significantly conflict with or impede operation of this part, achievement of the purposes of this part, or achievement of the objectives of the regulations under section 273.

"(2) Rules under paragraph (1) shall not be subject to the implementation requirements of section 274.

"(c) CERTAIN STATE SET-ASIDE PROGRAMS NOT PREEMPTED.—Notwithstanding subsection (a), a set-aside program for residual fuel oil or any refined petroleum product administered by a State shall not be preempted under subsection (a) if—

"(1) the Governor determines that such a program is required to meet a petroleum supply disruption within the State which will significantly impair essential public services or essential economic activity.

"(2) the set-aside program does not continue in effect for more than 90 days, except that, if the Governor determines that continued implementation is required by such disruption, the program may be continued for an additional 90-day period, and

"(3) the Governor determines that the program does not result in the creation of a residual fuel oil or refined petroleum product set-aside which requires any prime supplier to set aside more than 5 percent of the prime supplier's estimated portion of its total supply for that month which will be sold into the State's distribution system for consumption within the State.

For purposes of this subsection, the term 'prime supplier' with respect to any State means the supplier which makes the first sale of any product subject to the State set-aside into the State distribution system for consumption within the State.

"(d) CONTRACT DEFENSE.—There shall be available as a defense to any action brought for breach of contract in any Federal or State court arising out of delay or failure to provide, sell, or offer for sale or exchange any petroleum products, that such delay or failure was caused soley by compliance with the provisions of any regulation under this part.

"CRUDE-SHARING PLAN

"SEC. (a) STANDBY CRUDE-SHARING PLAN.—The President shall include a standby refinery crude-sharing plan in the Emergency Preparedness Plan required under section 273(c)(1).

"(b) PLAN PROVISIONS.—(1) To the maximum extent practicable, the plan established under subsection (a) shall—

"(A) fairly distribute the burdens of any international allocation of petroleum products by United States corporations to foreign countries participating with the United States in the International Energy Program;

"(B) aid in the equitable distribution and sharing of crude oil, at equitable prices, among efficient refineries of all sizes in the United States;

"(C) encourage the maintenance by all refineries of crude oil inventories, and the acquisition of secure supplies of crude oil;

"(D) help offset partially the disproportionate impact of supply disruptions on efficient refineries of all sizes;

"(E) minimize the adverse impacts of severe petroleum supply interruptions upon the customers of disproportionately impacted refineries of all sizes; and

"(F) help avoid more intrusive and comprehensive petroleum product price and allocation controls.

"(2) Such plan shall provide for the allocation among efficient refineries of crude oil—

"(A) in amounts specified in (or determined in a manner prescribed by) such plan, and

"(B) at prices specified in (or determined in a manner prescribed by) such plan.

"(3) Such plan may be implemented only in accordance with section 274.

"DELEGATION

"SEC. 277. The President may delegate all or any portion of the authority granted to him under this part to such officers, departments, or agencies of the United States, or to any State (or officer thereof), as the President may deem appropriate; except that the President may not delegate the authority to determine any severe petroleum supply interruption.

"EXPIRATION

"SEC. 278. (a) IN GENERAL.—All authority under this part, and any regulation issued pursuant to such authority, shall expire at midnight of December 31, 1984.

"(b) SAVINGS PROVISION.—The expiration of authority under this part, or any regulation issued pursuant to such authority, shall not affect any action or pending proceedings, civil or criminal, not finally determined at the time of such expiration, or any action or proceeding based upon any act committed prior to such expiration.".

(b) The table of contents for such Act is amended by inserting after the items relating to part B of title II the following new items:

"PART C—STANDBY PETROLEUM ALLOCATION AND PRICE CONTROL AUTHORITY

"Sec. 271. Findings and purpose.
"Sec. 272. Definitions.
"Sec. 273. Emergency allocation and price authority regulation.
"Sec. 274. Implementation of regulations.
"Sec. 275. Preemption and contract liability.
"Sec. 276. Crude-sharing plan.
"Sec. 277. Delegation.
"Sec. 278. Expiration.".

STRATEGIC PETROLEUM RESERVE DISTRIBUTION PLAN

SEC. 102. Section 161 of the Energy Policy and Conservation Act (42 U.S.C. 6241) is amended—

(1) by striking out subsection (c) and inserting in lieu thereof the following:

"(c) Not later than 180 days after the date of the enactment of the Standby Petroleum Emergency Authority Act of 1981, the President shall submit a Distribution Plan as an amendment to the Strategic Petroleum Reserve Plan in accordance with sections 159 (d) and (e). Effective beginning 195 days after the date of enactment of such Act, the Distribution Plan previously in effect may not be implemented."; and

(2) by striking out the period at the end of subsection (d) and inserting in lieu thereof the following: "and the Secretary has transmitted such finding to the Congress in accordance with section 551 and neither House of Congress has disapproved (or both Houses have approved) such finding, in accordance with the procedures specified in section 551.".

TITLE II—EXTENSION OF CERTAIN INTERNATIONAL ENERGY PROGRAM AUTHORITIES

EXTENSION

SEC. 201. Subsection (j) of section 252 of the Energy Policy and Conservation Act (42 U.S.C. 6272(j)) is amended by striking out "April 1, 1982" and inserting in lieu thereof "June 30, 1985".

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title of the Senate bill was amended so as to read:

"A bill to amend the Energy Policy and Conservation Act to authorize the President to control oil supplies and prices in the

event of a severe petroleum supply interruption, and for other purposes."

A similar House bill (H.R. 4700) was laid on the table.

APPOINTMENT OF CONFEREES

Mr. SHARP. Mr. Speaker, I ask unanimous consent that the House insist on its amendment to the Senate bill, S. 1503, and request a conference with the Senate thereon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana? The Chair hears none, and, without objection, appoints the following conferees: Messrs. DINGELL, SHARP, MOFFETT, BROYHILL, and CORCORAN.

There was no objection.

GENERAL LEAVE

Mr. SHARP. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 713 and HOUSE JOINT RESOLUTION 335

Mr. TAUKE. Mr. Speaker, I ask unanimous consent to have my name removed as a cosponsor from H.R. 713 and House Joint Resolution 335.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

PERMISSION FOR CERTAIN FARM CREDIT ADMINISTRATION REGULATIONS TO BECOME EFFECTIVE

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1948) to permit to become effective certain Farm Credit Administration regulations which expand the authority of financing institutions, other than farm credit system institutions, to borrow from and discount with Federal intermediate credit banks and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. WALKER. Mr. Speaker, reserving the right to object, I had a problem understanding from the title what this was going to do. Could the gentleman give us a short explanation of what this bill is all about?

Mr. DE LA GARZA. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Speaker, I would be very happy to explain this bill.

Mr. Speaker, this is a bill to permit to become effective certain Farm Credit Administration regulations which expand the authority of financing institutions, other than farm credit system institutions, to borrow from and discount with Federal intermediate credit banks.

The Farm Credit Act of 1971, the statute which governs the operation of both the federally chartered, privately owned farm credit system and the Farm Credit Administration, the Federal supervisory agency, was substantially amended by Congress last year. One of the most significant changes gave assurances to rural banks and other lending institutions that, when necessary, they could discount loans with and borrow from the Federal intermediate banks, which are units of the Federal credit system. It was the objective of Congress that these other financial institutions have access to adequate funds to finance their farm, ranch, and aquatic borrowers.

The Farm Credit Administration has been formulating regulations to implement the new statutory provisions since early this year. During the rulemaking process, comments and suggestions of various interested parties were addressed. The Subcommittee on Conservation, Credit, and Rural Development of the Agriculture Committee was briefed on the matter from time to time. On October 22, 1981, the Farm Credit Administration issued its final regulations on this subject. Because of a question which arose, a clarifying amendment was published on December 8.

The 1980 amendments to the Farm Credit Act subjected regulations issued by the agency on this subject to a two-House legislative veto. They provided that, at the earliest, regulations could not become effective until 60 days of continuous session of Congress after their promulgation. This provision is the source of the problem we must remedy.

It is obvious that the 60-day period of continuous session after promulgation of the regulations and the amendment will not expire before adjournment of the first session of this Congress. Sine die adjournment would break continuity of session for this purpose. Therefore, under the legislative veto provision of law, the 60-day period would begin to run anew upon convening of the the second session of this Congress. This would necessarily postpone the effective date of the regulations and the amendment at least into March 1982. In view of the dire economic circumstances now facing American agriculture, it is highly likely that the additional sources of credit which the regulations would make available will be sorely needed long before next spring.

The purpose of S. 1948 is simply to make these regulations and the amendment effective as of the date of enactment of this bill. Adoption of this bill will not necessarily indicate approval of the regulations by Congress. It will, however, promptly make additional sources of agricultural credit available and thereby accomplish one of the main purposes of Congress in adopting the 1980 farm credit amendments.

I urge my colleagues to join in adopting S. 1948.

Mr. WALKER. I thank the gentleman very much.

Mr. Speaker, I withdraw my reservation of objection.

Mr. JEFFORDS. Mr. Speaker, I reserve the right to object.

Mr. Speaker, I would like to say the minority has reviewed the regulations and also understands the bill, and would certainly support the legislation.

Mr. Speaker, I want to associate myself with the remarks of my colleagues and urge passage of S. 1948, a bill to permit to become effective certain Farm Credit Administration regulations which establish the authority of financing institutions, other than farm credit system institutions, to borrow from and discount with Federal intermediate credit banks.

Mr. Chairman, one of the most controversial items contained in the Farm Credit Act amendments signed into law last year was the provision to allow other financial institutions to use the discount window privileges of the Federal intermediate credit banks of the farm credit system. In order to maintain congressional oversight of the enactment of this important provision, we required the regulations concerning OFI authority subject to congressional veto. As a result, the regulations do not become effective until the passage of 60 calendar days of continuous session of Congress if no committee of either House has reported or been discharged from further consideration of a disapproval resolution by the end of that period.

A sine die adjournment of Congress, however, breaks the continuity of session. If that happens, the review period begins running again at the beginning of the next session of Congress. That is what appears will be the case in this situation if Congress adjourns within the next few days. If this happens, it is unlikely that the regulations will be effective until some time in March or April 1982.

All this bill will do is simply waive the 60-day waiting period, making these regulations effective on the date of the bill's enactment. The bill would in no way alter the statutory waiting period for similar Farm Credit Administration regulations which may be issued in the future.

The comments and suggestions of the various interested parties have been adequately addressed in the agency's rulemaking process. Therefore I ask support of this measure, as it will insure that these regulations become effective before the peak credit season for farmers early next year.

Mr. Speaker, I withdraw my reservation of objection.

Mr. WAMPLER. Mr. Speaker, I reserve the right to object, and I shall not object.

Mr. Speaker, I rise in support of S. 1948, a bill to waive the 60-day waiting period for certain Farm Credit Administration regulations. I want to associate myself with the remarks of the gentleman from Texas (Mr. DE LA GARZA) the chairman of the Committee on Agriculture, and I commend him for his timely action on bringing this bill to the floor.

Last year Congress enacted the Farm Credit Act Amendments of 1980. Among other things, that law expanded the authority for financial institutions to borrow from and discount with the Federal intermediate credit banks of the farm credit system.

This particular provision of the Farm Credit Act was not without controversy during consideration of the bill. As a result, the Congress mandated that the law require regulations concerning the "OFI" provision be subject to congressional veto. Consequently, under current law the regulations cannot become effective until the passage of 60 calendar days of continuous session of Congress if no committee of either House has reported or been discharged from further consideration of a disapproval by the end of that period.

Basically, the new regulations governing discount authorities under the Farm Credit Act amendments provide increased access to additional credit to the Nation's farmers and ranchers. This is done by providing rural banks and other commercial lenders which meet certain specified eligibility requirements with access to funds of Federal intermediate credit banks. As a result, additional sources of credit will be made available to farmers and ranchers, primarily through rural community banks and agricultural credit corporations.

The regulations at issue were published on October 22 of this year. An amendment clarifying the regulations was published in the Federal Register on December 8, 1981. Fifty days of the sixty-day review period already have expired. To my knowledge, no resolution disapproving the regulations has been introduced or will be introduced in the time remaining in this year's session of Congress. However, if Congress adjourns in the next few days as scheduled, the review period on these regulations must start again at the beginning of the next session of Congress. As a result, the regulations could not become effective until late March or April 1982.

The bill before us would waive the continuous 60-day waiting period, thus making these regulations effective on the date of the bill's enactment. The bill would in no way alter the statutory waiting period for similar Farm Credit Administration regulations which may be issued in the future.

Mr. Chairman, our Nation's farmers and ranchers must have adequate sources of credit to assure their continued viability. These regulations will play an important role in insuring that adequate sources of credit are available. The comments and suggestions of the various interested parties have been adequately addressed in the agency's rulemaking process, and I am not aware of opposition to this bill from any interested group or organization.

I ask that my colleagues join me in support of this legislation, as it will insure that these regulations become effective before the peak credit season for farmers next year.

Mr. Speaker, I withdraw my reservation of objection.

● Mr. JONES of Tennessee. Mr. Speaker, I rise in support of S. 1948, and urge its adoption to my colleagues.

This bill simply permits a regulation recently promulgated by the Farm Credit Administration to become effective immediately instead of being held up for a 60-day congressional review period. Because the regulation was not issued by the FCA until October 22 of this year, it appears impossible that the necessary 60 days will lapse before Congress adjourns this session. Therefore, it could be well into next year before the 60-day review period could again be observed.

The regulation in question would implement a new authority for Federal intermediate credit banks of the farm credit system to open their discount windows to other financing institutions not included in the system. This action will result in many rural banks having an additional source of agricultural credit available to them in the coming years. It was for this reason that the Congress granted this new authority last year in the Farm Credit Act Amendments of 1980.

Again, Mr. Chairman, I urge passage of S. 1948, and I assure my colleagues that it is in the best interest of the agricultural sector that we promptly settle this matter.●

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1948

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law, the final regulations issued by the Farm Credit Administration amending subpart P, Part 614, title 12 of the Code of Federal Regulations, published in the Federal Register of October 22, 1981 (46 F.R. 51886-51889), together with an amendment thereto published in the Federal Register of December 8, 1981 (46 F.R. 59959), which implement the provisions of section 2.3 of the Farm Credit Act of 1971, as amended by the Farm Credit Act Amendments of 1980, shall become effective on the date of enactment of this Act.

SEC. 2. The provisions of the first section of this Act shall not be deemed an expression of congressional approval of such regulations and the amendment thereto.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

THE POLISH CRISIS

(Mr. BOLAND asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOLAND. Mr. Speaker, as it has been so often over the last 16 months, the attention of the world is again focused on Poland.

The military crackdown on trade union activists, which began over the weekend, is a matter of the utmost gravity. It imperils the economic and political gains which Solidarity and other unions have so painstakingly made. It threatens Poland with an internal struggle that could have grave repercussions far beyond its borders. Those of us who have applauded the courage and determination of the Polish people, in achieving political reform in their country, can only hope that the declaration of martial law does not signal the end of those reforms. Above all, we pray that the military and union leaders can resolve the present crisis without resorting to bloodshed. As Pope John Paul II noted, too much Polish blood has already been spilled in this century.

Mr. Speaker, the struggle in Poland is now, as it always has been, one for the Polish people to settle. Given the proximity of Poland to the Soviet Union, the temptation for outside intervention is great. Our Government

cannot overstate the gravity of the consequences of Soviet intervention. It is my hope that the Soviets will see the wisdom of allowing the internal affairs of Poland to be managed by the Polish people.

Poland faces serious political and economic problems. Solving those problems will require the cooperation of all elements of the Polish state. As the current crisis unfolds, we will see whether that necessary cooperation is present or whether those who would crush Solidarity, at the risk of their country, will prevail.

A FEDERAL BUDGET PAINTED WITH REAGAN RED

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and to include extraneous matter.)

Mr. ALEXANDER. Mr. Speaker, over the weekend I appeared in a number of meetings in my district. I was asked by several constituents about the prospects of the President delivering on his promise to balance the budget by 1984. Yesterday, the New York Times published an article written by Stephen Wiseman, which accurately reports on the status of the economic situation today.

Mr. Wiseman points out that the next 3 years are expected to produce record high deficits totaling a cumulative amount of more than a third of a trillion dollars.

Clearly, the President has given us a budget painted with Reagan red.

DEEP IN THE RED

Administration's changing forecasts on the budget deficit

[In billions of dollars]

March projections:	
1982	−45.0
1983	−22.9
1984	0
July projections:	
1982	−42.4
1983	−22.9
1984	0
September projections:	
1982	−109.1
1983	−22.9
1984	0
December projections:	
1982	−109.1
1983	−152.3
1984	−162.0

Total Reagan deficit −$423.4.

Mr. Speaker, following is the text of Mr. Weisman's article in the December 13, 1981, issue of the New York Times:

HUGE DEFICITS FORCE REAGAN INTO SOME TIGHT CORNERS

(By Steven R. Weisman)

WASHINGTON.—Like a house flattened by a hurricane, President Reagan's ambitious economic goals have been splintered by what could turn out to be the worst recession since World War II. Now the master builder is presiding over a construction crew whose members seem to be spending more time swinging their conflicting approaches at each other than in putting the economic—and the political—house back together.

The events of the last week demonstrated that the arguments within the Reagan Administration, not to mention within the Republican Party, are growing increasingly sharper as the tasks ahead grow increasingly difficult. News of the latest Administration projections on the budget deficit—$109 billion this fiscal year, up from an estimated $43 billion only three months ago—sent the Reagan fiscal experts scrambling for two reasons. One was to explain why the program enacted amid such hope in the summer had produced such calamitous results. The other was to try to resolve credibility not only to the Administration, but to their favorite theories.

The disputes might not have occurred if Mr. Reagan's original economic program, enacted in the form he wanted, had achieved its desired results. The supply-side program was designed to bring about huge tax cuts—$750 billion spread over five years—which Americans would use to save and invest, expanding the "supply" of capital and financing both economic growth and the looming deficits.

Instead, fear of those deficits caused the bond market to collapse, which in turn sent interest rates soaring. The high interest rates choked off hopes for economic recovery. And now that Americans are saving as hoped—in newly created retirement accounts, tax-free savings certificates and the like—they are not spending. As economists for the Business Council, which represents the nation's largest corporations, pointed out last week, individuals' failures to consume has already exacerbated the recession and ultimately could critically damage the push for new business investment that is the key of the President's program as enacted. And that could jeopardize Republican hopes for the 1982 elections.

So, last week the "monetarists"—who believe that economic growth depends on monetary growth—were blaming the Federal Reserve Board and its chairman, Paul A Volcker, for keeping an overly tight grip on the supply of money. The adherents to conventional Republican economic theory—led behind the scenes by David A. Stockman, director of the Office of Management and Budget—were arguing that there could be no recovery, and hope of taming inflation, unless the Administration did something about looming budget deficits. Substantial tax increases next year were among the recommendations of the members of this group, who also argued that it would be politically impossible to bring Congress to try to close the Federal deficit with nothing but additional rounds of painful budget cuts.

"AN EMPTY RELATIONSHIP"

The most startling economic advice, however, came from the Administration's "supply siders," the people who believe in the sacredness of reducing the tax burden on Americans. Their zeal was exposed when William Niskanen, a member of the Council of Economic Advisers, observed that it was more important to protect the Administration's previously enacted tax cuts than to worry about Federal deficits, which, he said, don't have much of an impact on inflation anyway. "The simple relationship between deficits and inflation is as close to being empty as can be perceived," said Mr. Niskanen. The remark raised a storm within the Administration and without. Before 24 hours had passed, the White House disavowed it.

In Congress where Republicans have for years worshipped at the shrine of balanced budgets, Senator William Armstrong of Colorado summed up the cries of protest. Mr. Niskanen, he charged, was advocating a "malevolent metamorphosis" from sound economic theory. Inevitably, Democrats noted that Mr. Reagan himself had served as a balanced-budget apostle in his maiden economic address Feb. 5 when he deplored the nation's trillion-dollar debt, saying, "We know now that inflation results from all that deficit spending." Now, of course, the deficits the Administration is projecting could increase that trillion dollars by more than 40 percent by 1984.

Hidden in the smoke of these and other exchanges was a developing antagonism between Treasury Secretary Donald T. Regan, on the one hand, and Mr. Stockman and James A. Baker 3d, the White House chief of staff, on the other. The driving force was the realization that there was no way the Administration could close the deficit gap by spending cuts alone. Not only was there this year's recession-driven increase, the 1983 deficit was newly estimated at $152 billion and the 1984 deficit, at $162 billion. "If you assume that Social Security cuts are off-limits until 1983, and if you assume no new cuts in defense, then there is no way you can make much progress toward closing that deficit without substantial increases in taxes next year," said one official. "Anyone who thinks otherwise hasn't recognized political reality and is just smoking dope."

This was the thinking, in any case, that impelled Mr. Stockman and Mr. Baker to try to force a decision in favor of tax increases on a reluctant President Reagan. In an earlier skirmish this fall, Mr. Reagan rejected their advice—and the advice of Senate Republicans—to go for substantial tax increases, choosing instead a small three-year package of $22 billion in measures aimed at closing "loopholes" in business taxes. Now, Mr. Stockman and Mr. Baker are out to win the war. Forcing an early commitment to get the 1984 budget deficit down to $55 billion to $60 billion would, they reasoned, bring "discipline in the system" that would force Mr. Reagan to come round to their view.

Secretary Regan's response was to observe, like Mr. Niskanen, that budget deficits are not inherently worrisome, so long as the Federal Reserve lets money supply grow, enabling the Government to borrow without driving interest rates into the stratosphere. Mr. Regan let it be known that a deficit of $60 billion was fine with him, but that if it meant increasing taxes to get there, he would recommend "tolerance" of a higher deficit figure. Like Mr. Stockman and Mr. Baker, Mr. Regan seemed to be confident that "reality" would draw the President back to his thinking.

REAGAN, THE MYSTERY MAN

Last week's mystery man was, of course, Mr. Reagan himself. As candidate, Mr. Reagan declared firmly that his economic goals—big tax cuts, big increases in military spending, and a balanced budget—could all be carried out with ease because of the enormous economic growth he seemed confident would ensue.

Officially, the President continues to adhere to this view. At meetings last week, he was reported to have scowled and looked on with horror amid talk of the need to re-

treat on taxes. He was particularly distressed by one idea that was gaining currency—a windfall profits tax on natural gas, something Mr. Reagan, in a letter last summer to an Oklahoma Congressman, promised to veto if it came to his desk.

It was clear from everything that Administration officials said that Mr. Reagan had yet to make up his mind and that his advisers were trying to force him to come to terms with "reality" as each sees it. They all have until Christmas. Then, Mr. Reagan must send his documents for the 1983 budget, which begins next Oct. 1, to the printers. Unlike last year, he no longer has the luxury of advisers who agree on fundamentals.

The battle under way now "for the soul of the Reagan Administration and the mind of Ronald Reagan," as one aide put it, is likely to reveal more about the genial purveyor of economic verities who was elected President last year than any of the speeches or any of the legislation he has put forward so far.

PERSONAL EXPLANATION

Mr. PORTER. Mr. Speaker, I was unavoidably detained at the George Washington Hospital this morning when rollcalls 357 and 358 were taken. Had I been here and voted, I would have voted "aye" on both rollcalls.

Mr. Speaker, I ask unaminous consent that this explanation be placed in the permanent RECORD immediately following those votes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

□ 1920

SOCIAL SECURITY "NOTCH" PROBLEM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. BRINKLEY) is recognized for 60 minutes.

GENERAL LEAVE

Mr. BRINKLEY. Mr. Speaker, I ask unanimous consent that all Members may be given the balance of this week to insert their remarks on this subject which I will address.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. BRINKLEY. Mr. Speaker, on November 17 I introduced legislation which would instruct the Commissioner of Social Security and the Secretary of Health and Human Services to immediately conduct a study and report to Congress on steps which can be taken to correct the social security benefit disparity which has become known as the "notch" problem. My legislation was patterned after that of the gentleman from Maryland, Dr. LONG, and I very much appreciate his leadership in this regard.

The purpose of this legislation, Mr. Speaker, House Concurrent Resolution 222, is to insure fair treatment for those who have based their retirement plans on social security benefit levels which have existed for the past decade, but which would be substantially reduced by changes in the benefit formula scheduled to take effect next year.

As most of you know, I have long been committed to reducing Government spending and restoring fiscal responsibility. However, I am equally determined to see to it that all Americans are treated fairly by our Government, and that inequities within existing programs are corrected.

Certainly, our efforts to correct the Social Security "notch" problem are consistent with our goals for good government. When Congress passed the 1977 law resulting in this situation, it never intended or foresaw the huge gap which has come to exist between the benefit levels paid to those becoming eligible for social security during the past decade and the amounts which now stand to be paid to persons reaching eligibility age next year. That is because this gap is basically a reflection of the extremely high interest rates which have prevailed since 1977, and which were not anticipated when the original law was passed.

The question then, Mr. Speaker, is what should be done? Should we let the unexpectedly large gap that has developed go into effect next year as scheduled, thus saving the Government money but unfairly penalizing those who reach retirement age next year? I do not think so, and that is why I have introduced this concurrent resolution.

Lately, I have detected a growing feeling on the part of many people that our Government has quit caring about them, their families, and their problems. We have got to reverse that perception. We have got to have it clearly understood that, while cutting costs and saving money are important and necessary objectives, doing people right is still the most important standard our Government must meet.

At this point, Mr. Speaker, I will read the resolving clause of House Concurrent Resolution 222, which is as follows:

Resolved by the House of Representatives (the Senate concurring), That, the Commissioner of Social Security and the Secretary of Health and Human Services should immediately conduct a study and report to Congress on steps which can be taken to correct the benefit disparity known as the notch problem, in order to insure equitable and fair treatment for those who have based their retirement plans on benefit levels which have existed for the past decade.

Mr. Speaker, in an effort to be credible and to have our bona fides not suspect, I have examined the CONGRESSIONAL RECORD for the law in question, for the social security financing amendments of 1977, and I have in my hand the legislative history of that act under date of October 26, 1977. The chairman of the Ways and Means Committee at that time was Mr. Ullman, and he states the problem quite succinctly as follows:

The long-range deficit in the system, now estimated at the unsustainable rate of 8.2 percent of taxable payroll, is a result of two factors. One is a flaw in the benefit formula put into the Social Security Act in 1972 when automatic cost-of-living adjustments were added to the system. This formula would result in much higher benefit levels beginning in the 1990's than were intended or that workers could be asked to support with their payroll taxes.

So, he states the problem, and the issue is whether or not the projections made in 1977 are accurate today.

The statement of Mr. Ullman can be found on page 35239 of the CONGRESSIONAL RECORD of October 26, 1977.

Then, later on in the statement, he points to a way that a correction can be made. He says:

H.R. 9346 includes important "decoupling" provisions to correct the unintended benefits of the benefit formula adopted in 1972. The provisions are designed to stabilize future benefit replacement rates on a permanent basis at about 5 percent less than those that will be paid in 1979.

And the question I have to raise today, in 1981, is whether or not that projection was accurate. For you see, Mr. Speaker, most of us are not experts in this field, and we simply wish to know whether the perception and the projections raised in 1977 conform to the real facts of today, and whether or not the disparity gap is a great deal more than it had been projected to be, because he said:

The provisions are designed to stabilize future benefit replacement rates on a permanent basis at about 5 percent less than those that will be paid in 1979.

Is that accurate? Many of us feel that it is not. This is the question that would be resolved by House Concurrent Resolution 222 calling upon the Social Security Administration and the Secretary of Health and Human Services to come forward with options and with the report to let us know precisely whether or not the projections of 1977 conform to the facts of 1981.

Briefly, Mr. Speaker, I turn to the remarks of Mr. CONABLE, which are to be found on that same date, on page 35246, and he also recites the decoupling and wage indexing provisions. I am quoting further:

This bill stabilizes them at a level about 5 percent lower than those existing in January 1979. I think it is a sound proposal, and I am glad it is in there. It has a positive impact upon the actuarial improvement of the total package.

Again the inquiry today, Mr. Speaker, whether or not the perception of Mr. CONABLE in 1977 for both the outyears of 1979 and 1981, and actually for January 1982, are accurate.

On that same CONGRESSIONAL RECORD day, page 35249, Mr. ARCHER

also refers to the sound decoupling provision, and I know that he also would be interested in knowing whether the facts conform to the projections made at that time.

On page 35251 Mr. ROSTENKOWSKI states:

Although it is true that other benefit changes (mainly the correction of errors in the benefit formula through "decoupling") have offsetting cost effects, I believe it should be understood that the bill before us does contain some significant benefit improvements.

And then further, we hear from Mr. Fisher on page 35257, indicating that the bill before the body on that earlier day corrects the overindexing of future benefits.

The inquiry again, Mr. Speaker, is as to whether or not that perception conforms to the facts which are in existence today. If they do not conform, Mr. Speaker, there is a strong case to be made for a transition level which is more modest, because the people who had planned their retirement under social security, instead of experiencing a mild bump in the road, are being confronted with a speed breaker, which is hardly fair and, which should be smoothed out in their behalf.

□ 1930

Finally, Mr. Speaker, the last quote I have is on page 35266 of the CONGRESSIONAL RECORD of October 26, 1977. It is from Mr. GEPHARDT. I quote Mr. GEPHARDT:

First, it corrects the error created by Congress in 1972 of putting a double escalator on entry-level benefits. If this error continues, we will be replacing 52 percent of wages for a worker earning average wages in the year 2000. In 1955 the replacement rate was 31 percent, so the rate of escalation can be fully appreciated. This bill fixes and stabilizes the replacement rate at an average of 43 percent for all times in the future. If this bill did nothing more than this it would be a huge success.

Mr. Speaker, the inquiry I am making by referring to the legislative record for this social security amendments bill of 1977 is whether or not the people back in that time were on target when they referred to the figures involved and the percentages involved. If they are on target, we do not have a whole lot to quarrel about as far as accepting responsibility for the results.

But, Mr. Speaker, in the event the gap has escalated enormously, then I think it is a responsibility of this body to inquire of the Social Security Administration and the Secretary of Health and Human Services asking them to give us the comparisons, to give us some alternatives from which we could choose in making an adjustment in behalf of those people who are born in 1917, who will become 65 years of age in January of 1982.

Mr. ERDAHL. Mr. Speaker, will the gentleman yield?

Mr. BRINKLEY. I yield to the gentleman from Minnesota.

Mr. ERDAHL. Mr. Speaker, I rise in support of the resolution introduced by my colleague from Georgia, calling for a complete review and study of the social security benefit inconsistency known as the "notch" factor.

I think this is a bold effort which will signal to many millions of recently and soon-to-be-retired Americans that this Congress is truly committed to their well-being. It is unacceptable that many retirees should be asked to shoulder a burden created by an inconsistency in the law, which could cost them thousands of dollars in retirement benefits.

In its haste to correct an already inadequate benefit structure created in 1972, the Congress voted in 1977 to create a new benefit formula which would more closely reflect the actual increase in the cost of living expenses. Unfortunately, the 95th Congress was acting under very inaccurate assumptions about the performance of America's economy, so rather than solving a problem, it only created another, known as the "notch" factor.

The notch, or disparity in benefits between the 1972 and the 1977 formula, has resulted from a conscious decision on the part of Congress to reduce benefit levels below those which would otherwise have been payable under the old formula. This reduction in benefit levels created a disparity which was further aggravated by the recent adverse economic conditions.

For example, under the benefit formula adopted in 1977, it is possible for a worker born in January 1917, and retiring at age 65, to receive $110 a month less in monthly payments than someone born just 2 days earlier on December 31, 1916. If this same worker retired at age 66, he could receive $175 less than someone born a few days earlier. Multiplied over a 10-year retirement, this could potentially result in a discrepancy of as much as $21,000.

To claim that this problem is too expensive to correct is inexcusable. The Congress must be bold enough to correct an inequity which it helped create, and I am hopeful that passage of this resolution will begin the reversal of a painful blunder.

Mr. BRINKLEY. I thank the gentleman very much for his comments and for his support.

● Mr. SAWYER. Mr. Speaker, I appreciate the opportunity to participate in this special order today, which focuses on a problem that many constituents of the Fifth District of Michigan have brought to my attention. There is a strong need to correct the existing social security "notch" problem.

The 1977 amendments provided for a revised social security benefits structure that makes major modifications in the way benefits are figured. A major feature of the new benefit structure is that a worker's actual dollar earnings are indexed to take into account changes in average wages in the economy during his working years. This assures that a worker's benefits are based on earnings levels that prevail just prior to age 62.

Although special provisions were included to help smooth the transition from the old system to the new wage-indexed system certain workers retiring at age 65 in 1982 will get lower benefits than those who retire at age 65 in 1981, all other things being equal. There are several reasons why this situation will occur. The principal reason is that workers reaching age 62 before 1979 (age 65 before 1982) continue to get benefits under old law which overcompensates for inflation, while workers reaching age 62 in 1979 (age 65 in 1982) get benefits under new law, which eliminates the overcompensation. In addition, under the new law the Congress eliminated some of the unintended rise in benefits that had occurred under old law since 1972 and that added to the cost of the program. The result is that, in general, benefits are lower under the new system, both over the short and long range, than they would have been under the old system.

To help smooth the transition, House Concurrent Resolution 222 is asking that the Commissioner of Social Security and the Secretary of Health and Human Services conduct an immediate study to report steps which can be taken to rectify this situation.●

Mr. BRINKLEY. Mr. Speaker, I yield back the balance of my time.

POLAND: A NATION IN THE SHADOW OF FEAR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. MCDADE) is recognized for 5 minutes.

● Mr. MCDADE. Mr. Speaker, the people and workers of Poland are under siege. Once again, due to intimidation of the Soviet Union, they are forced to live under guns of tanks and foot soldiers. The outrageous declaration of martial law in Poland puts that great nation in the shadow of fear.

We do not yet know everything that is happening in Poland for the borders have been sealed and communications have been restricted. But we have the official announcement that soldiers and police have been given authority to take any citizen into custody whom they believe to be suspicious. We have the announcement that, quote, basic civil rights defined in the Polish Constitution, in particular those of personal liberty, are temporarily suspended, close quote.

Poland's people are denied information on what is happening in their own country. Printing and distribution of information is banned, unless it has been approved by authorities. Radio and television broadcasts outside Warsaw are suspended. Public gatherings are banned. Mail is being censored. Even movement on the streets is restricted.

Soviet officials have embarrassed themselves before the world. They have used the most obvious kind of intimidation and, as a result, there is no longer even a semblance of orderly government process in Poland.

All of us understand very well that Poland has been involved in a difficult internal struggle. Polish workers organized the Solidarity trade union and have continued to be persistent in articulating the grievances of the Polish people. They have stood up repeatedly to demand recognition of their needs. As a matter of fact, they have been inspired.

On the other hand, however, the government of any mature nation—if it is to be credible at all—must find a way to meet the essential needs of its people. No government that forces another to turn guns on its own people to maintain order can expect to have the respect of other nations.

We have hoped that in the 1980's—in a Europe that is older and, if not wiser, at least more aware of the futility of violence—we have hoped that Poland would find a way to improve the living conditions of its people, free of the threat of Soviet military might.

We still hold out that hope although Sunday's events in Poland put such hopes in jeopardy. Some trade union leaders and former Communist Party officers have been taken into custody. We seem to be seeing again what we had hoped was outdated: the callous, heavy-handed dictatorial exercise of military power against civilians.

As of now we do not know how the Polish people are reacting. Their relatives and friends wait for the least word. We Americans are their relatives and friends. We pray for them.●

BRAD BURNS, 1951-80

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Massachusetts (Mrs. HECKLER) is recognized for 15 minutes.

● Mrs. HECKLER. Mr. Speaker, 1 year ago today Brad Burns took his life. While this tragic suicide occurred in Brockton, Mass., Brad's friends and fellow veterans say Brad died in Vietnam.

Brad's friends yesterday gathered at his snow-covered gravesite in Canton, Mass. There was no formal service. Brad's family and friends just said whatever came to their minds or just said nothing. The overwhelming sentiment is that if only Brad had managed a little longer.

This year Congress passed long-sought legislation providing agent orange treatment by the Veterans' Administration, extended the psychological counseling program Operation Outreach—in which he worked counseling other veterans—provided additional job training and employment opportunities for Vietnam veterans.

We enacted other laws designed to benefit and assist other Vietnam veterans. But the important point is that this year things began to turn around for the Vietnam veteran. Long neglected, the Vietnam veteran is beginning to be appreciated and better understood by his countrymen. A year ago, things looked as bleak as ever. But because of the efforts of Brad Burns, progress is now being made.

Brad leaves a legacy as one of the most human and caring persons any of us shall ever know. He pursued his mission in life—of helping and assisting others—with such intense purpose and zeal that he rarely had time to himself. And Brad was a doer.

Two years ago Brad founded and became first president of the Massachusetts Vietnam-Era Veterans' Association (VEVA). His commitment to the veteran began immediately after his honorable discharge from the Marine Corps in 1973, after service as a lance corporal mortarman with the 9th Marine Division in Vietnam. He was awarded the Vietnam Service Medal and the Marine Combat Medal.

Upon enrolling at Southeastern Massachusetts University in 1974 on the GI bill, Brad founded and became first president of the campus Veterans' Club. He organized and directed campus veterans in many civic projects and efforts, ranging from "Toys for Tots" to a crisis "Hot Line" for troubled veterans.

Brad also established a crisis hot line for troubled youths in the community. Brad's first involvement in such counseling came while he was in the Marine Corps and served as a peer counselor in the Corps' Pacific Command.

Brad's commitment to helping others was total. His able vet center team leader, Bob Gillis, and personal friend and associate at the center, Frank Penacho, often stood in amazement at how—more than once—Brad would spend an entire night counseling a troubled friend and then report directly to work in the morning to perform his outreach duties. Brad always was readily accessible and available to anyone in need of help and assistance.

It was upon graduation from Southeastern Massachusetts University in 1978 that Brad founded VEVA. As its president, he was the driving force behind the proclamation by the Governor that March 29 of each year shall be Vietnam Veterans' Day in Massachusetts. This annual observance by the Commonwealth's 6 million citizens and residents commemorates the day the last American GI left Vietnam.

Brad Burns' legacy—literally—is the countless number of lives he saved and the many more he touched. Brad was rendered full military honors by a Marine Corps honor guard Thursday, December 18, at Knollwood Cemetery. We can best honor and enhance his legacy by carrying on his fine and selfless work. Brad's life has been an inspiration to each of us. It has been an example to all of us.

A poem Brad carried in his wallet exactly states the dilemma and internal tension that bedeviled him day and night. That poem states:

Going to Vietnam was a war crime;
Refusing to go was a domestic crime;
Sitting still in exile was a moral crime.
It was a terrible time to be American and young.
In fact, it apparently was a crime.

As a part of the legacy of Brad Burns, I place into the RECORD at this time certain newspaper articles about him and his passing. Let us learn from him and from his life's experience.

As his mother Miriam said of Brad:

My son was 29, and he made friends like I haven't made in my lifetime. And they all told me not to worry, that his work will live on. That's important, that his work live on.

It does.

The articles follow:

[From the Boston Phoenix, Dec. 23, 1980]

BRAD BURNS, 1951-80

The tableau at the Canton grave site was near to cliche. The sky was gray, ringed at the horizon with distant sunlight. A cold wind swirled loose snow off the pile of synthetic turf and into the faces of the mourners. Heads down, they pulled their arms in tightly under their overcoats until they appeared to be visibly shrinking. The canvas tent over the grave rippled at its edges.

Under the tent, muffled sobbing came from everywhere and nowhere. A man in fatigue clothing fell into the arms of a woman in furs. "Therefore," said the minister, "we commit his body to the ground."

Across the parking lot from the grave site, the Knollwood Memorial Park had erected a statue dedicated to the American veterans interred there: five United States Marines planting the flag atop Mount Suribachi. Snow drifted up the calves of the granite soldiers. Four live Marines stood in front of the statue. Three carried rifles. The fourth stood rigidly to one side. A plane flew overhead. The fourth Marine gave a command that was inaudible amid the jet roar. The other three Marines aimed their rifles at the sky. They fired three times. The shots echoed far down the hillside.

Those at the graveside were affected in different ways by the three volleys. Some stiffened into military postures. Others wept more openly than before. A few jumped at the sound of gunfire behind them as long-buried reflexes became active. These men looked nervously over their shoulders. They looked off toward the western horizon and the thin band of sunlight. They looked off toward Tulagi and Iwo Jima, toward An Loc and Pleiku and a hun-

dred other places that had followed them home.

One of the places was called Bien Hoa. Brad Burns had gone to Bien Hoa. Unlike many of the people who passed through there, Brad Burns had come back. He had set to work helping people deal with the places they had brought home with them. He was very good at his job.

Some of those people were among the ones startled by the gunfire. They had come to the cold hillside to pay Brad Burns back. They had done it in the only way left open to them now.

They had come to his funeral.

Suicide is mother to the cruelest hindsight. His friends remember that Brad Burns spent his last week getting in touch with everybody who meant anything to him. It would not seem important, except that sometime Sunday night Brad Burns shot himself in the head with a rifle.

"He had an itinerary all set up," said Burn's sister Rhonda Bagtaz. "He knew exactly what he was going to do before he bowed out."

In 1971, a judge gave Brad Burns a choice. He could serve time on a drug bust in Walpole or he could join the armed forces. He chose the latter, believing that in the Army he could get good duty as a heavy-equipment operator. "Everybody asks me if I'd do it again," he said a few years later. "Of course I would. I wasn't going to Walpole."

Burns's record scared off the Army, but the Marines weren't so choosy. They made him an infantryman and stuck him into an outpost in Bien Hoa. While he was in Vietnam, Burns picked up a Bronze Star, the Vietnamese Cross of Gallantry, and a heroin habit. The junk was virtually uncut, and extremely easy to come by.

By the time his hitch was up, Burns knew that his habit was going to bankrupt him back in the States. He volunteered to admit that he was a drug dependent and went through "10 days of hell on Okinawa" getting clean. He became his battalion's Drug Exemption Non-Commissioned Officer. He confronted people under his care with the same question he had faced: he asked them whether they could afford their habits back home.

"It worked on a lot of them," he would later recall.

Burns came back, as he once put it, with "my whole political viewpoint reversed. The moral values I was brought up with were shattered." He enrolled in Southeastern Massachusetts University. There, he played the leading role in the dedication of a amphitheater to Vietnam veterans. Eventually, he founded the Vietnam-Era Veterans' Association (VEVA). He drove himself relentlessly on behalf of the new organization. He set up information nights, inviting all the local media and all the local political heavyweights. Most of the invitations went unanswered. His marriage broke up.

Recently, Burns was working in a veterans' outreach program. He worked as hard as ever. "When he came over for Thanksgiving," his mother, Miriam, remembered, "I asked him to leave his beeper at home. If it went off, he was gone like that."

He appeared to be having some success. VEVA was a recognized political-action group. TV stations were coming around. Mary Richardson had interviewed him on Veterans' Day. Burns was beginning to plan on law school.

More than anything else, Brad Burns was determined to inform the world just what Vietnam meant to the men who fought there. He was a journalist's dream. "I got five stories," any interview would begin. "Which one you want?" Two years ago, he told the *Phoenix* that "I've seen it all. I was there during the abuses era of the war. The only question left was, 'What the —— are we doing here? And no one was buying the lifers' answers any more."

People who worked with him fear that his death might well mean trouble for the programs on which he worked so hard: they worry that questions will be asked about the counseling service's effectiveness, that people will say it couldn't even recognize danger signs in one of its most important employees. The elimination of any of those programs would make the grief surrounding Brad Burn's death well-nigh insupportable.

"My son was 29," his mother said. "And he made friends like I haven't made in my lifetime. And they all told me not to worry, that his work will live on. That's important, that his work live on."

Bob Gillis, who worked in the outreach program with Burns, has felt the impact of that work most directly. "There's been a backlash from our own clients," Gillis said. "There're some who are wondering, "What's the use? I've just got to comfort people, tell them, 'These things just happen to people.' I've got to comfort everybody."

On the day he died, Brad Burns went with his brother-in-law to the Patriots-Buffalo game. He told his mother what a good time he had. Several hours later, he was picking up the rifle. He left behind a will, now in the possession of his ex-wife. In the will, friends say, Brad Burns left instructions about the education of his son, Jamie Paul Burns. According to these friends, the boy is simply "to always be told what is really going on."

Brad Burns composed the will. Then he took his life, for reasons that will remain speculative. A good man. A hard worker. A father. A veteran. "Died unexpectedly," is the way the Brockton Enterprise put it.

The minister had left the graveside. Columns of exhaust smoke began to rise from the parking lot, hanging side by side in the chilly air. There was no more light on the horizon.

Someone laid a small cassette recorder on the ground at the head of the casket. Friends had put together a tape as a musical tribute. "Sam Stone," John Prine's tale of the GI junkie, came out tinny and small, audible only within the canvas walls. Others followed. Creedence. Van Morrison. Some late-'60s psychedelia that eluded identification.

Someone reached out and touched the casket. Someone else followed. Soon, everyone had placed his hands on the lid, singing or crying, softly in either case. Flapping on one of the casket's handles was a ragged strip of fatigue cloth. No one had noticed who tied it there.

Walter Norton, a friend of Brad Burns, was working the edges of the crowd. He was bracing people: a hand on one shoulder, the other arm around another. Telling people to be strong. He was crying, too.

They had all been through it before so many times. Years before. The casket. The salute. The flag being folded into the little triangle like a magician's prop. "We commit his body to the earth."

Brad Burns fought Vietnam long after peace was declared. They knew that. They would continue the fight themselves. But some things seemed immutable. The wind still blows. The grave site is still cold. The tears still freeze in your beard.

Gunshots on hillsides still echo forever, and the war still feasts on gratuitous heartbreak.

[From Brockton Enterprise & Times, Dec. 19, 1981]

VIETNAM VETERANS LOSE A FRIEND—BRAD BURNS FINALLY AT REST

(By Paul R. Stevens)

Brad Burns was buried in Knollwood Memorial Park, Canton, Thursday, at peace at last from the nightmares that had plagued him ever since he saw action in the Third Marine Division in a war he viewed as pointless in Vietnam.

"But he has left behind him thousands of Vietnam veterans still not at peace," his sister, Rhonda Bagtaz, said after the funeral. "What my brother has done in taking his life is a sad example to show how much help is really needed for the veterans of that useless war."

Brad Burns, who founded the Vietnam Era Veterans Association in Brockton and worked literally day and night for the cause of Vietnam veterans everywhere, shot himself Sunday night after his emotions had taken a roller coaster-like ride, up and down. That last "down" had been too much for him.

He died at 29.

Vietnam veterans—some from distant corners of the nation, some wearing faded combat fatigues—crowded into the Farley Funeral Home for the funeral service at 10 a.m. Thursday. Also present was U.S. Rep. Margaret Heckler, who had worked with Brad on legislation to help veterans. She vowed later to continue working for them in Brad's name and memory. She sat beside the family.

Family members included Rhonda, her sister, Laura, and her mother, Miriam, all of whom became, as Rhonda said today, uncontrollably upset.

"And who wouldn't be uncontrollably upset—those of us who loved him so!" Rhonda added. "That war was evil. It's hard to find who to blame for my brother's death. Trying to get an answer from the dense bureaucracies of our government is like trying to find your way out of a strange forest at midnight when there's no moon.

"Right now—right this minute as I talk to you—I haven't much faith left for the U.S.A."

When the Rev. Ernest O. Geigas, pastor of First Congregational Church, had finished his graveside eulogy, co-workers at the outreach center and friends of the dead veteran, who had followed the entourage to the cemetery, held their own particular way of saying "good-bye" to Brad.

Frank Penacho, who once roomed with Brad after the war and works at the outreach center Brad founded, announced in a loud voice to the standing-room-only mourners: "We're going to pay a tribute to Brad. Anyone who would like to stay is welcome."

Someone then turned on a cassette tape recorder—and out burst music. Three of Brad Burns' favorite songs were played, and then Penacho brought out the VEVA flag he and Brad had created, the emblem flag for the outreach center. Veterans placed the flag over the casket, with a bible and a rose.

Suddenly another Vietnam veteran and friend of Brad, Paul Camacho yelled: "How stupid the war was! My sons will never, ever go!"

Hundreds of persons, the majority veterans, had gathered at the cemetery, where

Brad's mother and sisters again broke down as the flag-draped casket was lowered.

Today, Rhonda told of that "terrible last Sunday night."

She said, "I live next door to where Brad lived on Spring Street, and often I'd go over to his place and have tea or coffee to help him break the depressions that struck him from time to time. I didn't this night. There didn't seem to be any reason to.

"At quarter of 11 Brad called me. He seemed to be in great spirits. Brad had a great sense of humor, and soon his jokes had me giggling. After he hung up, I sat watching television, not knowing at the time Brad was aiming a pistol at his head. I didn't suspect."

She says Brad has left two families behind, "his natural one, and the veterans of the war he, and they, hated so much. At the funeral, veterans, grown men, reacted like his relatives when they just hugged each other in their grief and let the tears go."

In looking over her brother's things, Rhonda found in his wallet a mimeographed quotation by Vietnam veteran Jan Crumb. She read it to the Enterprise because, she said, "It was just what my brother felt."

The quotation follows:

"Going to Vietnam was a war crime;
Refusing to go was a domestic crime;
Sitting still somewhere or somehow in exile was a moral crime.
It was a terrible time to be American and young
In fact, it apparently was a crime."

[From the Patriot Ledger, Dec. 18, 1981]

HIS OWN VIETNAM BATTLE IS ENDED

STOUGHTON.—Former Marine Bradford R. Burns was buried yesterday.

Even though he had taken his own life far away from the jungles of Southeast Asia, his friends and family believe his name should be among the thousands killed in Vietnam.

The 29-year-old Burns shot himself—ending life at an age when most young men are full of expectations.

But since coming home, he was unable to discover his own place in life and hold onto it.

Burns helped to found the Brockton-based Vietnam-Era Veterans Association—a group dedicated to aiding other veterans unable to cope with coming home.

He traveled extensively talking with other veterans, helping them avoid drugs, depression, alcohol and suicide. But his friends said he was disillusioned—no one cared.

"Do you want to know why," said fellow veteran Ronald Lembo, when asked what had bothered Burns so much that he put a .22-caliber handgun to his head Sunday. "For 10 years he tried to get people to understand that Vietnam veterans are hurting. People didn't give a damn. The job was bigger than he was."

Among the more than 300 mourners attending services at a local funeral home were veterans wearing faded camouflage combat fatigues. Some had served with Burns in Vietnam. Others he had tried to counsel.

Part of the hurt, Lembo said, is many Americans do not appreciate what they went through in Vietnam. "We have had no parades," said Lembo. "We saw hatred in people's eyes. Some said "Why did you go?" Others asked "Why didn't you stay over there and finish it?" None said "Thanks."

Brad lobbied Congress for better veterans' benefits and helped to convince the state Legislature in 1979 to declare March 29 Vietnam Veterans Day.

He headed the veterans' organization at Southeastern Massachusetts University, from which he earned a sociology degree in 1978. He planned to enter Bridgewater State College in February to gain a master's degree, his mother said.

He moved from his 36 Pine Tree Road home, where he grew up, to Taunton and married Lena Ceeley in 1975. They had a son, Jamie Paul, but the marriage broke up in 1978.

"He went to school in the day and worked with the veterans at night," his mother recalled. "And that didn't leave much time. I think that led to the divorce."

Despite the divorce, he seemed happy, especially while counseling veterans at the outreach center, Mrs. Burns said.

On Thanksgiving, Brad took his mother out for dinner. "He said he was so happy," she recalled. "He was just so happy. He really enjoyed it. He never said anything was wrong."

Sunday, he went to the Patriots game with his brother-in-law, Bobby Bagtaz of Brockton. After the game, he called his sister, Rhonda Bagtaz, and told her he had a "wonderful time," his mother said.

An hour later, a fellow Vietnam veteran found him dead on the floor of his apartment on Spring Street, Brockton, where he had moved six months ago.

"Some of the people he counseled have told me they just don't know how they can get along without him," Mrs. Burns said, unsuccessfully fighting back the tears.

It's unbelievable how many friends he made. I don't think he realized himself. Anybody who came in contact with him loved him."

Funeral services were held at the funeral home and burial was in Knollwood Memorial Park, Canton.

Memorial donations can be made to the Bradford R. Burns Vietnam Veterans Scholarship Fund, care of Blue Hill Credit Union, 490 Washington St.

[From the Herald-American, Boston, Mass., Dec. 19, 1980]

PEACE AT LAST FOR VIETNAM WAR VET

(By Bob Killam)

For Bradford Burns, the Vietnam war never ended. The 29-year-old former Marine went home to his room Sunday night and put a bullet through his head.

"Do you want to know why?" asked his close friend and fellow Vietnam veteran, Ronald Lembo. "For 10 years he tried to get people to understand that Vietnam veterans are hurting. People didn't give a damn. The job was bigger than he was."

Funeral services for the Brockton man were held in Stoughton yesterday, and persons wearing worn and faded combat fatigues were scattered throughout the crowd. Burns spent a year in Vietnam with the Third Marine Division.

His sister, Rhonda Bagtaz, 27, explained, "The Vietnam vets wanted to show their own closeness. They couldn't talk to other people. They could only talk to each other."

Mrs. Bagtaz, who lived almost next door to her brother on Spring Street, said that he had become moody, "happy and laughing one minute, terribly angry the next."

"He was divorced by his wife in June. He loved her and it upset him very much. But no one can blame her. It was understandable why she did it. He became so difficult to live with."

She said Brad Burns had been in pain from cysts in his intestinal tract, a condition he said was due to exposure to the defoliant "Agent Orange" in Vietnam.

"I could hear his screams from my own house. He was being treated at the VA Hospital. They gave him some kind of acid to disolve the cysts. They said it wasn't connected with Agent Orange."

She was sharply critical of the VA. "All they do is fill people with pills to keep them quiet," she said.

Attempts to get comment from the VA on the Burns' case were not successful yet.

Brad Burns had founded the Brockton organization called "Vietnam Era Veterans Association" and from that had grown a larger group whose aim it was to get better treatment for those who served in Southeast Asia.

According to Lembo, Burns was not making the headway in helping the vets he had hoped for. "He kept at it, and kept at it, and kept at it. But it wasn't coming fast enough for Brad."

Lembo, now a "team leader" in Brighton for the Vietnam Era Veterans Outreach Center, expressed bitterness at what he insists is a "total lack of understanding of the war."

"We had no parades," he said. "We saw hatred in people's eyes. Some said, 'Why did you go?' Others asked 'Why didn't you stay over there and finish it?' No one ever said, 'Thanks.' That's all we wanted."

Brad's sister said he was graduated in 1978 from Southeastern Massachusetts University on the dean's list. In 1975 he was selected by faculty and students to represent them in the publication, "Who's Who among Students at American Universities and Colleges."

"The reason all this happened," Bagtaz said, "is that the Vietnam Veterans were not understood or accepted. I am very angry. I was close to him. The country did not offer him the psychological help he needed.

"The war was divided into two eras, pre-Tet Offensive and after Tet. After the Tet offensive, it became really gory and that affected Brad. He never talked about it to me. He would only talk with other vets. His attitude was, 'You weren't there. How could you know what went on.' "

Bagtaz said she was convinced her brother had planned his own death. "You could tell by his pattern last week," she said. "He went around and visited everyone he had ever known. He knew what he was going to do."

A Marine Color Guard was at the funeral. Congresswoman Margaret Heckler of Wellesley was there even though Brockton is not in her district. She had worked on veterans legislation with Burns and they had become friends.

After the services, according to Bagtaz, Mrs. Heckler approached the family and told them, "I'm going to do everything I can to see that nothing like this ever happens again."

Burns was buried in Knollwood Memorial Park, Canton. The family stayed after the Marine Guard left. The cemetery was cold, snowy and silent.

[From the Patriot Ledger, Dec. 18, 1980]

HE FELT GUILTY ABOUT THE WAR

(By Rick Moriarity)

STOUGHTON—Along with 60,295 others, Brad Burns went to Schaefer Stadium Sunday and watched the New England Pa-

triots defeat Buffalo. Then he telephoned his sister to tell her what a "wonderful time" he had. Minutes later, he fired a .22 caliber bullet point blank into his head, fell to the floor and died.

The death certificate simply says Bradford R. Burns died of "lacerations and contusions of the brain, secondary to gunshot wound of head. Self-inflicted while in severe mental depression. Suicide."

But everyone who knew him, knows better. They say he was another case of a disillusioned Vietnam veteran who couldn't get a handle on life, who didn't understand what it all meant anymore. So he ended it. Another classic example of the so-called "Vietnam syndrome."

Brad Burns was an ex-Marine who had devoted his life to helping Vietnam veterans piece together and mend their shattered lives.

And today, Vietnam veterans from throughout the country came to Stoughton to attend his funeral and honor the man who helped many of them turn away from drugs, alcohol and suicide.

Brad, who turned 29 in November, freely discussed his war experiences with veterans, but never told his family about them. He rarely let anyone know he was depressed.

"He never, never spoke about it to me," his mother, Miriam Burns said last night at a wake attended by 100 people at Farley Funeral Home.

"That was the problem. He could talk to other veterans, but not to us. It's a problem with the Vietnam veterans. They feel guilty about the war. They think people believe they lost it, that it was their fault."

He joined the Marines in 1971 after graduating in 1970 from Stoughton High School. He had enjoyed working with youths, coaching Little League baseball and as coordinator of the youth center, which no longer exists.

A lance corporal, Brad gave his mother only glimpses of the trauma of combat.

He sent her a picture of what looked like a mangled hut or house. He wrote: "This is where I slept last night," but gave no other explanation, Mrs, Burns said.

Brad earned the Bronze Star and the Vietnamese Cross of Gallantry, but never told his parents, "I didn't know about the medals until I read the obituary," Mrs. Burns said, "He didn't tell us, not even his father."

Brad's father, James, died about six years ago.

A close friend of Brad's, James Fitzpatrick of 175 Manomet Ave., Hull, who also served in Vietnam, said Brad told him he suffered the same frustrations of many American soldiers.

"He saw the waste of life, like all of us did," Fitzpatrick said. "You know, your friend is beside you, then a shell hits. You turn around and all you see is a black hole and smoke. And maybe you try to piece together what's left of your buddy."

"Time after time, you'd go into the same areas. You'd kill the enemy and he'd kill you."

After the war, Brad spent much of time aiding veterans.

He founded the Vietnam Veterans Outreach Center in Brockton and helped found the Vietnam Era Veterans Association after 13 months of combat in the northern part of South Vietnam in the early 1970s.

He toured the country, counseling veterans and speaking to lawmakers and school children about veterans' problems.●

LEAVE OF ABSENCE FOR NATIONAL GUARD OR RESERVE TRAINING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi (Mr. MONTGOMERY) is recognized for 5 minutes.

● Mr. MONTGOMERY. Mr. Speaker, today I am introducing a bill to amend title 38, United States Code, to provide that the period for which an employer in required to grant an employee who is a member of the National Guard or Reserve a leave of absence in order to allow the employee to perform required active duty for training in any period of up to 12 consecutive months.

Current law (38 U.S.C. 2024(c)) requires State and private employers to reemploy those who leave their employment to perform the initial active duty for training required of nonprior-service personnel who enlist in the Guard or Reserve. In the usual case, that training is completed in less than 6 months. But a number of military specialties in such technical fields as fire control, radar, electronics, and avionics maintenance require training for continuous periods of 30 weeks or more. If that training is concluded during the member's initial active duty for training, he is protected under current law.

Subsection (d) of section 2024 of title 38, United States Code, provides for leaves of absence for those who have completed their initial active duty for training, in order to perform their inactive duty for training and other active duty for training. The statute does not specify the duration of such active duty for training periods. There are, however, two recent decisions of Federal courts in Florida which construe it as requiring employers to grant leaves of absence only for periods of 90 days or less.

The employment rights of Guard and Reserve members performing conventional active duty for training, such as annual field training and short courses at services schools for branch and technical training of less than 90 days, are adequately protected.

But some who have completed their initial active duty for training require retraining in the more exotic military skills in avionics and other areas described above. Training of undergraduate pilots requires at least 1 full year, as does that of air traffic controllers. If the Florida courts have correctly interpreted current law, the civilian jobs of guardsmen and reservists in this category are in jeopardy since their military training cannot be completed in 3 months or less.

Clearly, it will be impossible to attain the quantity or quality of trained personnel in the more technical and scientific skills required by the Guard and Reserve under these circumstances.

My bill would go far to rectify this situation by making it clear that members of the Guard and Reserve who leave their employment with a State or private employer in order to be trained in a military skill that requires as much as a year to complete are entitled, upon application, to leaves of absence from that employment and restoration to it upon completing the military training.

While a few programs, such as that for undergraduate pilots of the Army and Air National Guard and Reserve, may require over a year, and some programs in the medical field also exceed a year in duration, I believe the 12-month limitation strikes a fair balance between the demands of the military and the legitimate rights of employers in the public and private sectors.

I urge my colleagues to give their full support to this very important legislation.●

CHICAGO SOLIDARITY DAY II

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. SAVAGE) is recognized for 5 minutes.

● Mr. SAVAGE. Mr. Speaker, I rise today to congratulate the Amalgamated Transit Union locals 241 and 308 for initiating what will be known as "Chicago Solidarity Day II."

Solidarity Day II is a continuing step in the heroic effort begun by labor on September 19 of this year to oppose the reactionary forces of the Reagan administration, which, under the guise of balancing the Federal budget by decimating social programs, has in fact taken those funds and used them to feed the seemingly insatiable spending appetite of the Pentagon, the Armed Forces, the CIA, and multinational corporations.

Having successfully pushed through a compliant Congress massive budget cuts that spell increased economic hardship for the poor and the working poor, and a tax cut that bestows even more riches on the rich and well-placed, it is incumbent upon those of us who truly care about those citizens whom this administration has apparently decided to ignore, to speak out in protest against that administration's deception and treachery.

But, we must do more than just raise our voices in outrage and indignation.

In the days, weeks, months, and years ahead, we must expose the Reagan administration's policies to the poor, the unemployed, and the working class for what they really are—a betrayal of the American people.

We must agitate for a new alternative for the vast majority of Americans who are suffering so greatly at the hands of Reagan-induced recession. We must develop and solidify a

movement to unite the progressive forces in our country to continue the historic work begun on Solidarity Day I.

Today, I am calling upon trade unions, women's organizations, senior citizens, and community and public action groups to join in support of the efforts of the Amalgamated Transit Union and locals 241 and 308 to unite labor, community, church, and antinuclear forces in one solid voice. We must speak as one in our insistence that Reagan and those who support his policies in Congress stop stealing from the poor to give to the rich. We must make it known that we will not tolerate balancing the budget on the backs of the poor and working poor. We must agitate for jobs and for fair treatment for all citizens—not just the privileged few—from an administration that to date has seen fit to turn away from social justice.

On December 19, 1981, let us stand together and raise our voices for what we know to be right as we tell Reagan: "No more cuts!" "Protect jobs and services!" "We are one!"

Thank you, Mr. Speaker.●

LEGISLATION RESOLVING DISPUTE OF LAND IN OLYMPIC NATIONAL PARK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. BONKER) is recognized for 5 minutes.

● Mr. BONKER. Mr. Speaker, I am introducing today a bill that resolves a 41-year dispute over the future of some 2,000 acres of private land inside Olympic National Park in Washington State.

The property lies along the north shore of Lake Quinault and upstream along the Quinault River that drains into the lake. The valley provides access to the southwest portion of the park.

The legislation would revise the park boundaries to exclude about two-thirds of this private land from the park. The exclusion would include three platted subdivisions, the sites of some commercial activity, and a number of farms and residences.

The one-third of the land that would remain within the park is less developed and provides some of the best habitat for the elk herds whose protection was a chief reason for originally including the Quinault Valley in the park. This plan would also insure future public ownership of the entire north bank of the river upstream from the lake.

These private lands are the remnants of the homesteads of the original non-Indian settlers of the Quinault Valley. Descendants of these people still live in the valley, and their ties with the land and desires to preserve their way of life are very strong.

Residents of the area are also justifiably concerned about maintaining an adequate property base to accommodate community growth and to support adequate community services. The presence in the area of the national park, the Olympic National Forest, the Quinault Indian Reservation, and extensive State holdings make this a very real concern that the bill will help address.

Since this land has been within the park, the National Park Service has been responsible for law enforcement, road maintenance, and other Government services that are traditionally local concerns. The agency is not well suited for such tasks, and residents dislike having to rely on nonelected officials of a large Federal agency for such services. The people clearly prefer to work with local officials on these matters.

And, finally, the bill settles the four decades of uncertainty that valley residents say has gone with living under what they feel is a near-constant threat of Federal condemnation of their property.

A 1976 Olympic National Park boundary adjustment, which I also sponsored, established a procedure for studying the Quinault situation and developing recommendations designed to expedite resolution of these long-standing issues. This process unfortunately did not do the job for which it was intended, and the bill I am introducing today also cleans up Federal statutes by simply deleting all references to it.

Mr. Speaker, I have seen no other proposal which does a better, more balanced job of settling the future of the private lands in the Quinault Valley. My bill resolves the situation for most of the private landowners and does so in a way that retains within the park the most environmentally important lands and wildlife habitat.●

CONFERENCE REPORT ON H.R. 4503

Mr. ROE submitted the following conference report and statement on the bill (H.R. 4503) to amend the Federal Water Pollution Control Act to authorize funds for fiscal year 1982, and for other purposes.

CONFERENCE REPORT (H. REPT. No. 97-408)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4503) to amend the Federal Water Pollution Control Act to authorize funds for fiscal year 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Municipal Wastewater Treatment Construction Grant Amendments of 1981".

ELIGIBLE CATEGORIES

SEC. 2. (a) Section 201(g)(1) of the Federal Water Pollution Control Act is amended by adding at the end thereof the following: "On and after October 1, 1984, grants under this title shall be made only for projects for secondary treatment or more stringent treatment, or any cost effective alternative thereto, new interceptors and appurtenances, and infiltration-in-flow correction. Notwithstanding the preceding sentence, the Administrator may make grants on and after October 1, 1984, for any project within the definition set forth in section 212(2) of this Act, other than for a project referred to in the preceding sentence, except that not more than 20 per centum (as determined by the Governor of the State) of the amount allotted to a State under section 205 of this Act for any fiscal year shall be obligated in such State under authority of this sentence.".

(b) Section 211(c) of the Federal Water Pollution Control Act is amended by striking out "September 30, 1982," and inserting in lieu thereof "September 30, 1985,".

GRANTS FOR STEPS 1 AND 2

SEC. 3. (a) Section 201 of the Federal Water Pollution Control Act is amended by adding a new subsection (l):

"(l)(1) After the date of enactment of this subsection, Federal grants shall not be made for the purpose of providing assistance solely for facility plans, or plans, specifications, and estimates for any proposed project for the construction of treatment works. In the event that the proposed project receives a grant under this section for construction, the Administrator shall make an allowance in such grant for non-Federal funds expended during the facility planning and advanced engineering and design phase at the prevailing Federal share under section 202(a) of this Act, based on the percentage of total project costs which the Administrator determines is the general experience for such projects.

"(2)(A) Each State shall use a portion of the funds allotted to such State each fiscal year, but not to exceed 10 per centum of such funds, to advance to potential grant applicants under this title the costs of facility planning or the preparation of plans, specifications, and estimates.

"(B) Such an advance shall be limited to the allowance for such costs which the Administrator establishes under paragraph (1) of this subsection, and shall be provided only to a potential grant applicant which is a small community and which in the judgment of the State would otherwise be unable to prepare a request for a grant for construction costs under this section.

"(C) In the event a grant for construction costs is made under this section for a project for which an advance has been made under this paragraph, the Administrator shall reduce the amount of such grant by the allowance established under paragraph (1) of this subsection. In the event no such grant is made, the State is authorized to seek repayment of such advance on such terms and conditions as it may determine.".

MITIGATION AND SPECIAL PROCESSES

SEC. 4. Section 201 of the Federal Water Pollution Control Act is amended by adding the following new subsection:

"(m)(1) Notwithstanding any other provisions of this title, the Administrator is authorized to make a grant from any funds otherwise allotted to the State of California under section 205 of this Act to the project (and in the amount) specified in Order WQG 81-1 of the California State Water Resources Control Board.

"(2) Notwithstanding any other provision of this Act, the Administrator shall make a grant from any funds otherwise allotted to the State of California to the city of Eureka, California, in connection with Project No. C-06-2772, for the purchase of 139 acres of property as environmental mitigation for siting of the proposed treatment plant.

"(3) Notwithstanding any other provision of this Act, the Administrator shall make a grant from any funds otherwise allotted to the State of California to the City of San Diego, California, in connection with that city's aquaculture sewage process (total resources recovery system) as an innovative and alternative waste treatment process.".

COMBINED SEWER OVERFLOW

SEC. 5. Section 201 of the Federal Water Pollution Control Act is amended by adding at the end thereof the following new subsection:

"(n)(1) On and after October 1, 1984, upon the request of the Governor of an affected State, the Administrator is authorized to use funds available to such State under section 205 to address water quality problems due to the impacts of discharges from combined storm water and sanitary sewer overflows, which are not otherwise eligible under this subsection, where correction of such discharges is a major priority for such State.

"(2) Beginning fiscal year 1983, the Administrator shall have available $200,000,000 per fiscal year in addition to those funds authorized in section 207 of this Act to be utilized to address water quality problems of marine bays and estuaries subject to lower levels of water quality due to the impacts of discharges from combined storm water and sanitary sewer overflows from adjacent urban complexes, not otherwise eligible under this subsection. Such sums may be used as deemed appropriate by the Administrator as provided in paragraphs (1) and (2) of this subsection, upon the request of and demonstration of water quality benefits by the Governor of an affected State.".

CAPITAL FINANCING

SEC. 6. Section 201 of the Federal Water Pollution Control Act is amended by adding at the end thereof the following:

"(o) The Administrator shall encourage and assist applicants for grant assistance under this title to develop and file with the Administrator a capital financing plan which, at a minimum—

"(1) projects the future requirements for waste treatment services within the applicant's jurisdiction for a period of no less than ten years;

"(2) projects the nature, extent, timing, and costs of future expansion and reconstruction of treatment works which will be necessary to satisfy the applicant's projected future requirements for waste treatment services; and

"(3) sets forth with specificity the manner in which the applicant intends to finance such future expansion and reconstruction.".

FEDERAL SHARE

SEC. 7. The first sentence of section 202(a)(1) of the Federal Water Pollution Control Act is amended by inserting after "1971," the following: "and ending before October 1, 1984,". The first sentence of such section is further amended by inserting after "(as approved by the Administrator)," the following: "and for any fiscal year beginning on or after October 1, 1984, shall be 55 per centum of the cost of construction thereof (as approved by the Administrator),". Such section 202(a)(1) is further amended by adding at the end thereof the following new sentence: "Notwithstanding the first sentence of this paragraph, in any case where a primary, secondary, or advanced waste treatment facility or its related interceptors or a project for infiltration-in-flow correction has received a grant for erection, building, acquisition, alteration, remodeling, improvement, extension, or correction before October 1, 1984, all segments and phases of such facility, interceptors, and project for infiltration-in-flow correction shall be eligible for grants at 75 per centum of the cost of construction thereof.".

INNOVATIVE AND ALTERNATIVE PROCESSES

SEC. 8. (a) Section 202(a)(2) of the Federal Water Pollution Control Act is amended by inserting after the first sentence the following: "The amount of any grant made after September 30, 1981, for any eligible treatment works or unit processes and techniques thereof utilizing innovative or alternative wastewater treatment processes and techniques referred to in section 201(g)(5) shall be a percentage of the cost of construction thereof equal to 20 per centum greater than the percentage in effect under paragraph (1) of this subsection for such works or unit processes and techniques, but in no event greater than 85 per centum of the cost of construction thereof.".

(b) Section 202(a)(4) of the Federal Water Pollution Control Act is amended by striking out "in the fiscal years ending September 30, 1979, September 30, 1980, and September 30, 1981" and by striking out the last sentence.

(c) Section 205(i) of the Federal Water Pollution Control Act is amended by striking out "and September 30, 1981," in the first sentence and inserting in lieu thereof "September 30, 1981, September 30, 1982, September 30, 1983, September 30, 1984, and September 30, 1985," and by striking out "from 75 per centum to 85 per centum", and by adding at the end thereof the following: "Including the expenditures authorized by the first sentence of this subsection, a total (as determined by the Governor of the State) of not less than 4 per centum nor more than 7½ per centum of the funds allotted to such State for any fiscal year beginning after September 30, 1981, under subsection (c) of this section shall be expended only for increasing the Federal share of grants for construction of treatment works pursuant to section 202(a)(2) of this Act.".

(d) Section 212(1) of the Federal Water Pollution Control Act is amended by inserting after "procedures," the following: "field testing of innovative or alternative waste water treatment processes and techniques meeting guidelines promulgated under section 304(d)(3) of this Act,".

COMBINED STEP 2 AND 3 GRANTS

SEC. 9. Section 203(a) of the Federal Water Pollution Control Act is amended by striking "$4,000,000" and inserting in lieu thereof "$8,000,000". The last sentence of such section 203(a) is hereby repealed.

RESERVE CAPACITY

SEC. 10. (a) Section 204(a)(5) of the Federal Water Pollution Control Act is amended by striking out the semicolon at the end thereof and inserting in lieu thereof a period and the following: "Beginning October 1, 1984, no grant shall be made under this title to construct that portion of any treatment works providing reserve capacity in excess of existing needs (including existing needs of residential, commercial, industrial, and other users) on the date of approval of a grant for the erection, building, acquisition, alteration, remodeling, improvement, or extension of a project for secondary treatment or more stringent treatment or new interceptors and appurtenances, except that in no event shall reserve capacity of a facility and its related interceptors to which this subsection applies be in excess of existing needs on October 1, 1990. In any case in which an applicant proposes to provide reserve capacity greater than that eligible for Federal financial assistance under this title, the incremental costs of the additional reserve capacity shall be paid by the applicant;".

(b) Section 204 of the Federal Water Pollution Control Act is amended by adding at the end thereof the following new subsection:

"(c) The next to the last sentence of paragraph (5) of subsection (a) of this section shall not apply in any case where a primary, secondary, or advanced waste treatment facility or its related interceptors has received a grant for erection, building, acquisition, alteration, remodeling, improvement, or extension before October 1, 1984, and all segments and phases of such facility and interceptors shall be funded based on a 20-year reserve capacity in the case of such facility and a 20-year reserve capacity in the case of such interceptors, except that, if a grant for such interceptors has been approved prior to the date of enactment of the Municipal Wastewater Treatment Construction Grant Amendments of 1981, such interceptors shall be funded based on the approved reserve capacity not to exceed 40 years.".

(c) Section 201(k) of the Federal Water Pollution Control Act is amended by adding at the end thereof the following new sentence: "This subsection shall not be in effect after November 15, 1981.".

BRAND NAME

SEC. 11. Section 204(a)(6) of the Federal Water Pollution Control Act is amended by striking out ", or at least two brand names or trade names of comparable quality or utility are listed and are followed by the words 'or equal'" and by adding at the end thereof the following: "When in the judgment of the grantee, it is impractical or uneconomical to make a clear and accurate description of the technical requirements, a 'brand name or equal' description may be used as a means to define the performance or other salient requirements of a procurement, and in doing so the grantee need not establish the existence of any source other than the brand or source so named.".

ENGINEERING PERFORMANCE

SEC. 12. Section 204 of the Federal Water Pollution Control Act is amended by adding the following new subsection:

"(d)(1) A grant for the construction of treatment works under this title shall provide that the engineer or engineering firm supervising construction or providing architect engineering services during construction shall continue its relationship to the grant applicant for a period of one year

after the completion of construction and initial operation of such treatment works. During such period such engineer or engineering firm shall supervise operation of the treatment works, train operating personnel, and prepare curricula and training material for operating personnel. Costs associated with the implementation of this paragraph shall be eligible for Federal assistance in accordance with this title.

"(2) On the date one year after the completion of construction and initial operation of such treatment works shall certify to the Administrator whether or not such treatment works, the owner and operator of such treatment works meet the design specifications and effluent limitations contained in the grant agreement and permit pursuant to section 402 of the Act for such works. If the owner and operator of such treatment works cannot certify that such treatment works meet such design specifications and effluent limitations, any failure to meet such design specifications and effluent limitations shall be corrected in a timely manner, to allow such affirmative certification, at other than Federal expense.

"(3) Nothing in this section shall be construed to prohibit a grantee under this title from requiring more assurances, guarantees, or indemnity or other contractual requirements from any party to a contract pertaining to a project assisted under this title, than those provided under this subsection.".

ALLOTMENT FORMULA

SEC. 13. (a) Section 205(c) of the Federal Water Pollution Control Act is amended by inserting "(1)" after "(c)" and by adding at the end thereof the following new paragraph:

"(2) Sums authorized to be appropriated pursuant to section 207 for the fiscal years 1982, 1983, 1984, and 1985 shall be allotted for each such year by the Administrator not later than the tenth day which begins after the date of enactment of the Municipal Wastewater Treatment Construction Grant Amendments of 1981. Notwithstanding any other provision of law, sums authorized for the fiscal year ending September 30, 1982, shall be allotted in accordance with table 3 of Committee Print Numbered 95-30 of the Committee on Public Works and Transportation of the House of Representatives. Sums authorized for the fiscal years ending September 30, 1983, September 30, 1984, and September 30, 1985 shall be allotted in accordance with the following table:

Fiscal years 1983 through 1985

States:	
Alabama	0.011398

(b) Section 205(e) of the Federal Water Pollution Control Act is amended by striking out "and 1981" each of the two places it appears and inserting in lieu thereof at each such place "1981, 1982, 1983, 1984, and 1985".

STATE ADMINISTRATION GRANTS

SEC. 14. (a) The first sentence of section 205(g)(1) of the Federal Water Pollution Control Act is amended by inserting immediately after "October 1, 1977," the following: "except in the case of any fiscal year beginning on or after October 1, 1981, and ending before October 1, 1985, in which case the percentage authorized to be reserved shall not exceed 4 per centum.".

(b) Section 205(g)(1) of the Federal Water Pollution Control Act is amended by adding at the end thereof the following new sentence: "Sums authorized to be reserved by this paragraph shall be in addition to and not in lieu of any other funds which may be authorized to carry out this subsection.".

WATER QUALITY MANAGEMENT PLANNING

SEC. 15. Section 205 of the Federal Water Pollution Control Act is amended by adding at the end thereof the following new subsection:

"(j)(1) The Administrator shall reserve each fiscal year not to exceed 1 per centum of the sums allotted and available for obligation to each State under this section for each fiscal year beginning on or after October 1, 1981, or $100,000, whichever amount is the greater.

"(2) Such sums shall be used by the Administrator to make grants to the States to carry out water quality management planning, including, but not limited to—

"(A) identifying most cost effective and locally acceptable facility and non-point measures to meet and maintain water quality standards;

"(B) developing an implementation plan to obtain State and local financial and regulatory commitments to implement measures developed under subparagraph (A);

"(C) determining the nature, extent, and causes of water quality problems in various areas of the State and interstate region, and reporting on these annually; and

"(D) determining those publicly owned treatment works which should be constructed with assistance under this title, in which areas and in what sequence, taking into account the relative degree of effluent reduction attained, the relative contributions to water quality of other point or nonpoint sources, and the consideration of alternatives to such construction, and implementing section 303(e) of this Act.

"(3) In carrying out planning with grants made under paragraph (2) of this subsection, a State shall develop jointly with local, regional, and interstate entities, a plan for carrying out the program and give funding priority to such entities and designated or undesignated public comprehensive planning organizations to carry out the purposes of this subsection.

"(4) All activities undertaken under this subsection shall be in coordination with other related provisions of this Act.".

CONVENTION CENTER

SEC. 16. Section 205 of the Federal Water Pollution Control Act is amended by adding at the end thereof the following new subsection:

"(k) The Administrator shall allot to the State of New York from sums authorized to be appropriated for the fiscal year ending September 30, 1982, an amount necessary to pay the entire cost of conveying sewage from the Convention Center of the city of New York to the Newtown sewage treatment plant, Brooklyn-Queens area, New York. The amount allotted under this subsection shall be in addition to and not in lieu of any other amounts authorized to be allotted to such State under this Act.".

AUTHORIZATION

SEC. 17. Section 207 of the Federal Water Pollution Control Act is amended by striking out all that follows "$2,548,837,000;" and inserting in lieu thereof "and for the fiscal years ending September 30, 1982, September 30, 1983, September 30, 1984, and September 30, 1985, not to exceed $2,400,000,000 per fiscal year.".

WATER QUALITY PRIORITY

SEC. 18. Section 216 of the Federal Water Pollution Control Act is amended by adding at the end thereof the following new sentence: "It is the policy of Congress that projects for wastewater treatment and management undertaken with Federal financial assistance under this Act by any State, municipality, or intermunicipal or interstate agency shall be projects which, in the estimation of the State, are designed to achieve optimum water quality management, consistent with the public health and water quality goals and requirements of the Act.".

COST EFFECTIVENESS

SEC. 19. Title II of the Federal Water Pollution Control Act is amended by adding at the end thereof the following new section:

"COST EFFECTIVENESS

SEC. 218. (a) It is the policy of Congress that a project for waste treatment and management undertaken with Federal financial assistance under this Act by any State, municipality, or intermunicipal or interstate agency shall be considered as an overall waste treatment system for waste treatment and management, and shall be that system which constitutes the most economical and cost-effective combination of devices and systems used in the storage, treatment, recycling, and reclamation of municipal sewage

or industrial wastes of a liquid nature to implement section 201 of this Act, or necessary to recycle or reuse water at the most economical cost over the estimated life of the works, including intercepting sewers, outfall sewers, sewage collection systems, pumping power, and other equipment, and their appurtenances; extension, improvements, remodeling, additions, and alterations thereof; elements essential to provide a reliable recycled supply such as standby treatment units and clear well facilities; and any works, including site acquisition of the land that will be an integral part of the treatment process (including land use for the storage of treated wastewater in land treatment systems prior to land application) or which is used for ultimate disposal of residues resulting from such treatment; and water efficiency measures and devices; and any other method or system for preventing, abating, reducing, storing, treating, separating, or disposing of municipal waste, including storm water runoff, or industrial waste, including waste in combined storm water and sanitary sewer systems; to meet the requirements of this Act.

"(b) In accordance with the policy set forth in subsection (a) of this section, before the Administrator approves any grant to any State, municipality, or intermunicipal or interstate agency for the erection, building, acquisition, alteration, remodeling, improvement, or extension of any treatment works the Administrator shall determine that the facilities plan of which such treatment works are a part constitutes the most economical and cost-effective combination of treatment works over the life of the project to meet the requirements of this Act, including, but not limited to, consideration of construction costs, operation, maintenance, and replacement costs.

"(c) In furtherance of the policy set forth in subsection (a) of this section, the Administrator shall require value engineering review in connection with any treatment works, prior to approval of any grant for the erection, building, acquisition, alteration, remodeling, improvement, or extension of such treatment works, in any case in which the cost of such erection, building, acquisition, alteration, remodeling, improvement, or extension is projected to be in excess of $10,000,000. For purposes of this subsection, the term 'value engineering review' means a specialized cost control technique which uses a systematic and creative approach to identify and to focus on unnecessarily high cost in a project in order to arrive at a cost saving without sacrificing the reliability or efficiency of the project.

"(d) This section applies to projects for waste treatment and management for which no treatment works including a facilities plan for such project have received Federal financial assistance for the preparation of construction plans and specifications under this Act before the date of enactment of this section.".

STATE CERTIFICATION

SEC. 20. Title II of the Federal Water Pollution Control Act is amended by adding at the end thereof the following new section:

"STATE CERTIFICATION OF PROJECTS

"SEC. 219. Whenever the Governor of a State which has been delegated sufficient authority to administer the construction grant program under this title in that State certifies to the Administrator that a grant application meets applicable requirements of Federal and State law for assistance under this title, the Administrator shall approve or disapprove such application within 45 days of the date of receipt of such application. If the Administrator does not approve or disapprove such application within 45 days of receipt, the application shall be deemed approved. If the Administrator disapproves such application the Administrator shall state in writing the reasons for such disapproval. Any grant approved or deemed approved under this section shall be subject to amounts provided in appropriation Acts.".

MUNICIPAL COMPLIANCE DEADLINE

SEC. 21. (a) Section 301(i) of the Federal Water Pollution Control Act is amended by striking out "July 1, 1983," each place it appears and inserting in lieu thereof "July 1, 1988,". The amendment made by this subsection shall not be interpreted or applied to extend the date for compliance with section 301(b)(1) (B) or (C) of the Federal Water Pollution Control Act beyond schedules for compliance in effect as of the date of enactment of this Act, except in cases where reductions in the amount of financial assistance under this Act or changed conditions affecting the rate of construction beyond the control of the owner or operator will make it impossible to complete construction by July 1, 1983.

(b) Section 301(b)(2)(B) of the Federal Water Pollution Control Act is repealed.

OCEAN DISCHARGES

SEC. 22. (a) Section 301(h) of the Federal Water Pollution Control Act is amended in the portion preceding paragraph (1) by striking out "in an existing discharge".

(b) Such section 301(h) is amended by striking out the semicolon at the end of paragraph (7) and inserting in lieu thereof a period and by striking out paragraph (8).

(c) Such section 301(h) is further amended by adding at the end thereof the following: "A municipality which applies secondary treatment shall be eligible to receive a permit pursuant to this subsection which modifies the requirements of subsection (b)(1)(B) of this section with respect to the discharge of any pollutant from any treatment works owned by such municipality into marine waters. No permit issued under this subsection shall authorize the discharge of sewage sludge into marine waters.".

(d) Section 301(j)(1) of the Federal Water Pollution Control Act is amended by striking out clause (A) and inserting in lieu thereof the following new clause:

"(A) subsection (b)(1)(B) under subsection (h) of this section shall be filed not later that the 365th day which begins after the date of enactment of the Municipal Wastewater Treatment Construction Grant Amendments of 1981;".

(e) The amendments made by this section shall take effect on the date of enactment of this Act, except that no applicant, other than the city of Avalon, California, who applies after the date of enactment of this Act for a permit pursuant to subsection (h) of section 301 of the Federal Water Pollution Control Act which modifies the requirements of subsection (b)(1)(B) of section 301 of such Act shall receive such permit during the one-year period which begins on the date of enactment of this Act.

SECONDARY TREATMENT DEFINITION

SEC. 23. Section 304(d) of the Federal Water Pollution Control Act is amended by adding the following new paragraph:

"(4) For the purposes of this subsection, such biological treatment facilities as oxidation ponds, lagoons, and ditches and trickling filters shall be deemed the equivalent of secondary treatment. The Administrator shall provide guidance under paragraph (1) of this subsection on design criteria for such facilities, taking into account pollutant removal efficiencies and, consistent with the objective of the Act, assuring that water quality will not be adversely affected by deeming such facilities as the equivalent of secondary treatment.".

REVISED WATER QUALITY STANDARDS

SEC. 24. The review, revision, and adoption or promulgation of revised or new water quality standards pursuant to section 303(c) of the Federal Water Pollution Control Act shall be completed by the date three years after the enactment of the Municipal Wastewater Treatment Construction Grant Amendments of 1981. No grant shall be made under title II of the Federal Water Pollution Control Act after such date until water quality standards are reviewed and revised pursuant to section 303(c), except where the State has in good faith submitted such revised water quality standards and the Administrator has not acted to approve or disapprove such submission within one hundred and twenty days of receipt.

NEEDS SURVEY

SEC. 25. The Administrator of the Environmental Protection Agency shall submit to the Congress, not later than December 31, 1982, a report containing the detailed estimates, comprehensive study, and comprehensive analysis required by section 516(b) of the Federal Water Pollution Control Act, including an estimate of the total cost and the amount of Federal funds necessary for the construction of needed publicly owned treatment facilities. Such report shall be prepared in the same manner as is required by such section and shall reflect the changes made in the Federal water pollution control program by this Act and the amendments made by this Act. In preparing this report, the Administrator shall give emphasis to the effects of the amendment made by section 2(a) of this Act in addressing water quality needs adequately and appropriately.

JUDICIAL NOTICE

SEC. 26. It is the sense of Congress that judicial notice should be taken of this Act and of the amendments to the Federal Water Pollution Control Act made by this Act, including reduced authorization levels under section 207 of such Act, and that the parties to Federal consent decrees establishing a deadline, schedule, or timetable for the construction of publicly owned treatment works are encouraged to reexamine the provisions of such consent decrees and, where required by equity, to make appropriate adjustments in such provisions.

BATH TOWNSHIP

SEC. 27. For purposes of the Federal Water Pollution Control Act, the project for publicly owned treatment works for Bath Township, Michigan, shall be eligible for payments from sums allocated to the State of Michigan under such Act in an amount equal to the amount such works would be eligible for under section 202 of such Act if such works were to be constructed after the date of enactment of this Act, at the original construction cost.

And the Senate agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4503) to amend the Federal Water Pollution Control Act to authorize funds for fiscal year 1982, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

SHORT TITLE

House bill

Provides that the Act may be cited as the "Federal Water Pollution Control Act Amendments of 1981".

Senate amendment

Provides that the Act may be cited as the "Clean Water Act Amendments of 1981".

Conference substitute

Act may be cited as the "Municipal Wastewater Treatment Grant Construction Amendments of 1981".

INNOVATIVE AND ALTERNATIVE PROCESSES

House bill

Amends section 201(g)(5) of the basic Act to require the applicant to study and evaluate various innovative and alternative technologies taking into account and providing for, to the extent practical, the most efficient use of energy and resources which will result in the lowest net cost of water and sewer service to the consumer, including production of usable water through a production treatment process if the savings offset increased costs of the process.

Senate amendment

No comparable provision.

Conference substitute

Authorizes a grant for a project in San Diego, California, which will result in a low net cost for water and sewer service to the consumer.

INDUSTRIAL COST EXCLUSION

House bill

Repeals section 201(k) of the Federal Water Pollution Control Act. Section 201(k) provides that no grant made after November 15, 1981, for construction of a publicly owned treatment works shall be used to treat, store, or convey the flow of any industrial user into such treatment works in excess of a flow equivalent to 50,000 gallons per day of sanitary waste.

Senate amendment

Amends section 201(k) of the basic Act to provide that no step 3 construction grant may be made to treat, store, or convey industrial wastewater in excess of existing flows from industrial users.

Conference substitute

Makes section 201(k) of the basic Act, relating to industrial costs, inapplicable in view of amendments to the reserve capacity provisions of section 204(a)(5).

CAPITAL FINANCING PLANS

Directs the Administrator to encourage and assist applicants for grant assistance to develop and file with the Administrator capital financing plans which will at a minimum, project the applicant's requirements for waste treatment for at least 10 years; project the nature, extent, timing and costs of necessary expansion and reconstruction of treatment works within the applicant's jurisdiction; and set forth the manner in which the applicant intends to finance such expansion and reconstruction.

Senate amendment

No comparable provision.

Conference substitute

Same as House bill.

ALLOTMENT FORMULA

House bill

Provides that the fiscal year 1982 grant funds shall be allotted by the Administrator not later than the tenth day after the date of enactment of the Act.

Also extends the existing formula for allotment of construction grant funds among the States through fiscal year 1982.

Senate amendment

Establishes a new allotment formula that allots funds on the basis of 1980 population and backlog needs in categories I, II, and IVb, also maintains the minimum State share, and has a descending hold harmless provision included in the formula.

Conference substitute

Uses House formula for fiscal year 1982 and for fiscal years 1983, 1984, and 1985 uses the average of the House formula and the Senate formula for fiscal year 1984.

STATE ADMINISTRATION GRANTS

House bill

Provides that for fiscal year 1982 not to exceed 4 percent of the total amount authorized for construction grants is authorized to be reserved for making grants to States for the costs of administering provisions of the Act relating to the grants program which have been delegated to the States.

Senate amendment

Requires that a State's grant for administration of the program be tied directly to the amount of unexpended obligations made but not actually disbursed, plus unobligated allotment funds available to that State at the beginning of a fiscal year.

Conference substitute

Same as the House bill through fiscal year 1985.

INNOVATIVE AND ALTERNATIVE TECHNOLOGY FEDERAL SHARE

House bill

This section extends the set-aside for increasing the Federal grant share from 75 to 85 percent for innovative and alternative technology through fiscal year 1982. It also amends the existing 3 percent mandatory set-aside to provide that the set-aside shall be not less than 3 percent nor more than 5 percent. The amount of any increase between 3 and 5 percent will be at the determination of the Governor of the State.

Senate amendment

Amends section 202(a)(2) of the basis Act to provide that municipal treatment works utilizing innovative or alternative treatment processes shall be funded at a rate 20 percentage points more than conventional treatment processes, but in no event greater than 85 percent of the cost of construction. It also removes the statutory deadline for utilization of these practices for Federal funding under the construction grant program.

Amends section 205(i) of the basic Act to continue the use of a minimum of one-half of one percent of a State's allotted funds for the increased Federal share (that percentage which is over the Federal share for conventional systems). Also increases from three percent to four percent a State's mandatory set-aside of allocated funds in each fiscal year for innovative and alternative treatment systems.

Conference substitute

Similar to Senate amendment. The amount of the mandatory set-aside is established between 4 and 7½ percent as determined by the Governor of the State.

Innovative or alternative unit processes and techniques are made eligible for the increased Federal share. These processes and techniques represent the provisions contained in existing EPA regulations.

BRAND NAMES

House bill

Amends section 204(a)(6) of the basic law to strike the requirement that if a bid specification prepared by a sewage treatment plant grantee includes a specific brand name item, it must include a second brand name, followed by the words "or equal". This language is replaced by a requirement for "one brand name or equal" in situations where it is impractical or uneconomical to make a clear and accurate description of the technical requirements.

Senate amendment

Same as House bill.

Conference substitute

Same as House bill and Senate amendment.

WATER QUALITY MANAGEMENT PLANNING

House bill

Amends section 205 of the Federal Water Pollution Control Act by adding a provision which creates a set-aside of one percent of each State's allotted grant funds or $100,000, whichever amount is greater, to be used to make grants to the States to carry out water quality management planning. This planning is to include the identification of the most cost-effective and locally acceptable measures for treatment works and non-point sources to meet and maintain water quality standards; the development of an implementation plan to obtain State and local financial and regulatory commitments to implement such measures; and the determination of the nature, extent and causes of water quality problems in various areas.

Senate amendment

Section 205(g) of the basic Act is expanded to designate an additional one-half of

one per centum of a State's unexpended obligations and unobligated allotment, or $100,000, if greater for water quality management assistance.

Conference substitute

Same as House bill, except the reserved amount is not to exceed one percent of the sums allotted and available for obligation, and planning is also to include determination of those publicly owned treatment works which should be constructed, and implementation of section 303(e) of the Act.

NEW YORK CONVENTION CENTER

House bill

This section directs the Administrator to allot to the State of New York from fiscal year 1982 funds an amount necessary to pay the cost of conveying sewage from the Convention Center of the City of New York to the Newtown Sewage Treatment Plant in Brooklyn.

Senate amendment

No comparable provision.

Conference substitute

Same as House bill.

AUTHORIZATIONS

House bill

Provides an authorization of $2.4 billion for the construction grant program for fiscal year 1982.

Senate amendment

Amends section 207 of the basic Act by authorizing not to exceed $2.4 billion annually for the construction grant program for fiscal years 1982 through 1985.

Conference substitute

Same as Senate amendment.

Section 206 of the Federal Water Pollution Control Act provides a mechanism for the reimbursement of communities which proceed with construction of treatment works at their own expense if the treatment works meet all of the requirements of the Act. This enables communities to save money by moving ahead before Federal funds are available and thus avoiding the increased costs associated with inflation. This provision of the Act, however, has not been funded in Appropriations Acts. This has resulted in an unfortunate and unnecessary increase in cost for the program both to local interests and to the Federal Government.

With the reductions in Federal assistance incorporated in H.R. 4503, it is even more necessary that ways be found to decrease overall costs associated with the reduction of pollution of our nation's waters. Permitting construction at present day prices, with reimbursement later, is one way of doing this. The conferees urge, therefore, that funds be appropriated to implement section 206 so that the cleanup of our waters may proceed in as efficient and economical manner as possible.

FIELD TESTING

House bill

Amends the definition of the term "construction" in section 212 of the Act to include as grant eligible under title II the field testing of innovative or alternative wastewater treatment processes and techniques meeting guidelines promulgated under section 304(d)(3).

Senate amendment

No comparable provision.

Conference substitute

Same as House bill. It is the intent of the conferees that this provision not become a means for any delay in compliance with the requirements of section 301 of the Act.

COST EFFECTIVENESS

House bill

Expresses the policy of Congress that a project for waste treatment and management undertaken with financial assistance under the Federal Water Pollution Control Act shall be considered as an overall waste treatment system for waste treatment and management, and shall be that system which constitutes the most economical and cost-effective combination of treatment works to meet the requirements of the Act. Also provides that water efficiency measures and devices (conservation measures) are to be considered along with all other alternatives in determining what overall system is most cost-effective.

Senate amendment

No comparable provision.

Conference substitute.

Same as the House bill. This provision does not in any way override the limitation on eligible categories made by section 2 of this Act.

VALUE ENGINEERING

House bill

Provides the Administrator shall require value engineering review in connection with treatment works before any grant is made in excess of $10,000,000 in order to identify unnecessarily high costs in a project without sacrificing reliability or efficiency.

Senate amendment

No comparable provision.

Conference substitute

Same as the House bill.

STATE CERTIFICATION

House bill

Provides that where a State has been delegated sufficient authority to administer the construction grants program under title II, the Governor may certify to the Administrator that a grant application meets applicable requirements of State and Federal law. In such a case, the Administrator must approve or disapprove the grant application within 30 days of the date of application. If it is disapproved, the reasons for disapproval must be set forth in writing. If no action at all is taken within 30 days, the grant application is deemed to be approved.

Senate amendment

No comparable provision.

Conference substitute

Same as House bill, except that approval period is 45 days.

WATER QUALITY FOCUS

House bill

Establishes the policy of Congress that projects for wastewater treatment and management undertaken with Federal financial assistance under the Federal Water Pollution Control Act shall be projects which, in the estimation of the State, are designed to achieve optimum water quality management consistent with the public health and water quality goals and requirements of the Act.

Senate amendment

Amends section 216 of the basic Act to require that State priority lists contain only eligible projects in an order of precedence reflecting significant public health or water quality benefits, especially projects having the greatest effect on the improvement of water quality.

Conference substitute

Amends section 216 of the basic Act to establish the policy set forth in the House bill.

OCEAN DISCHARGE WAIVERS

House bill

Authorizes modifications of best practicable waste treatment technology requirements for ocean dischargers able to meet the same stringent environmental safeguards applicable to modifications of secondary treatment requirements. Deletes from existing law a restriction of eligibility to communities which had ocean discharges on the date of enactment of the 1977 Act, and a requirement, in section 301(j)(1) of the basic Act that applications must be submitted within 270 days of the date of enactment of the 1977 Act. Also removes as redundant a requirement in section 301(h)(8) of the basic Act that construction grant funds available to a community receiving a waiver be used to provide secondary treatment and best practicable waste treatment technology or to carry out the requirements of section 301(h). Clarifies that eligible applicants include communities which have achieved secondary treatment capability. Except for Avalon, California, no waiver for applications made after the date of enactment may be granted for a period of 1 year after the date of enactment.

Senate amendment

No comparable provision.

Conference substitute

Same as the House bill, except that no permit issued under section 301(h) shall authorize the discharge of sewage sludge into marine waters from outfalls and applications for waivers can be submitted only for one year from the date of enactment. This provision does not affect the Marine Protection, Research, and Sanctuaries Act. The Conferees intend that during the one-year period in which no waivers can be granted, while Congress is further considering amendments to this section, the research project conducted by the National Oceanic and Atmospheric Administration on sludge from the Orange County Sanitation District may continue.

LEGISLATIVE VETO

House bill

Establishes the procedure whereby rules of the Administrator of the Environmental Protection Agency shall be submitted to the Senate and the House and may be disapproved by those bodies in accordance with the procedure which has been established for such disapprovals in the case of other departments and agencies.

Senate amendment

No comparable provision.

Conference substitute

No comparable provision.

RESERVE CAPACITY

House bill

Retains existing grant assistance for reserve capacity in those projects which are presently receiving Step 2 design or Step 3 construction grant assistance. For projects which have not yet received any grant assistance, or are in Step 1 planning, it would limit such assistance to a reserve capacity representing 10 years of projected growth. The 10 years would be measured from the date of the first application for grant assistance.

Senate amendment

Section 204(a)(5) of the basic Act is amended to preclude the use of Federal construction grant funds for the construction of treatment work facilities in excess of current population or backlog needs except in limited instances.

Projects which have received approval to proceed with the engineering and design of a facility before September 30, 1981, and one segment of which receives a construction grant prior to October 1, 1983, shall receive the full Federal share for reserve capacity contemplated in the design phase and approved by the Administrator. A project shall receive Federal assistance for reserve capacity even if the project receives a phased or segmented construction grant prior to October 1, 1983, provided that the funded phase is for a legitimate portion of the treatment works.

Conference substitute

Beginning October 1, 1984, no grant may be made for a project to provide capacity in excess of needs existing on the date of award of a step 3 grant, and in no event in excess of needs existing on October 1, 1990.

This limitation does not apply to any project or to a subsequent segment of phase of treatment systems (comprised of primary, secondary, or advanced waste treatment and related interceptors) that receives a step 3 grant award prior to October 1, 1984.

If a step 3 grant is approved before October 1, 1984, for a step I, II, or IVb category of a treatment system, then subsequent grants for all of of these categories shall provide for 20 year reserve capacity and, in certain instances, for up to 40 years reserve capacity for interceptors.

ELIGIBLE CATEGORIES

House bill

Retains Federal grant assistance for presently eligible categories for all projects currently receiving assistance under the Act. For new projects which have not yet received any Federal assistance, up to 30 percent of a State's yearly allotment under the Act, as determined by the Governor, could be used for categories such as correction of combined sewer overflows, sewer rehabilitation, and construction of qualifying collector systems. For all projects, correction of infiltration/inflow problems would remain grant eligible where it represents a cost-effective alternative.

Senate amendment

Amends section 202(a)(1) of the basic Act to place a limitation on eligible categories of waste treatment facilities which may receive Federal assistance in the future. The eligible categories will be secondary treatment, more stringent than secondary treatment, and new interceptors and appurtenances. These correspond to categories I, II, and IVb of the Needs Survey updated every two years by the Environmental Protection Agency. This eliminates Federal funding of categories such as new collection systems, replacement and rehabilitation of sewers, combined sewer overflow systems, and correction of infiltration-inflow problems.

Conference substitute

For grants approved prior to October 1, 1984, all categories would be eligible. For grants awarded after October 1, 1984, only categories I, II, IIIa and IVb would be eligible. After October 1, 1984, up to 20 percent of a State's allotment in any fiscal year may, in the Governor's discretion, be used for categories of projects not otherwise eligible. Where a project encompasses eligible categories (as well as otherwise ineligible categories funded out of the 20 percent fund) only the cost of the otherwise ineligible categories will be counted against the 20 percent fund. The eligible categories will be funded out of monies available other than the discretionary fund.

COMBINED SEWER OVERFLOWS

House bill

No comparable provision.

Senate amendment

Amends section 202(a) of the basic Act to permit the use of construction grant funds for the construction of collector sewers in existing communities of less than 3,500 population for a limited period of time and certain larger existing communities which have received grants for collector sewer construction prior to October 1, 1981.

Section 202(a) is also amended to provide in paragraph (7)(A) that a Governor may use a portion of his allotment for treatment of combined sewer overflows upon demonstrating to the Administrator that the water quality goals of the Act will not be achieved without such treatment. The demonstration shall at a minimum prove that significant usage of the water for shellfishing and swimming will not be possible without correction of combined sewer overflows.

Paragraph (7)(B) provides that the Administrator, upon the demonstration of need by the Governor of a State, may fund the necessary facilities to correct combined sewer overflows where the receiving waters will not be improved by other methods of wastewater treatment. It is restricted to those facilities discharging into bays and estuaries.

The Administrator is authorized to utilize $200 million annually to correct combined sewer overflows into marine bays and estuaries. The authorization is not effective until fiscal year 1983. The minimum water quality demonstration for paragraph (7)(B) is the same as (7)(A).

Conference substitute

Same as paragraphs (7)(A) and (7)(B) as proposed to be added to section 202(a) of the basic Act by the Senate amendment.

DEFINITION OF SECONDARY TREATMENT

House bill

No comparable provision.

Senate amendment

Section 304(d) of the basic Act is amended by adding a new paragraph permitting the use of biological treatment facilities such as oxidation ponds, lagoons and ditches, trickling filters, and devices to treat waste waters from combined storm and sanitary sewers, as the equivalent of secondary treatment if it can be proven that water quality will not be adversely affected by such methods.

Conference substitute

Same as Senate amendment, except that the reference to combined storm and sanitary sewers is deleted.

JUDICIAL NOTICE

House bill

States that it is the sense of Congress that judicial notice be taken of the amendments to the Federal Water Pollution Control Act and the other provisions contained in the House bill and that the parties to Federal consent decrees establishing a schedule for construction of publicly owned treatment works are encouraged to reexamine the provisions of such consent decrees and, where required by equity, to make appropriate adjustments in such provisions.

Senate amendment

Expresses the sense of the Congress that courts in supervision of court orders for non-complying municipalities take cognizance of the amendments contained in the Senate amendment in their consideration of modifications to water pollution control deadlines.

Conference substitute

Same as House bill.

NEEDS SURVEY

House bill

Directs the Administrator of EPA to submit to Congress not later than June 30, 1982, a new report of the costs of meeting the requirements of the Federal Water Pollution Control Act as amended by the House bill for discharges of municipal waste. This is the so-called "needs" survey which EPA is required to submit to Congress every two years. In preparing this report, the Administrator is to give emphasis to the effects of section 18 of the bill in addressing water quality needs adequately and appropriately.

Senate amendment

Supplements section 516 of the basic Act by adding a requirement that the Environmental Protection Agency submit a report to the Congress within eighteen months of enactment of this legislation. The report must identify publicly owned treatment works not yet in compliance with the secondary treatment goals of the Act. It must also contain an assessment of the impact of the 1981 amendments on the cost of completing the Federal construction grant program, and the remaining Federal costs necessary to complete the program.

Conference substitute

Combination of both House bill and Senate amendment. This report is due by December 31, 1982.

MITIGATION ELIGIBILITY

House bill

Requires the Administrator of EPA to make a grant to mitigate adverse impacts arising from construction of a grant eligible treatment works from the State's allotment if the State determines that the proposed works are necessary for mitigation of impacts associated with the construction of the treatment works, that the proposed works are grant eligible and that the step II construction grant on the underlying grant eligible treatment works was made no later than February 1, 1981.

Senate amendment

Amends section 201 of the basic Act to authorize the Administrator to make a grant from California's allotted funds for the project specified in the order WQG 81-1 of the California State Water Resources Control Board.

Conference substitute

Same as the Senate amendment with the addition of a provision relating to the Eureka, California, wetlands mitigation, as well as the San Diego project discussed earlier.

BATH TOWNSHIP

House bill

Provides that the project for publicly owned treatment works for Bath Township, Michigan, shall be eligible for payments from sums allotted to the State of Michigan in an amount equal to the amount such works would be eligible for under the Act if the project had been constructed with Federal grant assistance. The amount to be paid

would be limited to the appropriate Federal share of the actual construction cost at the time it was originally constructed.

Senate amendment

No comparable provision.

Conference substitute

Same as House bill.

GRANTS FOR STEPS 1 AND 2

House bill

No comparable provision.

Senate amendment

Amends section 201 of the basic Act by providing for Federal reimbursement to grantees for the costs of planning (step 1) and design (step 2) of wastewater treatment facilities only after awards for actual construction (step 3) have been approved, rather than in advance as is currently authorized. This requirement will take effect on October 1, 1981.

Authorizes States to establish a revolving fund from not more than 10 percent of their annual construction grant funds allotment to be used to advance planning and design money to potential grant applicants who would otherwise be unable to perform such work.

The Administrator of the Environmental Protection Agency is required to determine the average cost of such planning and design based on the total projects in the general program experience. Planning and design costs usually average between seven and ten percent of total project costs. The cost associated with infiltration-in-flow analysis and examination of the need for sewer rehabilitation will be eligible for reimbursement.

If a construction grant is awarded following such an advance to a grantee, the Administrator shall subtract the estimated cost of planning and design from the grant to transfer to the State for replenishment of the revolving fund. In the event no construction grant is made, the State is authorized to seek repayment from the applicant on such terms and conditions as that State determines.

Conference substitute

Same as Senate amendment, except that the State is required to advance money for planning or design to small communities which would otherwise be unable to perform such work, but is not required to establish a revolving fund for that purpose. Money subtracted from a construction grant where an advance was made shall remain in the State's allotment. Where a State or other non-Federal interest has funded Step 1 or Step 2, it would be eligible for reimbursement under this provision.

FEDERAL SHARE

House bill

No comparable provision.

Senate amendment

Provides for the gradual reduction of the Federal share of wastewater treatment facilities from 75 percent through fiscal year 1981 to 65 percent through fiscal year 1984 and 55 percent thereafter. It will not affect grants which had approved step 2 grants prior to September 30, 1981. Municipalities which had voter approved bonds prior to July 1, 1981, and which receive a construction grant prior to July 1, 1985, shall receive a 75 percent grant.

Any treatment facility for which bonds have been approved before July 1, 1981, and which proceeds to construction prior to July 1, 1985, shall receive 75 percent of the cost of a facility from the Federal Government.

Conference substitute

Until October 1, 1984, the grant amount for eligible projects shall be 75 percent of the cost of construction.

Beginning October 1, 1984, the grant amount for eligible projects shall be 55 percent of the cost of construction. However, where a grant for construction of a primary, secondary, or advanced waste treatment facility and related interceptors or for correction of infiltration-in-flow was awarded prior to October 1, 1984, all subsequent segments and phases of such facility, related interceptors, and infiltration-in-flow correction shall be 75 percent of the cost of construction.

COMBINED STEP 2 AND 3 GRANTS

House bill

No comparable provision.

Senate amendment

Amends section 203(a) of the basic Act to raise the estimated cost limitation on small projects for combined step II and III grants from $4 million to $8 million and eliminates the $5 million limitation from projects in high construction cost areas.

Conference substitute

Same as Senate amendment.

ENGINEERING CERTIFICATE OF OPERABILITY

House bill

No comparable provision.

Senate amendment

Amends section 204 of the basic Act to require that the prime consultant to a grantee remain on the site for one year following start-up to certify to the Environmental Protection Agency and the appropriate grantee agency that the treatment works is in compliance with its permit, and to allow the main partners responsible for a treatment works to work cooperatively in making sure that it is meeting its discharge permits. This activity will be grant eligible.

Conference substitute

Same as Senate amendment.

REVISION OF WATER QUALITY STANDARDS

House bill

No comparable provision.

Senate amendment

Requires the review, revision, and adoption or promulgation of revised or new water quality standards within three years after enactment of the 1981 amendments.

After three years, no grant will be made unless this effort has been completed and approved by the Administrator. The sole exception to this is the situation of a State acting in good faith and submitting the necessary documentation to the Administrator and not receiving notification of action within 120 days of such submission.

Conference substitute

Same as Senate amendment, except that all references to total maximum daily loads of pollutants is eliminated.

MUNICIPAL COMPLIANCE DEADLINE

No comparable provision.

Senate amendment

Amends section 301(i) of the basic Act to extend the July 1, 1983, deadline for the uniform achievement of municipal secondary treatment to July 1, 1988. Repeals section 301(b)(G)(3).

Conference substitute

Same as Senate amendment.

HUDSON RIVER PCB'S

House bill

No comparable provision.

Senate amendment

Amends section 116(b) of the basic Act to clarify that funds are allocated under section 205(c) and not section 205(a).

Conference substitute

No comparable provision.

FEDERAL COMMON LAW

House bill

No comparable provision.

Senate amendment

Amends section 511 of the basic Act to provide that the Act does not displace or limit other Federal or State law, including common law.

Conference substitute

Contains no comparable provision with the understanding of the conferees that failure to include this provision is without prejudice and is not intended to displace remedies other than those under the Federal Water Pollution Control Act and with an agreement to examine further in the next session the best means to accomplish this intent.

CONFERENCE REPORT ON H.R. 4331

Mr. ROSTENKOWSKI submitted the following conference report and statement on the bill (H.R. 4331) to amend the Omnibus Reconciliation Act of 1981 to restore minimum benefits under the Social Security Act.

CONFERENCE REPORT (H. REPT. No. 97-409)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4331) to amend the Omnibus Reconciliation Act of 1981 to restore minimum benefits under the Social Security Act, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

INTERFUND BORROWING

SECTION 1. (a) Section 201 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(1)(1) If at any time prior to January 1983 the Managing Trustee determines that borrowing authorized under this subsection

is appropriate in order to best meet the need for financing the benefit payments from the Federal Old-Age and Survivors Insurance Trust Fund or the Federal Disability Insurance Trust Fund, the Managing Trustee may borrow such amounts as he determines to be appropriate from the other such Trust Fund, or from the Federal Hospital Insurance Trust Fund established under section 1817, for transfer to and deposit in the Trust Fund whose need for financing is involved.

"(2) In any case where a loan has been made to a Trust Fund under paragraph (1), there shall be transferred from time to time, from the borrowing Trust Fund to the lending Trust Fund, interest with respect to the unrepaid balance of such loan at a rate equal to the rate which the lending Trust Fund would earn on the amount involved if the loan were an investment under subsection (d).

"(3) If in any month after a loan has been made to a Trust Fund under paragraph (1), the Managing Trustee determines that the assets of such Trust Fund are sufficient to permit repayment of all or part of any loans made to such Fund under paragraph (1), he shall make such repayments as he determines to be appropriate.

"(4) The Board of Trustees shall make a timely report to the Congress of any amounts transferred (including interest payments) under this subsection.".

(b) Section 1817 of such Act is amended by adding at the end thereof the following new subsection:

"(j)(1) If at any time prior to January 1983 the Managing Trustee determines that borrowing authorized under this subsection is appropriate in order to best meet the need for financing the benefit payments from the Federal Hospital Insurance Trust Fund, the Managing Trustee may borrow such amounts as he determines to be appropriate from either the Federal Old-Age and Survivors Insurance Trust Fund or the Federal Disability Insurance Trust Fund for transfer to and deposit in the Federal Hospital Insurance Trust Fund.

"(2) In any case where a loan has been made to the Federal Hospital Insurance Trust Fund under paragraph (1), there shall be transferred from time to time, from such Trust Fund to the lending Trust Fund, interest with respect to the unrepaid balance of such loan at a rate equal to the rate which the lending Trust Fund would earn on the amount involved if the loan were an investment under subsection (c).

"(3) If in any month after a loan has been made to the Federal Hospital Insurance Trust Fund under paragraph (1), the Managing Trustee determines that the assets of such Trust Fund are sufficient to permit repayment of all or part of any loans made to such Fund under paragraph (1), he shall make such repayments as he determines to be appropriate.

"(4) The Board of Trustees shall make a timely report to the Congress of any amounts transferred (including interest payments) under this subsection.".

(c) The amendments made by this section shall be effective on the date of the enactment of this Act.

CONTINUATION OF MINIMUM BENEFITS FOR EXISTING BENEFICIARIES

SEC. 2. (a)(1) Section 215(a)(5) of the Social Security Act (as amended by section 2201 of the Omnibus Budget Reconciliation Act of 1981) is further amended—

(A) in the first sentence, by striking out ", and the table for determining primary insurance amounts and maximum family benefits contained in this section in December 1978 shall be modified as specified in paragraph (6)"; and

(B) in the last sentence, by striking out ", modified by the application of paragraph (6),".

(2) Section 215(a)(6)(A) of the Social Security Act (as added by section 2201 of the Omnibus Budget Reconciliation Act of 1981) is amended by striking out "The table of benefits" and all that follows down through "shall be extended" and inserting in lieu thereof the following "In applying the table of benefits in effect in December 1978 under this section for purposes of the last sentence of paragraph (4), such table, revised as provided by subsection (i), as applicable, shall be extended".

(b) Section 215(f)(7) of the Social Security Act (as amended by section 2201 of the Omnibus Budget Reconciliation Act of 1981) is further amended—

(1) by striking out the period at the end of the second sentence and inserting in lieu thereof ", and (effective January 1982) the recomputation shall be modified by the application of subsection (a)(6) where applicable."; and

(2) by striking out the last sentence.

(c) Section 215(i)(2)(A)(iii) of the Social Security Act (as amended by section 2201 of the Omnibus Budget Reconciliation Act of 1981) is further amended by inserting after "this title" the following: "and, with respect to a primary insurance amount determined under subsection (a)(1)(C)(i)(I) in the case of an individual to whom that subsection (as in effect in December 1981) applied, subject to the provisions of subsection (a)(1)(C)(i) and clauses (iv) and (v) of this subparagraph (as then in effect)".

(d) Section 215(i)(4) of the Social Security Act (as amended by section 2201 of the Omnibus Budget Reconciliation Act of 1981) is further amended by striking out ", modified by the application of subsection (a)(6)," each place it appears.

(e) Section 202(q) of the Social Security Act (as amended by section 2201 of the Omnibus Budget Reconciliation Act of 1981) is further amended—

(1) in paragraph (4), by striking out "changed" and "change" each place they appear and inserting in lieu thereof "increased" and "increase", respectively; and

(2) in paragraph (10), by striking out "changed", "change", and "changes" each place they appear and inserting in lieu thereof "increased", "increase", and "increases", respectively.

(f) Section 203(a)(8) of the Social Security Act (as amended by section 2201 of the Omnibus Budget Reconciliation Act of 1981) is further amended by striking out ", modified by the application of section 215(a)(6),".

(g) Section 217(b)(1) of the Social Security Act (as amended by section 2201 of the Omnibus Budget Reconciliation Act of 1981) is further amended by striking out ", and as modified by the application of section 215(a)(6),".

(h) Section 1622 of the Social Security Act (as added by section 2201 of the Omnibus Budget Reconciliation Act of 1981) is repealed.

(i) Subsection (e) of section 2201 of the Omnibus Budget Reconciliation Act of 1981 is repealed.

(j)(1) Subsection (h) of section 2201 of the Omnibus Budget Reconciliation Act of 1981 is repealed, effective September 1, 1981.

(2) Except as provided in paragraphs (3) and (4), the amendments made by section 2201 of the Omnibus Budget Reconciliation Act of 1981 (other than subsection (f) thereof), together with the amendments made by the preceding subsections of this section, shall apply with respect to benefits for months after December 1981; and the amendment made by subsection (f) of such section 2201 shall apply with respect to deaths occurring after December 1981.

(3) Such amendments shall not apply—

(A) in the case of an old-age insurance benefit, if the individual who is entitled to such benefit first became eligible (as defined in section 215(a)(3)(B) of the Social Security Act) for such benefit before January 1982,

(B) in the case of a disability insurance benefit, if the individual who is entitled to such benefit first became eligible (as so defined) for such benefit before January 1982, or attained age 62 before January 1982,

(C) in the case of a wife's or husband's insurance benefit, or a child's insurance benefit based on the wages and self-employment income of a living individual, if the individual on whose wages and self-employment income such benefit is based is entitled to an old-age or disability insurance benefit with respect to which such amendments do not apply, or

(D) in the case of a survivors insurance benefit, if the individual on whose wages and self-employment income such benefit is based died before January 1982, or dies in or after January 1982 and at the time of his death is eligible (as so defined) for an old-age or disability insurance benefit with respect to which such amendments do not apply.

(4) In the case of an individual who is a member of a religious order (within the meaning of section 3121(r)(2) of the Internal Revenue Code of 1954), or an autonomous subdivision of such order, whose members are required to take a vow of poverty, and which order or subdivision elected coverage under title II of the Social Security Act before the date of the enactment of this Act, or who would be such a member except that such individual is considered retired because of old age or total disability, paragraphs (2) and (3) shall apply, except that each reference therein to "December 1981" or "January 1982" shall be considered a reference to "December 1991" or "January 1992", respectively.

EXTENSION OF COVERAGE TO FIRST SIX MONTHS OF SICK PAY

SEC. 3. (a) Clause (2) of section 209(b) of the Social Security Act is amended by inserting immediately after "sickness or accident disability" the following: "(but, in the case of payments made to an employee or any of his dependents, this clause shall exclude from the term 'wages' only payments which are received under a workmen's compensation law)".

(b)(1) Subparagraph (B) of section 3121(a)(2) of the Internal Revenue Code of 1954 (defining wages for purposes of the Federal Insurance Contributions Act) is amended to read as follows:

"(B) sickness or accident disability (but, in the case of payments made to an employee or any of his dependents, this subparagraph shall exclude from the term 'wages' only payments which are received under a workmen's compensation law), or".

(2) Section 3121(a) of such Code is further amended by adding at the end thereof (after and below paragraph (18)) the following new sentence:

"Except as otherwise provided in regulations prescribed by the Secretary, any third party which makes a payment included in

wages solely by reason of the parenthetical matter contained in subparagraph (B) of paragraph (2) shall be treated for purposes of this chapter and chapter 22 as the employer with respect to such wages."

(c) Subsection (e) of section 3231 of such Code (defining compensation for purposes of the Railroad Retirement Tax Act) is amended by adding at the end thereof the following new paragraph:

"(4)(A) For purposes of applying sections 3201(b) and 3221(b) (and so much of section 3211(a) as relates to the rates of the taxes imposed by sections 3101 and 3111), in the case of payments made to an employee or any of his dependents on account of sickness or accident disability, clause (i) of the second sentence of paragraph (1) shall exclude from the term 'compensation' only—

"(i) payments which are received under a workmen's compensation law, and

"(ii) benefits received under the Railroad Retirement Act of 1974.

"(B) Notwithstanding any other provision of law, for purposes of the sections specified in subparagraph (A), the term 'compensation' shall include benefits paid under section 2(a) of the Railroad Unemployment Insurance Act for days of sickness, except to the extent that such sickness (as determined in accordance with standards prescribed by the Railroad Retirement Board) is the result of on-the-job injury.

"(C) Under regulations prescribed by the Secretary, subparagraphs (A) and (B) shall not apply to payments made after the expiration of a 6-month period comparable to the 6-month period described in section 3121(a)(4).

"(D) Except as otherwise provided in regulations prescribed by the Secretary, any third party which makes a payment included in compensation solely by reason of subparagraph (A) or (B) shall be treated for purposes of this chapter as the employer with respect to such compensation."

(d)(1) The regulations prescribed under the last sentence of section 3121(a) of the Internal Revenue Code of 1954, and the regulations prescribed under subparagraph (D) of section 3231(e)(4) of such Code, shall provide procedures under which, if (with respect to any employee) the third party promptly—

(A) withholds the employee portion of the taxes involved,

(B) deposits such portion under section 6302 of such Code, and

(C) notifies the employer of the amount of the wages or compensation involved,

the employer (and not the third party) shall be liable for the employer portion of the taxes involved and for meeting the requirements of section 6051 of such Code (relating to receipts for employees) with respects to the wages or compensation involved.

(2) For purposes of paragraph (1)—

(A) the term "employer" means the employer for whom services are normally rendered,

(B) the term "taxes involved" means, in the case of any employee, the taxes under chapters 21 and 22 which are payable solely by reason of the parenthetical matter contained in subparagraph (B) of section 3121(a)(2) of such Code, or solely by reason of paragraph (4) of section 3231(e) of such Code, and

(C) the term "wages or compensation involved" means, in the case of any employee, wages or compensation with respect to which taxes described in subparagraph (B) are imposed.

(e) For purposes of applying section 209 of the Social Security Act, section 3121(a) of the Internal Revenue Code of 1954, and section 2121(e) of such Code with respect to the parenthetical matter contained in section 209(b)(2) of the Social Security Act or section 3121(a)(2)(B) of the Internal Revenue Code of 1954, or with respect to section 3231(e)(4) of such Code (as the case may be), payments under a State temporary disability law shall be treated as remuneration for service.

(f) Notwithstanding any other provision of law, no penalties or interest shall be assessd on account of any failure to make timely payment of taxes, imposed by section 3101, 3111, 3201(b), 3211, or 3221(b) of the Internal Revenue Code of 1954 with respect to payments made for the period beginning January 1, 1982, and ending June 30, 1982, to the extent that such taxes are attributable to this section (or the amendments made by this section) and that such failure is due to reasonable cause and not to willful neglect.

(g)(1) Except as provided in paragraph (2), this section (and the amendments made by this section) shall apply to remuneration paid after December 31, 1981.

(2) This section (and the amendments made by this section) shall not apply with respect to any payment made by a third party to an employee pursuant to a contractual relationship of an employer with such third party entered into before December 14, 1981, if—

(A) coverage by such third party for the group in which such employee falls ceases before March 1, 1982, and

(B) no payment by such third party is made to such employee under such relationship after February 28, 1982.

PENALTIES FOR MISUSE OF SOCIAL SECURITY NUMBERS

SEC. 4. (a) Section 208(g) of the Social Security Act is amended—

(1) by inserting "or for the purpose of obtaining anything of value from any person," before "or for any other purpose" in the matter preceding paragraph (1); and

(2) by adding after paragraph (2) the following new paragraph:

"(3) knowingly alters a social security card issued by the Secretary, buys or sells a card that is, or purports to be, a card so issued, counterfeits a social security card, or possesses a social security card or counterfeit social security card with intent to sell or alter it; or".

(b) Section 208 of such Act is further amended by striking out "shall be guilty of a misdemeanor and upon conviction thereof shall be fined not more than $1,000 or imprisoned for not more than one year, or both" in the matter following subsection (h) and inserting in lieu thereof "shall be guilty of a felony and upon conviction thereof shall be fined not more than $5,000 or imprisoned for not more than five years, or both".

(c) The amendments made by subsections (a) and (b) shall be effective with respect to violations committed after the date of the enactment of this Act.

STATUTORY DEADLINE FOR IMPLEMENTING AFDC HOME HEALTH AIDE DEMONSTRATION PROJECTS

SEC. 5. The last sentence of subsection (c)(2) of section 966 of the Omnibus Reconciliation Act of 1980 (as added by section 2156 of the Omnibus Budget Reconciliation Act of 1981) is amended by inserting "with at least seven States" after "agreements".

INFORMATION WITH RESPECT TO PRISONERS

SEC. 6. Section 223(f) of the Social Security Act is amended by adding at the end thereof the following new paragraph:

"(3) Notwithstanding the provisions of section 552a of title 5, United States Code, or any other provision of Federal or State law, any agency of the United States Government or of any State (or political subdivision thereof) shall make available to the Secretary, upon written request, the name and social security account number of any individual who is confined in a jail, prison, or other penal institution or correctional facility under the jurisdiction of such agency, pursuant to his conviction of an offense which constituted a felony under applicable law, which the Secretary may require to carry out the provisions of this subsection.".

REPORT TO CONGRESS

SEC. 7. The Secretary of Health and Human Services shall report to the Congress within ninety days after the date of the enactment of this Act with respect to the actions being taken to prevent payments from being made under title II of the Social Security Act to deceased individuals, including to the extent possible the use of the death records available under the medicare program to screen the cash benefit rolls for such deceased individuals.

And the Senate agree to the same.

DAN ROSTENKOWSKI,
J. J. PICKLE,

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4331) to amend the Omnibus Reconciliation Act of 1981 to restore minimum benefits under the Social Security Act, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

INTERFUND BORROWING

Present law.—The present law tax rates for OASDI and HI, and the allocation of the OASDI tax rate between OASI and DI are shown below. No authority exists for administratively transferring funds from one trust fund to another.

PRESENT LAW OASDHI TAX RATES

	OASI	DI	HI	Total
Employees and employers, each (in percent):				
1982	4.575	0.825	1.30	6.70
1983	4.575	.825	1.30	6.70
1984	4.575	.825	1.30	6.70
1985	4.750	.950	1.35	7.05
1986–89	4.750	.950	1.45	7.15
1990–2004	5.100	1.100	1.45	7.65
2005 and after	5.100	1.100	1.45	7.65
Self-employed (in percent):				
1982	6.8125	1.2375	1.30	9.350
1983	6.8125	1.2375	1.30	9.350
1984	6.8125	1.2375	1.30	9.350
1985	7.1250	1.4250	1.35	9.900
1986–89	7.1250	1.4250	1.45	10.000
1990–2004	7.6500	1.6500	1.45	10.750
2005 and after	7.6500	1.6500	1.45	10.750

House bill.—No provision.

Senate amendment.—Section 101 of the amendment would authorize borrowing between the OASI and DI trust funds at any time prior to January 1991. The Managing Trustee, the Secretary of the Treasury, would determine when borrowing would be appropriate to meet the need to finance the benefit payments from these trust funds. The Managing Trustee would be authorized to borrow any amounts which he determines to be appropriate from either of these trust funds for transfer to and deposit in the other trust fund.

In any case where a loan had been made, interest would be paid by the borrowing fund to the lending fund at a rate equal to the rate the lending trust fund would earn on the unrepaid amount if the loan were a regular investment.

Whenever the Managing Trustee determined that the assets of the borrowing trust fund were sufficient to permit repayment of all, or part, of any loans made, he would make such repayments as he determines to be appropriate.

The Board of Trustees would be required to make a timely report to the Congress of any amounts borrowed or repaid (including interest payments).

Section 102 of the Senate amendment revises the distribution of social security taxes between the OASI, DI, and HI trust funds for 1982 and later, but did not alter the overall OASDHI combined tax rate under present law.

PROPOSED REALLOCATION OF OASDHI TAX RATES

	OASI	DI	HI	Total
Employees and employers, each (in percent):				
1982	5.185	0.715	0.80	6.70
1983	5.035	.665	1.00	6.70
1984	4.855	.595	1.25	6.70
1985	5.005	.595	1.45	7.05
1986–89	5.100	.600	1.45	7.15
1990–2004	5.150	.750	1.75	7.65
2005 and after	5.450	.750	1.45	7.65
Self-employed (in percent)				
1982	7.5150	1.0350	0.800	9.350
1983	7.3750	0.9750	1.000	9.350
1984	7.2150	0.8850	1.250	9.350
1985	7.5500	0.9000	1.450	9.900
1986–89	7.6500	0.9000	1.450	10.000
1990–2004	7.8550	1.1450	1.750	10.750
2005 and after	8.1750	1.1250	1.450	10.750

Conference agreement.—The conference agreement does not include the Senate provision with respect to changing the social security tax rates or the allocation of the OASDI tax rate between the OASI and DI trust funds. The conference agreement would authorize borrowing of existing assets between the OASI, DI, and HI trust funds under the same conditions and requirements as provided in the Senate amendment except with regard to effective date for borrowing between the OASI and DI trust funds. Under the conference agreement, the borrowing authority would be effective from the date of enactment through December 31, 1982. In determining that borrowing under this provision is appropriate in order to best meet the need for financing the benefit payments under any of the three trust funds, the Managing Trustee should, after consultation with the other trustees, make such determination no less frequently than on a monthly basis. In no case shall such interfund borrowing make adjustments in the trust funds insuring benefit payments for a period more than six months beyond the date of such determination.

RESTORATION OF MINIMUM BENEFIT FOR CURRENT RECIPIENTS (SECTION 2)

Present law.—The minimum benefit for all present and future beneficiaries will be eliminiated. No person becoming eligible for old-age or disability benefits after October 1981 will be entitled to the minimum benefit. Benefits payable to new beneficiaries will be based on their actual earnings.

All other persons will be affected beginning with benefits payable for the month of March 1982. Their benefits will be recomputed based on their actual earnings record and according to recomputation procedures prescribed in regulations issued by the Secretary of HHS. In addition, persons aged 60 to 64 who are entitled to a minimum benefit for the month of February 1982 will become eligible for a special SSI benefit if they qualify under all SSI rules except that pertaining to age. The amount of the special SSI payment will be limited to the difference between the minimum benefit the individual received in February 1982 (without regard to the earnings test) and the recalculated benefit. These SSI payments will not be adjusted for increases in the cost of living, nor will these 60 to 64 year old persons become eligible for certain other benefits including State supplementation, food stamps, medicaid, or social services as a result of this provision.

This provision was adopted in section 2201 of the Omnibus Budget Reconciliation Act of 1981 (P.L. 97-37).

House bill.—The House bill would repeal section 2201 of the Omnibus Budget Reconciliation Act of 1981 (P.L. 97-35), thereby reinstating the OASDI minimum benefit provision as it existed under prior law for both current and future beneficiaries.

Senate amendment.—Section 103 of the amendment would restore the minimum benefit for all people who are eligible for benefits before November 1981 and who are residents of the 50 States, District of Columbia, Puerto Rico, Guam, Virgin Islands, and American Samoa. Among this group of beneficiaries, those with governmental pensions would, beginning with benefits for June of 1982, have their minimum benefit reduced dollar-for-dollar for the portion of their governmental pensions above $300, but not below the amount of the benefit based on their actual earnings. This offset would apply only to the benefits of retired or disabled workers; it would not affect survivors' or dependents' benefits.

For members of religious orders who have taken a vow of poverty and who were first covered under the social security program prior to the date of enactment as a result of amendments adopted in 1972, the provision would apply the elimination of the minimum benefit for future recipients, only to those who become eligible after October 1991.

Conference Agreement.—The conference agreement restores the minimum benefit for all people who are eligible for benefits before January 1982 or whose benefits are based on a worker's eligibility or death before January 1982. Also, the elimination of the minimum benefit for future recipients applies to members of religious orders who have taken a vow of poverty, who were first covered under the social security program prior to the date of enactment, and who become eligible after October 1991.

For current recipients to whom the minimum benefit would be restored, the conference agreement does not include the provision of the Senate amendment that limits the restoration to residents of the United States and does not include the provision reducing the minimum benefit dollar-for-dollar for those also receiving governmental pensions above $300.

EXTENSION OF COVERAGE TO FIRST SIX MONTHS OF SICK PAY—SECTION 3

Present law.—Payments made to or on behalf of an employee of a private employer on account of sickness or accident disability are subject to social security taxes and are treated as covered earnings *unless* they are either: (1) paid under a qualified plan or system; or (2) paid after the employee has not worked for the employer for more than six months. A qualified plan or system is one that applies to the employees of a firm generally or to a class or classes of employees. The existence of a plan or system is shown if the plan or system is in writing or is otherwise made known to employees (for example, through the medium of a bulletin board notice or the long and established practice of the employer). Other indications of the existence of a plan or system include, but are not limited to, contractual references to a plan or system, employer contributions to a plan, or segregated accounts for the payment of benefits.

With respect to railroad employment, the Railroad Retirement Tax Act, sec. 3201 et seq. of the Internal Revenue Code, excludes from taxable compensation the amount of any payment (including any amount paid by an employer for insurance or annuities) made to, or on behalf of, an employee or any of his dependants under a plan or system, on account of sickness or accident disability.

Under the Railroad Unemployment Insurance Act (sec. 2(a)) certain daily benefits are paid from the railroad unemployment insurance account for qualified employees for each day of sickness after the fourth consecutive day of sickness in a period of continuing sickness. In general, the daily benefit rate for such sickness is an amount equal to sixty percent of the employee's daily rate of compensation in a base year, but not less than $12.70 nor in excess of $25.00 per day. The maximum number of days of sickness within a benefit year for which benefits may be paid to an employee is one hundred and thirty (26 weeks). Under present law these sickness and disability benefits are not taxable compensation for railroad retirement tax purposes.

House bill.—No provision.

Senate amendment.—Section 104 of the amendment would remove the exclusion of certain sick pay received under a plan or system during the first six months the employee is off work. However, payments made by an insurance company would still be exempt unless the company is owned, to a substantial extent, by the employer, or the insurance company has an administrative-

services-only contract with the employer under which the insurance company is reimbursed for sick payments actually made plus administrative expenses and profits. In addition, payments required by a workmen's compensation or temporary disability insurance law would continue to be exempt. This provision would be effective for sick payments made in January 1982 and thereafter. The treatment of payments made to an employee more than six months after the employee last worked would be unchanged from current law. Under the Senate amendment, sick payments made to employees covered by the railroad retirement system and sick pay benefits received under the Railroad Unemployment Insurance Act would continue to be exempt from railroad retirement employment taxes.

Conference agreement.—The conference agreement follows the Senate amendment extending coverage to certain forms of sick pay. In addition, the conference agreement would include in the definition of wages both for tax and coverage purposes, payments made under a sick pay plan to an employee or any of his dependents by a third party on account of the employee's illness. However, in the case where an employee has contributed to such plan, "wages" or "compensation" shall not include that portion of such payments attributable to the employee's contributions. It is the view of the conferees that such amounts are properly excludable in that they do not constitute remuneration for employment but rather represent a return on the premium contributions made by the employee. The conferees intend that rules similar to those provided in sec. 105 of the Internal Revenue Code (and regulations promulgated thereunder) shall apply in this instance. Payments which are received under a workmen's compensation law and those paid to an employee by either the employer or a third party more than six months after the employee last worked would continue to be excluded from the definition of wages, as under present law.

The conference agreement also provides that any third party (for example, an insurance company) that makes a payment, which is included in wages solely by reason of this provision, shall be treated as the employer with respect to such wages for purposes of social security and railroad retirement employment taxes. Thus, a third party payor will be responsible for the withholding of employee FICA taxes on wages up to the applicable maximum taxable wage base and for the remittance and timely deposit (as otherwise provided by law) of FICA taxes. However, the conference agreement establishes a specific statutory exception to this rule: the liability for the employer share of the FICA taxes will shift from the third party to the actual employer as soon as the third party payor has deposited the withheld employee taxes and notified the employer of the amount of sick pay made to the employee.

The conference agreement mandates the development of regulations which shall provide procedures under which, if the third party payor promptly withholds the employee portion of the taxes, deposits those taxes pursuant to the rules under section 6302 of the Code, and notifies the employer for whom services are usually rendered, of the payment, the employer (and not the third party payor) shall be liable for the employer portion of tax and for providing written statements and other reporting requirements under Code section 6051. It is the intention of the conferees that these regulations provide that third party payors withhold the employee portion of the tax as payments are made and deposit such withheld amounts under the applicable schedule authorized by Code section 6302 (including information reports such as Form 941 and related forms) as if these amounts were paid out of the third party payor's own payroll. Further, the provision adopted by the conferees requires simultaneous notification of the employer of the amount of compensation paid to each employee. If these conditions are met, the liability for the employer portion of the payroll tax shifts from the party making the payments to the employer for whom services are normally rendered. Upon the employer's receipt of the notification of the payment made by the third party, such employer must deposit the appropriate employer taxes as if these payments were made out of his own payroll on that date. The conferees intend that the implementing regulations shall be promptly issued and that, having met the conditions specified in sec. 3(d), they will be relieved of the liability.

As a result, FICA and railroad retirement employment taxes on combined amounts in excess of the maximum taxable wage base could be withheld from employees and paid by employers. Under section 6413(c) of the Internal Revenue Code, employees who experience such overwithholding are eligible to receive refunds. The conferees expect that the Secretary will attempt to design procedures whereby employers and third party payors can avoid withholding on combined amounts in excess of the maximum taxable wage base (both for FICA and railroad retirement taxes) and will implement these procedures by regulation.

The conference agreement provides that, notwithstanding any other provision of law (including certain payments made under the Railroad Unemployment Insurance Act), compensation for purposes of the Railroad Retirement Tax Act shall include all payments made to an employee or any of his dependents on account of sickness or accident disability during the first six months the employee is off work except: payments which are received under a workmen's compensation law; payments which are received under The Railroad Retirement Act of 1974; or benefits which are paid under section 2(a) of the Railroad Unemployment Insurance Act for days of sickness to the extent that such sickness is the result of on-the-job injury (as determined in accordance with standards prescribed by the Railroad Retirement Board).

In addition, the conference agreement provides that, for purposes of the taxes imposed by this provision, payments made under a state temporary disability insurance law shall be treated as remuneration for service.

Under the conference agreement, no penalties or interest shall be assessed for failure to make timely payments of taxes with respect to payments of sick pay made between January 1, 1982 and June 30, 1982 and which are imposed as a result of amendments made by this section, to the extent that such failure is due to willful neglect and such taxes are paid on or before June 30, 1982.

Finally, the conference agreement provides generally that the amendments made by this section shall apply to remuneration paid after December 31, 1981. However, these amendments shall not apply to any third party payment made to an employee pursuant to a contractual relationship of an employer with such third party which is entered into before December 14, 1981, if the third party's coverage for that employee's group ceases before February 28, 1982 and no third party payment is made to such employee under that contract after February 28, 1982. Since such payments would not be considered remuneration for purposes of these taxes, no employment taxes would be levied on such payments.

PENALTIES FOR MISUSE OF SOCIAL SECURITY NUMBERS (SECTION 4)

Present law.—Criminal penalties are provided for: (1) knowingly and willfully using a social security number that was obtained with false information, (2) using someone else's social security number, or (3) unlawfully disclosing or compelling the disclosure of someone else's social security number. The crime is considered a misdemeanor and the penalty involves a fine of up to $1,000 or imprisonment for up to one year or both.

House bill.—No provision.

Senate amendment.—Section 110 of the amendment would add new acts considered to be a misuse of social security cards by making it unlawful to: (1) alter, (2) buy or sell, or (3) counterfeit social security cards, or (4) possess a regular or counterfeit card with intent to sell or alter it.

The provision would make all unlawful acts affecting the social security number or card a felony, rather than a misdemeanor.

It would increase the maximum fine for conviction of such acts from $1,000 to $5,000 and the maximum prison term from 1 year to 5 years.

Conference agreement.—The conference agreement follows the Senate amendment.

Statutory Deadline for Implementing AFDC Home Health Aide Demonstration Projects (Section 5)

Present law.—P.L. 96-499 authorized the Secretary to enter into agreements with up to 12 States for the purpose of conducting demonstration projects to train AFDC recipients as homemaker-home health aides. This provision was amended by P.L. 97-35 to require the Secretary to establish by October 1, 1981, such guidelines and regulations as may be necessary to assure that agreements with the States are entered into by January 1, 1982.

House bill.—No provision.

Senate amendment.—Section 113 of the amendment would require the Secretary to meet the January 1, 1982 deadline for entering into demonstration agreements with at least 7 States.

Conference agreement.—The conference agreement follows the Senate amendment.

INFORMATION WITH RESPECT TO PRISONERS (SECTION 6)

Present law.—Beginning October 1980, disability insurance benefits cannot be paid while individuals are imprisoned for conviction of a felony, except where the individual is satisfactorily participating in a rehabilitation program which has been specifically approved for that individual by a court of law and which is expected to result in his being able to engage in substantial gainful activity upon release and within a reasonable period of time. Such individuals are also not eligible for student benefits. However, benefits can be paid to dependents of prisoners, just as if the prisoners were receiving benefits.

The law also provides that impairments, to the extent that they arise from, or are aggravated by, the commission of a crime,

cannot be considered in determining whether a person is disabled, and impairments arising while an individual is in prison cannot be considered for purposes of disability as long as the person remains in prison.

In order to implement this law, the Secretary of HHS requires information from penal institutions with which to identify the relevant prisoners. In some cases, providing this information without the consent of the prisoner possibly violates various privacy acts.

House bill.—No provision.

Senate amendment.—Section 108 of the amendment provides that, without regard to any contrary Federal or State law, Federal, State, or local government agencies must furnish the name and social security number of any prisoner convicted of a felony, when the Secretary of HHS makes a written request to the agency for the information.

Conference agreement.—The conference agreement follows the Senate amendment.

REPORT TO CONGRESS REGARDING PAYMENTS TO DECEASED PERSONS (SECTION 7)

Present law.—Social security benefits terminate with the month in which a beneficiary dies. Benefits are not payable for that month.

House bill.—No provision.

Senate amendment.—Section 109 of the amendment would require the Secretary of HHS to report to Congress within 90 days after enactment on actions being taken to prevent payments to deceased social security beneficiaries.

Conference agreement.—The conference agreement follows the Senate amendment.

OTHER PROVISIONS OF THE SENATE AMENDMENT

EXTENSION OF DISABILITY INSURANCE MAXIMUM FAMILY BENEFITS TO OLD-AGE AND SURVIVORS INSURANCE BENEFICIARIES

Present law.—There is a limit on the amount of monthly benefits that can be paid on the earnings record of one worker. This limit is known as the maximum family benefit (MFB). In retirement and survivor cases, the MFB ranges from 150 to 188 percent of the primary insurance amount, the unreduced benefit of the worker. In disability cases, the MFB can be no more than the lower of 85 percent of the worker's average indexed monthly earnings or 150 percent of the primary insurance amount, but not less than 100 percent of the primary insurance amount.

House bill.—No provision.

Senate amendment.—Section 105 of the amendment would provide that the disability maximum family benefit formula would be extended to retirement and survivor cases, for workers reaching age 62 or dying after December 1981.

Conference agreement.—The conference agreement does not include the Senate amendment.

STUDY OF SOCIAL SECURITY ADMINISTRATION EFFICIENCY

Present law.—Administrative expenses of the social security programs are paid out of trust fund monies. No provision of law requires special or ongoing reports to Congress on the adequacy of the administrative capacity of the agency.

House bill.—No provision.

Senate amendment.—Section 106 of the amendment would require GAO to undertake a study of the SSA for the purpose of determining the management efficiency, employee productivity, and technical capacities (including computer hardware and programming) of that agency and the extent of current information on the characteristics of recipients. The Comptroller General would be required to report to Congress, no later than 180 days after the date of enactment, the results of the study and any recommendations for improvements in any of the operations studied.

Conference agreement.—The conference agreement does not include the Senate amendment.

SEPARATE ACCOUNTING FOR SOCIAL SECURITY TRUST FUNDS

Present law.—Reports on the receipts, outlays, surplus or deficit, and reserve balance of each of the social security trust funds are included in the President's annual budget. In addition, the Boards of Trustees publishes annual reports on the financial status of the trust funds and includes in the reports current estimates of the short-run and long-run actuarial balances of each trust fund.

House bill.—No provision.

Senate amendment.—Section 107 of the amendment would require the President, in the annual budget message and midsession review, to include a separate statement containing a summary of his requests for new budget authority and estimating outlays, revenues, and surplus or deficit of the OASI, DI, and HI trust funds. The separate statement would show the revenues, outlays, and surplus or deficit estimates for the trust funds, would describe the economic assumptions that were used in making the estimates for trust funds and the relationship to economic assumptions made for other parts of the budget, would indicate financial prospects of the trust funds, and would present a comparative summary of the three trust funds with all the other portions of the unified budget. This report would be in addition to the usual budget submission which includes the budget estimates for the trust funds within the unified budget estimates.

Conference agreement.—The conference agreement does not include the Senate amendment.

SOCIAL SECURITY CARDS

Present law.—Social security cards are issued on regular paper. No special procedures are employed to prevent alteration and duplication.

House bill. —No provision.

Senate amendment.—Section 111 of the amendment would require that new and replacement social security cards issued more than 190 days after enactment be made of bank-note paper and (to the maximum extent practicable) to be a card that cannot be counterfeited. The Secretary of HHS would be required to report his plans for implementing this provision within 90 days after enactment.

Conference agreement.—The conference agreement does not include the Senate amendment. The conferees, however, are aware that the General Accounting Office has found that there may be a significant problem related to the use of counterfeit social security cards and believe that this matter deserves further consideration. The conferees believe that the Secretary of Health and Human Services should study the costs and benefits to the trust funds of such a proposal, the costs and benefits to other government programs, and the impact of such a proposal on the privacy of individuals.

FUTURE LEGISLATIVE CHANGES IN THE SOCIAL SECURITY ACT

Present law.—Congress has the authority to alter tax and spending provisions.

House bill.—No provision.

Senate amendment.—Section 112 of the amendment provides that it is the sense of the Congress that any future legislative changes in the Social Security Act will not reduce the current dollar amount of monthly OASDI benefits to which individuals are entitled for the month of enactment.

Conference agreement.—The conference agreement does not include the Senate amendment.

HIGHWAY TRUST FUND AND HIGHWAY EXCISE TAXES

Present law.—Under present law, the Highway Trust Fund and its related excise taxes are in place until October 1, 1984. At that time, the current rates of the excise taxes on gasoline and other motor fuels, on lubricating oil, on trucks and trailers, on truck parts and accessories, on tires, tubes and tread rubber and on the use of heavy trucks will expire or revert to prior lower rates. The provision authorizing the deposit of taxes to and appropriations from the Highway Trust Fund will also expire on October 1, 1984.

House bill.—No provision.

Senate amendment.—Sections 202 and 203 of the amendment would extend the highway excise taxes at current rates for 5 years, until October 1, 1989, but deposits of tax revenues to the Highway Trust Fund would be continued for 6 years, to October 1, 1990. Authorization for expenditures from the Highway Trust Fund would also be extended for 6 years, through September 30, 1990.

Conference agreement.—The conference agreement does not include the Senate amendment.

DAN ROSTENKOWSKI,
J. J. PICKLE,
CHARLES B. RANGEL
(except for section 3),
ANDREW JACOBS, Jr.,
RICHARD A. GEPHARDT,
BARBER B. CONABLE, Jr.,
WILLIS GRADISON,
Managers on the Part of the House.

SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 123. Joint resolution authorizing and requesting the President to proclaim "National Disabled Veterans Week"; to the Committee on Post Office and Civil Service.

ENROLLED JOINT RESOLUTION SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 370. Joint resolution making further continuing appropriations for the fiscal year 1982, and for other purposes.

BILLS AND A JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on December 11, 1981, present to the President, for his approval, bills and a joint resolution of the House of the following titles:

H.R. 3455. An act to authorize certain construction at military installations for fiscal year 1982, and for other purposes;

H.R. 3484. An act to provide for the minting of half dollars with a design emblematic of the 250th anniversary of the birth of George Washington;

H.R. 4034. An act making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1982, and for other purposes;

H.R. 4035. An act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1982, and for other purposes; and

H.J. Res. 370. Joint resolution making further continuing appropriations for the fiscal year 1982, and for other purposes.

ADJOURNMENT

Mr. BRINKLEY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 37 minutes p.m.) the House adjourned until tomorrow, Tuesday, December 15, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2684. A letter from the Director, Office of Management and Budget, Executive Office of the President, transmitting a cumulative report on rescissions and deferrals of budget authority as of December 1, 1981, pursuant to section 1014(e) of Public Law 93-344 (H. Doc. No. 97-121); to the Committee on Appropriations and ordered to be printed.

2685. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of certain defense equipment and services to Egypt (Transmittal No. 82-14), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

2686. A letter from the Assistant Secretary of State for Congressional Relations, transmitting reports on political contributions made by various ambassadorial nominees and by members of their families, pursuant to section 304(b)(2) of Public Law 96-465; to the Committee on Foreign Affairs.

2687. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment and services to Egypt (Transmittal No. 82-14), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 1486. A bill to establish the Protection Island National Wildlife Refuge, Jefferson County, State of Washington; with amendment (Rept. No. 97-403). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 4961. A bill to make miscellaneous changes in the tax laws; with amendments (Rept. No. 97-404). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 4717. A bill to amend the effective date provision of section 403(b)(3) of the Windfall Profit Tax Act of 1980 (Public Law 96-223) to further defer the effective date of certain provisions providing for the recognition as income of LIFO inventory amounts; with amendment (Rept. No. 97-405). Referred to the Committee of the Whole House on the State of the Union.

Mr. ROSTENKOWSKI: Committee on Ways and Means. H.R. 5159. A bill to amend the Internal Revenue Code of 1954 to provide a temporary increase in the tax imposed on producers of coal, and for other

purposes; (Rept. No. 97-406, Pt. I). Ordered to be printed.

Mr. LONG of Louisiana: Committee on Rules. House Resolution 303. Resolution waiving certain points of order against the conference report on S. 884, to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes; (Rept. No. 97-407). Referred to the House Calendar.

Mr. ROE: Committee of conference. Conference report on H.R. 4503 (Rept. No. 97-408). Ordered to be printed.

Mr. ROSTENKOWSKI: Committee of conference. Conference report on H.R. 4331 (Rept. No. 97-409). Ordered to be printed.

SUBSEQUENT ACTION ON A BILL SEQUENTIALLY REFERRED UNDER TIME LIMITATION

Under clause 5 of rule X, the following action was taken by the Speaker:

[Submitted December 12, 1981]

The Committee on Agriculture discharged from consideration of the bill (H.R. 9) which was committed to the Committee of the Whole House on the State of the Union and ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BONKER:

H.R. 5202. A bill to revise the boundaries of Olympic National Park, Wash.; to the Committee on Interior and Insular Affairs.

By Mr. BROWN of California (for himself, Mr. WAMPLER, Mr. BOWEN, Mr. EMERSON, Mr. EVANS of Iowa, Mr. FITHIAN, Mr. ROBERTS of Kansas, and Mr. THOMAS):

H.R. 5203. A bill to amend the Federal Insecticide, Fungicide, and Rodenticide Act; to the Committee on Agriculture.

By Mr. BURGENER:

H.R. 5204. A bill to authorize and direct the Secretary of the Interior to accept certain lands for the benefit of the Sycuan Band of Mission Indians; to the Committee on Interior and Insular Affairs.

By Mr. CONABLE (for himself, Mr. JONES of Oklahoma, Mr. VANDER JAGT, Mr. FRENZEL, Mr. KEMP, Mr. LAFALCE, and Mr. NOWAK):

H.R. 5205. A bill to amend the Internal Revenue Code of 1954 to deny the deduction for amounts paid or incurred for certain advertisements carried by certain foreign broadcast undertakings; to the Committee on Ways and Means.

By Mr. CONABLE (for himself and Mr. BAILEY of Pennsylvania):

H.R. 5206. A bill to amend the Internal Revenue Code of 1954 to repeal the minimum tax on corporations; to the Committee on Ways and Means.

By Mr. DERRICK:

H.R. 5207. A bill to provide that topsoil declared to be surplus property in connection with the construction of a dam by the United States may be donated to local governments, local public agencies, and private, nonprofit organizations; to the Committee on Government Operations.

By Mr. LOWERY of California:

H.R. 5208. A bill to amend the Bail Reform Act of 1966 to permit consideration of danger to the community in setting pretrial release conditions, to permit pretrial detention of certain offenders, and for other purposes; to the Committee on the Judiciary.

By Mr. MONTGOMERY:

H.R. 5209. A bill to amend title 38, United States Code, to provide that the period for which an employer is required to grant an employee who is a member of the National Guard or Reserves a leave of absence in order to allow the employee to perform required active duty for training is any period of up to 12 consecutive months; to the Committee on Veterans' Affairs.

By Mr. PEYSER (for himself, Mrs. HECKLER, Mr. JEFFORDS, and Mr. LUNDINE):

H.R. 5210. A bill to extend the delay in making any adjustment in the price support level for milk, to extend the time for conducting referendums with respect to marketing quotas for wheat, upland cotton, and rice, and to extend the authority to enter into agreements and programs of assistance under the Agricultural Trade Development and Assistance Act of 1954; to the Committee on Agriculture.

By Mr. RINALDO:

H.R. 5211. A bill to amend title 18, United States Code, to establish criminal penalties applicable to U.S. citizens who are employed in a military or intelligence capacity by certain foreign governments or international terrorist groups, to be named by the President, and for other purposes; to the Committee on on the Judiciary.

By Mr. SCHUMER:

H.R. 5212. A bill to amend section 235 of the National Housing Act; to the Committee on Banking, Finance and Urban Affairs.

H.R. 5213. A bill to amend the Internal Revenue Code of 1954 with respect to the treatment of certain payments under section 236 of the National Housing Act received by cooperative housing corporations; to the Committee on Ways and Means.

By Mr. SHUMWAY:

H.R. 5214. A bill to provide for a uniform products liability law; to the Committee on Energy and Commerce.

By Mr. SMITH of Alabama:

H.R. 5215. A bill to amend section 1979 of the Revised Statutes of the United States to eliminate the monetary awards and orders for the benefit of prisoners in certain cases based on overcrowding of jails, prisons, and other similar correctional facilities; to the Committee on the Judiciary.

By Mr. NICHOLS (for himself, Mr. DICKINSON, Mr. EDWARDS of Alabama, Mr. GINN, Mr. MOORE, Mr. DERRICK, Mr. LOTT, Mr. FUQUA, and Mr. BARNARD):

H.J. Res. 376. Joint resolution to commemorate the travels of William Bartram; to the Committee on Interior and Insular Affairs.

By Mr. ANDERSON:

H. Con. Res. 237. Concurrent resolution expressing the sense of the Congress that the Polish Government not seek to end the freedoms won by the trade union Solidarity, that martial law in Poland be ended, and that the Polish Government and Solidarity be allowed to negotiate their differences without outside interference; to the Committee on Foreign Affairs.

By Mr. APPLEGATE:

H. Con. Res. 238. Concurrent resolution expressing the sense of the Congress that the United States should develop, implement, and actively pursue a policy of controlling all imported manufactured goods, and for other purposes; to the Committee on Ways and Means.

By Mr. MICHEL:

H. Con. Res. 239. Concurrent resolution reaffirming the support of the Congress of the United States for the people of Poland; to the Committee on Foreign Affairs.

By Mr. NELLIGAN (for himself and Ms. MIKULSKI):

H. Res. 304. Resolution expressing the sense of the House of Representatives that the President should seek a halt in any deportation proceedings involving Polish citizens until he determines that the political situation in Poland is stable; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. JEFFRIES:

H.R. 5216. A bill for the relief of Frank M. Davis; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 2646: Mr. DREIER.

H.R. 2869: Mr. PEPPER, Mr. MURPHY, Mr. HUTTO, Mr. GIBBONS, and Mr. LEHMAN.

H.R. 3117: Mr. PURSELL, Mr. SYNAR, Mr. FASCELL, Mr. JAMES K. COYNE, Mr. STOKES, and Mr. GEJDENSON.

H.R. 3234: Mr. PEPPER, Mr. MURPHY, Mr. HUTTO, Mr. GIBBONS, and Mr. LEHMAN.

H.R. 3397: Mr. ROE.

H.R. 3541: Mr. MCCOLLUM.

H.R. 3984: Mr. WHITLEY.

H.R. 4091: Mr. HILER, Mr. MADIGAN, and Mrs. SCHNEIDER.

H.R. 4326: Mr. CLAUSEN, Mr. SMITH of Oregon, Mr. BROYHILL, Mr. ERDAHL, Mr. DOWNEY, and Mr. MOORHEAD.

H.R. 4382: Mr. SILJANDER and Mr. HUNTER.

H.R. 4399: Mr. BEREUTER, Mr. CHAPPIE, Mr. CLAUSEN, Mr. COELHO, Mr. CORCORAN, Mr. FINDLEY, Mr. FOLEY, Mr. HANSEN of Idaho, Mr. KOGOVSEK, Mr. MORRISON, Mr. SUNIA, Mr. WEAVER, Mr. WILSON, Mr. WINN, and Mr. WON PAT.

H.R. 4457: Mr. MINETA, Mr. LIVINGSTON, and Mr. JAMES K. COYNE.

H.R. 4488: Mr. DANNEMEYER and Mr. DERWINSKI.

H.R. 4526: Mr. ROBERTS of Kansas.

H.R. 4547: Mr. DENARDIS.

H.R. 4681: Mr. SHELBY and Mr. NICHOLS.

H.R. 4725: Mr. PEPPER, Mr. MURPHY, Mr. HUTTO, Mr. GIBBONS, and Mr. LEHMAN.

H.R. 4789: Mr. FOWLER, Mr. GEJDENSON, and Mr. KILDEE.

H.R. 4856: Mrs. COLLINS of Illinois, Mr. DELLUMS, Mrs. CHISHOLM, Mr. RANGEL, Mr. MITCHELL of Maryland, Mr. SMITH of Pennsylvania, Mr. FORD of Tennessee, Mr. LEHMAN, Mr. FAUNTROY, Mr. RODINO, Mr. STOKES, Mr. FISH, Mr. FOGLIETTA, Mr. FROST, Mr. IRELAND, Mr. HOYER, Mr. SCHUMER, and Mr. WEISS.

H.R. 4895: Mr. COELHO, Mr. SMITH of Iowa, Ms. FIEDLER, Mr. WYDEN, Mr. WON PAT, Mr. WOLPE, Mr. HATCHER, Mr. HIGHTOWER, Mr. EDGAR, Mr. DYSON, Mr. FRENZEL, Mr. PAUL, Mr. PARRIS, Mr. SIMON, Mr. MCKINNEY, Mr. COATS, Mr. MITCHELL of Maryland, Mr. NELLIGAN, Mrs. BOUQUARD,

Mr. WASHINGTON, Mr. GEJDENSON, Mr. SOLOMON, and Mr. BEDELL.

H.R. 4896: Mr. WON PAT, Mr. DWYER, Mr. EDGAR, Mr. FOGLIETTA, Mrs. COLLINS of Illinois, and Mr. WYDEN.

H. Con. Res. 222: Mr. SENSENBRENNER, Mr. FRANK, Mr. WASHINGTON, Mr. MCCLORY, Mr. DOUGHERTY, Mr. OTTINGER, Mr. JACOBS, Mr. LEVITAS, and Mr. RHODES.

H. Con. Res. 232: Mr. RAHALL, Mr. MURPHY, Mr. OTTINGER, Mr. BONIOR of Michigan, Mr. PEPPER, Mr. FORD of Tennessee, Mr. MCKINNEY, Mr. FROST, Mr. CROCKETT, Mr. MITCHELL of Maryland, Mr. SOLARZ, and Ms. MIKULSKI.

H. Res. 252: Mr. FISH, Mr. STUDDS, Mr. RANGEL, Ms. FERRARO, Mr. OBERSTAR, Mrs. CHISHOLM, Mr. RINALDO, Mr. ROYBAL, Mr. ADDABBO, Mr. MOAKLEY, Mr. RATCHFORD, Mr. MATSUI, Mr. RODINO, Mr. PATTERSON, and Mr. LANTOS.

H. Res 262: Mr. KOGOVSEK and Mr. MITCHELL of Maryland.

H. Res. 265: Mr. BEDELL, Mr. JEFFRIES, Mr. BOWEN, Mr. RUDD, Mr. KOGOVSEK, Mr. GOODLING, and Mr. MCCOLLUM.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 713: Mr. TAUKE.

H.J. Res. 335: Mr. TAUKE.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 2559

By Mr. GEJDENSON:

Page 2, line 14, change the period to a comma, and add the following new clause: "of which sufficient funds shall be made available to continue in operation a Coast Guard research and development center through the end of the 1982 fiscal year.".

Page 6, at the end of the bill, add the following new section:

"SEC. 12. Notwithstanding any other provision of law, the fiscal 1982 end of year civilian personnel strength of the Coast Guard shall be at least 5,484.".

EXTENSIONS OF REMARKS

THE HORRORS OF NUCLEAR WAR

HON. EDWARD J. MARKEY
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. MARKEY. Mr. Speaker, there is a rising tide of emotion in this country about the dangers of nuclear war. This outcry is not coming predominantly from politicians, but from concerned citizens all over this country, who have joined with hundreds of thousands of Europeans to proclaim the need to halt the drift toward Armageddon. One group that is perhaps more acutely aware of the traumatic medical consequences of a nuclear holocaust is the medical profession. Recently, Dr. Barnard Lown wrote a very important commentary in the American Medical Association Journal about nuclear war from the physician's perspective. I believe this is a frightening—and realistic—view of the consequences of nuclear war. I include Dr. Lown's article in full in the CONGRESSIONAL RECORD:

PHYSICIANS AND NUCLEAR WAR

The world is moving inexorably toward the use of nuclear weapons. The atomic age and space flights demonstrate the awesome power of science and technology. These developments have also brought humankind to a bifurcation—one road of unlimited opportunity for improving the quality of life, the other of unmitigated misery, devastation, and death. The road we follow will determine whether modern society has a future.

THE EXPERIENCE OF HIROSHIMA

In Hiroshima, a primitive uranium bomb with an explosive power of 13 kilotons (equivalent to 13,000 tons of TNT) instantaneously killed more than 75,000 persons. Of a population of 245,000 more than 100,000 persons were injured. Ninety percent of the 76,000 buildings within city limits were destroyed. Only three of Hiroshima's 45 hospitals were left unscathed. Fewer than 30 of the 150 physicians were available to attend the thousands of victims. Of the 1,780 nurses only 126 were alive and able to assist the burned and traumatized casulties. Long after the bombing, illness and affliction continued to emerge. Some of the people living in proximity to the nuclear detonation experienced radiation effects years to decades later, including leukemia and cancer of the breast, lung, and thyroid.

With the passage of years, the bomb appeared less threatening. After all, both Hiroshima and Nagasaki continued as vibrant cities, Within hours after the bombing, aid arrived from other parts of Japan. Many of the victims were evacuated to adjacent communities with largely intact medical facilities. Both cities have been rapidly rebuilt. The aftermath of the bombing is now only to be recognized in museums, in commemorative monuments, and in surviving victims. In effect, the consequences of nuclear bombs, contrary to numerous prophesies of doom, could be overcome. But there are a number of new realities that need examination.

NUCLEAR OVERKILL

The United States and the Union of Soviet Socialist Republics, the two superpowers, now possess more than 40,000 nuclear weapons for a total of about 15,000 megatons. Even a single megaton carriers unimaginable destructive power, more than 70 times that which destroyed Hiroshima. A megaton is equivalent to 1 million tons of TNT, and were this to be transported by rail, the train would stretch more than 640 km. If one were to add the weapons in the arsenals of the other nuclear powers, the 20,000-megaton total, now in world stockpiles, provides 5 tons of explosive power for every man, woman, and child on this earth.

The Hiroshima and Nagasaki experiences, horrendous as they were, have but limited validity in extrapolating the consequences of nuclear war with present-day arsenals. Kiloton-sized weapons have been multiplied a thousandfold; instead of individual cities, there are now multiple-city targets. No help could be forthcoming from adjoining or distant communities, which likewise would be victims of blast, firestorm, and radiation. In one likely and specific scenario, during an all-out nuclear war in mid-1980 more than 200 million men, women, and children would be killed outright. More than 60 million would be seriously injured; among these, half would experience radiation sickness. The remainder would be afflicted with various combinations of trauma, burns, and irradiation. Crushing injuries, fractures, perforated viscera, contusions of internal organs, charred extremities, and uncertain radiation exposures, as well as psychiatric derangements, would be commonplace. Such injuries would tax the best of health care systems during peacetime conditions. Even a 1-megaton explosion above a city of 1 million would produce at least ten times more severely burned patients than could be accommodated by all burn treatment facilities in the United States. Given disruption of the health system, its lack of transport, communication facilities, electric power, hospital beds, x-ray and other diagnostic equipment, blood, drugs, and essential instruments, surviving health workers could provide only verbal comforting to those in pain and dying. As Khrushchev direly propheisied, "The living will envy the dead."

Yet, even these extrapolations do not encompass many potential longer-range effects. They exclude possible natural consequences such as degradation of stratospheric ozone layer, long-term climatic changes, radioisotope contamination of the food chain, crop failures resulting from destruction and insect ecology, and yet other unpredictable adverse consequences.

THE INCREASING LIKELIHOOD OF NUCLEAR WAR

A superficial analysis would suggest that society and the nuclear bomb have reached a tolerable symbiosis. The fact that these weapons have been around for 35 years and have not been used by the superpowers against one another promotes wide public belief of the permanence of such stability. In short, we have learned to live with the bomb. This is a dangerous illusion. In the first place, there is the escalating nuclear arms race. The destructive power stored in world arsenals now exceeds by a factor of more than a million the bomb that destroyed Hiroshima. The multiplication of nuclear weapons is intended to promote a nation's security, but the cost is that of increasing world insecurity. History provides scant comfort for the view that peace is promoted by the preparation for war. The arms race cannot be a process without end; its terminus is inevitable nuclear confrontation.

More worrisome than the growth in sheer numbers of weapons or their proliferation is the qualitative transformation in the dynamics of the atomic arms race itself. Until recently, an uneasy peace has prevailed, assured by the doctrine of deterrence or the certainty of incalculable damage to one's adversary. Each side has acknowledged that protection of its own citizenry was based on threat of annihilation of the opposing side. In a sense, nearly 500 million people have been held hostage by the two superpowers. This policy of mutual assured destruction, the acronym for which is MAD, now is undergoing alteration. Changes in strategic doctrine are largely propelled by technological innovation. Development of great precision in so-called terminal guidance systems has increased accuracy of targeting. This makes missiles, in their hardened silos, vulnerable. These weapons then lose value in retaliation. A symmetrical instability ensures wherein the temptation for an enemy to attack is at the same time inducement for one's own preemption. These developments in turn create great uncertainty and international instability.

The instability is enhanced by the fact that in a period of crisis, little time is available for making an awesome decision. Only 30 minutes would elapse between launch and impact of nuclear weapons between the USA and the USSR. This imposes dependence on complex technologies to monitor, detect, and analyze signals of attack. The increased accuracy of guidance systems invites contemplation of preemptive strikes, promotes "hair-trigger" readiness, and increasingly compels reliance on computers to sort out the real from spurious warnings of a potential attack. Physicians in their daily work know the malfunctioning of technological hardware, but while the failure of a pacemaker, a defibrillator, or an oxygenator might jeopardize a single life, the malfunctioning of military technology threatens a way of life. We have set in motion forces over which we shall increasingly have less control. Ultimately, the bomb may take command.

THE COST ON THE WAY TO ARMAGEDDON

Moreover, the arms race is imposing enormous economic, psychological, and moral costs. In the 1970s, world military expenditures exceeded $4 trillion, which is greater than the total goods and services created by mankind in one year. Forty percent of research budgets are devoted to the military. Last year, more than $500 billion was spent by the world's military establishment. This

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

is equivalent to $1.4 billion per day, or $1 million per minute. This massive diversion of scarce resources diminishes development of knowledge, technology, and manpower that could address global ecological and overpopulation problems. A small fraction of these expenditures for the military could provide the world with adequate food and sanitary water supply, housing, education, and modern health care. Physicians can cite numerous illustrations of the power of modest investments in health. For example, slightly more than a decade ago, smallpox was endemic in 33 countries with a total population of 1.2 billion, with 10 to 15 million cases and loss of 2 million lives annually. The World Health Organization campaign for smallpox eradication was successfully completed in a decade. The last case of naturally occurring smallpox was diagnosed in Somalia in 1977. This signal achievement required an investment of $300 million, or approximately five hours of the cost of military budgets. With a diversion of funds consumed by three weeks of the arms race, the world could obtain a sanitary water supply for all of its inhabitants. The lack of clean water now accounts for 80 percent of all the world's illness and imposes untold misery and degradation on half the world's population.

In addition to economic costs, the nuclear arms race has incurred psychological costs as well. Living with the possibility of imminent annihilation has created a new reality for humanity with profound and widespread psychological effects. Not only does each person have to deal with the possibility of one's own agony or sudden death, but also with the dissolution of the total surroundings. Membership in a family, community, society, and nation provides the psychological means for coming to terms with individual death. Something of the "I" survives in the social germ plasm, providing a symbolic continuity or immortality. But suppose nothing survives! How does one come to terms with nothing? And what are the psychological injuries in confronting a world where extinction can be so absolute?

Little is said of the moral degradation deriving from the preparation for nuclear war. Bertrand Russell called attention to this aspect some 30 years ago: "Our world has sprouted a weird conception of security and a warped sense of morality—weapons are sheltered like treasures, while children are exposed to incineration."

THE ROLE OF PHYSICIANS

Physicists who let the atomic genie out of the bottle did not succeed in either stemming the nuclear arms race or persuading mankind of the ominous peril to their lives. We physicians must join our scientific colleagues who have insistently, with an increasing sense of despair and urgency, attempted to alert humanity. Only an aroused world public opinion can compel political leaders to stop the spiraling nuclear arms race.

Physicians, as few other groups in society, are committed to maintaining health and promoting survival. We have a world constituency of 4 million members who have taken a sacred and ancient oath to assuage human misery and preserve life. In the face of the nuclear threat, this commitment imposes social and moral obligations for us to band together, to make our collective voices heard and hopefully heeded. If we are to succeed, we must realize our own limitations. We can have credibility and be effective only as long as we scrupulously adhere to the province of our expertise as scientists and as healers. We must not become bogged down in debating the political differences that have fueled the cold war and have hindered détente. We are not politicians. Nor are we arms control experts; we cannot discourse or debate over weapons systems, deterrence, retaliation, or overkill. We can speak on the threat of nuclear weapons, on the consequences of nuclear war, on the diversion of scarce resources from human needs, on the psychological, moral, and biologic implications of the arms race. We must recognize the one fundamental reality of this nuclear age, that the future, the very fate of US, European, and USSR societies are indissolubly linked. We shall either live together or die together.

A HIGHER DUTY

We are but transient passengers on this planet Earth. It does not belong to us. We are not free to doom generations yet unborn. We are not at liberty to erase humanity's past or dim its future. Social systems do not endure for an eternity. Only life can lay claim to uninterrupted continuity. This continuity is sacred. We physicians, who shepherd human life from birth to death, are aware of the resiliency, courage, and creativeness that human beings possess. We have an abiding faith in the concept that humanity can control what humanity creates. This perception provides optimistic purpose in reversing the direction of humankind's potential tragic destiny.●

PROPOSED CHANGES BY THE DEPOSITORY INSTITUTIONS DEREGULATION COMMITTEE

HON. DON BAILEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. BAILEY of Pennsylvania. Mr. Speaker, the continuing decline of our economy is imposing increasing hardship on every segment of society. The disastrous effects of Reaganomics are being felt particularly by small savers who must look on helplessly watching their savings eaten up by inflation while, at the same time, being forced to pay higher and higher interest rates for home mortgages, automobile loans, home improvement loans, loans to farmers and to small business men and women.

The Depository Institutions Deregulation Committee (DIDC), an agency created by Congress, will meet on December 16 to discuss the plight of small savers and the banks and savings and loan institutions which serve them. I have been informed that the DIDC will recommend the creation of new deposit accounts. While I favor higher interest rates for the small saver, I do not want to see a condition created in which billions of dollars are added to the cost burdens of depository institutions. These costs would be passed on to consumers, thus negating any gain realized as the result of higher passbook interest rates. Robbing Peter to pay Paul is not the answer. We must encourage general economic recovery without any inflationary backlash and without depleting the net worth of our traditional depository institutions—especially the savings and loan associations and commercial banks in the smaller cities and towns of this Nation.

I urge the DIDC to carefully examine every aspect of its proposed recommendations and the results that will surely affect us all. I intend to communicate this message to the DIDC, and I call upon all of my colleagues who are concerned for the state of this Nation's economy to do likewise.●

TRIBUTE TO MR. BRUCE A. NEWHALL

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. MINETA. Mr. Speaker, it gives me great pleasure to rise today to honor Mr. Bruce A. Newhall of Los Gatos, Calif. Mr. Newhall has been named to receive the Red Cross Certificate of Merit and accompanying pin. This award is the highest given by the American Red Cross to a person who saves or sustains a life by using skills and knowledge learned in a volunteer training program offered by the Red Cross.

On July 19, 1980, Mr. Newhall, trained in Red Cross first aid, observed a motor vehicle accident where a moped rider suffered a severed leg. Stopping at the scene, Mr. Newhall determined that the victim was in danger of bleeding to death and began first aid procedures to stop the bleeding. He continued his efforts until an ambulance arrived. Without doubt, the use of first aid by Mr. Newhall saved the victim's life.

Mr. Speaker, I ask you and all our colleagues in the House of Representatives to join me in commending Mr. Newhall for his outstanding achievement and to congratulate him on being a recipient of the Red Cross Certificate of Merit.●

STRIKING POLISH WORKERS THREATENED WITH EXECUTION

HON. JOSEPH F. SMITH

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. SMITH of Pennsylvania. Mr. Speaker, I rise today to address a particularly disturbing situation that has developed in Poland. The growing tensions between the government and the Solidarity Union has recently culminated in the arrest of innocent people, and the trampling of human dignity. The government has not only banned the Solidarity Union, but it has also

threatened to execute the workers striking in industries. This action, obviously backed by the Soviet Government, is denying Polish citizens the basic rights of free expression, which we find to be a fundamental right of every individual.

The concerns which have been voiced by Polish Americans over the plight of their friends and relatives is well founded. There is not an easy solution to the internal conflicts of Poland, but I believe that we must unite with our Polish American friends and urge the opposing forces to bring their groups back into working contact in order to construct a stable government.

I firmly believe that our handling of the crisis in Poland should be the same with any country that arbitrarily arrests, persecutes, and harasses any of its citizenry, because, we, as leaders of the free world, must go on record in opposition of their actions, and to take steps, both singularly and in concert with our allies, to provide for redress of this injustice. This is not to imply that the United States or any other free nation should pursue the dictatorial policies of the Soviets which have imposed this situation on the people of Poland. We must, however, pursue through the appropriate diplomatic channels viable policies through which our Government can play an instrumental part to relieve this oppression.●

TRAUMA SOCIETY SUPPORTS LEGISLATION AND COMMISSION COMBATING DRUNK DRIVING

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. BARNES. Mr. Speaker, the issue of drunk driving has begun to receive increasing attention over the past year from the Nation's news media, the Congress, and the American public generally.

Perhaps America's greatest tragedy, drunk driving is responsible for the most common occurring form of violent crime in the United States and more than half of the deaths on our highways, killing 70 people and maiming thousands of others each day, and creating economic costs surpassing $5 billion yearly. Yet, only one of every 2,000 drinking drivers on an average day is caught, and the chance of conviction is slim.

Early this year, Senator CLAIBORNE PELL and I introduced identical legislation (S. 671 and H.R. 2488) aimed at discouraging drunk driving nationwide. To date, our legislation has received strong bipartisan support from over 80 Members of Congress.

More recently, I was joined by our colleagues GLENN ANDERSON and JIM HANSEN, asking Members of the Senate and House to co-sign a letter to President Reagan urging the formation of a national commission to finally map out a coordinated master plan combating drunk driving among the Federal, State and local levels. I am most gratified that over 340 Republicans and Democrats, comprising a majority of the Senate and House, joined us to let the President know that drunk driving can no longer be tolerated by a sane society and to ask for the President to help resolve this vitally important issue nationally.

These efforts have received widespread support across the Nation from private organizations and concerned citizens. Just this past Friday, the American Trauma Society's Board of Directors voted unanimously to endorse both our national legislation and the call for the Presidential Commission on Drunk Driving. The American Trauma Society has hundreds of active members nationwide who devote their work to treating and helping prevent trauma—the No. 1 killer of Americans under the age of 35.

I submit for the record copies of the ATS's resolutions supporting our two efforts to combat the Nation's drunk driving epidemic:

DRAFT RESOLUTION NO. 1—LEGISLATION

Whereas, motor vehicle crashes are the principal cause of trauma in the United States; and

Whereas, more than one half of the fatal motor vehicle crashes in the United States each year are caused by drunk drivers; and

Whereas, over 750,000 Americans suffer crippling and other serious injuries each year in drunk driving incidents; and

Whereas, pending legislation in the 97th Congress of the United States in the form of H.R. 2488 and S. 671 addresses the need for coordinated, comprehensive state and local alcohol traffic safety and enforcement programs; be it hereby

Resolved, That The American Trauma Society endorses the goals and programs embodied in H.R. 2488 and S. 671, and urges the expeditious enactment of this legislation.

DRAFT RESOLUTION NO. 2—PRESIDENTIAL COMMISSION

Whereas, drunk driving is the nation's principal highway safety problem; and

Whereas, drunk driving is a national epidemic which knows no jurisdictional boundaries; and

Whereas, effective control of drunk driving can only be accomplished through the coordinated efforts of the Federal government and the States; and

Whereas, the Federal government can play a critical role in providing the necessary national coordination in the deterrence of drunk driving; be it hereby *Resolved*, that the American Trauma Society calls upon the President of The United States to create and appoint a Presidential Commission on The Drinking Driver, and that the Commission be charged with the goal of developing recommendations on ways in which the Federal government and the States can work together to reduce the annual toll of needless death and injury caused by alcohol-related motor vehicle incidents.●

A MOOD OF MEANNESS

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. STOKES. Mr. Speaker, I am delighted to call attention to a very timely article by my honorable colleague from the First Congressional District of Missouri, Congressman WILLIAM L. CLAY.

The article, "A Mood of Meanness" appeared in the St. Louis Post Dispatch on November 29, 1981. Mr. CLAY is deserving of commendation for his incisive review of a troubling national mood. There can be no denying that there is a mood of malevolence in this regard to the human and civil rights of blacks, Hispanics, and the poor of our Nation. He is certainly correct, I believe, that a number of legislative proposals before this body would indeed circumscribe and limit the freedom of certain groups in our society; and in a larger sense, encumber the liberties of all of us.

It is wrong that in a great nation such as ours, unemployment among black youths surpassed that of the great depression; it is wrong in our Nation that members of the Ku Klux Klan and neo-Nazis should openly attack blacks, Jews, and others whom they dislike; it is wrong that over 25 million of our fellow citizens should live in poverty; it is wrong, in the name of Reaganomics, that the hopeless feel more hopeless and the dispossessed feel more threatened and the powerless feel more powerless.

Mr. CLAY suggests strongly in his article, invoking the name of a grand exemplar, Frederick Douglass, that the struggle must go forward. I congratulate the Congressman and believe as he does that the struggle continues. The article in its complete form is presented for your benefit.

[St. Louis Post Dispatch, Nov. 29, 1981]

A MOOD OF MEANNESS—INDIVIDUAL RIGHTS, MINORITY GAINS UNDER ASSAULT

(By Rep. WILLIAM L. CLAY)

Proposals pending before this Congress read like a blueprint for the nullification of the Bill of Rights and a master plan for the creation of a totalitarian, fascist government. If the language is not the same, certainly the intent is.

Legislation pending would give the attorney general the right to deny or revoke passports of those who disagree with the foreign policy of an administration and would make it a crime for individuals, including members of the press, to publish names of American foreign intelligence agents if there is mere reason to believe that publication would impair our foreign intelligence activities.

One regulation now being proposed by the administration would give the CIA authority to conduct covert operations in this country and would allow it to infiltrate domestic groups such as the Black Panthers, the Weatherman, the Ku Klux Klan, and the Communist Party.

But it woud not prohibit it from infiltrating the American Legion, the Elks, the NAACP, the ACLU, the Democratic National Committee, the Girl Scouts, and the PTA. What will happen to the rights of personal privacy and equal protection of the law with warrantless CIA agents reading your mail and tapping your telephones, breaking into your homes and offices and stealing your files? What happens to those guarantees protected under the Fourth Amendment?

Don't think it can't happen because it did under the Nixon administration. During the Kennedy administration the CIA enlisted the aid of organized crime figures to assassinate Fidel Castro. Some of us may not like Fidel Castro, but what would prevent a president or director of the CIA who did not like a Menachim Begin or Margaret Thatcher from assassinating them?

Yes, the mood in this country is one of meanness and it's getting worse. Take a look at the legislation now being considered in Congress to eliminate equal opportunities for women and minorities; the drive to kill all affirmative action programs; and the attempt to establish a sub-minimum wage for youth. In effect, what is being said is that the extension of the rights of youth and minorities somehow infringes on the rights of white male adults.

And perhaps the meanest streak of elected leadership is being displayed in the reckless, irresponsible, insensitive way in which it's dealing with the basic right of life, liberty, and the pursuit of happiness. What this president and this Congress have done to the poor is an indictment of us as a part of the civilized world. This administration and this Congress expect our senior citizens to live in tennis shoes, not houses; our youth to work for less than a living wage; our unemployed to find jobs in a jobless economy; our sick to endure suffering in the name of fiscal restraint; our hungry to eat jelly beans.

The litany of cases documenting the depth and extent of deprivation in this country is shocking. Who would imagine that in the richest country ever to exist 22 million would resort to food stamps, 10 million would fill the rolls of unemployment, 12 million would turn to alcohol and narcotics to escape? Who would have imagined that a nation richer than Egypt under Ramses, Rome under Caesar, and Spain under Isabella would not be able to feed its hungry, clothe its naked, and house its homeless?

In my opinion we must heed the admonition of the great Frederick Douglass. Douglass, a former slave, gave us some excellent advice when he said over 121 years ago:

"The whole history of the progress of human liberty shows that all concessions yet made to her august claims have been borne of earnest struggle. The conflict has been exciting, agitating, all absorbing, and for the time being, putting all other tumults to silence. It must do this or it does nothing.

"If there is no struggle, there is no progress. Those who profess to favor freedom and yet deprecate agitation are men who want crops without plowing up the ground, they want rain without thunder and lightning. They want the ocean without the awful roar of its many waters. This struggle may be a moral one, or it may be a physical one, and it may be both moral and physical. But it must be a struggle.

"Power concedes nothing without a demand. It never did and it never will. Find out just what any people will quietly submit to and you have found out the exact measure of injustices and wrong which will be imposed upon them, and these will continue till they are resisted with either words or blows, or with both. The limits of tyrants are prescribed by the endurances of those whom they oppress."

(The preceding is condensed from an address to the congressional legislative conference of the American Civil Liberties Union of Eastern Missouri. The conference was at Washington University.)

A SPECIAL REMEMBRANCE

HON. ROBERT A. YOUNG

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. YOUNG of Missouri. Mr. Speaker, I come before the House today to recognize the civic and personal contributions of a man I knew as both a dedicated public servant and as a friend. I am speaking of Joseph M. (Bud) Weil, who served the city of Fenton, Mo., in St. Louis County as police chief, fire chief, and goodwill ambassador.

To almost everyone, he was simply known as "Bud" Weil. "Bud" was a native to the predominantly rural area of Fenton and grew up there long before the spread of urban life caught up with the small town in the form of an interstate highway, an automobile plant, and transplanted residents from the city of St. Louis.

"Bud" Weil was not content to just live in Fenton. He wanted to help make Fenton a safe and secure home for everyone who lived there or just happened to pass through its borders. His concern for the welfare of others led him to take the job as the city's first police chief from 1959 to 1966. He then changed hats from police-blue to fireman-red becoming the chief of the Fenton fire protection district in 1966. He served in that post for 10 distinguished years until suffering disabling injuries in a furniture store fire in a neighboring city forced his retirement for medical reasons in 1976.

Yet "Bud's" compassion and concern for others went beyond his job. During the 1960's some people from out-of-town were stranded in the area without money or shelter until "Bud" went to their aid with money and a place to stay. Because of "Bud's" generosity, those people labeled Fenton as the "city with a heart."

"Bud's" concern for the safety of others in the Fenton community continued into his retirement. He recently kept an eye on a suspicious individual he spotted until Missouri Highway Patrol officers arrived to apprehend the man who turned out to be wanted by authorities in Pennsylvania. For his effort, "Bud" was appointed an honorary Missouri State Highway Patrol trooper last April.

I regret to say that "Bud" Weil died Tuesday, September 29, leaving behind his wife, Mary, and three sons, all of whom have carried on their father's tradition as firefighters including a son, Dennis, who took over as Fenton fire chief when his dad retired.

I am proud to have known "Bud" and equally proud to be able to introduce him to my fellow Members of Congress. His life definitely was a model for all of us.●

RESOLVING THE CRISIS AT FAA

HON. STAN LUNDINE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. LUNDINE. Mr. Speaker, since the decertification of PATCO, the crisis at the Federal Aviation Administration (FAA) seems to have dropped from view, at least in the major media. And yet, more than 10,000 controllers are still out of work, questions persist about flight safety, and the Nation's airlines and their employees continue to confront economic hardship.

Recently, the President announced that the dismissed air traffic controllers would be eligible for Federal employment outside the FAA. But, such magnanimity has a hollow ring when one considers that Federal jobs are being reduced by the thousands under the President's own budget. Moreover, such an offer does nothing to address the fundamental concerns about air safety.

Clearly, the point has been made by now that strikes in the Federal Government will not be tolerated. It is time to consider the Nation's best interest. Those interests were cogently assessed in a recent editorial in the Elmira Star-Gazette, a leading newspaper in my district. I think my colleagues will find the Star-Gazette's analysis compelling, and I commend it to their attention.

[From the Elmira Star-Gazette, Nov. 26, 1981]

THE POINT HAS BEEN MADE

How long must a point be hammered in until it is proven? President Reagan would be wise to consider that question in regard to ending his continuing hard-line stand against air traffic controllers who were fired after engaging in an illegal strike.

The 11,500 strikers have been out of those jobs since they went on strike Aug. 3. Their union, the Professional Air Traffic Controllers Organization, has been de-certified. Reagan certainly has made it clear that illegal actions by government workers will be treated harshly.

So whose purposes would it serve to keep refusing to allow the return of those fired controllers who may want to?

Certainly not the nation's, even though the industry has shown that the controllers greatly overestimated their importance to the system. The system is operating and there have been no disasters.

But is it not in the nation's best interest for the system to be operating at full capacity once again. It still will take years for the government to replace the fired controllers. Yet airline service is down 20%. Schedules have been reduced, workers laid off and the economic losses to the airline industry and related business are mounting.

Those economic losses will only get worse as time goes on, particularly now that the holiday season and bad weather is approaching. Winter weather also raises additional questions about safety.

Will it serve Reagan's political purposes to continue the hard line, which received great public support? He was without question correct in taking the position he did at the time of the strike. The controllers clearly broke the law and were well aware of the consequences of their actions.

But would it be a sign of weakness for Reagan to ease off on his position now? Hardly. While some may see it as such, it wouldn't be a retreat, just a smart move.

If the controllers are allowed to return, it would be under the government's terms, not their own. The government obviously could not be seen as caving in to the controllers' original, exhorbitant demands.

So why continue to ignore trained workers? Continued punishment serves no purpose. The price has been high enough.

Reagan surely has made his point. And now would be a good time for him to exercise some wise compassion and pragmatism and consider ways to allow the return of those fired controllers who wish to.●

POLAND WILL BE FREE

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. SMITH of New Jersey. Mr. Speaker, the people of our Nation and of the entire world have watched with great concern the actions of the military council now ruling in Poland. I believe that first and foremost, this Government should appeal to the people of Poland for a peaceful solution to this crisis from within. President Reagan has made it clear "how seriously we would view any interference in Poland," and I believe that my colleagues in the House reflect this serious concern that we have for the Polish people at this time.

Mr. Speaker, no other organization in America has done more to promote freedom for the people of Poland these last few months than the College Republican National Committee. With over 100,000 members on 1,000 campuses across the Nation, they have put the full force of their organization behind the Solidarity Union and what it represents: The de facto rejection of Communist repression.

The College Republican National Committee has recently embarked on the "Poland will be free" campaign to alert the American people of the threat to inalienable rights and send a powerful message of support to the Polish people in their struggle. This campaign involved the circulation of a petition declaring our complete support for the people of Poland. Over 200,000 people have signed this petition in the last 3 months. The goal is to collect 1 million signatures.

Mr. Speaker, I commend the College Republicans for this bold and valiant campaign of support and I enthusiastically join them in sending an important message to the world community. I would like to submit for the RECORD the text of the "Poland will be free" petition, which over 200,000 Americans have signed.

POLAND WILL BE FREE

Whereas, the men and women of Poland share the rights of all people to freedom of religion, freedom of emigration and freedom to organize in voluntary associations such as unions, student groups and churches,

And whereas, these rights have been denied to the people of Poland since 1939, first by National Socialist Germany and now the Soviet Union,

And whereas, the people of Poland have made steady gains in establishing these rights since August, 1980,

And whereas, these newly won rights are jeopardized by a threatened invasion by the Soviet Union and its client states in Eastern Europe, therefore, be it

Resolved, that we the undersigned wish to state before the world community our complete support for the people of Poland in their struggle to retain their inalienable rights.●

TRIBUTE TO AVA PAULING

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. MINETA. Mr. Speaker, I would like to take this opportunity to inform the Congress of the death of Ava Helen Pauling, civil rights leader, peace activist, and conservationist. She died December 7, 1981, at the age of 77 in her Portola Valley, Calif., home.

Mrs. Pauling was three times national vice president of the Women's International League for Peace and Freedom. She was a board member of the American Civil Liberties Union and was a leader of the women-strike-for-peace movement.

In 1961, she helped her husband, Linus Carl Pauling, organize an international symposium on the prevention of the spread of nuclear weapons. The symposium held in Norway was attended by scientists from 15 countries, including the Soviet Union. Recommendations from the conference were used in forming U.S. policy on nuclear proliferation announced in 1962 by President John F. Kennedy.

Mrs. Pauling's support and research assistance led to her husband's award of two Nobel Prizes, for chemistry in 1954 and for peace in 1962.

Mrs. Pauling received numerous awards during her life, including the Janice Holland Award of the Pennsylvania Chapter of the Women's International League for Peace and Freedom, an honorary doctorate of world peace from San Gabriel College, and the Ralph Atkinson Award of the Monterey County Chapter of the American Civil Liberties Union.

The American Civil Liberties Union Award stated; "To Ava Helen Pauling—She spoke out against the internment of the Japanese Americans in 1942, challenged the inquisitorial committee of Congress—the McCarthy era witch hunts for Communists—in the fifties and sixties, and actively supported the ACLU and its programs for half a century."

Mrs. Pauling was also active in preserving coastal and wilderness areas of California. She was a leader in the Sempervirens Fund effort to protect the redwood and Douglas-fir trees, and was active with the Anza-Borrego Desert Protective Council.

Although those of us who knew and respected Mrs. Pauling mourn her loss, her many contributions to our society succeed her.●

THE DIDC SHOULD BE PUT ON HOLD

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. BONKER. Mr. Speaker, the members of the Washington State congressional delegation have formally asked Mr. Steven Skancke, executive secretary of the Depository Institutions Deregulation Committee (DIDC) to defer action on four proposals that could have a disastrous effect on our Nation's thrift institutions.

As I am sure my colleagues are aware, thrift institutions across the country have suffered unprecedented losses over the past year. High interest rates have combined with the institutional stresses of too rapid deregulation of some aspects of the industry with a negative impact on thrifts nationwide. As desirable as it is for consumers to receive a higher rate of interest on their deposits, it is also important that the thrift industry and the housing industry survive this period of adjustment.

It is my understanding that on December 16, the DIDC is scheduled to consider four proposals for new accounts. These would include:

First, establishing a $25,000 "wild card" account with 1-day notice of withdrawal;

Second, creating a $5,000 minimum ceiling-free transaction account;

Third, setting up a 91-day, $10,000 minimum Treasury bill discount rate tied to the 13-week Treasury bill rate; and

Fourth, establishing a new 3½-year "wild card" account.

Representatives of thrift institutions in our State and elsewhere feel strongly that more time is needed for the industry to further changes. The DIDC has an important job to do, but it must not rush ahead so rapidly that it destroys what it is trying to improve. For that reason, I have joined my colleagues from Washington State in urging deferral of any action in this regard.

In line with this request, I would like to commend my colleague, JERRY PATTERSON, for introducing H.R. 5135, of which I am a cosponsor. The bill calls for a 6-month moratorium on any action by the DIDC. This would provide the House Banking Committee adequate opportunity to conduct a full oversight review of DIDC actions to date.

The DIDC was established last year as part of the Depository Institutions Deregulation Act of 1980, Public Law 96-221. It was created by Congress to oversee the "Orderly phaseout and the ultimate elimination of the limitations on the maximum rates of interest and dividends which may be paid on deposits and accounts by depository institutions."

Recognizing that this would be a difficult task, the Congress specifically stated in the act that the DIDC "work toward providing all depositors with a market rate of return on their savings with due regard for the safety and soundness of depository institutions." It is clear that during this past year, the DIDC has ignored the intent and will of Congress.

At a time when a majority of our Nation's depository institutions are operating in the red, the DIDC has taken numerous actions which will significantly increase the cost of funds to all depository institutions. Such an increase in the cost of funds will ultimately be passed on to the consumer, making it all the more expensive to obtain loans. Additionally, the actions of the DIDC do not represent an orderly phaseout of regulations and do not show due regard for the viability of depository institutions.

I believe it is time for Congress to reassert its authority in this field, and insure that committee created by Congress follows the intent of Congress. I would urge my colleagues to support H.R. 5135.●

REMARKS OF KEN HOLUM—I

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. DASCHLE. Mr. Speaker, Mr. Kenneth Holum, general manager of Western Fuels Association and former Secretary of Interior for Water and Power, is among the most distinguished natives of my State of South Dakota. His career as an advocate of rural electrification, resource development and family farming is admired widely in this town, in his home State and by all those who have fought and worked with him.

Ken Holum recently addressed the 24th annual meeting of the Mid-West Electric Consumers Association and Preference Customers Association in Denver. From his description of the trickle-down economics as a "feed the horses and the sparrows will eat" theory, to his perceptive discussion of the agenda he sees needed in the resources area. Ken's remarks will be of interest to the Members of this Congress.

I commend them to you and include them in the RECORD at this point:

REMARKS OF KEN HOLUM, GENERAL MANAGER, WESTERN FUELS ASSOCIATION, INC.

During 1980, after being invited to share my views on issues of concern to a public gathering such as this, one of my friends took me aside and said. "Ken, you talk like you don't think anything good has happened since the end of the Johnson Administration."

My friend's remark made a considerable impression upon me. No one likes to be perceived as a perpetual complainer. Yet, I must admit right now that not much has happened since last year's meeting of the Mid-West Electric Consumers Association to cause me to come here today to lead a "cheering session" for our present leadership in either branch of our national government.

My friend's comment makes me uncomfortable, but I am more discomfitted by not being able to identify examples of significant public interest progress in natural resources development during the administrations of Presidents Nixon, Ford and Carter. I begin to despair for the Reagan administration as well—but more about that later.

My good friends know I never hesitate to give credit where credit is due. For example, I have been consistent in my commendation of Dave Hamil and Bob Feragen for maintaining and capably administering one of the finest public interest programs in the nation—The Rural Electrification Administration. They both deserve our cheers and our gratitude. Rural America is a better place to live because of the fine work of both these gentlemen. I suspect that both had to be vigorous, vigilant and competent champions of the program, within their respective administrations, to achieve the successes they did achieve.

As Western Fuels Association, through its wholly owned subsidiary, Western Fuels-Utah, has begun work on the Deserado Mine in northwestern Colorado, I have had the opportunity to get to know Harold Hunter reasonably well. I like and respect him as an individual. I appreciate his candor in telling us that the REA program will be changed under this Administration.

It is imperative for him as REA's new Administrator to exercise sufficient strength within the Reagan Administration to make certain that these changes, if and as they occur, do not damage this essential program. In this respect I expect his job to be at least as difficult as that of his two predecessors. It is equally as important, if and when changes occur, that he convinced his professional staff at REA that one cannot administer a modified, new or altered program in the same old way. On this score, we are waiting and concerned.

Now that I have mentioned Western Fuels, I would like to give you a brief report on our activities. I always consider doing so appropriate when I attend a Mid-West Electric annual meeting because it was this Association's members that first identified the need for a fuel supply cooperative and provided the essential leadership and support to make Western Fuels a reality. As a practical matter, I consider all Mid-West members an integral part of the Western Fuels' family.

Except for the fact that we share the problems that bedevil electric utility management—I feel comfortable in telling you that things are going well at Western Fuels.

We are well acquainted with and share the headaches of utility managers and policy makers. Two of our members are experiencing start-up problems of unique severity as they struggle to bring new coal-fired electric generating stations to dependable operation. All of our members contend with the problems associated with less than anticipated consumer demand for electric power—a result I believe of a weak economy, unusual weather conditions and national leadership that has failed to recognize the importance of coal-fired electric power generation as a replacement for imported oil.

As a direct result of these problems Western Fuels must contend with coal commitments that exceed our member's requirements. Dealing with this problem is not easy—but I like it better than not being able to supply our members' needs. We can meet their requirements and we are doing so.

Although we continue to secure most of our coal from energy companies, we have financed and supervised the construction of one mine—in southern Illinois—and we have started construction of another mine in northwest Colorado—near Rangely. In both instances the total output is committed to Western Fuels' members. The Brushy Creek Mine supplies coal to Sikeston, Missouri and Kansas City, Kansas—the Deserado Mine will fuel a generating station being built by Deseret G&T in Utah.

The balance of my remarks will deal with problems of a more general nature but, nonetheless, related to the responsibilities and challenges confronting Western Fuels. A few minutes ago I used the phrase "watching and waiting." In a real sense these words will be the theme of these comments as I address myself to areas of concern where we watch and wait and work with Mid-West, APPA and NRECA to achieve public interest results.

Henry Kaufman of Salomon Brothers, New York, who is one of this country's preeminent and most quoted economists, addressed the Western Fuels Association annual meeting last July. He warned that the economic policies undertaken by the

Reagan Administration would continue to produce high interest rates and that they would lead to severe economic problems. We now see plenty of evidence that his forecast was "on target."

I am deeply troubled by the economic policies of the Reagan Administration. The recently disclosed doubts of the President's Director of the Office of Management and Budget—David Stockman—have not eased my concerns. If anything, I am more troubled to learn of his doubts and skepticism about the merits of "supply-side" economics as but the rhetorical guise of that old chestnut, the "trickle-down" theory of economics. We used to call it "feed the horses and the sparrows will eat."

As an admittedly populist New Dealer from a farm in South Dakota, I am even more troubled by the Administration's attitude toward social programs. While I am in no position to prove that civil unrest in the cities and the rising rates of violent crime and crimes against property are a direct result of unemployment and economic despair, I am deeply convinced there is a relationship—one which will become increasingly evident in the months to come.

I expect the ruthless dismantling of social programs to cost this Nation dearly as hungry, homeless, unemployed people become increasingly desperate. I wish our political leaders on Capitol Hill had looked Mr. Stockman's Trojan gift horse in the mouth and calculated the damage that could come from the program.

While I don't expect everyone to adopt my pessimistic view, it is apparently shared by J. Richard Monroe, President of Time, Incorporated. Speaking in mid-November to the Union League Club of New York, an organizaton not known for its progressive leadership, he said of the Reagan economic program:

"In the rush to fight inflation and stimulate investment, I fear that we have cut too deeply, that we have put too high a burden on the poor and elderly, and that we are jeopardizing the long-term goals of this program and the interests of business. I am especially concerned about the cuts in social spending. They have gone too far, too fast. And too few of us understand their impact."

I agree—and now they demand more cuts.●

WE MUST RENEW OUR NATIONAL COMMITMENT TO UNIVERSAL HUMAN RIGHTS

HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 10, 1981

● Mr. SEIBERLING. Mr. Speaker, today is International Human Rights Day—the 34th anniversary of the adoption of the Universal Declaration of Human Rights by the United Nations. The United States has been at the forefront of the struggle for human rights for many years, and Congress has in many ways been responsible for the enactment of human rights restrictions dealing with foreign aid, particularly foreign military sales.

Yet today, we are seeing the progress of the past few years slowed and, in some instances, reversed. The current administration indicates that it prefers to use "quiet diplomacy" in its pursuit of human rights. For the families of the thousands of Argentinians who have disappeared, for the tens of thousands in El Salvador and Guatemala who have been murdered by paramilitary death squads, for political prisoners in Chile and the Philippines, for those imprisoned and executed by revolutionary zealots in Iran, for those imprisoned and harassed for dissidence in the Soviet Union, there is little comfort in quiet diplomacy.

The muting of our National Government's strong support for human rights cannot help but to embolden those who seek to repress and stamp out political opposition in their own countries. One of the greatest strengths of the United States is that we have from the very start stood for humanity. We diminish ourselves in the councils of the world and in the eyes of mankind if we choose to abandon the forceful pursuit of human rights in our dealings with other countries. I hope that we will reflect on the importance of human rights today, and renew our commitment to its pursuit in the fora of international relations. A statement by the Helsinki Watch Group follows my remarks.

STATEMENT OF THE HELSINKI WATCH COMMITTEE AND AMERICAS WATCH COMMITTEE ON HUMAN RIGHTS DAY

This is an unhappy Human Rights Day for many persons: For Andre Sakharov, and his wife Elena Bonner, on a hunger strike in Gorky—or perhaps being force-fed—protesting Soviet refusal to abide by international agreements dealing with the rights to travel and the reunification of families; for Yuri Orlov, founder of the Moscow Helsinki Watch Group, serving a 7 year sentence in a strict-regime labor camp; for Vaclav Havel, playwright and signer of Charter 77, serving a 4 year prison sentence in Czechoslovakia; for Marko Vesvlica, economist recently sentenced to 11 years in prison for discussing "economic mismanagement" in Yugoslavia with a foreign journalist; for Hebe de Bonafini and Maria de Antokoletz in Argentina, still denied word on the fate of their "disappeared" children; for Jaime Castillo, former Minister of Justice of Chile, exiled for his work in the Chilean Human Rights Commission; for the Haitian refugees, imprisoned in barbarous conditions to deter other Haitians following them to the U.S.; and for countless others victimized by governments that disregard the rights they have pledged to honor.

We do not celebrate Human Rights Day. Rather, we note it and pledge to try to do better what we believe best serves the cause of human rights: to speak out loudly, clearly, and consistently in defense of human rights everywhere.●

PUBLIC SERVICES AND THE BUDGET

HON. STAN LUNDINE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. LUNDINE. Mr. Speaker, a great deal has been said about the effects of the Reagan budget on individuals throughout this country. Fewer student grants and loans mean fewer young people can go to college. Diminished coverage under unemployment insurance means greater hardship for increasing numbers of jobless Americans. An emasculated economic development administration portends less economic opportunity for those who live in America's declining cities and regions.

But while many have noted these specific consequences, few have evaluated the cumulative social impact. Recently, the distinguished MIT economist, Lester Thurow, furnished just such an overview. In an "Op-Ed" article for the New York Times, Mr. Thurow observed that retrenchment in the public sector, far from encouraging a revived private sector to take on new responsibilities, may actually undermine the sense of civic pride and commitment. Thurow notes:

Municipal services—clean streets, an efficient transportation system, good schools effective police and fire protection * * * [play an] important role in binding us together and reminding us that we depend upon each other for survival. * * * As municipal services decline in quality, citizens feel they have no stake in society.

These remarks carry special significance, given the increasing burdens on local governments. Thus far, the new federalism promoted by the President appears to mean only increased responsibilities, and decreased revenues with which to meet them. The seriousness of this problem has now been acknowledged by the chairman of the Senate Budget Committee. Despite his record as one of the staunchest supporters of the President's budget, Senator DOMENICI last week declared that the strain on municipal governments had reached the breaking point and that a 3-year moratorium should be placed on further cuts in discretionary funding affecting the local level.

We will discover whether the administration is heeding these cries of distress when the new budget is submitted in January. Meanwhile, as the numbers crunchers at the Office of Management and Budget contemplate new ways to plug the $150 billion hole in the 1983 deficit without curbing the enormous increases in defense expenditures, I hope they will take Mr. Thurow's sobering warning to heart. The article follows:

HOLES IN REAGANOMICS

(By Lester C. Thurow)

CAMBRIDGE, MASS.—Reaganomics is based upon the assumption that society is nothing but a statistical aggregation of private economic actors. From the Reagan perspective, whatever the level of government and whatever the program (with the exception of defense), the public sector should shrink. A completely private economy with minimal government would be a better society, from this point of view.

But societies do not work unless there is a feeling of mutual obligation and willingness to sacrifice for the common good. Sole reliance on self-interest works in some areas of human activity but not all. Regardless of how many weapons are purchased, national defense cannot be achieved unless people are willing to make sacrifices for the welfare of others. Regardless of how privately wealthy we are, a good life cannot be had in the midst of social disintegration.

What Reaganomics forgets is that government plays an important role in creating feelings of mutual obligation and respect. Those feelings don't just exist on their own. They have to be carefully cultivated. They can easily be exterminated by what seem to be relatively trivial problems.

Anyone coming back from Europe or Japan is struck by the filthiness of American cities. Public filthiness lowers our standard of living but, more importantly, it affronts our self-respect. Only vermin deliberately live in filth. Yet clean streets and parks depend upon a sequence of public and private interactions that gradually improve or deteriorate over a period of time.

If private citizens litter and vandalize with abandon, no amount of public street cleaning can succeed. The espirit de corps of sanitation workers plunges in the face of insurmountable filth, and the quality of the service declines. With poor public cleaning, private littering accelerates. Conversely, if public cleaning deteriorates, citizens feel that their individual self-restraint and cooperation does no good—the streets and parks are going to be dirty whatever they do. With less self-restraint and cooperation, littering grows. A vicious cycle begins with our cities getting dirtier and dirtier.

But if no one gives a damn about a clean environment, the feeling quickly grows and spreads to other more important areas of life. People start to be rude to each other when they meet face-to-face on the street. From there it is a simple step to even more hostile actions.

Municipal services—clean streets, an efficient transportation system, good schools, effective police and fire protection—are important in their own right: They make life easier to live. But they play an even more important role in binding us together and reminding us that we depend upon each other for survival. They are the means by which each of us learns that we belong to a society in which our actions and the actions of others are important.

As municipal services decline in quality, citizens feel that they have no stake in the society. The public services that directly affect one's life are not going to improve, so voting does not matter. With fewer people voting, government becomes less representative and fewer people feel that it is their government. The world comes to be seen not as a place where we work out our quarrels peacefully and with consideration for others in the democratic process but as a place where we solve our quarrels by clubbing each other and where the only difference between the rich and the poor is whether the clubbing is legal or illegal.

Government services can, and often should be, cut back selectively. But indiscriminate across-the-board cutbacks in local services, such as most municipal areas are now experiencing under Reagan budget cuts and a deteriorating economy, are a different matter. They result in a society where the public signals indicate that the individual belongs to a society in which everything is getting worse.

No one likes to be associated with institutions that are getting worse on every front. Who can take pride in New York or Boston if the city we see, the public sector, is falling apart? But if we do not feel attached to our cities, it is but a short jump to not feeling attached to our society.

Socially it is important that in some aspect our society is visibly seen to be getting better. Signs of social disintegration—sloppy workmanship, falling educational standards, anger, rudeness, crime—are all around us. We have only to look.

The cycle of increasingly hostile actions ending in crime and social disintegration has to be replaced with a positive cycle. Local public services aren't, in the end, a local problem. They are the place where a positive cycle can begin. The Reagan Administration has to provide some leadership when it comes to local services, or it won't have a national society to lead into battle.●

POLAND AND THE PRINCIPLES OF FREEDOM

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. GOODLING. Mr. Speaker, 41 years ago the free nations of the world went to war over the issue of Polish independence and freedom. After 5 long years of global carnage the war came to an end, its cause forgotten. It was not until a little over 1 year ago, in August 1980, that Poland began to obtain a measure of freedom. Now that too has been cut short and the Polish people are left to languish under severe conditions without a say in the running of their own lives.

The actions taken by the Polish "Government" on Saturday night against the leading members of the Solidarity Union prove beyond a doubt that the so-called government of Poland is nothing more than a puppet of the Kremlin. Although the Red Army has not, as of yet, violated the territorial borders of Poland, the Soviets have seen fit to intervene in the affairs of another country by sheer terror. I do not know for certain whether or not Premier Jaruzelski's actions on Saturday night were the result of a phone call from his "Camrades" across the border to the East, or perhaps a visit from the Soviet Ambassador; but, what is certain is that Jaruzelski's actions would never have been taken were it not for the claws of the bear that stands threateningly on Poland's eastern frontier. What we have seen in Poland is a first: Foreign intervention in a country by proxy, the proxy being that country's own government.

Poland's fate will be indicative of the fate of East-West relations, and, perhaps, the fate of the world. Solidarity is not yet dead: Walesa may be able to rescue the situation, but if Solidarity is crushed, and if the evolution of a democratic process in Poland is killed then we will know once and for all the negotiation is not possible with the Soviets for they will have been the murderers of Solidarity and the principles of freedom in Poland. If Brezhnev sincerely desires talks for the limitation and reduction of arms in Europe, if Brezhnev is truly the advocate of peace he claims to be, then let him put pressure on Jaruzelski to reverse his actions of Saturday night, to allow Solidarity to fulfill its functions as the union and representative of the working people of Poland.

In the meantime, it is of utmost importance that we in the West stand by the leaders of Solidarity, and let the Soviet Union know that the imprisonment of Lech Walesa, should that come about, the stifling of Solidarity, and any measure that threatens the evolution of freedom in Poland will not only be viewed with the greatest seriousness, but will also have the most negative repercussions on arms limitation and reduction talks, as well as economic and diplomatic relations. We cannot, we must not let the people of Poland down; for should we fail the people of Poland, we will have failed ourselves and the principles of freedom.●

ROLLCALL VOTES ON FRIDAY, DECEMBER 11, 1981

HON. WILLIAM E. DANNEMEYER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. DANNEMEYER. Mr. Speaker, unfortunately I was necessarily absent during most of the session of the House on Friday, December 11, 1981. Had I been present, I would have cast the following four votes:

Rollcall No. 353 (on resolving into Committee), Yea.

Rollcall No. 354 (Kemp amendment to the pending Edwards amendment), Nay.

Rollcall No. 355 (Edwards amendment, as amended), Yea.

Rollcall No. 356 (Final passage of H.R. 4559, foreign assistance appropriations), Nay.●

INTRODUCTION OF THE HELEN KELLER NATIONAL CENTER ACT

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. LEBOUTILLIER. Mr. Speaker, last Friday, December 11, I was pleased to have introduced the Helen Keller National Center Act. At first glance, this appears to be a specialized bill affecting just one isolated Federal facility. In fact, nothing could be further from the truth.

The Helen Keller National Center, located in Sands Point, N.Y., is a unique national treatment and rehabilitation center for the deaf, blind, and verbally impaired. This unique national facility helps clients from all over America, and prepares training materials for international use. The rehabilitation and training of America's deaf, blind, and verbally impaired youths and adults is a national effort.

The Center is recognized in section 313 of the Rehabilitation Act of 1973, as amended. Initiated in 1969 in cooperation with the U.S. Department of Health, Education, and Welfare and the Industrial Home for the Blind, the Center was federally constructed and supported. Approximately 87 percent of its income is derived from this source. The Center, directly and through its nine geographically dispersed service regions, has provided testing, rehabilitation and job training to hundreds of deaf, blind, and verbally impaired youths and adults. During 1980, 693 clients received services through the Center's network, and 130 were served at the primary facility at Sands Point, N.Y.

The Helen Keller National Center is a truly national institution. It performs unduplicated services for people with the most severe of disabilities—deaf and blind. My bill seeks to carve out a special niche for the Center in the realm of treatment centers for the handicapped.

Because of the severity of deafness and blindness, effective services must be individually tailored. The Center is able to deliver individualized, highly complex, and effective training services because of its unique design and its well-trained staff. The Center is able to successfully work with large numbers of deaf and blind persons. Without this Center, the training, program development, and rehabilitation provided by the States would be less effective, as well as more expensive.

While the Center presently performs highly qualified services, its future demands are slated to expand. During the mid-1960's, a nationwide rubella outbreak resulted in the birth of at least 6,000 deaf and blind children. This nationally dispersed population is reaching maturity and needs comprehensive training for employment and self-development. Without the existence of the Helen Keller National Center, these deaf and blind young adults would be relegated to warehouse-like institutions, and would be dependent upon public assistance for the remainder of their lives. The Center helps to train these people so that they are able to find employment and become productive members of society. While the "rubella bulge" babies need comprehensive training, others similarly afflicted but for different reasons also need help. These persons also benefit from the training offered at the Helen Keller Center.

There are no other existing specialized comprehensive places such as the Helen Keller Center that are exclusively equipped to deal with the range of training needs for the deaf and blind.

The object of my legislation is to firmly establish the Center, to strengthen it, and to guarantee its survival.

Because of its statutory placement in title III of the Rehabilitation Act, the Center has been lumped together with other rehabilitation projects in the budget and appropriations process. The Center's budget was slated to be heavily cut, and its existence further threatened by inclusion in a block grant. A number of my colleagues and I intervened with the White House and rectified the situation. The Center has since been budgeted at $3.5 million.

I believe that the Congress, in recognition of the uniqueness of the Helen Keller National Center and the seriously disabled population that it ably serves, should enact legislation which will effectively enable the Center to insure its further ability to deliver its vital services. I urge the adoption of this bill.●

PRAYERS AND SUPPORT FOR PEOPLE OF POLAND

HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. CARMAN. Mr. Speaker, today is a solemn day for the lovers of freedom. The puppet government of Poland has threatened to kill workers with essential jobs who do not show up. What other government has ever made such a threat?

What triggered this action? Solidarity had the audacity to suggest a democratic vote of confidence in the present regime. Would this puppet government of the Soviet Union rather slaughter its people than allow the will of the majority of Poles to be felt?

We must not forget that the Soviet Union would directly interfere in Poland in a second to prop up its puppet government if they felt they had the slightest excuse. This crackdown may be a way of seeking an excuse. But let no one be confused. The Poles are clearly united in their support of Solidarity.

I believe that all Americans today send their prayers and their support to the people of Poland.●

WHO SHOULD CHAIR THE EEOC?

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. GINGRICH. Mr. Speaker, controversy surrounds the nomination of William M. Bell to head the Equal Employment Opportunity Commission. Among the many of us who believe President Reagan should find a more qualified candidate as Chairman of the EEOC is our colleague, the Honorable TOM BLILEY of Virginia. A recent editorial in the Richmond Times-Dispatch discusses and endorses our colleague's views. I would like to insert it in the RECORD for the benefit of my colleagues.

The editorial follows:

LEWIS FOR THE EEOC

President Reagan has nominated William M. Bell of Detroit to become chairman of the Equal Employment Opportunity Commission. Mr. Bell appears to have few qualifications for the job.

Virginia's 3rd District Rep. Thomas J. Bliley Jr. declares that "the nomination of William Bell is perceived by some to be the height of insensitivity." It is insensitive to the wishes of minority groups that are directly concerned with successful operation of the EEOC, he says, pointing out that the National NAACP, the National Urban League, and the National Organization for Women are among the groups opposed to the Bell nomination. Rep. Bliley says Mr. Bell's main career experience has been as president and sole employee of an employment recruitment firm that has placed no persons in jobs this year, and that Mr. Bell has never supervised more than four employees. Where are the qualifications to oversee an annual budget of $140 million and the work of 3,300 staff members?

In light of the strong opposition to Mr. Bell's nomination, it seems unlikely that he will be confirmed by the Senate for the position.

Here in Richmond, there is a man well qualified by experience and temperament to head the EEOC. He is Colston A. Lewis, an attorney, who served for nearly seven years as a member of the commission. A Republican, he was appointed by former President Richard Nixon. He was removed from the commission by President Jimmy Carter in 1977.

Mr. Lewis, who was chairman of the city of Richmond's Electoral Board at the time of his selection for the post in Washington, has impressive credentials as an attorney and as an outstanding black leader in Republican Party affairs. In a letter to the White House, Rep. Bliley and Virginia Sen.

John W. Warner declared that during Mr. Lewis' tenure on the EEOC, he "earned and continues to have the respect of his peers for his unquestionable expertise in this area." The Virginians stressed that Mr. Lewis "has demonstrated experience in this field and . . . has the confidence and understanding of the legal and civil rights community."

Once when there was a disagreement among commission members on a matter they were considering, Mr. Lewis wrote to a fellow member: "This agency, as I see it, is mandated to eliminate invidious discrimination when and where it finds it. The means by which we seek to find that discrimination—i.e., analysis, investigation, and decision—require us to be fair and impartial." Fairness and impartiality, he added, give "credibility to our findings and decisions."

We believe Colston Lewis would preside over the EEOC in a fair and impartial manner. We join with Sen. Warner and Rep. Bliley in urging the president to consider him for that responsible and vitally important position.●

DISCUSSION ON SOCIAL SECURITY

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. YATRON. Mr. Speaker, I want to take this opportunity to join my colleagues in this discussion on the social security notch which resulted from the 1977 amendments. I rise in support of legislation to instruct the Social Security Commissioner and the Secretary of Health and Human Services to conduct a study and report to Congress on steps which can be taken to correct this benefit disparity.

It seems to me to be very unfair for those born after 1916 not to receive as high a benefit as those born prior to that date. Many senior citizens need every last dollar they receive from social security just to keep pace with the high cost of living. A benefit reduction of this magnitude comes at a difficult time for the elderly, many of whom have witnessed their retirement savings eaten up by inflation.

I think exploring possible alternatives to alleviate this problem is a prudent step. It would help restore some of the confidence and trust in our Government which was lost as a consequence of the 1977 amendments. With all the conflicting reports circulating with respect to the future of social security, the Congress and the President must work harder than ever to keep our commitments to the senior citizens.●

BIOLOGICAL SOLUTION TO MEDFLY PROBLEM

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. EDWARDS of California. Mr. Speaker, the outbreak of the Mediterranean fruit fly in the Santa Clara Valley and surrounding areas shook the agricultural and San Jose community earlier this past year. Eventually, the USDA led an aerial spraying effort to rid this area of these undesirable pests. I supported the efforts of the California Conservation Corps and local residents as they stripped fruit from trees and applied on the ground an application of malathion. This effort to rid the area of the Medfly was augmented with the release of millions of sterile fruit flies.

Many entymologists remain convinced that despite the Medfly's survival through the 1981 winter in northern California, a projected cold winter in 1982 will kill them off. More importantly though, some believe the weather conditions of northern California are such that the Medfly could never become a significant crop pest.

I am adding to the RECORD today an article which appears in the December issue of Not Man Apart. The article describes the Medfly situation to date, and reveals a new computer program pioneered by Richard Tassen at the University of California which will give us a more accurate picture of the Medfly's life cycle.

As responsible legislators we must listen to a wide variety of specialists on different issues. Regarding the erradication of Medflies, this includes entymologists. The article that follows reveals many facts which have been overlooked by many here in Washington. I hope that my colleagues will take the time to read this article.

[From Not Man Apart, December 1981]

CALIFORNIA'S MEDFLY: WHERE DO WE GO FROM HERE?

The ongoing infestation of California's Santa Clara Valley by the Mediterranean fruit fly has focused public attention on the tools we use to protect our crops from the ravages—or possible ravages—of exotic pests. The experience has also raised serious questions about the depth of our knowledge about these pests and how to control them; and, it has raised questions about the ability of our decision-makers to pay attention to biological rather than political forces when control decisions are made.

By the time medflies were discovered in Venice, near Los Angeles, in 1975, agricultural officials in Florida and Texas had fought off the small fly several times since the 1920s, in earlier years relying on host fruit and tree destruction, in later years relying mainly on aerial and ground applications of the pesticide malathion. Southern California officials were the first to take advantage of the new sterile-fly pest control method which had just been tested in Hawaii. Coupled with selective ground applications of malathion, tens of millions of sterile flies were released into the infested area. Fertile flies were vastly outnumbered and few productive matings occurred. The fly was declared eradicated after seven months.

When the fly was rediscovered in southern California in June 1980—most likely reintroduced from Costa Rica—southern California pest control officers had the benefit of experience. The fly was positively identified the day of discovery. Control efforts—fruit stripping, ground spray, and sterile fly release—began within four days. Residents of the infested area were quickly informed of the problem by mail and asked not to move fruit out of the infested area. No flies were discovered after September, despite numerous traps with scented lures, and agricultural officials declared the fly eradicated in December.

At the same time, the medfly was discovered in northern California's Santa Clara Valley. The fly was mailed to a state lab for identification, causing a five-day delay. It took a month for control efforts to begin, enough time for the flies to produce a new generation in the warm summer weather. Sterile flies were sometimes released in a neighborhood on one day, only to be killed by pesticide spray on the next (well-managed efforts would separate fly release and pesticide applications by several days). Ground crews sprayed 500,000 gallons of fenthion on the ground in an attempt to kill pupae in the soil before someone thought to test the pesticide for effectiveness. Testing proved fenthion to be ineffective. Huge amounts of time, labor, and money were wasted.

These and other problems with the state-run eradication effort in the north (see NMA, September 1981) led the federal government to propose aerial application of malathion in December 1980. Growing public concern about the dangers of toxic chemicals spawned immediate and strong opposition to the aerial spray plans. At least one study had shown the pesticide to be a mild carcinogen. Even if the danger of getting cancer from the malathion alone was very low, some people were nervous about how little was known of the ways malathion might act together with other carcinogens in the environment.

The entymological facts were on the side of the citizens. The relative dormancy of the fly during the winter meant that aerial spray would be largely ineffective. Aerial spray can kill only adult flies; most medflies are in egg, larval, or pupal form during the winter (see sidebar). Also, frequent rainstorms make flying dangerous during the winter and ensure that the poison is washed off the host fruit soon after it is applied. The state's Medfly Technical Review Committee recommended against aerial spray. Staunch citizen opposition, coupled with that recommendation, blocked aerial spray.

Instead, local residents joined forces with the California Conservation Corps to strip fruit from trees and bushes in the infested area, while crews sprayed the ground with a more effective pesticide and released millions of sterile fruit flies.

The ground control seemed a success. In the city of Santa Clara, which had been deemed the core of the infestation in 1980, not a single fly was found in 1981. In mid-June, just as state officials and aerial spray opponents began to speak with hope of

eradication, tens of thousands of apparently fertile, but supposedly sterile, medflies from Peru were released. Within weeks, the number of medfly larvae finds began to climb, indicating the recent presence of fertile flies.

Environmentalists and many entymologists believed that the infestation could still be controlled with ground-based efforts. Others, including some who had been opposing aerial spray, felt that the infestation had gotten too widespread for the amount of equipment and labor available to the ground control effort. For the first time, the Medfly Technical Review Committee recommended aerial spraying. The California Farm Bureau also recommended aerial spray for the first time. While Governor Jerry Brown sided with those who favored ground control efforts, within a week he was forced by the federal government's threat of a quarantine to start aerial spray.

THE PERUVIAN LESSON

The resurgence of the medfly in the early summer of 1981 is being interpreted by some as a failure of ground-based control efforts, or at least of the sterile fly release technique. While most observers would agree that some mistakes were made, most scientists remain convinced that properly run ground efforts remain the best approach to controlling the medfly and other exotic pests.

California medfly project officials maintain the bulk of the resurgence of the fly was due to the release of more than 50,000 fertile flies from Peru on June 14, though the federal government disagrees. Most of the larvae finds in July 1981 were in a small area in which Peruvian flies had been released just two weeks earlier—the right amount of time for larvae to form. Traps caught two supposedly sterile Peruvian flies with mature eggs—proof that at least some flies had not been sterilized.

Troubles with flies from Costa Rican labs had led state officials to no longer accept flies from that source. Some of the flies received from the Peruvian lab in 1980 had to be destroyed because of their poor quality. In June 1981, state officials were primarily using flies from the much more reliable labs in Mexico and Hawaii, but a severe need for more sterile flies lead them to continue to use flies from Peru. California will now accept only flies from Mexico and Hawaii.

To increase the number of high quality sterile flies available to the US, the federal government is replacing the experimental sterile fly facility in Hawaii, capable of producing 100 million sterile flies per week, with a larger permanent facility, capable of producing 500 million reliably sterile flies per week. This new facility, coupled with closer monitoring at the point of release, should ward off repeats of the Peruvian disaster.

Some smaller new fly finds in the early summer of 1981 were probably due to an inadequate number of traps in areas surrounding the original infestations, and people carrying infested fruit out of the core area (studies show that medflies move very little from their place of birth unless carried).

If a repeat of the Peruvian disaster can be avoided, and many entymologists are confident that it can, ground-based efforts at control promise to be not only safer for the public, but more effective at eradicating pests. Aerial spray can only kill adult flies. Eggs, larvae, and pupae are untouched. To eradicate the pest with aerial spray only, it is necessary to spray often and long enough to get all flies as they enter the adult stage. We now know that some flies have remained immature for at least 70 days, more than twice the normal life span. Thus huge amounts of poison must be dumped from the air to insure eradication.

A ground-based program combining spraying the soil to kill pupae, stripping host fruit to eliminate larvae and eggs, and releasing sterile flies to prevent productive matings, attacks the insect in all stages of development.

BRINGING THE COMPUTER ON LINE

Richard Tassen, research associate at the University of California at Berkeley's Division of Biological Control, has been using computers to get a more accurate picture of the medfly's life cycle. The computer model that is developed can be used to improve the effectiveness of either aerial or ground-based eradication programs. The program relates air and soil temperatures to the medfly's speed of development in different communities. Development from egg to adult fly can take place as quickly as three weeks in warm weather or can take as long as several months in cool weather. Air and soil temperatures from approximately 30 stations in infested or recently infested areas throughout the state are fed into the computer. The computer, by comparing temperatures to existing data that relate temperature to the speed of development, calculates when flies in a particular area would have gone through one full generation.

Currently, aerial spraying is stopped if an area has gone through two generations without a fly or larvae find. At first, medfly project officials deemed the results generated by Richard Tassen's program as "theorectical" and overly pessimistic. but the discovery of two fertile medflies—ready to lay eggs—in one San Francisco Bay Area community on November 1 may convince them to take Dr. Tassen's program more seriously. The area had been sprayed 10 times since mid-August and medfly project officials planned no further spray treatments for the area. The two medflies had apparently survived for 69 days, most of that time as larvae. Dr. Tassen's program had indicated that medflies in the area could survive as long as 76 days.

The initial disregard given Dr. Tassen's work is just one example of the tendency of people in charge of eradication efforts to pay more attention to their own hunches or the political pressures they feel, than to the advice of entymologists.

Even where experience has shown that steril fly release could eradicate a smaller medfly infestation, there is a tendency now to call in the aerial spray crew immediately. In August several medflies were found near Tampa, Florida, where they have been found most frequently in the past; flies are often introduced from Central or South America. Flies were also found this summer in an area of southern California that was new to the medfly. This infestation was near Interstate 5, which connects with northern California, and may have been carried via contaminated fruit from the north. Both infestations were smaller than the infestations in 1975, which were successfully eradicated using sterile flies. In spite of the availability of enough reliable sterile flies from Mexico and the existing Hawaiian labs, aerial spray was used in both cases.

Politicians are not ignorant of the trouble Governor Jerry Brown has run into for opposing aerial spray so adamantly. The public now gets very agitated at reports of new infestations, be they in Florida, Texas, or California. No one wants to be accused of not doing enough and, unfortunately, unless you aerially spray, a lot of people will think you're not doing enough.

FURTHER CONCERNS

In spite of the medfly's survival in northern California through at least one, and possibly as many as three, winters, many entymologists remain convinced that the medfly could not become well-established in northern California. Recent winters have been mild; they argue that a cold winter would kill them off. In any case, they argue, conditions in California are such that the medfly could never build up a large enough population to become a significant crop pest.

Some entymologists go so far as to blame our increasingly effective baited traps as the cause of our troubles. In 1956, the medfly had to spread through about 1,000 square miles of Florida's urban and agricultural orchards before it was detected. We can now detect the fly long before it actually does any crop damage.

Considering the huge numbers of tourists that return to the West Coast from Hawaii each year, entymologist Kenneth Maehler believes that the medfly has been brought to California as larvae in fruit "thousands of times over the years," The problem, as he sees it, is that we now know about infestations that, in years past, would have come and gone without our knowing. "To spend," he comments, "$100,000,000 to try and eradicate an insect which past experience indicates cannot live in California is foolish. The fact that it has possibly overwintered is no assurance it will continue to do so. . . . Do we intend to spend millions of dollars every time one of these incipient infestations occurs?

On the whole, the environmental community remains concerned that the medfly not become established as a crop-damaging pest in California. The biggest fear is that some farmers and many homeowners will find it necessary to use more pesticides to protect their fruit. Widespread use of malathion to control medflies has already caused secondary outbreaks of other pests, such as leafhoppers and white flies, driving more people onto the "pesticide treadmill" of ever-increasing pesticide use.

In addition, the only fumigant now commonly accepted for controlling medflies in fruit to be shipped is ethylene dibromide, or EDB, which Dr. Adrian Gross of the Environmental Protection Agency has called "probably the most potent and toxic carcinogenic substance used as a pesticide today." The Carter Administration had planned on stopping all use of EDB by July, 1983, and severely limiting its use until then. Dr. John Todhunter, new pesticides chief at the EPA, approved its use to fumigate California fruit, worrying several EPA employees, including Dr. Gross.

Workers who fumigate the fruit, or handle it on the way to the market, suffer the greatest risk of getting cancer. But one EPA staffer has said that he wouldn't even eat fruit treated according to Dr. Todhunter's guidelines.

Thanks to Dr. Ken Hagen of the University of California's Division of Biological Control and to Steve Dreistadt for the information they provided for this article.

PERSONAL ANNOUNCEMENT

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. DASCHLE. Mr. Speaker, earlier this year I opposed and voted against the first concurrent resolution on the budget, fiscal year 1982, because of massive deficit spending. If I had been present for rollcall vote No. 351, the second concurrent resolution on the budget, fiscal year 1982, I would have voted no as the second concurrent resolution on the budget for this fiscal year merely affirmed the massive budget deficit contained in the first concurrent resolution.●

ANSWER TO "EDUCATION'S THREE MILE ISLAND"

HON. AUSTIN J. MURPHY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. MURPHY. Mr. Speaker, in response to the article, "Public Law 94-142—Education's Three Mile Island," inserted in the RECORD by Senator JOHN EAST on December 1, 1981, I would like to offer the following comments.

It is always possible to use extreme examples to attempt to prove a point but let us consider for a moment the situation that existed for handicapped children prior to the passage of Public Law 94-142, the Education for All Handicapped Children Act. The grim facts are:

There were more than 8 million handicapped children in the United States and less than half were being served, thereby denying them equality of educational opportunity;

More than 1 million handicapped children in the United States were excluded entirely from the public schools, prohibiting their inclusion in the educational process and forcing peer isolation;

Many handicapped children throughout the United States participating in regular school programs had handicaps that were undetected;

Because of the lack of adequate services within public schools systems, families were frequently forced to find services outside these systems, often at great distance from their residences and at their own expense;

There were untold violations of the rights of children and parents with regard to placement and confidentiality of records; and

There was a tremendous gap between personnel trained to deliver services to children with severe and low-incidence handicapping conditions and the numbers of children needing these services.

As a result of the implementation of Public Law 94-142, nearly 4 million handicapped are now receiving a free, appropriate public education. This law has helped to dispel many of the fears and myths surrounding the handicapped and it has helped integrate the handicapped into the school system as they will one day have to integrate into society.

Times have changed and severely handicapped children who in the past were considered uneducable are now being trained to be independent, taxpaying citizens. Choosing to deal with only the extreme cases serves only to undermine the gains that many handicapped children have achieved since the implementation of this important statute.

If, in fact, we are truly concerned about making sure that dollars are well spent, we must remember that each time we provide a handicapped child with an appropriate education program, we are allowing him the opportunity to become a self-sufficient, tax-paying adult. When these programs are provided in the early stages of the child's development we may be preventing additional or more severe handicaps and the need for costly remedial and maintenance programs later in his life.

During hearings held by the Committee on Education and Labor earlier this year, Mrs. Mary Akerley of Silver Spring, Md., provided the following testimony regarding the education program for her 16-year-old son, Edward, who is autistic:

> His specialness has cost the taxpayers about $44,000 so far. * * * By getting the help he needs now, he will not later need SSI, special housing, food stamps, medicaid, and other assistance.
>
> He will pay taxes, probably at least $80,000 worth if he works for 40 years at a minimum wage. That is nearly double what he has cost society. And society will realize an additional saving, $400,000, the current estimated cost of institutionalizing a handicapped person for life.

With the many advances made in educational programing across the country since the implementation of Public Law 94-142, the above example is now the rule, rather than the exception.

If we are serious about rescuing the economy, we will not sacrifice a potential long-term saving of nearly one-half of a million dollars per handicapped person in order to achieve an immediate reduction of one-tenth of that in education costs.●

AMERICAN HISTORY MONTH

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. SKELTON. Mr. Speaker, we have often heard the phrase "history repeats itself," and today I would like to call your attention to a bill which would authorize the President to proclaim February 1982, as "American History Month." The importance of studying history cannot be overemphasized. We must look to the past for a greater understanding of the present and an insight into the future.

The month of February is especially significant in the lessons of American history. It is an appropriate time to study a number of events surrounding the birth of our great Nation. The study of these events, with an emphasis on historical progress and problems, will help the citizens of our country to increase their understanding and awareness of how our Government has operated successfully for the past 200 years.

Mr. Speaker, we should never forget the important lessons that history has taught us. Perhaps its own history is America's most valuable resource.●

THE SHCHARANSKY STEPS

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. GILMAN. Mr. Speaker, recently, I had the pleasure of participating in an important ceremony at the Isaiah Peace Wall in New York City, honoring a Soviet Prisoner of Conscience, Anatoly Shcharansky. The purpose of the ceremony was to redesignate the staircase at the Isaiah Peace Wall, which is just across the street from the United Nations, as the "Shcharansky Steps."

Several hundred people congregated at the Isaiah Peace Wall for the "Shcharansky Steps" and many of those participating were political, religious and Soviet Jewry leaders.

Mayor Edward Koch was among the officials who cosponsored the afternoon of prayer, song and remembrance, along with Rabbi Shlomo Rishin of the Student Struggle for Soviet Jewry.

Among those present were city council president Carol Bellamy, city comptroller Harrison J. Goldin, members of the New York State Senate and Assembly; members of the New York City Council; and several of my colleagues in the House of Representatives.

Monsignor Phillip Mulcahy opened the ceremony with a blessing, followed by Herbert Rickman, special assistant to the mayor, who conducted the assembly. Songs by Misha Aleksandrovich, a prominent cantor in the New York area, and a dramatic reading by Kevin Conway, brought variety to the dedication.

The suggestion that a prominent New York City public area or edifice

be named for Shcharansky first came from former prisoner of conscience Iosif Mendelevich, during a recent speaking tour in the New York area. At a City Hall reception where Mendelevich was awarded the key to the city, the former prison mate of Shcharansky urged that a street be named after the human rights activist, to demonstrate the solidarity of the people of New York with his cause.

The action to accord an appropriate tribute to this prisoner of conscience was unanimously adopted by the New York City Council in October.

Anatoly Shcharansky is presently serving the 4th year of a 13-year sentence he received in 1978 as a result of his activities as a human rights leader in the U.S.S.R. A leading human rights and Soviet Jewish activist, Shcharansky has been called a champion of justice and liberty.

The dedication of the Shcharansky Steps just opposite the United Nations serves as a further reminder of the repression of human rights in the Soviet Union and the continuing struggle of Soviet Jewry for the right to emigrate.

I am proud that I was able to participate in this memorable and signficant occasion and wanted to share this event with my colleagues. It is hoped that the Shcharansky steps will contribute to leading the oppressed to freedom.●

COSPONSOR OF CONABLE LEGISLATION

HON. HENRY J. NOWAK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. NOWAK. Mr. Speaker, I am pleased to consponsor legislation intended to respond to a Canadian policy which has substantially and unfairly injured U.S. broadcasting stations located near the Canadian border. I refer to the bill introduced by my distinguished colleague and neighbor, Mr. CONABLE.

This measure was recommended by President Reagan last month as a result of a petition filed under section 301 of the Trade Act of 1974. One of the 15 border stations that filed the petition is WIVB-TV of Buffalo which serves my district. I would like to quota and endorse a portion of the testimony by the president and general manager of WIVB, Leslie G. Arries, during a hearing before the section 301 committee on July 9, 1980. Mr. Arries stated:

> We have no objections to competing with Canadian broadcasters—as long as the terms are the same. We would much prefer an open trans-border market to protectionist barriers. But if Canada wants the benefits of the services our stations provide, it must allow us a reasonable and competitive opportunity to obtain compensation.
>
> We appreciate the deep concerns about national identity and cultural sovereignty that underlie Canadian policies such as Bill C-58. But such concerns do not justify a policy so plainly unfair and one-sided.
>
> Moreover, Bill C-58 is a misguided attempt to meet these cultural goals. Canada seeks to sustain a domestic television program production industry that can compete for Canadian viewers with the American stations to which these same viewers demand access on their cable systems. But any revenues that might conceivably be diverted from a U.S. border station to a Canadian station can hardly count as more than a drop in the bucket of resources needed to offset the financial advantages enjoyed by the much larger U.S. program production industry.
>
> I still hope our friends in Canada will rethink the wisdom and need for continuation of C-58. But in the meantime, Congress should proceed expeditiously to pass this bill.●

LEGISLATIVE RESPONSE TO CANADIAN TAX PRACTICE

HON. BARBER B. CONABLE JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. CONABLE. Mr. Speaker, I am introducing legislation today, along with several cosponsors, that was suggested by the administration as a response to a nagging trade problem with Canada. The recommended legislation follows several years of effort to persuade the Canadians to remove a discriminatory tax practice that has disrupted trade in services between United States and Canadian advertisers.

Five years ago Canada amended its tax laws so as to deny a deduction to Canadian businesses for the cost of advertisement placed on U.S. border television and radio station programs viewed by Canadians. This law, of course, has discouraged Canadian advertisers from placing ads on popularly viewed U.S. programing and has cost U.S. broadcasters millions of dollars in lost ad revenues.

Since the Canadian law was passed, I have supported efforts by the affected U.S. stations, particularly those in western New York, to persuade the Canadians to modify their discriminatory law. The Canadians have refused to repeal or modify that law.

Finally, the U.S. broadcasters initiated a formal complaint under section 301 of the Trade Act of 1974, which provides for an investigation of unfair trade practices, and if found to be injurious, provides for the development of an appropriate U.S. response. The section 301 process assures the legitimacy of trade discrimination complaints and provides a mechanism for the U.S. Government to seek a negotiated resolution of such discriminatory practices.

On July 31, 1980, under the authority of section 301 and after a thorough investigation, the President determined that the Canadian tax practice was unreasonable and a burden on U.S. commerce. Meanwhile, efforts to seek a solution through negotiation have failed and the discrimination remains.

Last December on this floor I withdrew my objection to a bill which amended the Internal Revenue Code to expand the tax deductibility of expenses for attending business conventions in Canada. I did so only after calling on the Canadians to be more forthcoming in regard to the broadcast dispute. I expressed the hope that Canada would reciprocate our grant of special treatment for conventions held in Canada.

On November 17, President Reagan sent a message to the Congress recommending that mirror legislation be passed. Such a law would amend the Internal Revenue Code to deny a tax deduction for expenses of advertisements placed with a foreign broadcast undertaking and directed primarily to a market in the United States. This restriction in U.S. law would apply only if the laws of the country in which such foreign broadcast undertaking is located deny a similar deduction to advertisers in that country.

The legislation, as the President indicated, may not by itself cause the Canadians to resolve this dispute. I would hope, however, that our friends in Canada understand that this measure reflects the commitment of the Congress and the President to the promotion of free trade while at the same time insuring that our trade laws operate effectively to protect U.S. industry from unreasonable and restrictive practices.

President Reagan clearly expressed the importance of resolving this issue without delay, and has reserved his option to take further action, if appropriate, to obtain elimination of Canada's discriminatory law. I hope, however, that this modest legislation will not have to be strengthened and that Canada will be responsive to settling this dispute.●

ONE VETERAN'S STORY

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. DASCHLE. Mr. Speaker, I was visited last week by Max Inglett, a Vietnam veteran who recently completed a 3,000-mile journey in his wheelchair across the United States. Max has written a very poignant and moving poem concerning his participation in the Vietnam war that I would like to share with my colleagues:

ONE VETERAN'S STORY

(By Max Inglett)

This is one veteran's story, for I've lived my life alone, but like so many others the memories still aren't gone.

I gave up the warmth and comfort of home, because they told me it was time to fight. But deep inside I asked myself if they really had the right, to give me a gun, and teach me to kill.

My heart had no answers, but pride in my country said "I will".

So I landed in a place called Vietnam, they were shooting guns and dropping bombs. Why do these children have to die? God, help me get home alive.

Vivid memories of when my best friend died, because I was "Doc" at his side. Laying there in a pool of blood, the mud, and the tears that fell from my eyes.

Leaving on a jet plane, a so called "freedom bird", not one of us could find a word. We could only pray that time would help us forget the bloodshed, the tears, and the sweat.

And then they asked, "Why are you weeping? These aren't the actions of a man! I said because of sadness, you wouldn't understand. For if it were not meant for me to express my joy or fears, then why did my God not give me a pair of eyes without tears?

As I awoke in an Army hospital bed, they told me that I would never walk again. And at first I prayed to God to please put my life to an end.

But as I lay there paralyzed, I began to realize just how fortunate we are, and for this great country in which we live, I thank my lucky stars. Because you see, I have seen the children who have never climbed a tree. And that little girl who asked to just touch my face, because she could not see. How does a mother say I love you, to a little boy who cannot hear?

Thank you God for the life I have, for myself I have no tears.

One veterans' story, but I speak not by myself, for most have felt it in our hearts.

We're white, we're black, many are brown, some of us are women too. But it makes no difference because you see, we're united all together in a kind of family that few others will ever understand.

Yes, one veterans' story, for I've lived my life alone, but just like all the others, the memories will never ever be gone.●

MISSOURI STATE TEACHER'S ASSOCIATION

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. SKELTON. Mr. Speaker, I take this opportunity to recognize the Missouri State Teacher's Association, which, for the past year, has been celebrating its 125th anniversary. Organized in 1856, the Missouri State Teacher's Association sought to increase the quality of teachers within its own ranks, and in the past 125 years, has made tremendous strides in the furtherance of education in Missouri. Today, the Missouri State Teacher's Association has 37,000 members striving to achieve a number of important goals.

A well-educated citizenry has been, and will continue to be, a cornerstone of our society. The contributions of these teachers to the education of our young people in Missouri is invaluable. Through the dedicated work of these loyal citizens who have chosen to join the education profession, Missouri can celebrate over a lifetime of quality education. This is a marvelous task, and I would like to pay tribute to the Missouri State Teacher's Association for its leadership and progress in the field of education.●

NICARAGUAN HUMAN RIGHTS

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. YATRON. Mr. Speaker, I would like to share a copy of a letter I received from the chairman of the Subcommittee on Human Rights and International Organizations, DON BONKER. This correspondence is a reply to a letter I sent Chairman BONKER regarding a human rights case in Nicaragua which appeared in the CONGRESSIONAL RECORD on December 8.

I would like to take this opportunity to commend Chairman BONKER for taking the initiative in urging the Sandinistas to cease with their policies of repression which threaten the basic human rights of the Nicaraguan people.

The letters follow:

SUBCOMMITTEE ON HUMAN RIGHTS AND INTERNATIONAL ORGANIZATIONS,
Washington, D.C., December 4, 1981.

Hon. GUS YATRON,
Rayburn House Office Building

DEAR GUS: Thank you for your recent letter signed by a number of our colleagues on the Foreign Affairs Committee concerning the deterioration of human rights conditions in Nicaragua.

I have been following the problems in Nicaragua for a long time. Last June 26, I inserted an article in the Congressional Record expressing my concerns. Recently along with a number of other colleagues I signed a telegram to the Junta in Nicaragua expressing our outrage at the arrest of the COSEP leaders. Last November 25, Mike Barnes and I sent another telegram to the Junta protesting the treatment of the COSEP leaders who are in prison (enclosed).

I appreciate very much your interest in this question, Gus, and hope you and our other colleagues will continue to speak out and make your influence felt on such a vital matter.

You can be assured I will continue to monitor the situation in Nicaragua.

Sincerely,

DON BONKER,
Chairman.

JUNTA DEL GOBIERNO DE LA RECONSTRUCCION NACIONAL,
Casa De Gobierno,
Managua, Nicaragua

We have heard reports that COSEP leaders in jail are now being mistreated. We urge you in the name of human rights and decency to take appropriate steps to alleviate the problems.

Signed,

DON BONKER.
MICHAEL BARNES.●

POSTAL PUBLIC SERVICE SUBSIDY

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. CLAY. Mr. Speaker, I rise to address the issue of the postal public service subsidy. I want to express my disagreement with the action taken by the Appropriations Committee in the continuing resolution which would have eliminated the $250 million public service subsidy to the U.S. Postal Service.

I have in the past and will continue to support the need for this subsidy, which covers the cost of certain uneconomical postal operations—6-day mail delivery, small post offices, rural mail delivery, window services, and other postal activities—that are deemed in the public interest.

The Subcommittee on Postal Operations and Services, which I chair, recently began a series of public hearings with the Subcommittee on Postal Personnel and Modernization, to take a close look at the effectiveness of the Postal Reorganization Act of 1970. One of the areas we are looking at is how the Postal Service will be affected by the possible elimination of the public service subsidy.

Mr. Speaker, frankly I worry about the Appropriations Committee's action to accelerate the phased out schedule of this subsidy by its elimination. Last week, Postmaster General Bolger testified before our subcommittees and was questioned closely about the effect on the Postal Service in eliminating this subsidy. He replied that although the Postal Service could absorb these cuts it would most likely lead to increasing postage rates sooner than he had anticipated. This was also the prevailing view presented to the subcommittees by the General Accounting Office.

The American people have been complaining about the fact that in the past year they have seen postage rates increase twice, first to 18 cents and

more recently to 20 cents. I do not think the people of this Nation will be happy to learn that their rates would be going up again sooner because of the Appropriations Committee's proposal to eliminate this subsidy. They want to see their postage rates stabilized for as long as possible.

We all realize that at some point the public service subsidy will be eliminated. However, I believe now is not the time to take this action. I support the continuation of this subsidy.●

SALES REPRESENTATIVES PROTECTION ACT

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. FLORIO. Mr. Speaker, among the many matters considered this year by the Subcommittee on Commerce, Transportation and Tourism is legislation dealing with the relationships between sales representatives and the manufacturers for whom they market products. This bill, the Sales Representatives Protection Act, has been cosponsored by 170 of our colleagues.

The subcommittee held a day of hearings on this bill, H.R. 3496, on June 23. Since that time we have received many letters expressing various concerns about this legislation. Among these is a letter from the Federal Trade Commission indicating their lack of support for H.R. 3496. In the interest of providing all parties concerned with this matter a better understanding of the legislation, I am inserting into the RECORD a memorandum commenting on the FTC opinion.

In this memorandum, Prof. Stephen B. Presser of the Northwestern University School of Law provides a useful analysis of the current state of common law dealing with representative-principal relations. Presser has testified on this legislation twice on retainer to the Bureau of Wholesale Sales Representatives.

The subcommittee has been reviewing the record of the hearings on this bill with a goal of preparing a series of improving amendments that may produce a broad consensus. This effort will continue next year, and I invite all interested Members to provide us the benefit of their views.

The memorandum follows:

You have asked for my comments on the FTC's recent letter indicating that while the Commission recognizes that H.R. 3496 provides for salutary and efficient disclosure of pre-transaction information between sales representatives and their principals (FTC letter, pages 3-4), because the commission believes that the bill might create inefficiences and higher prices to the consuming public, it is unable to support its enactment. The reasons which the FTC gives to support its conclusions are basically the same, indeed many of them are in the exact same language, as those expressed in the FTC letter dated April 17, 1980, commenting on H.R. 5099, the predecessor bill to H.R. 3496.

In my written and oral testimony delivered at June 23, 1981, I indicated my disagreement with the conclusions reached by the FTC in its April 17, 1980 letter, and there is nothing in November 10 FTC letter which causes me to change my views. In this memorandum, I will summarize and develop the reasons expressed in my testimony for my disagreement with the conclusions reached by the FTC, and for my own conclusion that H.R. 3496 is a bill that would not only confer benefits on the sales representatives and their principals, but would confer benefits on the consuming public as well. I will also explain how some amendments currently under consideration could cast further doubt on the conclusions reached by the FTC.

The principal difficulty which I have with the FTC's position is that the Commission appears to have taken a rather simplistic view of what H.R. 3496 would do, a view which not only ignores the current state of the common law regarding sales representatives, but which also ignores important economic aspects of the market for sales representatives' services. This has led the FTC to the view that by creating a situation in which sales representatives are given a limited indemnity for non-good cause termination, H.R. 3496 would create additional costs which would have to be passed on to consumers. The FTC has failed to realize that consumers are now bearing a greater burden of costs created by the uncertainties and inefficiencies of the current state of the law. The reasons that lead me to this conclusion are listed below.

1. H.R. 3496 does not, as the FTC suggests, create a "broad new basis of liability", rather H.R. 3496 appropriately refines and clarifies legal rights which have already been recognized in the common law.—As I have indicated on the two occasions in which I previously testified on the proposed SRPA, there is a clear trend in court decisions to reduce or eliminate the application of the "terminable at will" doctrine between employers and employees, and this trend has clearly been extended to affect the relations between sales representatives and their principals, whether the sales representatives are considered as employees or as independent contractors. The "terminable at will" doctrine is in the process of being replaced by the courts with doctrines requiring "good cause" termination or "reasonable notice" before termination.

The jurisdictions which have explicitly adopted the "wrongful termination" doctrine, and have rejected the "terminable-at-will" rule of the common law remain a minority, but it is an "ever-increasing minority." Phillips v. Goodyear Tire & Rubber Co. 50 Law Week 2099 (5th Cir., 1981). Indeed, three weeks after I testified on H.R. 3496 last June the Maryland Court of Appeals noted that in an appropriate case Maryland would follow Illinois' lead and permit actions for "wrongful discharge." Adler v. American Standard Corp., 50 LW 2069, 2070 (Md. Ct. App., 7/16/81). Still because of uncertainty in the courts over precisely when "public policy" calls for abandonment of the "terminable-at-will" doctrine, and because of similar uncertainty over what remedies are appropriate, and whether a contract or tort standard applies, where the "terminable-at-will" doctrine is rejected, principals and representatives have become unsure of their rights and have been forced to litigate to find out just what their rights are. Several courts have suggested that the employers' right to terminated without cause can only be determined on a case-by-case basis, but the uncertainties of such an approach have led the courts of several states to declare that legislatures should clarify terminations rights of employers and employees, in the manner H.R. 3496 seeks to do.

The costs of litigation and the costs of other uncertainties in this area must ultimately be borne by consumers, and thus prices of some goods may now be higher than they would be if the law were clarified. For example, it is likely that the bill's modest indemnity provisions are significantly lower than those which a court might reach in a case rejecting the "terminable-at-will" doctrine, and a court applying the tort "wrongful termination" standard could impose punitive damages which would be far higher than those specified in H.R. 3496. Finally, as I indicated in my previous testimony, some sales representatives may now be forced to self-insure against termination by demanding higher rates of compensation than they would request if they knew a legal or contractual notice provision were provided. This raises costs to the consumer unnecessarily. It also seems likely that some employers are seeking to self-insure against liability by offering lower commission rates than they might if they knew sales representatives' indemnity recovery was limited.

In either event, it would appear that the uncertain state of the common law is creating inefficiencies because sales representatives may not be receiving the compensation to which their services might entitle them absent the risks of court-imposed liability. In short, the situation which H.R. 3496 is designed to ameliorate is one in which the costs of sales representatives' services may be over-determined by uncertainties in the law, and underdetermined by their intrinsic worth in terms of the representatives' performance in servicing markets. The inefficiencies thus created are surely as bad or worse than any which the FTC has feared. This is particularly true in light of the questions which can be raised concerning the FTC's continuing belief that the bill is anticompetitive.

2. H.R. 3496 does not create a situation in which it is more likely that an ineffective sales force will be maintained, and H.R. 3496, especially if currently-pending amendments are accepted, will provide adquately for termination based on incompetence.—One of the most important reasons which the FTC gives to support its belief that H.R. 3496 would create inefficiences and increase costs is the FTC's assertion that H.R. 3496 "fails to provide adequately for terminations based on incompetence, where the sales representative acts in good faith, is not grossly negligent and does not breach the contract, but nevertheless is simply not a good representative". FTC Letter at 2-3. As the bill is currently drafted, however, Section 3(3)(A)(ii) defines "good cause" for termination (for which no indemnity liability is imposed on the principal) to include any "material breach" of the contract, and leaves it open, in the case of written or oral contracts, for the parties to include "incompetence", however the parties might choose to define it, as a "material breach" of the contract. If the parties so choose, then, they can ensure that the situation the the FTC fears, the existence of incompetence that is not a breach of contract, never occurs.

Further, Mr. Florio has offered an amendment to this section which would clarify the term good cause, by defining it as "conduct on the part of a sales representative with respect to the principal of the sales representative which constitutes a material breach of the express or implied provisions of the contractual relationship between the sales representative and the principal * * *." Mr. Florio's amendment is a change along the lines suggested in my 1980 supplemental testimony (1980 hearings on H.R. 5099, at 472-473), and I believe that this would make it even plainer that incompetence on the part of the sales representative would allow the principal to terminate with no liability under the bill.

3. H.R. 3496 does not unduly restrict the principal from freely exercising his discretion to change distribution and selling techniques in response to current market conditions.—The FTC believes that H.R. 3496 will make it more difficult for principals to respond to declining product lines or other business contingencies, and this difficulty will result in marketing inefficiences. FTC letter, at 3. It should be stressed, however, that in its current form the bill allows the principal, even in the case of non-conforming contracts, to reduce a salesman's activity without liability unless the reduction results in 25 percent less commission for the salesman. In making this calculation, however, reductions in commission caused by "nonperformance" of the sales representative do not count, and this does give some flexiblity to principals.

Further, since good cause for termination includes "marketing area withdrawals" of at least one year's duration, as I remarked in my testimony this summer, changes in response to current market conditions may be effected through such marketing area withdrawals without risk of liability. Finally, as was true with regard to "incompetence," discussed above, where principals take the trouble carefully to draft written contracts, they can provide that conduct on the part of a Representative which would fail to meet competition, or which would result in inefficient operation, could be defined as a material breach, thus allowing "good cause" termination and no liability.

4. If currently-proposed Amendments to H.R. 3496 are adopted, it is highly unlikely that H.R. 3496 would increase the caseload of the federal courts.—The FTC has argued that the "social costs" of H.R. 3496 would be unacceptably high because H.R. 3496, as currently drafted, waives the $10,000 amount in controversy provision for federal jurisdication, and unwisely places the burden of proving "good cause" for a termination upon the defendant principal and provides for attorney's fees to prevailing sales representatives. "Even where no violation of the law had occurred," the FTC maintains, "principals might be compelled to settle non-meritorious claims rather than incur the substantial costs of litigation." FTC letter, at 3. These are serious criticisms, but it is encouraging to note that several amendments now under consideration for H.R. 3496 would ameliorate this problem, in a manner which would ensure basic fairness in litigation, and would thus minimize the risk of non-substantial or harassment actions.

One such amendment would remove the waiver of the federal $10,000 amount in controversy requirement, thus minimizing the risk of litigation over trivial claims. A second amendment would alter the burden of proof, in a manner consistent with similar pieces of legislation (See my supplemental 1980 testimony, at 474-475), to provide that plaintiff sales representatives must make a prima facie showing that they have not engaged in any Section 3(3) conduct which would provide good cause for termination, and that they have complied with their duties under the sales representation contract, before the burden of proving that termination was for good cause would shift to the principal. Finally a third amendment that is being considered would provide that a court could allow attorney's fees to the prevailing party—representative or principal—thus further reducing the risk of meritless litigation. Finally, it should be mentioned that when H.R. 3496 is passed there will no longer be as pressing a need to litigate to determine the existence of any "wrongful termination" rights, and thus it is likely that the mere passage of the bill will reduce, and not promote litigation.

5. Insofar as H.R. 3496 will make it more difficult for principals to fire their reps and sell directly to consumers, the bill may appear to be maintaining higher costs to consumers, but because the bill will also have the effect of encouraging job security for potential sales representatives, in the longer run it may just as easily be seen to reduce costs to consumers.—There is some truth in the FTC's assertion on page 3 of its letter that "Account and territory adjustments are options which are the traditional prerogative of business," but the maintenance of "traditional prerogatives" has never been one of the goals of American law, which has always been hostile to arbitrary prerogatives in any form. Even if total freedom to fire reps and sell directly might often be used to reduce prices to consumers, such activity is impossible to condone, if, as the findings of fact in the bill indicate, such reduce costs would be at the expense of equities built up by the sales representatives.

Not only is the appropriation of the time, energy, and resources spent by a salesman in developing accounts and markets without full compensation inequitable, however, it may also be inefficient and counterproductive. To the extent that the law allows undervaluation of such contributions on the part of sales representatives, the law will discourage investment of time and opportunity in independent sales representation. Those with the talent to be successful in independent service industries will enter other professions than sales representation, and markets will not be developed as efficiently and at as low cost as they would be were the best available talents to be active in sales work. The failure adequately to develop markets could lead to reduced production, and, because of failure for economies of scale to materialize, higher costs. These effects, too, would be as bad as any the FTC forsees from H.R. 3496. With H.R. 3496, then, it seems more likely that economics of scale and concomitant consumer savings will be realized.

As our economy evolves into one in which the provision of human services becomes as prominent and important as the production of goods, a service-intensive industry such as sales representation will become increasingly important, and it seems only appropriate to reexamine the legal maintenance of "traditional prerogatives" of business. Those "traditional prerogatives" were established in the law at a time when the paramount need was not for service industries, but was for the speedy development of industrial capitalism. We are now entering a new economic era, and the courts have been seeking to evolve service-oriented rules to facilitate this economic evolution. H.R. 3496 appears to be a wise step in this process, and one in which the federal legislature can produce a more comprehensive and efficient solution than can the courts.

CONCLUSION

The FTC, in its letter, has recognized that H.R. 3496 is a bill which can be "helpful to both parties" because of its mechanisms for "efficient pre-transaction information disclosure between parties." FTC letter at 3-4. Somehow, however, the FTC has arrived at the conclusion that the benefits that would thus be conferred on both parties would be offset by "the social costs inherent in the interference with the normal free marketing processes and the inefficiencies and higher prices likely to result from the enactment of the bill." FTC letter at 4. The FTC's conclusion seems to be highly questionable because of two factors discussed in this memorandum.

First, the "normal free marketing processes" which the FTC blithely assumes are in existence are imaginary, because of the considerable interference in the "free market" already generated by the courts applying common law doctrine. More is operating in the area of employer-employee and representative-principal contracts than Adam Smith's mythical invisible hand. The visible hands of modern judges have already wielded a powerful force.

Second, insofar as the exchange of information between the parties leads to a correct valuation of and more equitable compensation for the services rendered by sales representatives, it appears that costs to consumers are as likely, in the longer term, to be lowered as they are to be raised. Contrary to what the FTC appears to suggest, then, Congress is not faced with a choice between the parties to the sales representation contracts on the one hand and the consuming public on the other.

A wise legislative measure, such as H.R. 3496, as amended pursuant to current proposals, can confer benefits on the representatives, the principals, and the public. Pursuant to this reasoning, then, it seems entirely appropriate that the piece of legislative which finally emerges ought to be named, as another amendment proposes, the "Sales Representation Contractual Relations Act" or simply the "Sales Agency Act."●

REMARKS OF KEN HOLUM—II

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. DASCHLE. Mr. Speaker, Ken Holum speaks not just as a former Assistant Secretary of Interior and current general manager of Western Fuels, but as a man raised on and still close to the family farm. His concerns in that area mirror my own. I include his remarks on this issue in the RECORD at this point:

REMARKS OF KEN HOLUM—II

My concern goes beyond traditional social programs. While my day-to-day work responsibilities force me to concentrate my attention on other matters, I watch and worry as the Administration bludgeons the Congress into weakening essential farm pro-

grams with the veto threat. I'm close enough to the Holum farm in South Dakota to know that family farms cannot survive when essential equipment sells at inflated prices with obscenely high interest rates at a time when commodity prices are so low. The potential demise of the family farm foreshadows economic and social costs of catastrophic proportion.

This being my point of view, maybe you will be surprised to learn that my concerns did not induce me to sign the Sierra Club petition demanding the ouster of the Secretary of the Interior James Watt.

In spite of the fact that I, personally, worked long and hard as Assistant Secretary for the Dickey-Lincoln School Project and continued that work as a private citizen, I am not going to condemn him for turning "thumbs down" on that Maine project. As we say on the farm, the Secretary was only kicking a dead horse. I surmise he was making a politically cheap concession to the professional environmentalists.

Personally, I assumed the Dickey-Lincoln Dam Project was doomed when former Senator Ed Muskie, in his key position as Environmental Pollution Subcommittee Chairman, turned a deaf ear on our request for help when the whooping crane and the Endangered Species Act needlessly threatened the Grayrocks Dam and Reservoir and the Laramie River Station Project. As I told the Senator in a private letter at that time, after he refused to help us, "Do you really expect nationwide support for your State's project when you refuse to consider the problems of other areas of the country?" In spite of bitter disappointment, I continued to support him and Dickey-Lincoln School.

I must note, however, that this does not imply that I have decided at this time that James Watt will rank alongside the great Secretaries of the Interior of my generation—I put Harold Ickes, Fred Seaton and Stewart Udall in that class. In his case, too, I am watching and I am waiting.

This being my attitude and my theme, what am I watching and waiting for? Let me set forth as succinct an agenda as I can.

The Reagan Administration has said some things and indicated attitudes which we felt would, if carried out, be helpful in such areas as Federal coal leasing, modifying the Clean Air Act, authorizing coal slurry pipeline eminent domain powers, and multipurpose water resource development.

The new Federal Coal Management Program is supposedly on the verge of being made public. Reports are that Interior has modified the Andrus program: That it is being reviewed at OMB and that it will be offered for public comment soon. But we were told that same thing in June. We watch and wait. Will the program provide adequate coal for leasing so as to maintain a competitive market—or will it be related to proven demand to the advantage of the energy companies?

The Clean Air Act is now overdue for amendment. While saying it wants to reduce the total number of applicable regulations, the Administration has not really made its views known. Present requirements mandating the use of the best available control technology have nothing to do with environmental protection. Instead it is economic policy masquerading as an environmental measure. It should go.

The Administration seems to favor easing Clean Air Act regulations on preserving "integral vistas"—which are outstanding panoramic views outside Federal parks as seen from within the park. National parks were given Class 1 area protection under the Clean Air Act. This additional set of prohibitions which extend as far as the eye can see on a clear day, can be used by environmentalist extremists as a means of blocking not only utility and industrial plants but even the mining and hauling of coal.

I think most of us support measures to keep the air as free as possible from man-caused pollutants. In spite of a recent study by the Brookings Institution that the Clean Air Act is mis-directed and not really effective, I think the United States has made good progress in preserving clean air.

But we need energy in addition to clean air, potable water and some other basic necessities if we are to prosper—or even survive—as an industrial nation. And when officials of an Indian tribe or a Board of County Commissioners have the power to declare a new Class I area near an electric generating station or a coal mine under construction in an adjacent jurisdiction, thus creating a costly stall and a jungle of obstacles for the builders, the law and regulations should be changed.●

COURAGE OF POLISH PEOPLE

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Ms. OAKAR. Mr. Speaker, in the past year and a half, Poland has been undergoing a remarkable social transformation. What began as a series of worker strikes over food price increases in August 1980, soon developed into a broad-based nationwide movement to abolish censorship, restore democracy and personal liberties, and win a greater measure of national independence for the country. Poland's "renewal" became possible through the unshakable unity of the Polish people in the face of threats from the central government and from the Kremlin. This unity was harnessed and given direction by the Solidarity workers' union, enabling the Polish people to stand up even to the highly publicized Red Army and Warsaw Pact maneuvers of last year and earlier this year which seemed likely to develop into an actual invasion of the country.

The cost of the social transformation, the "renewal," in Poland has been high. The strikes which demonstrated the strength of the Polish masses, also sapped the strength of the Polish economy that was already in trouble because of the inefficient system imposed by Moscow on the Polish people nearly 40 years ago. Conditions have not been made easier by the Soviet manipulation of the flow of goods in and out of Poland in the past year. This has created shortages that were then blamed on Solidarity.

Since the central government has been unwilling to try any meaningful reforms, the situation in Poland became stalemated. In recent months, Poland has hovered on the edge of economic collapse brought on by stubborn confrontation. Hardship became the daily lot of the Polish people. It is the price that Poles have thus far been willing to pay to achieve greater liberties and political independence from Moscow.

Over the past weekend, the central Polish government has taken steps to break the political stalemate by force. Nearly all communications have been cut off between Poland and the outside world. Under the cover of a news blackout, the Army then went to work arresting hundreds of Polish citizens. The Kremlin is no doubt pleased with the return to massive repressions. For those concerned with peace and freedom in the world, however, the situation in Poland is a matter of grave concern.

The Polish people have historically been courageous and resourceful. That courage has been amply demonstrated in the past year and a half. Because of ideological constraints, though, their resourcefulness was never given a chance to unfold. So much energy was dissipated in political confrontation—always with an eye cast eastward toward the Kremlin—that the real problems of Poland were never addressed. Now the typical Soviet solution—brute force—is going to be tried. It is my fervent prayer that the measures adopted by Premier Mojciech Jaruzelski and the newly formed Military Council will be short lived. The Polish people have too much talent and vigor to be permanently harnessed by a military regime. The spirit generated by Solidarity was leading to the independence and eventual prosperity of the Polish nation. The unhealthy influence and threats of intervention by outside powers—specifically the Soviet Union—has again stifled the potential of a great nation.

It should be clear by now that political arrests and force only postpone a solution to national problems. A permanent solution to Poland's problems can only be achieved with the free expression of the ideas, talents and energies of her people. Let people everywhere who are free to speak their minds come to the defense of the Polish workers and her patriotic citizenry. Peace, prosperity, and freedom are the key to continued peace, prosperity, and the development of freedom in Europe and in the world.●

INEQUITY IN SOCIAL SECURITY RETIREMENT BENEFITS

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. LONG of Maryland. Mr. Speaker, I am delighted to join my friend and colleague, JACK BRINKLEY, in bringing the social security notch

problem to the attention of all Members. My bill, House Concurrent Resolution 192, and Mr. BRINKLEY's bill, House Concurrent Resolution 222, seek to correct this inequity in social security retirement benefits.

Mr. Speaker, I have received many letters from constituents who were shocked to learn that they will draw substantially smaller retirement benefits from social security than many of their fellow workers, simply because of a small difference in age. People who are turning 65 and preparing to retire in 1982 find that their social security checks will be as much as $110 a month less than those of workers retiring at 65 this year. Why, they ask, should we get smaller social security checks when we paid the same social security taxes and had the same work records?

Simply stated, this sharp disparity in benefits, the so-called notch problem, results from adverse economic conditions unforeseeable when Congress made changes in 1977 in the retirement benefit formula. Although Congress tried to avoid creating a notch problem by providing a transition period from the old formula to the new one, the transition rules did not work as intended, largely as the result of continued inflation. Everyone born in 1917—all who turn 65 in 1982, and thereafter—will be sharply and unfairly penalized by the present formula changes, combined with economic conditions.

Mr. Speaker, the notch problem needs to be corrected. Indeed, the National Commission on Social Security, after extensive investigation, agreed that this disparity in benefit amounts was unjust and that steps should be taken to resolve it. My bill, House Concurrent Resolution 192, and Mr. BRINKLEY's bill, offer possible solutions. I urge my colleagues to join in resolving this critical problem.●

INVESTING U.S. PENSIONS ABROAD

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. FLORIO. Mr. Speaker, the Congress has often been criticized for governing too much by hindsight, that we do not exercise sufficient foresight to see problems developing in order that we may act before a crisis results.

One specific area that demands foresight is the increasing trend toward investing U.S. pension assets abroad. I am disturbed that this trend could develop into a serious problem with the result being a loss of jobs for U.S. workers.

Billions of dollars of pension funds of U.S workers are being invested overseas to earn a higher short-term yield. The irony is that these funds are helping to build the industrial strength of Japan, Germany, and other nations and the result may well be more jobs for foreign workers and fewer jobs for workers here.

Pension funds totaling $653 billion in 1980 are the largest single source of funds for U.S. capital markets. Private pension fund assets totaled $450 billion at the end of last year, an increase of 100 percent since 1975.

The danger we are facing is that U.S. industry will need more capital to grow in the future than can be generated by corporations themselves.

So, we are facing a serious financing gap. Next year the U.S. corporate financing gap will be about $20 billion. In 1986 it will grow to about $66 billion.

But by 1990 the U.S. capital financing gap will soar to about $136 billion. And that is almost exactly the amount of U.S. pension assets expected to be invested abroad at that time.

In light of these projections, there is good reason to raise questions about the investment of U.S. pension assets abroad.

Because of this concern, my Subcommittee on Commerce, Transportation, and Tourism will hold a foresight hearing Tuesday morning. Since the subcommittee has jurisdiction over the insurance industry, the hearing will focus on the potential impact of overseas investment of pension portfolios managed by insurance companies.

We hope to develop information about the present and future capital needs of U.S. industry, the dynamics of the foreign diversification of pension assets and the public or social purpose of pension assets.

We realize the need to balance the demands of pension funds to earn the highest rate of return to insure adequate resources and reserves will be available for American workers when they retire.

We also recognize that diversification, including foreign investment, may be required for pension fund integrity and safety.

But at the same time, there is legitimate concern on the part of current workers that their deferred wages, as represented by pension contributions, are being used to invest in overseas facilities that jeopardize U.S. job security.

Our hearing, therefore, will appreciate the need for evaluation of the need for high earnings on the investment of pension funds, as well as the need for capital to build our productivity here in the United States.●

PETER A. BOZICK

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. HOYER. Mr. Speaker, we are fortunate in Prince Georges County, Md., to have a number of men and women who see public service as an integral part of citizenship. On December 16, one man who has served Maryland and Prince Georges County, in particular, will be honored for his many contributions to the political scene.

Peter A. Bozick has been a State senator in Maryland since 1971. He will officially leave office on January 4, 1982, when he will transfer his residency from his current address in Camp Springs, to his new home in Dunkirk, Md. While I hope that Senator Bozick continues his political career in Dunkirk, I wanted to take a moment to note his many accomplishments while serving Prince Georges County.

Senator Bozick was born in New York City and came to this area in his early years. He attended Baltimore City and Baltimore County parochial and public schools and received his bachelor of science degree from the University of Maryland. During the war, Bozick served his country in the Office of Strategic Services. He also attended the Johns Hopkins University and the University of Baltimore School of Law.

Soon after Senator Bozick moved to Prince Georges County, he began his career in public life, serving, in 1965 to 1970, as a commissioner, and chairman, of the Washington Suburban Sanitary Commission. The senator also took an active role in reshaping the structure of our county government, serving as a member on the Prince Georges Community Goals Committee and the Prince Georges County Charter Advisory Committee.

Mr. Bozick was appointed to the State senate in 1971 and he won reelection in 1974 and 1978. As a State senator, Mr. Bozick won needed funds for Prince Georges County as a member of the prestigious budget and taxation committee. He also was active on the Chesapeake Bay Commission which reviews plans and actions concerning the bay.

Mr. Bozick's leadership abilities and expertise have been of vital importance to our State. He has fully understood the meaning of public service and has rendered it with integrity, concern, and candor.

Mr. Speaker, I know you would want to join with me in saluting Peter Bozick for his many achievements and for his dedication as a true public servant.●

AL BARKAN—THE ARCHITECT OF LABOR'S POLITICAL ROLE RETIRES

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. SOLARZ. Mr. Speaker, this January one of the architects of labor involvement in the world of politics retires after 19 years as national director of the Committee on Political Education of the AFL-CIO.

Al Barkan practically invented political action committees. Many of today's PAC's, including rightwing ones, have modeled themselves on the innovative and practical model Al created at COPE. Under his effective leadership the AFL-CIO PAC was a positive force for political education and effective action.

A dynamic platform speaker, Al Barkan tirelessly crisscrossed the country, appearing before audiences of workers in big cities and small towns, stirring up union members to get involved in the important political and economic issues of the day. But despite the pressures of his work, Al Barkan always had time for his friends and coworkers; whether they were clerks, Congressmen, or union officials. The zest and enthusiasm which characterized his 27 years of organizing, building, and improving COPE will be a major challenge for all who come after him.

He has left a mighty imprint on the American political scene through his efforts to increase workers participation in the electoral process and thus improve the well-being of millions of Americans.

Mr. Speaker, I am proud to pay tribute to this wonderful man, and to say how fortunate I am to count him and his family as friends. Al's sister, Gertrude Iris, is an able volunteer worker in my Brooklyn office and I must say that she, too, is blessed with the same gracious manner and dedicated zeal that characterizes her brother.

We here in Washington will sorely miss Al Barkan—but we won't be able to forget what he has done through 35 years of dedicated and effective trade unionism to affect the course of this Republic.

I am proud to have this opportunity to recognize and pay tribute to the outstanding achievements of Al Barkan, and to express my personal thanks to him for all that he has done for me, for the Democratic Party, and for the people of our Nation.

Mr. Speaker, I insert an editorial from COPE's "Legislative Alert" on Al's place in political history to be reprinted in today's RECORD:

AL BARKAN—A PLACE IN POLITICAL HISTORY

In early January, Al Barkan will retire after 35 years in labor political action—the past 27 of them with COPE, and the last 19 of those as its National Director.

He is a unique man, with a unique and secure place in the political history of these three decades—both for all he's been and all that he's done. He is the architect of a labor political structure built on a firm foundation and built to last.

If political programs are to be judged by a standard of election wins and losses, the COPE record under Al Barkan's leadership is unmatched by any PAC or party. During his lengthy stewardship, 62.9 percent of all COPE-endorsed candidates for President, U.S. House and Senate and governor were elected.

If political programs are to be judged on the degree of citizen participation they generate, COPE's record under Al Barkan again is unequalled. More than 140,000 union members, their spouses and offspring participate year-around in their communities as volunteers in the COPE registration, education and get-out-the-vote programs.

The result of their efforts has been a dramatic increase in union member participation in the democratic process. Whereas 20 years ago, union members registered and voted in numbers 10-15 percent lower than the electorate-at-large, they now register and vote in numbers 10-15 percent higher than the general voting public.

If political programs are to be judged on the degree of innovation they introduce, COPE under Al Barkan has been a trailblazer. Barkan began moving labor's political activities into the computer age in 1965. Today, in the COPE computer are the names of nearly 15 million union members. Because of this constant urging over the years, all State AFL-CIO bodies and virtually all international unions now have staff people working full time on political programs.

In every respect, the COPE program is stronger, better organized and more effective than it was 20 years ago. This is Al Barkan's legacy to the labor movement he has served selflessly.

Nothing in him as an individual or leader smacks of personal vanity or aggrandizement. Everything he has done as COPE National Director has been motivated by his determination to serve through political education and action the purposes of the AFL-CIO, the well-being of the millions of members it represents, and the nation itself.

The COPE Al Barkan built has countless admirers and imitators in the political field, even among its foes. Many "new right" PACs openly patterned themselves after the COPE structure and program that Al Barkan developed.

Director Barkan has been a mover, a motivator, an innovator, an inspirer. From the platform, he is pure dynamite. No one who hears him address a labor audience fails to be galvanized by the energy, drama and enthusiasm he pours into a speech.

Off the platform he has been a forward-looking and innovative leader, a builder, a person admirable both in achievement and character, an extraordinarily considerate and decent person to work for and with.

In his case, the person and the job were one—a perfect fit.

The COPE structure Al Barkan developed inevitably will be embellished and altered by time, circumstances and events. But always, ineradicably carved in its cornerstone, will be the name of Al Barkan.●

UCO, INC.—50TH ANNIVERSARY

HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. DYMALLY. Mr. Speaker, I am pleased to bring to the attention of the Members the fact that UCO, Inc., will celebrate its 50th anniversary—today Monday, December 14, 1981.

In just 50 years, UCO, Inc., has grown from a small sole proprietorship into one of the largest privately held corporations in America. From its modest beginning as a gasoline retail operation, UCO has been transformed into one of the world's leading independent marketers and shippers of petroleum products. If it were a public company, UCO would have ranked 250th on the Fortune 500 list of prominent companies in 1981.

Earlier this year, UCO divested one of its major oil related companies. This decision proved a significant step in the evolution of UCO as it reflected an ongoing tradition of parlaying strength through the sale and acquisition of assets and companies.

Today, UCO, Inc., is a diversified corporation with divisions active in real estate investment, aviation, construction, shipping, and the international oil industry.

Long term planning and strength in management have contributed largely to UCO's success. The company has earned an enviable reputation for its ability to respond quickly to changes in the business climate and to prosper by maximizing investments in areas of high economic growth. This is a legacy UCO intends to protect and enhance.

As UCO, Inc., enters its second half-century of operation, UCO looks with pride to their accomplishments and enthusiastically welcome the challenges to be faced in a dynamic and changing business world.

I join with UCO's many friends and customers in coveying to them best wishes and success in their future endeavors.●

REMARKS OF KEN HOLUM—III

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. DASCHLE. Mr. Speaker, the conclusion of Mr. Holum's remarks deal with the frustrations of balancing competing needs for energy development and environmental protection. He deals with complex matters based on a wealth of experience and in the same straightforward manner that has allowed those of us who know him to work, learn, and debate with him over

the years secure in the knowledge we might disagree but would always come away from our discussions understanding more than we had before. His remarks continue:

Will these changes be made or proposed to Congress?

Will unsuitability for mining requirements be modified in coal areas to reduce harassing litigation? In both cases, I hope so, yet, with mixed signals on both, we again must wait and watch.

As for the federal coal management program developed during the Carter Administration, we saw on limited lease sale before the change of administrations—quite a record for four years of work. Under the Reagan Administration we've seen a small number of public competitive lease sales conducted. There have been no "public body set-aside" tracts offered except for one allowed at the request of Alabama Electric Cooperative for a sale in Alabama later this month. The law requires a reasonable number of tracts be set aside for acquisition by government bodies, rural electric cooperatives, municipal utilities and other public entities. Will this provision be vigorously pursued? We must again wait and see.

At another earlier Mid-West annual meeting during the administration of President Carter and Cecil Andrus, I commented sarcastically that their water resource management program contemplated storing the precious fresh water of the Rocky Mountains and the arid high plains in the Gulf of Mexico. For four years they managed a program consistent with my sarcastic comment.

As we watch and wait, our limited fresh water supplies continue to find their way to the Gulf of Mexico. So far at least the only discernible difference between the Carter and the Reagan Administrations is found in their rationale for inaction—Carter with his hit list yielded to the professional environmentalists; Reagan proposed to invest our financial resources in MX missiles and B1 bombers and then says we can't afford resource development to strengthen the country's economic base.

Carter didn't build the Gregory pump back storage project—do you think Reagan will? Do any of you expect meaningful new starts on multipurpose water resource development in the Missouri Basin or your individual states during the Reagan Administration? If you do—I hope your optimism is justified.

The Staggers Rail Act has stripped captive shippers such as coal users from any real protection against monopoly rail carriers. Deregulation of railroads seems to have blown the roof off rail rates for hauling coal and it is still not apparent there is any reasonable ceiling on the prices the railroads can charge. The Burlington Northern is moving aggressively to raise rates for hauling coal for all of its utility customers. Instead of making reductions and service adjustments flexible, deregulation seems merely to have led to increased rates and increased abandonments. Again, we wait and watch and worry about our obligation at Western Fuels for getting goal delivered to our members at reasonable defensible rates.

While the Staggers Rail Act has unleashed the railroads to demand higher tariffs and escalation formulae that bear little relationship to reality, the Administration has moved—either independently or in concert with the railroads—I don't know which—to diminish the effect of existing or potential competition.

On one hand they recommend user charges, higher taxes on fuel for tugs and a variety of other measures that will significantly increase the cost of moving coal and farm commodities on our inland waterways. Simultaneously, they oppose national eminent domain legislation for coal slurry pipelines on states rights grounds—while ignoring the national interest. I can assure you that both decisions are being cheered in railroad board rooms and executive offices. They are not in the best interest of consumers.

There also is clear evidence that President Reagan's Economic Recovery Tax Act, passed by Congress last July, is hurting the demand for tax-exempt bonds. The law decreases tax rates, increases an individual's ability to shelter earnings in an individual retirement account, taxes capital gains at only 20 percent, and defers taxes on reinvested dividends, leaving fewer individuals in the market for tax-exempt bonds—the life blood of consumer-owned utilities.

This law also has effectively repealed corporate taxes, giving investor-owned utilities who already have little tax liability an opportunity to sell tax advantages they are unable to use themselves. As a result, investor-owned utilities have access to massive amounts of interest-free capital while municipal and cooperative utilities are faced with the need to finance a total of $11 billion in 1982 without federal assistance. This structural change in the credit markets is drastically altering public power's competitive position in financing. With interest rates at unacceptably high levels, the impact upon consumer-owned utilities is cause for real concern. The facts are that investor-owned utilities can now finance at more attractive rates than publicly owned utilities and rural electric cooperatives.

I had this in mind as I read the Washington comment column in the November issue of Electrical World. If Mel Ray, the author, is right, the Reagan Administration is concerned that electric power supplies may not be adequate to supply demand when economic recovery occurs. I agree that electric power shortages in the future are a real possibility. Apparently they are seeking ways to assist and encourage investment by the investor-owned utilities beyond the generous help provided by the Economic Recovery Act.

I wonder what they have in mind for the rural electric cooperatives? Will REA's loan guarantee authority be increased? Interest rates lowered? Do they expect economic recovery in rural America? What will they do to encourage investment in new facilities by municipal electric utilities?

This, then, is my agenda for judging the Reagan Administration in the resources area. We must see definitive action on the following issues:

Federal coal leasing and management program, including public body performance;

Federal Clean Air Act amendments;

Competition among coal transportation alternatives;

Adequate and competitive financing of consumer-owned utilities;

Support for a vigorous REA program; and

A new start for public interest, multipurpose water resource development.

Based upon this agenda and their performance, I will either lead a cheering section for the Reagan Administration at this time next year or continue to sound as though nothing good has happened since the Johnson Administration.

Now you—and I—can only wait and see.

I suggest you not consider my wait-and-see attitude an expression of personal optimism.●

SUPPORT FOR H.R. 5180, TO COVER HOSPICES UNDER MEDICARE

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. WAXMAN. Mr. Speaker, on Friday I joined with my colleague, Mr. PANETTA, from the State of California to introduce H.R. 5180, a bill to provide hospice care under the medicare program. We were joined in this effort by a number of distinguished colleagues from both sides of the aisle who are widely recognized for their expertise in health issues and the problems of the aging. I believe this bipartisan support indicates widespread concern about the need for Federal programs to recognize the value of the hospice alternative and to provide a humane alternative to hospital care for the terminally ill.

I have followed the evolution of the hospice movement in this country with a great deal of interest over the past years. Hospices provide care and services to patients and their families to help deal with the pain and other symptoms associated with terminal illness. They were developed as an alternative to the often impersonal, high technology acute care that terminally ill individuals are generally confronted with. Their growth demonstrates that they fill a need which has been widely perceived. Since hospices offer a unique combination of compassionate care and potential cost effectiveness, they merit being included in our Nation's health financing programs.

In making the hospice benefit available to the medicare population, we must be sensitive, however, to the problems which will occur if we do not design coverage and reimbursement standards with great care. The hospice movement has thus far been characterized by compassionate care givers, and we must be careful to design the program to assure that we will retain the essential nature of that industry. It would be tragic if the availability of medicare reimbursement drew persons into the field who were concerned more with the money to be gained than with the provision of a humane alternative for the terminally ill. Nothing could hurt the hospice movement more. I am convinced in my discussions with leaders in the hospice movement that they are keenly aware of this. They have cooperated fully in working with Mr. PANETTA to design this legislation to minimize the likelihood of abuse and problems. One unique feature of the bill, for example,

is the requirement that GAO report on the experience with the reimbursement system within 2 years, and provide Congress with recommendations for any necessary changes. As this legislation moves through hearings, further safeguards may be developed. Certainly H.R. 5180 provides a strong framework to move ahead.

I believe one of the strengths of the current hospice movement is its reliance on volunteers—including family and friends. This legislation recognizes that. Further, it is my hope that we can construct a better way to use the reimbursement system to further encourage and reflect the role of volunteers in providing hospice services.

We await a CBO estimate of the cost of adding the hospice option to medicare. My own belief is that this benefit can and will be cost effective if it is designed properly. The bill I am cosponsoring with Mr. PANETTA is a good first step to bring about the necessary changes in medicare. I believe many of our colleagues in the House will want to support it. I look forward to working with them to make hospice care a reality in the medicare program.●

HAITIANS MARCH ON WASHINGTON

HON. SHIRLEY CHISHOLM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mrs. CHISHOLM. Mr. Speaker, this past weekend over 6,000 Haitian Americans and their supporters marched on Washington to urge the release of their countrymen from detention camps and Federal prisons around the country. Our colleague, Congressman WALTER E. FAUNTROY, chairman of the Congressional Black Caucus, addressed the rally and march on the Monument Grounds along with Rev. Benjamin Hooks, executive director of the NAACP. I have included Congressman FAUNTROY's remarks for the benefit of our colleagues. I am hopeful that his remarks will inspire a change in our Government's policies toward Haitian asylum seekers.

DEMONSTRATION REMARKS BY HON. WALTER E. FAUNTROY

To my brother and colleague in the freedom movement, Ben Hooks; Father Adrien, fellow demonstrators; on behalf of my colleagues and myself, the eighteen members of the Congressional Black Caucus, let me say thank you for being here today and helping to bring to the conscience of our nation the plight of the Haitian refugees and the suffering of our brothers and sisters in Haiti.

I come here also in a spirit of solidarity with my colleague on Capitol Hill, Congresswoman Shirley Chisholm, that great drum major for justice for the Haitian refugees.

I come today primarily to send four messages to four groups that have a responsibility with regard to the Haitian refugee issue.

I bring these four messages to these four groups with the hope that our nation can begin the necessary dialogue that we need to have with regard to the purpose, the ethics, and the principles that ought to define our refugee and immigration policies and practices.

MESSAGE TO THE REAGAN ADMINISTRATION

The first message is to the President, the Department of State, and the Department of Justice and it is one of outrage at the harsh treatment of Haitian refugees manifested in a program to interdict Haitian refugee boats on the high seas. It is a message of outrage at the harsh policy of cruel and punitive detention of Haitian refugees. Unfortunately, I can not say that we in the Congressional Black Caucus are surprised by the Administration's action on interdiction. Its alarming tilt toward the racist government of South Africa, its recent announcements about refugee allocations and its decision to eliminate the "extended voluntary departure" program for Ethiopian nationals are all indicative of this Administration's total disregard for the human rights of Black refugees. This country has continued, despite a change in our refugee law, to show a decided preference for refugees from communist regimes. This ideological bias is compounded by the obvious pattern and practice of racial exclusion. For example, Ethiopians, fleeing from a Communist regime, have had to meet a rigid and unrealistic standard of proof in their asylum claims not required of persons seeking asylum from the Soviet Union or other Eastern European countries.

As we stated in our letter of August 13th to President Reagan, interdiction is clearly a violation of the U.N. protocol relating to refugees and Article 13 of the Universal Declaration of Human Rights which guarantees the right of a person to emigrate. At a hearing before the House Judiciary Committee on the refugee allocation for FY 1982, Under Secretary of State Walter J. Stoessel stated that one of the reasons for the increase in refugee admission numbers for the Soviet Union is to send a signal to that country that the U.S. opposes their restriction on emigration in violation of the universal declaration of human rights. Yet, somehow these violations don't seem to matter when it comes to Black refugees. Interdiction is enforcing Haitian law which makes it a crime to leave Haiti without a visa from the Government. The Haitian law is identical to the exit visa requirements in the Soviet Union. But we have applied a different standard in dealing with Haitian refugees. Further, our policy is also decidedly different in comparison to our treatment of Indochinese refugees who are also fleeing by sea.

In response to the continuing pattern and practice of bias in our country's refugee policies the Congressional Black Caucus announced on October 1st that there would be a reassessment of our support for the reauthorization of the Refugee Act in 1982. At that time we noted that the Conference Report on the Refugee Act of 1980 passed the House by only a four vote margin. Our message to the Administration is clear and in the words of Jesse Jackson it is: "Cut us in or cut it out."

In the interim, we in the Congressional Black Caucus will be pursuing legislation to provide the institutional reform which we believe is necessary if due process and equal protection is to be afforded to all claimants for refugee status or asylum. We are interested in the creation of an independent corps of asylum officers positioned outside of the Immigration and Naturalization Service and free of the geopolitical bureaus of the Department of State. Such a corps of asylum officers should be knowledgeable in the requirements of the Refugee Act of 1980 and the United Nations Protocol relating to refugees as well educated on the political, social, and economic conditions in source countries which are generating refugees. There is a need to establish one layer for appeals of decisions against applicants for asylum through an independent appellate review board which is also free of the ideological, national origin, and racial bias so prevalent in the treatment of the Haitian refugees and others.

We will also be pushing for change so that mass asylum situations such as in the case of the Haitian refugees will be treated in the same manner in which we evaluate refugee claims, that is humane processing which avoids the long periods of detention in federal prison as well as the disgraceful form letter denials for Haitian asylum claimants.

Finally, let me say that interdiction, detention, and denial of due process to Haitian refugees is a policy decision made by an Administration which chooses to define our foreign policy challenges exclusively in militaristic terms. It is evident that the Reagan Administration does not yet have the political maturity to implement a refugee policy which is free of ideological and racial bias. Rather, this Administration has chosen to align itself with racist elements at home and abroad.

The causes of the Haitian refugee phenomenon are political, social and economic in nature and reflect a basic lack of justice in Haitian society. A resolution of the Haitian refugee problem will require that the governmental sector Haiti reverse its position and make a commitment to political freedom. It must also remove itself as a barrier to development for the poorest of the poor in Haiti. Until these steps are taken, refugees will continue to leave Haiti with or without a program of interdiction. It is time for the Administration to get with the Government of President Duvalier on the issue of corruption, human rights, and complicity in the desperate flight of Haitian refugees.

The message to the Administration is to engage with us in a serious dialogue on the Haitian refugee issue; don't ignore us for we in the Congressional Black Caucus are in touch with our constituency and know the anger which your policies toward the Haitians are igniting and the chaos that awaits if the present course is not changed to one that is rational and humane. We can and want to be part of a solution based on justice.

MESSAGE TO THE VOLUNTARY AGENCIES AND THOSE ENGAGED IN REFUGEE RESETTLEMENT

The second message that I want to send today is to the religious community, those working with the voluntary agencies and engaged in refugee resettlement.

This is a message wrapped in the spirit of speaking the truth in love to my brothers and sisters who have provided such wonderful and humanitarian service in resettling the hundreds of thousands of people who because they were fleeing from our ideological adversaries were fortunate enough to be officially called refugees.

The message is that in doing God's work of bringing good news to the poor and displaced we must be concerned with all the poor and displaced. There must be a concern for all the "boat people", the boat

people from Indo-China yes, the "black boat people", from Haiti yes, but also the sons and daughters of displaced rural black sharecroppers new faced with unemployment and a future of despair accelerated by cold and cruel budget cuts placed on the backs of the least among us in our society.

There are grave disparities in treatment within the refugee program and between the care and concern correctly being given to those we officially call refugees on the one hand and those we do not; such as the Haitian refugees. There are grave questions of equity between those we call and resettle as official refugees and those in our inner cities, born here, neglected and forgotten, now without job training, job placement, and without the prospect of a job or a future.

Common sense tells us that this is unjust and a prescription for resentment, rage, and chaos.

The message to the voluntary agencies and the resettlement community is that we in the Congressional Black Caucus want to intensify the dialogue that has begun on these questions of equity and the requirement to be concerned for all of God's children, the homeless, and dispossessed both here and abroad.

MESSAGE TO THE GOVERNMENT OF HAITI

My third message is to the Government of Haiti and it is that you will not get over by just talking that talk of negritude and Black pride and brotherhood but you will have to walk that walk by reordering your priorities and structures so that the voices of freedom can be allowed to speak and the Haitian people can benefit from the fruit of their labor. You have continously attempted to shift the responsibility for your own country's development and social justice to others. You have not demonstrated an interest in creating justice or enhancing political freedom for your own people. Haiti, which once symbolized Black liberation struggle as the world's first Black republic, under your present and corrupt and repressive policies can no longer lay claim to this proud heritage. This situation is one of profound sadness for the Congressional Black Caucus.

The Government of Haiti should know that the Congressional Black Caucus would be interested in a dialogue but only in a dialogue that is fixed on bringing good news to the oppressed poor of Haiti and not one merely based upon color. Being a brother is a matter of acting like a brother, it is a matter of the content of your character, not the pigmentation of your skin.

We in the Congressional Black Caucus are concerned about economic development in Haiti. But we are particularly concerned that our economic development assistance help the least of those the poor, and not merely support the lifestyle of the rich in Haiti.

Given the scarce resources we ourselves have for the poor right here in the United States of America it is our responsibility to be sure that the governments to which we provide assistance have a demonstrated commitment to enhancing the quality of life for the poor. The test of commitment is the willingness of the rich in Haiti to generate internal savings by cutting back their consumption of luxury goods to be used in programs to break the cycle of poverty, oppression, and despair.

You are failing this test miserably. Fully two-thirds of the development budget of Haiti is funded by foreign financial sources. Eighty three (83 percent) of your fiscal expenditures are made in Port Au Prince, which has only 20 percent of your population. The concentration of wealth in the hands of a few is simply outstanding. Four fifths of one percent (0.8 percent) of the population takes 44.8 percent of your national income. While 80 percent of the population lives in rural areas and depends upon agriculture for survival, government expenditures for agriculture are no higher than 7-10 percent of the national budget. Peasant farmers who are productive are threatened by coerced expropriation of their products and because of insecure land tenure and lack of credit are subject to loss of their access to the land, particularly in the more fertile areas. All too many wealthy Haitians connected to the government are permitted to place their earnings abroad. The tax structure is extremely regressive, taxing the basics produced and consumed by the poor, while leaving relatively untouched imported and non-essential luxury goods.

Government of Haiti, this must stop if you want a sympathetic ear from us in the United States generally and in the Black nation in particular. The answer is not to repress, jail, exile, or force into hiding those courageous journalists, agronomists, and community workers who have worked with the poor as you did last year on November 28, 1980. The answer is not to say as was recently said that "only the United States can save Haiti from Moscow." That is not credible. Haitians can save Haiti if given the chance and opportunity to participate fully in the political and economic life of their country.

Now finally, I want to remind the Government of Haiti of a message first delivered by my brother, now Mayor-Elect of Atlanta, Ambassador Andrew Young. In August of 1977 Andy Young told the truth in love to you during an official visit to your country. Andy said to you that "Imprisonment of the voices of freedom and dignity among the society, denying them access to their families, treating them with brutality, does not do anything to further the growth and development of a country. In fact it contributes ultimately to its downfall."

This is and was an eternally valid message from Black America to the Government of Haiti. I reaffirm it today.

MESSAGE TO BLACK AMERICA

My fourth and final message today is to Black America. For too long we have been left out of the formulation of immigration and refugee policy. We must now become involved because it is our right, our responsibility, and our interests are affected. Having spoken with several heads of organizations holding membership in the Black Leadership Forum, Benjamin Hooks of the NAACP the cosponsor of this much needed demonstration, Joseph Lowery of the Southern Christian Leadership Conference, Jesse Jackson of Operation Push, Carl Holman of the National Urban Coalition, and Dorothy Height of the National Council of Negro Women, I can report that we are ready to lead in the formulation of immigration and refugee policy and we see the treatment of the Haitian refugees as a primary concern. Additionally, we in the Congressional Black Caucus will be giving high priority to the placement of a member of the Congressional Black Caucus on the Subcommittee on Immigration, Refugees, and International Law of the Committee on the Judiciary. My message to Black America today also involves a time tested idea and political principle which this demonstration celebrates and that is that in unity there is strength. It is with this wisdom and idea in mind that we in Black America must address the difficult problems that must be faced with courage in the issue area of refugee and immigration policy. As we in the Black nation take up these difficult questions of immigration and refugee policies, particularly during these very hard and difficult times, we must have the wisdom and strength to resist demogogic appeals to bigotry against "strangers in our midst" that have always been used to divide and conquer those who otherwise might in unity be able to muster the political strength to bring good news to the poor. We in the Black nation must speak to the question of refugee and immigration policy with the wisdom of Dr. Martin Luther King, who once said:

"We are all caught up in a network of mutuality, wrapped in a single garment of destiny, and what affects one of us directly affects all of us indirectly.

"I can't be what I ought to be until you are what you ought to be. You can't be what you ought to be until I am what I ought to be. This is the inter-related structure of reality."

Now, before someone says "who needs to listen to Blacks on Refugee and Immigration Policy", I want to say a few more things. We in the Black nation here know the arithmetic of our political power in key elections in this nation, and come November, 1982 we're going to send a message to those who have been against us on budget matters, voting rights, Southern Africa, and yes, Haitian refugees. We may have to let down some Democrats and lift up some Republicans in Congressional Districts that our voters have kept Democratic for decades, but we are determined to send a message. We may have to bring down some Republicans and lift up some Democrats to keep you Republicans from gaining control of the House, and if that's what it takes, we're going to send a message next year.

The message is "Democrats, don't take us for granted anymore;" and "Republicans, ignore us at your considerable risk in your quest for power in our nation." We'll be voting next year on how you vote and act this year. And the Haitian refugee issue will be part of this equation. To skeptics about the power of the Black vote it may be instructive to ask Governor-elect Charles Robb of Virginia and Mayor Maurice Ferre of Miami about the importance of the Black vote in their recent elections.

Now, the absolutely last thing I am going to say is a message to all of us and it is that what is impossible with man alone is possible with God. The strength of Black people has always been in our spiritual and intellectual unity. I want to remind you that we in Black America met the challenges of the fifties and sixties with our spiritual strength embodied in our civil rights movement. My understanding of the Haitian revolution against the slave owners includes a comprehension of the deep African religious underpinnings of that historic struggle.

In Black America we got on the freedom road because a Black woman who had gone to church all of her life decided that she was tired of singing "I'm a child of the king" on Sunday, and not acting like it on Monday through Saturday.

So she sat down on a bus one day; and when she sat down a Black spiritual leader endowed with a liberal dose of intellect—named Martin Luther King, Jr.—stood up in a church one cold winter night and asked a teeming crowd of Black people who had as-

sembled to assess the condition of the dry bones of a dream deferred. "Can these dry bones live?" And when he did, somebody stood up and said, "Yes, Reverend. If the headbone connects to the neckbone and the neckbone connects to the shoulder bone, the shoulder bone connects to the backbone, the backbone connects to the hip bone, the hip bone connects to the leg bone, and these bones start walking around—somebody's going to hear the word of the Lord."

Before you knew it, Black Ph.D.s linked up with the A.B.s and the B.D.s and the "No-D-Goods" and they marched! In Montgomery, and Birmingham, and Selma they marched until the patter of their feet became the thunder of the marching men of Joshua and the world rocked beneath their tread; rocked until I could sit in the East Room of the White House with Martin Luther King, Jr. and watch President Lyndon B. Johnson sign a piece of paper that enabled me to get up and rush to the phone to call Andy Young, then Executive Director of the SCLC. I said, "Andy, Good news! Go tell it on the mountain, over the hills and everywhere. Tell our people that the day is over when we can be herded like dumb, driven cattle to the backs of buses. Tell them that the day is over when we can be denied access to the command posts of political power. Tell Lester Maddox, Andy, that either he will fry chicken for Black folks or he will not fry chicken." We met the challenge in the decade of the 60s. All of this we achieved in the 50s and 60s because we realized that our strength is in our own spiritual and intellectual unity.

But as Goethe has reminded us: "What we have inherited from our Fathers, we must earn again for ourselves, else we will lose it."

The plight of the Haitian refugees is such a reminder.

We can bring and have the obligation to bring our spiritual and intellectual unity to the question of the Haitian refugees. Your presence here today is testimony that we are ready to lead in the difficult national debate on refugee and immigration policy which we are beginning today.

God bless you.●

GLOBAL EDUCATION: THE OCEANS

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. WHITEHURST. Mr. Speaker, the article which follows appeared in the Christian Science Monitor on Monday, December 7. It was written by Jim Bencivenga, a staff writer for that paper, and I believe that it makes a strong case for the development of a national sea-grant college program.

I commend Mr. Bencivenga's column to my colleagues, and I hope that they will give it careful consideration:

[From the Christian Science Monitor, Dec. 7, 1981]

THE OCEANS

(By Jim Bencivenga)

Our earth is sustained in an endlessly rocking cradle of water.

From Prince Henry the Navigator of Portugal in the 15th century to Christopher Columbus, Ferdinand Magellan, and Captain Cook, early explorers had a hint of this startling fact. Modern scientists and environmentalists also are aware of our dependence on the one world ocean.

But not until the Apollo astronauts did mankind truly see its water planet for the first time. We saw "home" as a bright orb mantled in blue and framed by the black of space. Brown and green continents, partly concealed by lovely cloud patterns of white water-vapor, turned as islands.

The view transmitted by America's pioneering star-sailors affirmed there is no separation between the earth's destiny and that of the sea.

We peer out from island masses. With 70 percent of the globe covered by water the continents need to be undertood as patches of land in the ocean. And not, as in the past, as dominant land masses surrounded by water. The "difference" sounds subtle, but is actually enormous.

To understand ourselves we must understand the waters of the world. Our schools must teach this. The challenge for educators is immense.

No longer can students be timid bathers on the shores of global thought. They need to get their feet wet in more than disparate and haphazard marine-biology curricula. They must plunge into the full spectrum of the oceanic frontier if a common sense response to its potential is to affect their lives.

And like the tides that guided the first explorer's sailing ships, a number of contemporary currents are charting the course for more direct involvement by schools in oceanic education. They include:

A broad-based environmental awareness of the delicate balance of the coastal zone and the creative tension of competing claims made on it: by land developers, the fishing industry, and "sea-creation" (boating and maritime leisure pursuits.)

Maturing of the 13-year-old National Oceanic and Atmospheric Administration's (NOAA) Sea Grant programs, which seeks to do for marine research and education what the land grant colleges have done for agriculture.

Awareness of the Law of the Sea conference and the international consensus it is trying to hammer out—a first in the history of man.

The technological leadership of the United States in oceanography, offshore oil drilling, and deep-sea mining at a time when the US is looking to be more competitive in world commerce.

For Dr. John Bern, director of (NOAA), "The seas can no longer be looked at as barriers. They must be see as links; and the Law of the Sea conference is a clear example of this.

"Any time you can get 160 nations together to talk about common law it is very positive for the development of mankind. This positive side of increased ocean understanding is what must be communicated to students," he says.

Yet in talking with marine educators one barrier becomes clear: Ocean-related education has resided to long in the ivory towers of graduate schools of oceanography, naval and merchant marine academies, or institutes of naval architecture. The tide must change and ocean education must come ashore not only in undergraduate programs, but in elementary and secondary schools as well.

"The problem of oceanic education transcends the interest of the marine science community, the environmentalists, the oceanic technician. What we must deal with is the understanding of the American people at all levels," says Gilvin M. Slonim, president of The Oceanic Education Foundation.

With the television his classroom and countless viewers his students, one teacher who most links the 20th century to the watery world of Neptune is Jacques Cousteau.

"We are concerned about education, about what the ocean really means. And not only for resources, but for life—for quality life, which is what we have to assume," Cousteau says.

Gazing out the 32nd floor window of the Cousteau Society's island headquarters in Manhattan, Captain Cousteau says, "The goal of education is really to show the children there is something else than concrete in life. That they have to fall in love with these things in order to protect them and keep them as an asset, an incomparable asset. To own it, and to extend the scope of their life."

But there exists a tension between the specialist and generalist in oceanic education.

The trickle-down knowledge from specialized marine-research schools needs to take into account the fact that this country was "discovered" by sea; its forebearers came here in ships; the clipper ship was invented here; in World War II the greatest Navy and merchant fleet of all time was built here; that Herman Melville wrote "Moby Dick;" Richard Henry Dana produced "Two Years Before the Mast;" Ernest Hemingway told the tale of "The Old Man and the Sea;" and Anne Morrow Lindbergh gave us "Gift From the Sea."

Even our maps are all wrong when it comes to understanding our water planet.

"You must think in contour maps when discussing the sea—multilevel, multinational and multidisciplinary," says Mr. Slonim. "World geography is ocean geography."

"Despite 200 years of dependence upon the sea, the United States to date has failed to provide education pertaining to the seas within American schools," he continues. "At the water's edge an entirely new world of human enrichment, human enjoyment, of oceanic thought and action, of challenges to the mettle and spirit of men and women emerges.

"The most critical element which has been lacking insofar as seeking oceanic and global understanding by American citizens has been teachers who are trained, educated, motivated, and confident in their teaching of the full spectrum of disciplines to the world ocean, humanities as well as sciences," Mr. Slonim concludes.

This is not to say that institutions like Woods Hole Oceanographic Institute on Cape Cod in Massachusetts, or Scripps Institution of Oceanography in La Jolla, Calif., aren't important. They are the cutting edge of new research about the ocean deep: biology, chemistry, geology and geophysics, ocean engineering, and physical oceanography.

But the kind of student and curriculum these graduate schools serve are very specialized.

(Dr. Charles D. Hollister, dean of the graduate program at Woods Hole, offers this advice to the interested college science major: "Take an extra year and concentrate on mathematics and physics, then apply. I can't emphasize enough that math is the language of science and without a solid foundation in math a student can't talk

about what it is he or she will research about the oceans.")

Sea Grant is a crucial link in developing a broad understanding of the sea. It is the catalyst transferring the specialized knowledge generated at major maritime research universities to the broader public. This is done at the local level much as the county agent in agricultural extension programs.

In the last five years, in addition to its support of research and marine resource development, Sea Grant has begun to develop a marine environment education program. A spokesman states, "Sea Grant people are not going to be in there teaching the kids, but they will be helping those who are."

Sea Grant has set its sights on having at least one institutional marine education program in each of the 30 coastal states. Coastal states include the eight Great Lakes states as well as those directly bordering on the oceans. When inland waterways that give access to the oceans are taken into account, there are 40 coastal states.

An interesting sidelight to these classifications is that the state with the highest per capita boat ownership is the desert state of Arizona.

Uncertainty over budget cuts has caused concern among Sea Grant personnel. The Reagan administration's David Stockman, chief of the Office of Management and Budget, called for elimination of Sea Grant's $31 million budget. The House appropriated $21 million and the Senate $41 million. The issue now is before a joint conference committee.

Even with education about the oceans for everyone relatively new, there are still numerous marine studies programs in schools throughout the country.

Big city school systems, despite budget cutbacks, still have the resources to offer some students enhanced marine education curriculum.

Los Angeles County Public Schools offer a unique opportunity to study the marine environment aboard a marine science floating laboratory. Beach Channel High School, a magnet school in New York City, centers its entire curricula on oceanographic subjects from literature to the sciences. The Oceanic Studies program at McLean (Va.) High School began its seventh year this fall.

Classroom outings to coastal areas and whale watches along both the east and west coasts are some of the more popular field trips.

Speaking as a specialist, Dr. David Ross, director of Marine Policy and Ocean Management at Woods Hole asks: "Imagine 100 oceanographers in a country like Somalia. Compare the contribution they could make to the standard of living of the people there as compared to 100 physicists, or 100 military advisers? The coastal fisheries could be studied for the greatest return of protein. Harbor, housing, or mineral (oil) development could move forward. The possibilities are unlimited.

"Then imagine these 100 oceanographers in each of the countries throughout the third world. The transfer of technical skills would just be the beginning, the world could be changed," he emphasizes.

As a generalist Jacques Cousteau promises that love of knowledge about the seas will generate its own intellectual passion. "Leaning provides extension—extension by knowledge, by sharing, by love, and by creation.

"We cannot find happiness in contemplating ourselves; but we can find it in contemplating infinity. Reaching out, with our imagination, toward its majesty, it will in turn embrace us and inspire us."

For students, the sea is big enough for both the specialist and the generalist.●

FINAL PORTION OF MONOGRAPH ON THE LEGAL SERVICES CORPORATION

HON. ALBERT LEE SMITH, JR.

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. SMITH of Alabama. Mr. Speaker, I offer the final portion of Mr. Hammond's monograph on the Legal Services Corporation and hope my colleagues have found this exposé to be thought provoking and enlightening. I trust this information will help spur the Congress to correct the abuses of the Legal Services Corporation.

MISSIONARIES FOR LIBERALISM: UNCLE SAM'S ESTABLISHED CHURCH

(By Michael E. Hammond)

ALTERNATIVES TO THE LEGAL SERVICES CORPORATION

Block grants

The attraction of the comprehensive Social Services Block Grant approach is that state governments are permitted to set priorities among competing service bureaucracies. If enacted, state and local governments will be allowed to channel funds to those services which they feel are most urgently required.

If, as ABA Secretary and Legal Services Corporation board chairman F. William McAlpin contends, "it's not realistic to ask a welfare mother to take ten percent of the food out of the mouths of her children in order to pay for legal services," it may be equally "unrealistic" to require a diversion of funding from food and housing programs for the poor to a program that essentially puts money in the pockets of lawyers.

Apparently intimidated by President Reagan's recommendation that service providers be required to compete for resources under the control of state officials, Legal Services Corporation President Dan Bradley responded:

"I felt an atomic bomb had been dropped on the Legal Services Program for the poor . . . I wouldn't be surprised if [Legal Services opponent] Howard Phillips were not over at the Supreme Court building today with a hammer and a chisel, chiseling out the words 'equal justice under law.' [If the Legal Services Corporation is not funded,] there will not be justice for 30 million poor people in America."

The first problem with Bradley's exaggerated predictions of dire consequences is that Legal Services' current level of funding is historically unprecedented. In 1965, the Office of Legal Services was created within the Office of Economic Opportunity with a budget of $1.3 million. By 1975, that figure had grown to $90 million, rising to $157.4 million in 1978, $261 million in 1979, and $321.3 million for 1981. The 1981 figure, therefore, was three and one half times the amount authorized only six years earlier.

What McAlpin and his colleagues really fear is that states would not place legal services, as presently provided, high on the list of priorities for servicing the poor. New York Mayor Edward Koch indicated in a statement, "It has always been my policy that Federal financing of the Legal Services Corporation should be extended. But now priorities must be set. My highest priorities are mass-transit aid, the continuation of the food stamp program and aid under Title XX of the Social Security Act for the elderly and very young."

Similarly, a spokesman for New York Governor Hugh Carey stated that the Governor had not included Legal Services among items on a list of proposed Federal budget cutbacks to which Carey would have serious objections.

But, in other states, such as California, there is strong political support for local funding of legal services projects.

TAX INCENTIVES FOR LAWYERS

Congressmen Henry Hyde (R-Ill.) and John Ashbrook (R.-Ohio) have introduced H.R. 3929, a bill to provide tax incentives for the provision of free legal services to the poor.

Attorneys would receive a tax credit for voluntarily contributing legal services to the poor free-of-charge. The credit could not be invoked for types of representation which could not currently be funded by the Legal Services Corporation because of the restrictions contained in section 1007(b) of the Legal Services Act.

In addition, an individual could not take a legal services tax credit for representation of poor relatives, representation at criminal proceedings, or representation which would result in a credit exceeding 30% of the individual's tax liability for the taxable year.

The proposal would not be triggered until the attorney had given at least twenty hours of free services for which he received no tax advantage. After this initial $1000 worth of services had been provided, the attorney would be allowed to deduct fifty percent of the reasonable value of the legal services he provided free of charge to poor persons. A cap of $50 per hour, and a $1000 deduction ceiling would be imposed.

The advantage of the Hyde-Ashbrook tax incentive plan is that it would lead to a client-based, rather than a provider-based, system for assuring the poor equal access to our system of justice.

In other words, eligible indigent individuals would establish priorities for representation. This would contrast sharpy with the present system, in which the officers and employees of Legal Services projects are able to set priorities, controlling, as they do, a monopoly on the supply of a "free" service, the demand for which is potentially unlimited.

ALTERNATIVE FUNDING

Even without Block Grant funds or a system of tax incentives for lawyers to contribute their services to the poor, there are numerous alternative private and public sources of financing, including the Administration on Aging, Revenue Sharing, Community Development Block Grants, Titles IX and XX of the Social Security Act, CETA, VISTA, United Way, and many more.

Los Angeles County Bar Association president and LSC supporter Joseph Mandel concedes that private contributions from individuals and entities such as the United Way can be expected to increase somewhat if Legal Services Corporation grants are eliminated.

Prepaid legal insurance is another significant way of meeting genuine legal needs.

Private lawyers can also be expected to increase their already extensive provision of free legal services to the poor. Currently, for example, the Los Angeles Bar's Mandel

estimates that members of his association are annually providing more than $2-million of free legal services to the poor. The Columbus (Ohio) Citizen-Journal paraphrases as similar sentiment by Legal Aid Society of Columbus Executive Director Douglas Rogers: "Before the government got into the legal aid business, private lawyers provided the poor with free help."

For some unexplained reason, Rogers felt that "times have changed," and that these private lawyers would be more reluctant to service the poor today. If some members of the American Bar Association have their way, attorneys may not have a choice. A resolution currently under consideration by the ABA would require that lawyers provide a stipulated amount of pro bono work as a condition of practice.

Other approaches are possible. In Sacramento, Democratic State Senator Nicholas Petris of Oakland introduced a state bar-sponsored bill which would allow interest on client trust fund accounts to be used to pay for legal services programs for the poor. The bill is similar to legislation which has been approved in Florida.

In a commencement address to Widener University's Delaware Law School, Presidential Counsellor Edwin Meese III advocated "a variety of mechanisms such as the Judicare program in which individual lawyers render service and then present their bills to be recompensed as in the case of Medicare." He went on to discuss utilization of volunteer Legal Services by Legal Aid Societies, expansion of Legal Services provided by individuals on a pro bono basis, and the enhancement of law school clinical programs serving the poor.

Finally, in 1979, Congress enacted the Dispute Resolution Act, which was designed to fund experimental state programs to shift minor controversies out of courts and into more informal forums. The notion was that, through the increased use of medication, small claims courts, peer adjudication, and other methods of informal dispute resolution, the costs of resolving these minor disputes—in which attorneys fees often far outweigh the amount in litigation—could be considerably reduced. This new program, which has not yet received Federal funding, should be given priority ahead of programs to fund more costly and formal methods of legal adjudication.

CONCLUSION

In considering the role of the Federal government in the provision of Legal Services, there are at least two important public policy questions to be addressed.

One of those questions relates to the inability of many Americans, not just the poor, to afford to sue because of economic constraint.

Contrary to the claims of Legal Services Corporation advocates, there must be some limits on the degree to which the American taxpayer, himself unable to afford legal services in many cases, must be required to hire lawyers for others.

Another equally, if not more important, public policy question is whether the fundamental accountability and legitimacy of our political system is undermined by subsidizing a group of advocates who, purporting to act in the interests of a class of the public, are accorded a specially subsidized place of influence in the arena of public policy debate.

The problems with the Legal Services Corporation can not be cured merely by the designation of a new board of directors, or the selection of a new headquarters staff.

The more than 323 organizations which are recipients of Legal Services funds enjoy a presumptive right to refunding which will not be affected by the appointment of Reaganites to vacancies on the Corporation Board. No recipient program can be closed down because of disagreement with its policy priorities, only on the basis of established violations of an Act which is itself admittedly full of loopholes. Even when violations occur, procedures are so arcane that it is virtually impossible to single out an abusive grantee for punishment or reform.

Nor would the appointment of a new board cure the fundamental structural problem in Legal Services: the staff attorney system.

No degree of regulation can adequately guard against the establishment of secular faith which results when some 17,000 individuals are given guaranteed annual salaries and authorized to engage in lobbying, litigation, grass roots organizing, media campaigns and the manipulation of Federal resources, to advance their particular notions of what constitutes justice for the public as a whole, or for a particular class.●

THE OIL COMPANY MERGER BLIZZARD

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. CONTE. Mr. Speaker, as you well know, this past week winter arrived with a bang in our part of the country. After the blizzard last Sunday, Boston had exhausted its snow removal funds that were supposed to last the entire winter. With a lot of snow, but not a lot of money, this could be a very harsh winter for the towns and for the people up there indeed.

There is another resource besides money which is in short supply now. While there is supposedly a glut of oil and petroleum products on the market now, there is at the same time a shortage of warmth, caused by budgetary constraints. I know in my district there are a lot of homes that are cold, colder than they should be for many people, such as the elderly, but cold nonetheless because warmth is expensive and unaffordable. I cannot tell you how many letters I have received telling me that heating and electricity now cost more per month than the mortgage payments on the house itself; how people wake up in the middle of the night during the summer, when it is 80° outside, wondering how they are going to pay their utility bills in the upcoming winter and keep their children warm.

Mr. Speaker, there has been a massive transferral of wealth caused by the incredible increase in energy prices over the past decade. That transferral of wealth has not gone solely to the OPEC countries. It has also gone to the oil companies who have reaped massive profits from the tenfold increase in the price of crude oil and from decontrol.

That increase, it is said, has one benefit, which is to increase the incentive of oil companies to find domestic sources of energy—petroleum and other sources like renewables—to liberate us from the cold kiss of OPEC crude. But how are the oil companies spending their OPEC-bloated profits?

Take the case of Mobil. Mobil is a large oil company, the second largest, in fact, after Exxon. Its net profit for 1980 was $3.3 billion, an increase of 63 percent from the previous year, from total revenues of $63 billion and total assets of $32 billion. It is one of four participants in Aramco, the oil production company in Saudi Arabia, but it has the lowest production of domestic crude oil and natural gas among the top five American oil companies. Furthermore, its reserves of domestic resources are relatively low. So what is it doing to improve its domestic production? Is it using its immense profits to explore for new sources of petroleum?

That depends where you look. If you happen to be on the floor of the New York Stock Exchange, you are likely to see Mobil's exploration team hard at work. Last year, $700 million of its $2 billion outlay for exploration and production in America was spent to acquire Trans Ocean Oil, Inc. The year before, it paid $792 million to acquire the oil and gas business of General Crude Oil. This year, however, it has gotten serious about its domestic exploration program. First, it tried to purchase Conoco for somewhere in the neighborhood of $9 billion, but it lost to Du Pont. Now it is trying to purchase Marathon Oil for $6.5 billion, and, failing that, is also trying to buy a portion of United States Steel, its competing bidder to force United States Steel to sell Marathon's prize asset, the Yates field, to it.

The potential effect of Mobil's original offer for Marathon on retail gasoline marketing was bad enough from an antitrust point of view that a Federal court has enjoined the purchase until the antitrust suit can be heard. And just this week the Federal Trade Commission stated that it would intervene to stop the takeover under the terms of the original bid.

Not to be stopped, Mobil has recruited Amerada Hess to form a joint bidding venture in hopes of eliminating the retail marketing antitrust problems.

Because of these latest developments in the bidding war, the debate on the takeover of Marathon is moving to a different level—whether we and the American people are expected to sit by and watch our money, paid in ransom to OPEC, and these companies have not hesitated to profit from OPEC's price fixing, be used not to find new domestic sources of oil,

but to buy up other companies who have already made substantial domestic discoveries.

Mr. Speaker, Wall Street has warned us that if this merger goes through between a first tier and a second tier oil company, there are a number of other second tier companies waiting to be grabbed—Getty, Sun, Union, Citgo, Pennzoil and Kerr-McGee, among others. As one former Harvard antitrust professor has said, permitting this merger to go through would be "like an invitation to race to merge." There would be a blizzard, Mr. Speaker, a blizzard of takeovers, resulting in a new breed of supergiant oil companies. Whatever competition that exists is in danger of being substantially diminished. And what would the consumer have? Not more oil, not cheaper oil, not more competition, but a foregone opportunity to liberate our country from Arab dominance and a promise to pay an even higher percentage of their scarce resources to an even more concentrated industry.

Before Marathon's resources are swallowed by Mobil, and before the threatened avalanche of other oil company mergers occurs, I urge my colleagues to put a hold on these mergers until we know what the effects of these mergers would be on the country. H.R. 4920, introduced by the gentleman from Ohio (Mr. BROWN), would be one way to do this. I also believe we should look at United States Steel's offer, for the reason that United States Steel has maintained that it is capital poor and cannot presently afford the cost of modernization of its steel plants and yet it can afford to make a $6 billion offer for an oil company.

Unless action is taken to stop this merger trend in the oil industry, the resulting concentration and lessening of competition could make this winter that is now upon us a symbol of the climate our citizens can expect—snow white and beautiful, but very cold and very austere.●

POUL HARTLING—HIGH COMMISSIONER

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. FISH. Mr. Speaker, amid the often unsettling news of human cruelty and violent conflict, we can derive comfort and encouragement from the knowledge that the work of reconstructing shattered lives continues. The Office of the United Nations High Commissioner for Refugees provides international protection and material assistance to millions of dispossessed people from many lands. The organization encourages nations to provide first asylum opportunities, and seeks permanent solutions to refugee crises through voluntary repatriation, integration into countries of refuge, and resettlement in third countries.

Poul Hartling, the present High Commissioner, fills one of the most delicate and demanding jobs in the world. A former theologian and educator, Hartling served as Denmark's Minister for Foreign Affairs from 1968 to 1971 and Prime Minister from 1973 to 1975. Shortly after his election as High Commissioner in 1977, Hartling poignantly observed that "there will always be refugees, but what is not understood and what encourages me is that they are not always the same people year after year looking for help." Under Hartling's leadership, the Office of the High Commissioner recently received its second Nobel Peace Prize.

In an interview with the Washington Post, Poul Hartling describes the uplifting experience of seeing desperate people rescued. I commend this article to my colleagues, because I believe the humanitarian work of the High Commissioner's office deserves our continued support. The article follows:

[From the Washington Post, Nov. 10, 1981]

BATTLE FOR THE LOST MILLIONS—THE U.N.'S POUL HARTLING AND THE REFUGEE TRAGEDY

(By Jacqueline Trescott)

Poul Hartling, the U.N. High Commissioner for Refugees whose agency just won the Nobel Peace Prize, has a favorite story. One young Vietnamese, whose boat to freedom had broken up, was rescued by a Norwegian ship. Deciding to settle in Norway, he survived the rigors of weather and language and passed a technical examination. "In the summertime, he went by train down into Europe, got a bicycle, biked to Geneva, because he [wanted] to see the high commissioner. He spoke to me in Norwegian. He had learned so much. That's encouraging. You have seen them in their destitute situation, but you have seen them rescued."

Sitting in a Washington office, the tall, pale man, whose concern and humor are barely hidden behind his gold-rimmed glasses, savors the success of an occupation in which the odds of winning are brutally low. He has experienced the trappings of world power as Denmark's former foreign minister and prime minister; now he mostly sees the pit of world misery. Over the last 30 years the agency he has headed since 1977 has resettled 25 million refugees, and the numbers keep growing. Yet Hartling's determination is continually reinspired by the human spirit of that young man from Vietnam and thousands of others.

This fall Hartling, 66, was in Pakistan visiting the Afghan refugees. In the desert where they were camped there was nothing but rows of tents and unflagging patience. "They have only one thing in their minds, to go back, when the possibility comes, to go back in dignity. There the impression was of a proud people, very dignified," says Hartling.

Hartling, who also establishes refugee policy with both the original and host countries, dispassionately re-creates his field work, careful to walk the thin wire between the tragic reality and sensationalism, the work and his own passion. "Sometimes there are impressions that go to the heart. Impossible to forget what you have seen," says Hartling. "If you are depressed that refugees still are coming, you cannot do the job. I sometimes say the picture is just like a hospital. The doctors see patients coming, sick people coming. If you say, 'I give up, more sick people are coming,' it's hopeless. But no, if you can help, more people are coming the next day, you can help some."

When Hartling visited a settlement in southern China this fall, his step was lighter. China had settled most of the Vietnamese refugees in state farms, but the 10,000 fishermen preferred a port location, so one was refurbished. "One of the captains had a family of 13 people and they lived in one boat. It was 6 by 3 meters. That was the space. Now, he said, 'They gave me a flat with three bedrooms and one sitting room. The sitting room is more space than before,'" says Hartling.

Now in its 30th year, the agency concentrates on the first phase of the refugee problems, saving the displaced from starvation and homelessness. The long-range goal is repatriation or integration in other countries. In the last few years, 200,000 Burmese have returned from Bangladesh, 100,000 Nicaraguans from Costa Rica and Honduras, and 150,000 Zairians from Angola. "What we want to do is go out of business," says Hartling flatly.

Though the estimates go as high as 18 million, the agency deals with the 10 million refugees who have been displaced by natural and social upheavals, and who have registered with the agency. Right now, the agency is helping 250,000 Southeast Asian refugees in Thailand, 1.7 million Afghan refugees in Pakistan, 700,000 Ethiopians in Somalia, and 500,000 refugees from various African states in Sudan.

That number is only a small indication of the size of the problem—including 5 million refugees on the African continent, and the latest flood of hundreds of thousands of Salvadorans in Central America. The agency does not even work with some problem areas, like Haiti, until a host government invites its participation.

Hartling's own involvement with refugee programs started 25 years ago when he was a founding father of the refugee council of a Danish relief organization, Danish Inter-Church Aid. The impetus had been the Palestinian refugees in Jordan. Then, as now, he enjoyed the small details as well as the larger philosophical questions.

After persuading drug firms to donate medicine that was outdated but still effective, he went to the shipping firms. "I said, 'You are going out anyway. Why not take a few cases? We are not going to pay for it.' That was exciting," he said.

Hartling feels that the Nobel Prize, which his agency also won in 1954 for its resettlement of European refugees, will again focus attention on the refugee problems, encourage other humanitarian organizations to participate and ease the task of fund-raising—$365 million this year.

Hartling turns to the small encounters for his inspiration—when "some of the children begin to be naughty, which is a very good sign," he says, laughing. On his last visit to Zimbabwe, he stopped by the office of the minister of interior, one of the 660,000 Zimbabweans he had helped return to his homeland. "He said to me: 'Do you remember where we met the last time, it was in Mozambique, in the camp.' He laughed," says Hartling. "When I came out of his

office, in front of his door there was a typist and she also said, 'I saw you in the camp.'"

The Nobel Prize notwithstanding, those moments might be Poul Hartling's real reward.●

THE POLISH CRISIS

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. MOFFETT. Mr. Speaker, today the attention of the world is focused on the Polish Government's dramatic crackdown on the independent trade union, Solidarity. Amid sketchy reports of arrests, strikes, and potential violence between workers and Polish authorities, the hopes which the free world has held for freedom in Poland are fading as the reality of totalitarian rule asserts itself once again on the Polish political scene.

While it is too early to tell how the current crisis will end, some of the gains made by the Polish workers' fragile experiment in self-determination will undoubtedly be lost. Press reports indicate that at least 17 leading members of Solidarity have been arrested, while the status of Solidarity leader Lech Walesa remains in doubt. Civil rights have been suspended, a curfew is in force, and communications within the country have been cut off. These drastic developments, while not entirely surprising, are a cause for sadness and fear for the Poles among those of us who have been following their valiant struggle against totalitarianism.

Mr. Speaker, the events in Poland over the last year and a half raised our hopes for freedom in that country. Unwilling to suffer further under a government that was unresponsive to the needs and aspirations of its people, the Polish workers took the initiative in a dramatic move to set up an independent trade union. This unprecedented action, heralded in the West and feared in the Warsaw Pact, renewed our hopes that the dismal repression endemic to Soviet bloc nations could be countered by the will of the people themselves.

The successes of the Solidarity movement continues. Its membership grew to include over half of Poland's 19 million workers, and it freely elected its own leaders. And finally, facing increasing intransigence from newly elected Communist Party leader Wojciech Jaruzelski, the union took the bold step of proposing a nationwide referendum on setting up a non-Communist government. Within hours, Poland's Communist government cracked down on Solidarity and declared martial law.

It is my fervent hope that, through bravery and perseverence, the Polish people will ride out this latest crisis, and retain the basic freedoms they have already won. As details unfold, in the days ahead, of the Jaruzelski government's intentions, we will be watching the situation in Poland closely, with great hope that the victories of the past will not be lost.●

ROBERT B. CULLUM OF TEXAS

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. COLLINS of Texas. Mr. Speaker, all Dallas was saddened with the loss of our great civic leader, Robert B. Cullum, who died at the Baylor University Medical Center with services held at Highland Park Methodist Church.

Mayor Jack Evans said that Bob's last words were "Take care of our town." Mayor Evans added that Cullum was a great citizen, was known all over the world as an outstanding leader in business, professional, civic, and philantropic circles.

Bob Cullum was a leader in all of the civic affairs of Dallas. In October, a secton of State Highway 362, leading to the gates of the State fair, was dedicated as Robert Cullum Boulevard. Earlier, he and his brother had been named "1981 Enterpreneurs of the Year" by their alma mater, Southern Methodist University.

For 9 years Bob served as president of the Texas State Fair Board. Honored at a luncheon, former Mayor J. Erik Jonsson said:

When leadership was needed, you give it with full measure. When you die . . . and you arrive at the pearly gates and are issued a harp, some wings, and assigned to a soft cloud, we know that in about 3 days you will be oiling the gates."

Bob had the best sense of humor of anyone in Texas. Being 5 foot 6 inches, he used to joke, "I am small—but I am frequent."

Bob Cullum and his brother, Charlie, started the Tom Thumb grocery chain in 1948 by taking over three bankrupt grocery stores. From this they built up the Tom Thumb chain which today has 132 supermarkets in the Texas midwest and west.

Let me quote for you some of the sections of the comprehenseive summary of Bob Cullum's activities as they were reported in the Dallas Morning News:

Bob Cullum became an influential force in the city in the 1960s as president of the Dallas Chamber of Commerce and a member of the Dallas Citizens Council, whose members were the most influential Dallas businessmen. He was one of the three Dallas negotiators who in 1964 and 1965 set in motion the plans for Dallas/Fort Worth Airport.

Cullum received the Linz award for civic service in 1962 and the Brotherhood Citation of the National Conference of Christians and Jews. In 1964, he was named the Dallas Press Club's Headliner of the Year. He received the SMU distinguished alumnus award in 1967.

Cullum was a past president of the Cotton Bowl Athletic Association, the Salesmanship Club of Dallas, the SMU Alumni Association, Dallas Country Club, Texas Wholesale Grocers Association and the Super Market Institute of America. He was a member of Highland Park United Methodist Church.

He was a director of the Dallas Council of World Affairs, the Greater Dallas Planning Council, the American Red Cross, the Children's Medical Center, Texas Research Foundation, Callier Center for Communication Disorders, Dallas Zoological Society, Southwestern Medical Foundation, the Better Business Bureau of Metropolitan Dallas, the SMU Board of Governors and the D/FW Airport Board.

He served on the board of directors of Dallas Power & Light Co., Dr. Pepper, Inc., Republic National Bank and Great National Life Insurance Co. He was director emeritus of Dallas Federal Savings & Loan Association.

In addition to his wife and his brother, he is survived by two daughters, Mrs. Betsy Bolin of Houston and Mrs. Houston R. Holmes Jr. of Dallas, two sons, Dan Rogers Cullum and Robert B. Cullum Jr., both of Dallas, and three sisters, Mrs. Mary Cullum Nash, Miss Eloise Cullum and Mrs. Alice Warford, all of Dallas.

The News summed it up well when they said Bob Cullum was—

Civic champion and business magnate, a grocery tycoon who liked to describe himself as "just a cabbage trimmer."

I have known Bob Cullum all my life. He represents the finest of the American traditions. Bob was a hard worker in business, a devoted family man at home, and a leader in every activity to build for a greater Dallas. The great thing about Bob Cullum was that when the going was tough and you needed someone in rough times, you could always count on Bob Cullum. I was proud to call Bob Cullum my friend. He will go down in Texas history as one of the greatest Texans.●

CONFERENCE ON SOCIAL SECURITY MINIMUM BENEFIT HAS TO BE COMPLETED BEFORE THE NEW YEAR

HON. RON MARLENEE

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. MARLENEE. Mr. Speaker, over 4 months ago, the House voted to reinstate the social security minimum benefit. For over a month, the conference committee on the social security minimum benefit has been deadlocked, leaving a large group of Americans unsure about their future.

There is no doubt that the House and the administration are unified in their desire to restore the minimum

benefit to those already receiving it. It is very important to settle this issue without further delay. Thankfully, the Social Security Administration has not mailed notices to minimum benefit recipients telling them their minimum benefit is due to be terminated. But, nonetheless, these people are living day to day wondering and worrying if their benefits will change.

Those receiving this benefit have a right to know where they stand. I urge the conferees to settle this issue once and for all, before we recess for the holidays.●

CORPORATE MINIMUM TAX REPEAL LEGISLATION

HON. BARBER B. CONABLE, JR

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. CONABLE. Mr. Speaker, I have today introduced for my distinguished Ways and Means colleague, Mr. BAILEY, and myself, a bill repealing the corporate minimum tax. We propose repeal of the corporate minimum tax; because it has not functioned equitably, it is not an impressive generator of tax revenues, and it operates in many cases to contradict and dilute the effectiveness of other provisions of the Tax Code which had been enacted to spur productivity and economic performance through capital investment for new equipment and plant modernization.

The corporate minimum tax is not a well-known feature of the Federal tax laws. It was enacted as part of the Tax Reform Act of 1969, along with the highly publicized provisions establishing a minimum tax on individuals. It will be recalled that the individual minimum tax was proposed following public revelations that some 154 taxpayers with adjusted gross income in excess of $200,000 paid no Federal income taxes in 1966.

For those of us in the House of Representatives, it may be of interest to know that the House bill which ultimately led to the Tax Reform Act of 1969 did not apply its minimum tax provisions to corporations. The inclusion of corporations occurred in a Senate amendment which was ultimately sustained in the House-Senate conference. Also, it is important to know that the mechanics of the minimum tax as proposed in the House bill were radically modified in the Senate, and the Senate version ultimately prevailed in conference. The minimum tax, as approved by the House, was a comparative tax, which operated as an alternative to the regular tax liability. The minimum tax as it appears in the Internal Revenue Code is an add-on tax over and above any regular tax liability.

Simply described, the corporate minimum tax is calculated in the following manner:

Certain statutory deductions and exclusions are designated as "preference items." For corporations, the three principal "preference items" are: The excess of depletion allowance deductions over the adjusted basis of the property; the untaxed portion of capital gains; and bad debt reserve deductions of financial institutions, to the extent such deductions exceed amounts otherwise permitted on an institutional experience basis.

All "preference items" are aggregated by the corporate taxpayer. To the extent that the aggregate amount of these "preference items" exceeds a corporation's regular corporate tax liability (after application of available tax credits), the excess is taxed at a flat rate of 15 percent.

Because there is very little legislative history available on the corporate minimum tax, we are left to speculate as to the underlying public policy rationale. If we look to the individual minimum tax as a guide, we might conclude that the corporate minimum tax was meant to be levied on highly profitable corporations, which used provisions of the Tax Code for their benefit in a manner not contemplated or intended, so as to dramatically reduce their tax liability or to avoid taxation altogether. If that was the conceptual objective of the corporate minimum tax, there is abundant evidence that it has not worked out that way in practice. In fact, the corporate minimum tax occurs most frequently in cases of low profitability or large deductions and credits for new plant equipment on some combination of these two circumstances. That this is the practical result should be no surprise. The very mechanics of the provisions suggest that such a result is almost inevitable. As profits decline, regular taxes will, of course, be correspondingly reduced, and "preference items," which arise in the normal course of business, while not large in relation to the size of the company, may nevertheless exceed the regular tax, and thus trigger a 15 percent minimum tax. Similarly, if a company is in a capital-intensive business, such as mining, and is making significant modernizing capital expenditures for equipment, the combination of the depreciation deductions and applicable investment credits may well reduce corporate tax liability in relation to depletion allowance deductions so as to trigger the 15 percent add-on tax.

Such results make no sense. Why should an episode of low profitability or the pursuit of a capital expansion or modernization program (precisely the results sought from accelerated depreciation and investment tax credits) produce for some companies a selective, add-on tax applied against a base, which is not, in fact, income. Our judgment, based on the evidence available to us, is that the corporate minimum tax appears to have few, if any, redeeming features and should be repealed.

I noted earlier that in addition to the perverse and inequitable effects produced by this tax, it has not been an impressive generator of tax revenues. For example, in 1977 the minimum tax produced $267 million from the corporate sector, as contrasted with $56 billion raised from regular corporate tax payments. Estimates are that the corporate minimum tax will produce $350 to $400 million in taxes in the current fiscal year.

The ultimate illogic of the operating effects of this tax are probably best illustrated by a company which has "preference items" and which suffers an operating loss. Obviously, its regular corporate tax will be "0," with the result that every dollar of its "preference items" will be taxed at a 15 percent rate. A totally absurd imposition on a company with an operating loss. Such a result may well be occurring among many savings and loan associations, as the minimum tax is applied to excess bad debt reserve deductions.

Another classic example of the perverse results which can be produced by the minimum tax can be found in the case of companies which sell major assets in the course of an effort to turn around low-profit performance. The asset sale produces a capital gain. The untaxed portion of the capital gain, a "preference item," may well exceed the amount of regular corporate tax, which means this struggling company has the privilege of paying a higher capital gains tax than its more robust competitors, courtesy of the corporate minimum tax.

So that our colleagues may have a better understanding of the corporate minimum tax and the unfair—and I hope unintended—results it produces, I have appended to this statement a series of working examples.

We understand that this is not the ideal fiscal climate in which to propose any change in our tax code which reduces revenues, no matter how modest. But the corporate minimum tax is so illogical in its application and so contradictory of other major corporate tax policies designed to foster capital formation, we believe it must receive priority attention as a matter for repeal at the earliest appropriate opportunity.

We invite the support and interest of affected businesses and trade organizations. We urge companies to provide us with other working examples of the minimum tax. Likewise, if there are students of tax policy who believe that there are sound public policy reasons for having a minimum tax applicable to corporations, we should like

to be educated as to those reasons. But we should like also to have their recommendations for a provision that will operate fairly and rationally.

For the present, we stand for repeal. We urge our colleagues to educate themselves concerning the incongruous results which are produced by the corporate minimum tax. Particularly hard hit by this tax are companies engaged in mining, timber operations, and basic metals production, all industries that have been suffering periods of low profitability and should assuredly not be burdened with a surtax on normal corporate taxes.

ILLUSTRATIVE EXAMPLES OF THE MINIMUM TAX IN OPERATION WITH OTHER PROVISIONS OF THE INTERNAL REVENUE CODE

Calculation of the minimum tax

Basic example:	
Tax preference total	$12,000
Less tax liability (net)	2,000
Excess tax preference over tax	10,000
Minimum tax at 15 percent	1,500

NET OPERATING LOSS EXAMPLE

	Year 1	
	Before NOL carryback	After NOL carryback
Year 1:		
Tax preference total	$10,000	$10,000
Taxable income	50,000	0
Tax liability	23,000	0
Minimum tax	0	1,500
Year 2:		
Tax preference total	10,000	10,000
Net operating loss (carried back to year 1)	(50,000)	.....
Tax liability	0	0
Minimum tax at 15 percent	1,500	1,500

Excess tax carryover example (repealed in 1976)

Year 1:	
Tax preference total	$15,000
Tax liability	25,000
Excess tax carried to year 2	$10,000
Year 2:	
Tax preference	15,000
Tax liability	5,000
Excess tax carryforward	10,000
Total	15,000
Excess tax preference:	
With carryforward	0
Without carryforward	10,000
Minimum tax at 15 percent	1,500

EXAMPLE COMPARING THE EFFECT OF A DEDUCTION FOR PERCENTAGE DEPLETION WITH A DEDUCTION FOR NONPREFERENCE ITEM

	Preference	Non preference
Separate taxable income before deduction	$10,000	$10,000
Separate deduction for:		
Percentage deletion	(6,000)	.....
Research and development	.....	(6,000)
Net taxable income	$4,000	4,000
Regular tax at 46 percent	1,840	1,840
Minimum tax: $6,000 minus $1,840 equals $4,160 times 15 percent	624	0
Total tax	2,464	1,840

Example showing effect of credits to create a minimum tax

Taxable income before percentage depletion	$25,000
Percentage depletion	−5,000
Net taxable income	20,000
Tax at 46 percent before application of credits	9,200
(No minimum tax at this point—tax liability is higher than preference.)	
Credits allowed under Revenue Code:	
Foreign tax	−2,200
Balance	7,000
Investment tax credit (80 percent of tax in 1981)	−5,600
Balance	1,400
Energy tax credit (up to 100 percent of the tax)	−1,400
Net tax liability	0
Minimum tax:	
Preference item	5,000
Less net tax	0
Total	5,000
Multiplied by 15 percent	750

EXAMPLE TO SHOW THAT ACRS (OR 10-5-3) WILL NOT HAVE FULL INTENDED EFFECT IF THE MINIMUM TAX IS APPLICABLE

	Old depreciation law	ACRS no tax preference	ACRS with tax preference
Taxable income before percentage depletion and ACRS or depreciation	$21,000	$21,000	$21,000
Percentage depletion deduction	.....	.....	(5,000)
Any nonpreference deduction	(5,000)	(5,000)	.....
Capital recovery—$50,000 item:			
5-yr ACRS	.....	(10,000)	(10,000)
10-yr depreciation	(5,000)	.....	.....
Net taxable income	11,000	6,000	6,000
Tax at 46 percent	5,060	2,760	2,760
Minimum tax:			
Preference item	$5,000	.....	.....
Less net tax	2,760	.....	.....
Total	$2,240	.....	.....
Multiplied by 15 percent	.....	.....	336
Total tax	5,060	2,760	3,096

ACRS should have reduced the tax by $2,300 ($5,000 additional capital recovery times 46 percent equals $2,300).

Because of minimum tax, tax was only reduced $1,964 ($5,060 minus $3,096 equals $1,964.)

EXAMPLE TO SHOW THE POSSIBLE EFFECT OF AMORTIZATION OF POLLUTION CONTROL FACILITY COMPARED TO DEPRECIATION

	Amortize	Depreciate
Taxable income before amortization or depreciation	$50,000	$50,000
$250,000 pollution control facility:		
Amortized	(50,000)	.....
Depreciated	.....	20,000
Net taxable income	0	30,000
Regular tax at 46 percent	0	13,800
Preference item:		
Excess of amortization over depreciation	30,000	.....
Regular tax	0	.....
Excess	30,000	.....
Multiplied by 15 percent	4,500	.....

Note.—This will be academic if ACRS or 10-5-3 is adopted since 5 year cost recovery is better than 5 year straight line amortization.

Example to show that the minimum tax can change the 10 percent investment tax credit to an 8½ percent credit

Taxable income before percentage depletion	$14,600
Percentage depletion	−4,600
Net taxable income	10,000
Tax at 46 percent	4,600
(No minimum tax-preference and tax are equal.)	
Investment tax credit applied	−1,000
Net tax	3,600
Minimum tax:	
Preference item	4,600
Less net tax	3,600
Total	1,000
Multiplied by 15 percent	150
Total tax	3,750
Total net reduction from $1,000 ITC	$850●

CRISIS IN POLAND

HON. ARLEN ERDAHL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. ERDAHL. Mr. Speaker, today we are witnessing a crisis in Poland that comes out of the very type of economic and political system that has proven itself in the past to be inefficient and inherently unworkable. East Germany in the late 1940's, Hungary in the 1950's, Czechoslovakia in the 1960's, and now Poland all point to the fact that communism simply does not work. The imposition or the threat of military imposition is all that holds that fragile fabric together.

We in the United States need to stand by them during this crisis and insure them of our concern for basic human rights and needs. The Poles certainly recognize the difference between the threats of the Soviet Union and the support of the United States.

The recent meeting between Chairman Erich Honecker of East Germany and Chancellor Helmut Schmidt of West Germany comes on the heels of the very important visit of President Leonid Brezhnev to Bonn. The importance of that historic meeting, along with the discussion between the two German heads of state, should not be lost among those contemplating the future of Poland. This is a time for reason and for judging the terrible effects any Soviet intervention in Poland may have on East-West relations.

It is clear that for any long-term solution we will have to encourage the Polish people to work out their political and economic problems internally. The struggle they face now may actually be the beacon of hope for a more peaceful and prosperous future.●

LABOR'S PROGRESSIVE ROLE

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. LaFALCE. Mr. Speaker, last month the biennial AFL-CIO convention had a very special meaning. In addition to the important issues addressed by the delegates, the AFL-CIO was also commemorating the 100th anniversary of the organized labor movement in America. The theme of this year's centennial celebration is "A Century of Achievement, a Challenge for the Future." There could be no more appropriate theme for the beginning of the second century of the labor movement at a time when the needs of America's working men and women, and the survival of the important programs for which labor has vigorously fought, are at a critical crossroads.

My good friend, Paul Cole, an educator, member of the board of directors of the New York State United Teachers, and vice president of the American Federation of Teachers, recently wrote an excellent column for the Buffalo Courier-Express commemorating this special centennial celebration.

In his column, Mr. Cole describes the importance of the labor movement's contributions to our Nation's development over the past 100 years. He describes how the labor movement has strived for and achieved gains—always working within our basic American economic free-enterprise system.

Mr. Speaker, I am sure that my colleagues will benefit from Mr. Cole's insights and understandings of labor's past accomplishments and future vision. I ask that Mr. Cole's column from the December 11, 1981, Buffalo Courier-Express be inserted in the RECORD at this time.

LABOR'S PROGRESSIVE ROLE

(By Paul Cole)

(Mr. Cole is a Lewiston-Porter Senior High School social studies teacher, a member of the board of directors of the New York State United Teachers and vice president of the American Federation of Teachers, AFL-CIO.)

They gathered in Pittsburgh on Nov. 15, 1881.

Delegates came from the carpenters, the cigar makers, the printers, merchant seamen, and the steel workers, as well as from a few city labor bodies and a sprinkling of delegates from local units of the Knights of Labor.

They came to form the Federation of Organized Trades and Labor Unions which in five years was transformed into the American Federation of Labor (AFL). And so was born the modern trade union movement in America and it is this centennial of American labor that was commemorated at the biennial convention of the AFL-CIO last month in New York City.

The roots of our country's trade unions extended much deeper into the early history of America. It included the primitive unions, or guilds, of carpenters and cordwainers, of cabinet makers and cobblers, which made their appearance, often temporarily, in the various cities along the Atlantic seaboard of colonial American. But it is this gathering a hundred years ago which laid the foundation of the labor movement as we know it today.

In those hundred years, workers have had to endure many struggles in order to gain the basic right to organize and bargain collectively. Throughout America's history, attempts by workers to organize were met with open and hostile opposition by not only employers, but all three branches of our government as well.

The first unions were declared "conspiracies in restraint of trade" by the courts. State legislatures and the Congress were loath to enact laws protecting workers and more often than not sided with the corporate giants whose influence among them was unrivaled. And presidents and governors alike did not hesitate to send in militia to help employers break the backs of workers who were striking in order to alleviate intolerable working conditions on the railroads, in the mines and in the factories.

But under the leadership of such men as Samuel Gompers, the first president of the AFL, workers fought until they had gained an eight hour day, improvements in working conditions, and "a fair day's wage for a fair day's work."

It is fashionable to criticize unions today for being greedy and selfish. This has always been the case will probably always be. To do so, however, fails to recognize some very important aspects of the American labor movement. The labor movement in the United States has never sought to replace the basic American economic free enterprise system but to work within that system, and within our democracy, to provide workers and their families with a decent standard of living so that they may live in dignity and share in the fruits of this great land.

It was the American labor movement that fought for, and won, free, universal public education in America. It was labor that fought for programs of social and economic justice that benefited all poor people whether they were union members or not.

A review of the resolutions adopted last month by the AFL-CIO further attests to its role as the "people's lobby." They adopted statements calling for tax justice, support for low and middle-income housing, energy conservation, protection of the nation's environment, occupational safety and health, and a strong public school system. They called for protection of our Social Security system and improvements in health services. They adopted resolutions supporting civil rights and consumer protection. And they reiterated their stand calling for a strong America.

As is often the case, the accomplishments of the labor movement are obscured by headlines about strikes or corruption because they are newsworthy. It's important to pause, in this, labor's centennial year, and view the movement in perspective. The preamble of the AFL-CIO Constitution states ". . . At the collective bargaining table, in the community, in the exercise of the rights and responsibilities of citizenship, we shall responsibly serve the interests of all the American people."

The labor movement has been true to the tradition and it is in that spirit that we greet the second century of the American labor movement.●

THE CZAR IN CHARGE OF NUCLEAR ARMS

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. WIRTH. Mr. Speaker, I rise to bring to the attention of the House of Representatives an article which appeared in the New York Times, Saturday, December 12, 1981, on Mr. Herman Roser, Assistant Secretary of Energy for Defense Programs.

Throughout my 7 years in Congress, I have worked extensively with Mr. Roser on many issues involving the Rocky Flats nuclear weapons facility in Golden, Colo., and have developed a great respect for him. His long record of achievement within the nuclear weapons complex has distinguished him as a true professional in every sense of the word. This article is a tribute to Mr. Roser, who, having assumed a very difficult task, possesses the qualifications to provide the Department of Energy with first-rate leadership. I respectfully ask that the article be reprinted in its entirety.

[From the New York Times, Dec. 12, 1981]

THE CZAR IN CHARGE OF NUCLEAR ARMS

(By Robert D. Hershey, Jr.)

WASHINGTON, Dec. 11—At one time the Atomic Energy Commission and an 18-member joint Congressional committee were in charge of America's mighty nuclear arsenal.

Nowadays, however, much of the responsibility for it and for the Reagan Administration's big planned weapons buildup rests in other hands. They belong to Herman E. Roser.

Mr. Roser, a 59-year-old career civil servant who was appointed Assistant Secretary of Energy for defense programs by President Reagan, is not actually a one-man successor to two major Federal bodies, but he does function as a sort of nuclear weapons czar.

His name is virtually unknown to the public, or even to the movement that opposes nuclear arms. Yet Mr. Roser is directly in charge of a weapons complex that employs 54,000 people and whose annual budget of almost $5 billion exceeds that of such departments as State, Interior, Justice and Commerce.

He supervises the design, testing, production, storage and security of all nuclear warheads. But neither he nor his nominal chief, Energy Secretary James B. Edwards, has much to do with decisions about whether the nation actually needs, say, the MX missile.

NOT HOW MANY OR WHAT KIND

"It's not our function to determine how many or what kind of weapons systems we should have," Mr. Roser said in an interview at his trim, very secure office in suburban Maryland. The Pentagon, acting through the Military Liaison Committee and with the coordination of the National Security Council, "asks us what we can furnish that can meet their requirements," he said.

That statement in itself reflects how much authority has changed since the days

immediately after World War II when, after a bitter fight between military and civilian scientists, the Atomic Energy Commission was set up with the explicit idea of maintaining civilian control over nuclear weapons.

In principle, the commission was to review the Pentagon's annual weapons requests and determine whether nuclear warheads should be developed and built. In practice, the commission generally went along with the Pentagon's "buy orders," although it occasionally rejected some warheads wanted by the military, as it did, for example, in the Kennedy Administration.

Mr. Roser, who was born in New Mexico, has spent his career working on nuclear weapons, but it would be hard to imagine anyone less akin to the maniacal Dr. Strangelove stereotype. In Washington, where he dons three-piece suits instead of the Western sport shirt and string tie garb he prefers, he looks like a Wall Street banker or a corporation president.

It is also hard to find, even among those skeptical of the Administration's arms policy, anyone who will whisper a critical word about him.

"He is the perfect example of the technical professional civil servant," said John Deutsch, a former Under Secretary of Energy who is now a professor of chemistry at the Massachusetts Institute of Technology. "There's no person in the country more qualified for the job.".

John J. Burke, a former Atomic Energy Commission official who plucked Mr. Roser from the ranks of the Zia Company, a contractor at Los Alamos, in the early 1960's, added, "I regard him as the quintessential public service executive."

UP FROM RETRENCHMENT

As deputy manager and then manager of the Energy Department's giant Albuquerque Operations Office, Mr. Roser was widely credited with carrying the nuclear weapons program through what one official calls the "retrenchment mode" of the 1970's when the topic of nuclear arms was about as popular as the Vietnam War.

What he did was keep up the standards and morale of an agency at a time when few people had any use for things military. In the words of N. Douglas Pewitt, assistance science adviser to President Reagan, nuclear weapons "were sort of in the dustbin of the Federal bureaucracy and I think he did an exceptionally good job of keeping up the standards." Albuquerque Operations embraces nine major facilities stretching from California to Florida, including production plants, test sites, the warhead final assembly plant in Amarillo, Tex., and research laboratories that are often locked in competition with one another.

Some people lament the fact that with the 1977 demise of the Joint Committee on Atomic Energy and the disappearance in 1975 of the Atomic Energy Commission there has been a diminution of civilian control over the nuclear stockpile.

Today there is no one outside the White House who can say "no" to the Defense Department's weapons requests, which are transmitted annually in top-secret "stockpile memorandum."

Although the joint committee did, at least, sometimes veto elements of the Pentagon shopping list, some officials say that its oversight job has been spread so thinly among many committees that none seems to care.

"We used to have strong civilian control," said John T. Conway, former executive director of the joint committee, now a lobbyist for nuclear utilities. "But we don't have that today. It's so diversified—with no expertise."

In addition to working these days on the latest generation of missiles, Mr. Roser is involved in a program begun by the Carter Administration to modernize the weapons-making plants themselves, many of which date from World War II.

"We have some rebuilding to do," he asserted. But to call the facilities dilapidated, as some have done, he said, "is probably an overstatement."

AS ALWAYS, TIME AND MONEY

One of his biggest problems, Mr. Roser said, is inflation, which has raised the Government's weapons costs no less than its other programs. He pledged at his Senate confirmation hearings in June to continue to seek ways to improve productivity.

"It's always a matter of time and money," Mr. Roser said recently, but "we're doing the job more efficiently than we've ever done it" before.

Despite a heart attack and bypass surgery that has forced him off a two-pack-a-day cigarette habit in favor of a pipe, Mr. Roser maintains a punishing schedule that includes heavy travel to his far-flung empire.

"My style of management calls for me to get out and kick the tires," he said.

Friends say that while Mr. Roser, a widower, who remarried last year, is probably "a good bit more wound up and coiled than he appears," as one put it, there is little sign that he worries much about what his arsenal might be called upon to do.

He regards himself primarily as manager of an enterprise "very much like an industrial organization—with perhaps higher standards," he said, one filled with professionals in whom he has gained confidence over many years.

"We'd all like to see the day when you don't need weapons," he declared just before the arms negotiations resumed recently in Geneva. "But I don't see anything on the world horizon that indicates we'll be going out of the nuclear weapons business anytime soon."●

FARM DEBT—HOW HIGH?

HON. RON MARLENEE

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. MARLENEE. Mr. Speaker, I include the following:

FARM DEBT—HOW HIGH?

(By Dick Hansen, Jr.)

There are few who argue that American agriculture is hemorrhaging badly today. How long and how severe are the critical questions now facing both farmers and agribusiness? There are optimistic signs, but many of these projections are far in the future barring unforeseen circumstances.

For the present however, one prominent ag observer put it succinctly. "The citizens of Washington, D.C. can rest easy about the possibility of more tractorcades this year. Farmers now can't afford the fuel," he said. Even the normally ultra-optimistic U.S. Department of Agriculture admits that the nation's food producers are in their deepest trouble in over 50 years.

Producers, of course, don't need to be told this. But it needs to be clearly brought to the attention of the nation's consumers and lawmakers. And it looks like this tremendous job will be the responsibility of these same producers if it is to be done.

Many economists and others say it will take about six months to a year for what could be our worst agricultural holocaust in history to be felt throughout our national economy.

This will be when the millions in ag-related jobs and industries begin lining up for unemployment checks because producers can no longer afford such things as new tractors, trucks, buildings, and hundreds of other ag inputs. Already such agribusiness giants as International Harvester are feeling the squeeze. Added to this will be increased pressure on such areas as ag lending, where many hard-pressed producers will have a struggle just to meet interest payments, much less any paydown on loan principle.

Of virtually no help to the situation is the new farm bill, which many see as only speeding up the process of bankrupting thousands of already nearly-broke farmers and ranchers. Most call it a blueprint for economic disaster in rural America.

"A year from now," said H. L. Tinley, who heads the nation's largest farm management concern, "there will be two camps—one of ex-farmers and the other survivors."

All of this and more beginning to echo through our already depressed rural mainstreets as the shockwaves of potential economic disaster to producers are being felt. Producers are cutting back even more sharply on already curtailed purchases of every kind except bare necessities in many cases.

When the U.S. federal debt reached $1 trillion recently, it was heralded with suitable hoopla by the national media. At the beginning of 1981, however, our national farm asset value reached $1.1 trillion with no fanfare at all. Even more newsworthy, and ignored, was that last year's rise in agricultural debt exceeded the growth in assets. And many analysts say the farm debt-to-asset ratio, which was 16 percent at the start of the year, will likely climb by some two percent or more before year's end. If this happens, and many believe it will, this would be the highest in history.

Farm debt has soared by over 650 percent in the last 20 years.

Even more discouraging is that projections for 1982 are for an even greater decrease in ag proprietors equity interest. Net farm income plummeted from $32.7 billion in 1979 to $19.9 billion in 1980—a decrease of 39 percent. At the same time net farm expenses rose by over 10 percent.

Secretary of Agriculture John Block told the Joint Economic Committee on Agriculture last October that while farm income for 1981 will be up slightly, after adjusting for inflation, net farm income will be no better that during the 1980's and that spells trouble in rural America Block said.

Yet, despite his seeming realization of this, Block, as a main man on the Reagan team, still seems determined to help his team deal even more misery for the same rural America he admits is in such desperate straits. Block's answering "How high" each time Secretary of State Haig or OMS's Stockan tell him to jump makes one wonder if he is indeed captain of his ship.

His flat-out rejection of raising loan rates to a more realistic level on the new farm bill is a good example. Loan rates effectively set world prices for all world grain exporting nations. They are also repaid with interest

by producers, and this, not a real government expenditure.

One ag specialist said he hoped we in America could put a higher priority on food, and the price of food can reach a point where it is profitable for the producer, because, he said, but for the grace of God, we could also become have-nots.

"If agriculture is neglected we could end up in the same plight as other countries who seek our help. Research and development must be continued and expanded if we are to remain the leader in the race to supply food for mankind," this source said.●

"WINDFALL": SOCIAL SECURITY AND RAILROAD RETIREMENT

HON. JAMES L. OBERSTAR
OF MINNESOTA
IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. OBERSTAR. Mr. Speaker, social security is the cornerstone of retirement life for most Americans, with 35 million people now receiving benefits. For 1 million others, railroad retirement benefits are a mainstay. In each case, the promise of a retirement income is a compact between the Federal Government as trustee, employees and employers who finance benefits, and retirees who, through years of work, established eligibility for retirement income by meeting program criteria set by law.

Social security and railroad retirement benefits are paid not as a handout, but as an earned right.

Over a year ago, candidate Ronald Reagan promised our senior citizens that would not change; under his stewardship, their retirement income would not be touched.

This year, President Reagan labeled a substantial part of retirement income as windfall and now tells us his commitment no longer applies.

That has already happened with minimum benefit annuitants as well as widows and children drawing social security and it is happening with railroad retirees.

Does anyone here believe that the same rationale cannot or will not be applied to other retirees or those close to retirement?

The Social Security Act contemplates a 40-year work life. Because it is still a maturing system, virtually anyone retiring before 1991 will receive a windfall. Even without regard to the total number of years used to determine average lifetime income, the benefit formula itself provides a windfall to low-income earners and their families.

But what is windfall? For nearly 400,000 railroad retirees and their families, it is a vested entitlement to both a railroad annuity and a social security benefit.

This supposed "windfall" is due to congressional action 30 years ago authorizing dual benefits to individuals who worked under each program a sufficient length of time to qualify for a retirement annuity.

Since 1951, the Social Security Act and the Railroad Retirement Act have been integrated. A financial interchange between the two funds keeps social security trust funds in the same condition they would be in if railroad employees were covered by social security. On an annual basis, the books are balanced and funds interchanged as necessary. Workers with 120 months of railroad service are guaranteed a railroad annuity at retirement age. Workers with less than 120 months railroad service have all wage credits transferred to the Social Security Administration to be combined with any other wage credits earned for work under social security.

The seeds for future difficulties were sown by the 1951 act and compounded by a 1954 act which provided that railroad workers and their spouses could qualify for two separate annuities if they were fully vested under both the Social Security Act and the Railroad Retirement Act. Legislative history makes it abundantly clear that Congress intentionally authorized dual benefits.

Declining railroad employment and the seasonal natural of railroad work in many parts of the Nation resulted in millions of workers qualifying for benefits under both programs. Additionally, millions of wives became eligible for social security on their own work records and also qualified for spouse or widow's benefits on a railroad husband's work record. In either case, these dually insured persons qualified under the law for combined benefits exceeding what would have been paid if all lifetime work had been either under social security or railroad retirement.

By 1970, it would be apparent that the Railroad Retirement Trust Fund would become bankrupt if required to continue bearing the full cost of funding dual benefits. Nearly 2 years of labor-management negotiations went into devising a solution to the funding problems. The result was the 1974 amendments which completely restructured the Railroad Retirement Act and eliminated dual benefits for everyone not fully vested for both social security and railroad retirement in December 1974. Congress then accepted its share of responsibility and authorized Federal appropriations to fund a phaseout of dual benefits for those people already vested.

The 1974 act was not a Federal bailout of an industry problem; it was a balanced solution to a situation caused years earlier. Labor and management accepted unprecedented benefit reductions to future annuitants and strengthened the financing of the Railroad Trust Fund—an action repeated this year in a continuing effort to compensate for the failure of the Federal Government to meet its 1974 commitment to fully fund dual benefits.

Dually insured individuals do not just sit back and reap excess benefits. They are required to absorb the greatest share of all increases in the cost-of-living. Railroad tier I benefits (computed as if work had been covered by social security) are adjusted for increases in the consumer price index only to the extent that they exceed social security benefits also being paid. Railroad tier II benefits are reduced at time of retirement by 25 percent of windfall entitlement and receive only 32.5 percent of CPI as an annual cost-of-living adjustment. Windfall, once computed at time of retirement, is never adjusted for increases in the consumer price index.

The Senate Labor and Public Welfare Committee, in 1974 explained the need to phaseout rather than eliminate dual benefits by stating:

> Cutting off the benefits to those already receiving or legally entitled to them would clearly be inequitable. These individuals have a right to receive those benefits the law had led them to rely upon or expect.

The arguments advanced in 1974 are still valid today. Some of these workers or their survivors have been receiving annuities for years. In October 1981, however, 389,000 retirees were notified that a portion of their annuity was a windfall which was being reduced 21 percent. On December 1, this so-called windfall was completely eliminated from monthly checks. In tears, retirees called or visited my district offices. "How can I pay my rent?" "What am I supposed to eat?" "I don't know anything about a windfall," were some of the comments I received.

This situation is the result: First, of a Budget Reconciliation Act provision separating windfall from the railroad retirement trust fund and creating a separate dual benefits payments account; second, the Reagan administration request for and House authorization of an appropriation equal to only 79 percent of 1982 fiscal year requirement for dual benefits, and, third, the Office of Management and Budget's attempt to force an additional 12 percent reduction in windfall dual benefits.

"Callous and insensitive" was the description given the latest benefit elimination action by a Member of the other body. I couldn't agree more.

Congress must advise the administration and the Office of Management and Budget in no uncertain terms that it will not tolerate retroactive elimination of earned benefits or budget brinkmanship at the expense of retirees. Minimum benefit social security annuitants, dually entitled railroad annuitants, and any other group already vested or receiving retirement annu-

ities must not be required to live from month to month in fear of reductions in benefits to which they have an earned right and on which they have made their retirement plans.

The continuing resolution passed by this body on December 10 exceeds the $350 million for the dual benefits payments accounts approved by the House of Representatives in July, but is still less than the $440 million needed to pay full dual benefits during fiscal year 1982. We have been promised that a supplemental appropriation will be forthcoming to provide full funding for the dual benefits payments account. The administration and Congress have an obligation, in all fairness to railroad retirees, to restore the full amount of the earned entitlement. I hope that all of my colleagues will support that legislation when it is offered next year.●

WESTERN NEW YORK TO PAY FOR REAGAN ECONOMIC BLUNDERS

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. LAFALCE. Mr. Speaker, a distinguished former member of the U.S. House of Representatives, Max McCarthy, has written a pointed analysis of the impact the President's economic recovery program is bound to create in western New York.

Mr. McCarthy, now the bureau chief for the Buffalo News, does not paint a pretty picture. Yet, despite the fact that as a Congressman he sat on the Democratic side of the aisle, his views reflect those held by a good many western New Yorkers, regardless of party.

Mr. McCarthy's analysis deserves the attention of all Members who are concerned with the problems of our older, industrial regions.

The article follows:

[From the Buffalo News, Dec. 13, 1981]

WNY TO PAY FOR REAGAN ECONOMIC BLUNDERS

(By Max McCarthy)

WASHINGTON.—The performance of the Reagan administration in its handling of the economy is turning out to be a disaster for most parts of the nation—especially the older industrial areas like Western New York.

It shows what happens when "tinsel town" moves to the shores of the Potomac.

The latest word from "Hollywood East" is that we soon may face the worst of all possible economic worlds:

Deep recession.

Record deficits.

Unemployment at or near 8½ percent into 1982.

Higher taxes.

More budget cutting of programs needed by so many in Buffalo.

At the same time, a small percentage of Americans—the wealthiest 5 percent—are doing better than ever thanks to the deep income-tax cuts evangelized by Western New York's own Jack Kemp and ardently embraced by President Reagan. These revenue reductions are among the main reasons for the enormous deficits facing us.

Here is a "conservative" administration that came to power promising to spur the U.S. economy with its tax cuts and also to balance the budget. It shows what happens when a football player and a movie star team up to plot the nation's economic game plan. Kemp and Reagan may be "winning one for the Gipper" and others in the top 5 percent but they are losing the game for most Americans. What good are income-tax cuts to people without income?

The reason that the geniuses planning our economy now are talking about higher taxes and more budget cuts is that without them, the federal budget deficit will hit $109 billion this year, $152 billion in 1983 and $162 billion in 1984.

If "Coach" Reagan and "Quarterback" Kemp compiled a losing streak like this for, say, the Buffalo Bills, they both would be sacked.

Aides at the White House say the former actor was given the bad news about the projected deficits a week ago Friday. That was the same day that his own Labor Department disclosed that the nation's unemployment rate zoomed to 8.4 percent in November, the highest in nearly six years.

Now we hear that the president's advisers expect that rate to continue well into next year. Private-sector economists, such as Citibank's Arthur Gandolfi, foresee an even grimmer 1982. He predicts that "there will be rising unemployment throughout most of the year."

If past experience is any guide, the Buffalo area will post an unemployment rate substantially higher than the national average. At the same time, thousands of unemployed workers and their families can look forward to fewer public programs to tide them over if Reagan has his way. This will spell genuine tragedy for thousands of Buffalo-area citizens.

White House insiders say the president's first reaction to the bleak budget news was to resist any suggestion that he try to reduce the projected deficits by not increasing defense spending as much as planned. Instead, he again indicated that he wants further spending cuts in non-defense programs.

Oddly, the most vocal members of his new opposition are not Democrats but members of his own party—Republican governors and mayors who see, in practical and human terms, the disastrous consequences of Reagan's economic program.

Budget cuts, these GOP officials are telling the White House, were made too fast and too deep. Additional reductions now being planned are insensitive to the growing needs of their constituents.

These Republicans are also saying that the Kemp-Reagan tax cuts were too large, too responsive to that 5 percent of special interests and amateurly designed to stimulate economic growth.

In one of his rare departures from ideology over reality, the president has acknowledged that some states and localities are in dire straits but the answer is for the residents of these locations to move to places with better economic climates.

How can be say that to a recently unemployed worker in Cheektowaga with a half-paid off mortgage, with several children in local schools, living in the community where he was born close to relatives and friends? If you follow the logic of that, Buffalo soon would be a ghost town except for people like my nearly blind 85-year-old mother who couldn't move to Texas if she had to.

This country can't afford to write off Buffalo or Detroit or Erie or Toledo. We need professional political and economic leadership that will devise realistic policies that will revive these national assets. We need leaders who can add 2 and 2 and not tell us, like snake oil salesman, that you can cut taxes, increase defense spending and have a balanced budget—all at the same time. We should have known better. Fool me once, shame on you! Fool me twice, shame on me?●

SOVIETS POUR BILLIONS INTO ANTI-AMERICAN PROPAGANDA DRIVE

HON. JOHN EDWARD PORTER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, December 14, 1981

● Mr. PORTER. Mr. Speaker, Soviet communism once again is showing the world its dark face. Pressures have been brought on the Polish Government to impose martial law and stamp out nascent democratic institutions which threaten the present totalitarian rule of the Communist Party in Poland.

But confusion about Soviet motives and methods employed in East and West Europe is only too obvious. Recent demonstrations on a giant scale in European capitals against U.S. policies on theater nuclear forces in Europe is but one manifestation.

Next we will be hearing about how the Soviets are saving freedom in Poland. Lest any remain in doubt about Soviet foreign policy goals and intentions after this latest Soviet-manipulated suppression of a peoples' basic freedoms by order of the Communist party government in Poland, it is time renewed alert is called to Soviet methods in foreign affairs.

I want to have inserted in the RECORD for Members attention at this time a documented study of Soviet propaganda and disinformation. Because the cost of a single insertion is $1,440 to the taxpayers, I intend to insert this information in a three-part series at no additional cost, the first of which is enclosed today.

Mr. Speaker, more than $3 billion a year and 70,000 employees go into the Soviet propaganda and disinformation drive against the United States. The United States is alleged to have engaged in an assassination plot against Pope Paul II and engineered the plane crash which killed Panama President Torrijos. The Soviets accuse the United States of wanting to turn Western Europe into a nuclear battleground in order to eliminate European industry and leave America free to

dominate world markets without competition. The Soviets, on the other hand, represent themselves as peace-loving, seeking only to end the arms race and concentrate resources on human welfare.

How do the Soviets persuade peoples everywhere that these patently fabricated allegations have validity? By a series of diabolically clever publication and dissemination techniques perfected by their extensive experience in this Soviet national industry.

Illustrations of this distortion technique are contained in this month's "Project Truth," a Soviet Propaganda Alert published by USIA. So that all Members can observe the cleverness employed in distorting and misinforming publics around the world, I ask to insert the following material from this alert:

I. CHARACTERISTICS OF SOVIET EXTERNAL PROPAGANDA

A. SOVIET EXTERNAL PROPAGANDA [1]

Soviet external propaganda has two main purposes:

To represent the Soviet Union as dedicated to peace and detente, and

To show the Soviet Union as a just, fair, progressive society, worthy of admiration if not emulation.

For these purposes, Soviet propagandists follow several basic principles. The first of these is a systematic denigration of the U.S., its culture, political system, and belief structures. By showing that the U.S.—the acknowledged representative of all things Western—is a doomed, decadent, inherently evil society which opposes all progressive change, Soviet propagandists hope to persuade target audiences that it is not a fit model for their own countries.

The Soviet Union presents itself as the only alternative to the U.S. as a system of social organization. It portrays itself as the near-perfect society. Armed with an ideology that maintains that the Soviet form of society is the inevitable next step in human development, Soviet propagandists draw invidious comparisons between almost every aspect of American and Soviet life.

Another key feature of Soviet propaganda is the argument that while the U.S. and the West are doomed in historical terms, the U.S. is all the more dangerous because it will defend its way of life to the end, taking the rest of the world with it to destruction if need be.

By contrast, the Soviet Union arms only to defend itself and its allies. It does this reluctantly because its main goal is to perfect the social, cultural, and economic lives of its citizens; and armaments are a drain on that process.

From these basic principles flow the whole litany of Soviet propaganda and, for that matter, foreign policy:

Support for "National liberation" movements is justified in terms of putting them on the road to the higher plane of existence enjoyed by the Soviet Union.

The foreign and domestic policies of Western countries are criticized because they are dedicated to the preservation of the status quo and are opposed to progressive change.

Western military measures are portrayed as inherently aggressive because they are directed against the Soviet Union and the progressive principles for which it stands.

Anti-imperialism (anti-Americanism) is claimed to be good because it represents a movement against the *ancien regime* and toward historical progress. The methods used in the anti-imperialist struggle are sometimes harsh but are justified by the ends.

The Soviet Union is the natural ally of Third World countries and all others who have freed themselves from imperialism (i.e., Eastern Europe).

B. SOVIET PROPAGANDA TECHNIQUES

Soviet propagandists employ a vast array of techniques, crude and sophisticated. As well as simply being very good at what they do, Soviet propagandists are not restrained by truth, honesty, and morality; rather, they are guided by a new morality, defined by Lenin as that which serves the good of the Party. Their ideology rationalizes the use of falsehood and deception by promising that the end—the perfect society—justifies all means and that shrinking from the use of all available means constitutes betrayal of the cause.

Soviet propagandists use selective information, half-truths, distortions, and innuendo, as well as outright lies. Many Soviet propagandists (such as Radio Moscow's Vladimir Pozner) have an excellent understanding of the American psyche and take advantage of American feelings about fair play to justify their own actions or call those of the West into question.

A favorite Soviet propaganda technique is indirection: an item from a Western or other non-Soviet source is cited in support of the Soviet position on an issue, the item sometimes having been planted by the Soviets. Ironically, the Soviets tend to think sources from the bourgeois West will have the greatest credibility, even among their own population. An alternative form of indirection is the inaccurate citation of a foreign source or the portrayal of the source as broadly representative of the larger society when it is not (i.e., frequent citations from the U.S. Communist Party newspaper, Daily Worker).

Disinformation is another technique. It is impossible to tell how widespread the practice is because good disinformation is usually not detected. One form of disinformation is the "revelation" of false information (such as a forged U.S. document), preferably in a foreign source that cannot be directly associated with the Soviet Union. Another disinformation technique is to draw attention to past covert actions by U.S. intelligence agencies and they to imply that the attempted assassination of the Pope or the bombings in Iran are similar types of activities. From here it is a short step to the suggestion that the U.S. could have been involved.

A most effective technique is imputing false motives to U.S. policy. The Soviets are quick to exploit any opening offered by a U.S. action by pointing out adverse consequences or offensive features to the countries affected. Thus, any U.S. action which can be interpreted to support Israel is portrayed as being anti-Arab in nature. U.S. attempts to achieve "balance" in situations such as the recent South African incursion into Angola are dismissed as hyprocrisy.

Another technique is to debase the meaning of words. Soviet propaganda has succeeded in appropriating the word "socialist" as a synonym for the word "communist," and propagandists seldom refer to themselves or their East European allies as communist countries. In so doing, they acquire at least semantic legitimacy with groups and countries that consider themselves to be socialist but not communist. Perhaps the term most debased is "anti-Soviet": virtually every development in the world is seen as either pro- or anti-Soviet and whatever is not clearly "pro" is immediately labeled "anti." There is also the example of the application of "national liberation movement" to groups which seek the violent overthrow of governments unfriendly or neutral toward the Soviet Union.

Diversion is a technique used to blunt attacks on the USSR. When the USSR is criticized, Soviet propaganda responds with a barrage of countercharges, trying to turn the accusation made against the USSR against the accusers themselves. For example, Western charges of Soviet experimentation with biological warfare, arising in connection with the Sverdlovsk anthrax incident, were answered by a Soviet propaganda blitz on Western development of biological weapons. Soviet propagandists often concoct even the most absurd accusations in the belief that even these will help distract attention from the charges against the USSR.

This is not to say that everything that Soviet propagandists create is untrue or that Soviets necessarily disbelieve their own arguments even if they appear to be untrue in Western eyes. Because their ideology dictates the "correct" interpretation of most facts, Soviets may often read a vastly different meaning into a situation or action than would their Western counterparts. Over the years, Soviet ideologists have developed an array of philosophical rationalizations that make all Western actions appear to be threatening or malevolent regardless of their objective intent, while all Soviet actions are laudable, no matter how they might appear to the outside observer.

II. CURRENT SOVIET EXTERNAL PROPAGANDA THEMES

This list of current propaganda themes and variations is not exhaustive. Soviet propagandists adjust quickly to changing situations, developing variations on general and constant themes in the Soviet repertoire to suit the needs of the moment. Thus, a general theme (e.g.: "The U.S. is a threat to peace") can be refined to apply to an unlimited range of geographic and situational requirements.

The themes are organized according to their geographic concerns—global, regional, or country-specific—and within these categories according to whether they involve military-strategic matters or seek to contrast the Soviet Union with the United States.

A. GLOBAL THEMES: MILITARY-STRATEGIC

The aggressiveness of the U.S. as contrasted with the peace-loving nature of the USSR is one of the dominant themes of Soviet propaganda. It encompasses many sub-themes, some of which are discussed below.

According to Soviet propaganda, the U.S. is escalating the arms race, provoking conflict, and trying to counter every aspect of Soviet influence in the world in its efforts to regain the military-strategic superiority it once possessed. Aggressive behavior by the U.S. stems largely from its inability and/or unwillingness to adjust to the new "correlation of forces" in the world (the decline of the Western capitalism and the rise of socialism). U.S. frustration at no longer being

[1] In the Soviet lexicon, the word "propaganda" does not carry the negative connotation that it does in the West.

"number one" is expressed in violence, directed primarily at its chief rival, the Soviet Union.

The USSR, on the other hand, has always been and continues to be dedicated to the struggle for peace. Its military might is intended only to defend itself and other peoples who want and deserve help in defending themselves. In recent months, the so-called Brezhnev "peace offensive" has been cited repeatedly as testimony to the peace-loving nature of Soviet policy.

While Soviet propaganda always presents U.S. military-strategic aggressiveness as a real and dangerous threat, it also indicates that U.S. actions will ultimately prove futile. For as Marxism-Leninism teaches, the capitalist/imperialist world is doomed, despite its desperate efforts to survive, and socialism—with the USSR its leading representative—is the future. Nonetheless, the forces of socialism cannot wait passively for the collapse of the capitalist world; they must actively counter its "last gasps" of harmful activity.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, December 15, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

DECEMBER 16

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on Senate Joint Resolution 110, Senate Joint Resolution 17, Senate Joint Resolution 18, and Senate Joint Resolution 19, measures amending the Constitution to establish legislative authority in the Congress and States with respect to abortion.
2228 Dirksen Building

10:00 a.m.
Agriculture, Nutrition, and Forestry
Foreign Agriculture Policy Subcommittee
To resume hearings in U.S. agriculture trade policies, focusing on the status of trade with the European economic community.
324 Russell Building

Commerce, Science, and Transportation
Aviation Subcommittee
To hold oversight hearings on training and testing programs for air traffic controllers.
235 Russell Building

Select on Indian Affairs
Business meeting, to mark up S. 159, authorizing the exchange of certain land held by the Navajo Indian Tribe and the Bureau of Land Management, Department of the Interior; S. 792, establishing a National Institute of Native American Culture and Arts Development; S. 1779, providing for the exchange of certain land held in trust by the U.S. for the Navajo Indian Tribe; to resume consideration of S. 563, authorizing the States and Indian tribes to enter into mutual agreements and compacts respecting jurisdiction and governmental operations in Indian country, and to further consider the substance of S. 1088, promoting the goal of economic and social self-sufficiency for American Indians, Hawaiian Natives, and Alaskan Natives.
5302 Dirksen Building

10:30 a.m.
Armed Services
Preparedness Subcommittee
To hold closed hearings to examine plans and policies of the Department of Defense relating to mobilization fuel requirements.
212 Russell Building

2:00 p.m.
Judiciary
Constitution Subcommittee
Business meeting to mark up S.J. Res. 110, S.J. Res. 17, S.J. Res. 18, and S.J. Res. 19, measures amending the Constitution to establish legislative authority in the Congress and the States with respect to abortion.
2228 Dirksen Building

Select on Intelligence
Budget Subcommittee
Closed briefing on intelligence matters.
S-407, Capitol

DECEMBER 17

9:30 a.m.
Agriculture, Nutrition, and Forestry
Foreign Agriculture Policy Subcommittee
To continue hearings on U.S. agriculture trade policies, focusing on the status of trade with the European economic community.
324 Russell Building

10:00 a.m.
Armed Services
Preparedness Subcommittee
To hold hearings on the organization, missions, and readiness of the U.S. Army's Reserve components.
212 Russell Building

JANUARY 11, 1982

9:30 a.m.
Labor and Human Resources
Employment and Productivity Subcommittee
To hold hearings on unemployment problems in the automobile industry, focusing on the need for job opportunities and training assistance programs.
4232 Dirksen Building

JANUARY 12, 1982

9:30 a.m.
Labor and Human Resources
Employment and Productivity Subcommittee
To continue hearings on unemployment problems in the automobile industry, focusing on the need for job opportunities and training assistance programs.
4232 Dirksen Building

JANUARY 13, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To hold hearings on S. 1761, amending the Voting Rights Act of 1965, to provide for the application of preclearance provisions to all States and political subdivisions, and provide for submission of any changes under the preclearance provisions to the appropriate U.S. district court.
2228 Dirksen Building

JANUARY 14, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To continue hearings on S. 1761, amending the Voting Rights Act of 1965, to provide for the application of preclearance provisions to all States and political subdivisions, and provide for submission of any changes under the preclearance provisions to the appropriate U.S. district court.
2228 Dirksen Building

JANUARY 20, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on S. 1761, amending the Voting Rights Act of 1965, to provide for the application of preclearance provisions to all States and political subdivisions, and provide for submission of any changes under the preclearance provisions to the appropriate U.S. district court.
2228 Dirksen Building

JANUARY 26, 1982

9:30 a.m.
Labor and Human Resources
Labor Subcommittee
To resume hearings on S. 1541, amending the Employee Retirement Income Security Act (ERISA) by simplifying both reporting and disclosure requirements, and the process for employers to provide retirement income to employees, and providing incentives for employers to provide pension benefits to employees.
4232 Dirksen Building

10:00 a.m.
Environment and Public Works
Business meeting, to resume markup of proposed amendments to the Clean Air Act (Public Law 95-95).
4200 Dirksen Building

JANUARY 27, 1982

10:00 a.m.
Labor and Human Resources
Investigations and General Oversight Subcommittee
To hold hearings on problems of drug abuse in the American school system.
4232 Dirksen Building

JANUARY 28, 1982

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on S. 1761, amending the Voting Rights Act of 1965, to provide for the application of preclearance provisions to all States and political subdivisions, and provide for submission of any changes under the preclearance provisions to the appropriate U.S. district court.
2228 Dirksen Building
Labor and Human Resources
Labor Subcommittee
To hold hearings on S. 1785, increasing the penalties for violations of the Taft-Hartley Act, requiring immediate removal of certain individuals convicted of crimes relating to his official position, broadening the definition of the types of positions an individual is barred from upon conviction, increasing the time of disbarment from 5 to 10 years, escrowing a convicted official's salary for the duration of his appeal, and clarifying the jurisdiction of the Department of Labor relating to detecting and investigating criminal violations relating to ERISA.

10:00 a.m.
Judiciary
Immigration and Refugee Policy Subcommittee
To hold hearings on the impact of immigration numbers and the interrelation of immigration policy and population policy.
5110 Dirksen Building

SENATE—*Tuesday, December 15, 1981*

(Legislative day of Monday, November 30, 1981)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

Blessed is the man who walks not in the counsel of the ungodly, nor stands in the way of sinners, nor sits in the seat of the scornful; but his delight is in the law of the Lord and on his law he meditates day and night.—Psalm 1: 1, 2.

We thank Thee, God for Thy word, the Bible. We are guilty of thinking of it as a book of outdated, inflexible rules designed to take the pleasure out of life when in reality it is like an operation manual from the factory showing us how to put it all together. It is given to make life more abundant, free and joyful.

Teach us the truth and light and love that shines through its pages. Remind us that we ignore the Bible or neglect it to our own peril. We deprive ourselves of essential spiritual and moral nurture. We forfeit our opportunity to be instructed in the way and will of the Lord.

Help us, dear God, to avail ourselves of this incalculable treasure which is meat for our souls, light for our way, and strength for the day. We ask this in the name of Him who is the bread of life and the light of the world. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

THE JOURNAL

Mr. STEVENS. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

CONFERENCE AGREEMENT ON DEFENSE APPROPRIATIONS BILL, 1982

Mr. STEVENS. Mr. President, I am pleased to report to the Senate that the conference on the Defense appropriations bill, H.R. 4995, completed its work last evening.

The conference agreement appropriates $199,691,264,000 for the military services and the Defense Department agencies and for intelligence activities. This amount is $2,247,975,000 above the allowance in the House-passed bill and $8,984,481,000 below the Senate version of this bill. It is also $1,186,970,000 below the budget estimates of the President in his budget request.

Among other major changes adopted by the conferees, the $4.8 billion which the Senate added at my request to fund the October pay raise and the $1.6 billion which represented an inflation increase from 8.4 to 10 percent which the Senate also approved at my request, were deleted from the bill with the conference agreement that these unbudgeted costs will be considered in a supplemental appropriations bill.

The conferees also agreed to a House reduction of nearly $500 million based on adjusted fuel cost projections with the cost of fuel coming down for the Defense Department as it is throughout the country.

The conferees approved a Senate increase of $300 million to be allocated by the Department of Defense to the Coast Guard for ship construction and other capital equipment needs.

(Mrs. KASSEBAUM assumed the chair.)

Mr. STEVENS. Madam President, that item specifically refers to the need of the Coast Guard for new cutters particularly the 270's, so that the Coast Guard can carry out its vital work with respect to enforcement of our laws on the seas.

The B–1 bomber cost language was approved, and the Cohen amendment concerning MX missile basing was approved by the conference without change.

Nearly $250 million in increased funding for the National Guard and Reserves equipment and supplies was approved under the conference agreement.

The strength increases approved for the Reserve components were agreed to be funded with an increase of $50 million.

Shipbuilding and conversion were increased in conference by $372 million over the House allowance.

Madam President, this was a very intense conference. We had absolute cooperation throughout the day and ran late into the night last night.

I congratulate the distinguished Congressman from New York, Congressman JOE ADDABBO and those who served with him as members of the conference and all of those who served on our side and particularly we are indebted once again to the distinguished Senator from Mississippi, Senator JOHN STENNIS, for his leadership in being able to bring back to the Senate a bill which we can recommend and I believe it will be a unanimous recommendation from the Members of the Senate—I hope it will be—that the Senate approve this conference report.

Mr. PROXMIRE. Madam President, will the Senator yield?

Mr. STEVENS. I yield.

Mr. PROXMIRE. Madam President, the distinguished Senator from Alaska did really a magnificent job in handling that conference. He was chairman of the conference. He not only had to work all day yesterday from 9:30 in the morning when the Senate conferees met until 8 o'clock last night, but he met for days before that with Chairman ADDABBO in the House of Representatives.

This bill, as we all know, contained literally hundreds of separate items, all very important and amounting to the biggest appropriations bill in the history of our country.

I think that we all agree that this is going to be much bigger than $200 billion because it will have to have a pay increase. It will have to have probably an allowance for inflation that will be more substantial.

But I cannot recall a conference that was more difficult or a conference that was handled in a more orderly way, in a fairer way, with better feeling on both sides, even though there was a strong difference of opinion on many individual items.

I think that all Senators should be very proud of the Senator from Alaska who did really an outstanding, a brilliant job under very difficult circumstances.

Mr. STEVENS. Madam President, I am grateful to the Senator.

I reserve the remainder of our time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. Under the previous order the minority leader is recognized.

Mr. ROBERT C. BYRD. Madam President, I thank the Chair.

THE SENATE SCHEDULE

Mr. ROBERT C. BYRD. Madam President, I wonder if the distinguished majority leader would be in a position to announce the program at this time for the remainder of the day, for tomorrow, and for Thursday if necessary.

Mr. BAKER. I thank the minority leader.

Madam President, I am pleased to do that.

The controlling issue is how soon we receive the Defense appropriations conference report from the House of Representatives. It is my hope that the House of Representatives will act on that measure today and transmit it to the Senate. If they do so and in time for the Senate to act on the measure tonight it is conceivable that the Senate could complete its work this evening, albeit a late evening.

I think it is far more likely that we will be in session tomorrow. It is even

possible that we will be in Thursday because of these measures, first, the one I have just referred to, the Department of Defense appropriations conference report, which clearly must be dealt with before we finish.

Then there are the following measures:

The identities bill, which I hope to ask the Senate to consider today and which I trust will not take an inordinate amount of time.

The Nuclear Regulatory Commission reform bill, which is also scheduled for today, which I believe will not take a great amount of time, perhaps an hour or somewhat longer.

The Export Administration conference report, which is available and must be dealt with today, should not be an unduly long debate.

The military construction conference report, which is available to the Senate and must be acted on today and can be dealt with, I believe, in a very short period of time.

Then there is the social security minimum benefits conference report which must be acted on by the Senate first, in which I hope will be done today; the agricultural appropriations conference report, and there may be other matters, Madam President, that must be dealt with. But this appears to be the must list at this point.

I will consult with the minority leader on any other measures he wishes to take up, and with other Senators.

There are routine matters, of course, which can be dealt with in the course of the day, and housekeeping details will be arranged between the leaders on both sides.

So in answer to the minority leader it is possible we could finish late this evening, but I doubt it.

If the House does complete action on the Department of Defense appropriations conference report, and if the Senate wishes to do so, I am prepared to stay late tonight in an effort to finish this list of items. If the House does not act, then obviously we cannot finish until tomorrow or, perhaps, even on Thursday.

That is the situation as I see it at this time.

Mr. ROBERT C. BYRD. Madam President, I thank the majority leader for his very lucid statement. I appreciate his courtesy always, and I want to compliment him on the good job he has done and continues to do. I share the hope that the Senate will be able to complete its work today, certainly by tomorrow, hopefully not beyond tomorrow.

Mr. BAKER. Madam President, I am grateful to the minority leader and I am sure if ever there was a bipartisan commitment of the joint leadership it was to try to get us out of here as soon as possible.

Madam President, I yield the floor.

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that any further statements I may have today be inserted in the RECORD at this point.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Does the distinguished Senator from Wisconsin wish my time?

Mr. PROXMIRE. No.

Mr. ROBERT C. BYRD. I yield back my time.

RECOGNITION OF SENATOR SPECTER

The PRESIDING OFFICER. Under the previous order, the Senator from Pennsylvania (Mr. SPECTER) is recognized for not to exceed 15 minutes.

Mr. SPECTER. I thank the Chair.

S. 1953—THE VIETNAM VETERANS AGENT ORANGE RELIEF ACT

Mr. SPECTER. Madam President, I rise today to introduce the Vietnam Veterans' Agent Orange Relief Act.

The pain and suffering inflicted by the Vietnam war continues to this day. The purpose of this bill is to give belated recognition and relief to the thousands of brave men and women who have suffered physical harm because of their exposure to the defoliant agent orange and other toxic herbicides during the Vietnam war.

The solemn pledge of the Veterans' Administration is "to care for him who has borne the battle, and for his widow and his orphan." If that pledge of care is to have real meaning, it must be fulfilled willingly, fairly, and expeditiously. This pledge has not been kept for the veterans of the Vietnam war who suffer from their exposure to agent orange more than a decade ago.

Attention is only now being given to the plight of the Vietnam veteran. It is attention that is long overdue, for in our ambivalence, or guilt, about the Vietnam war, we allowed these veterans to return to us without fanfare, without thanks, and without concern for the special problems that might plague their lives.

I have conducted a series of hearings throughout Pennsylvania to examine the readjustment problems of Vietnam veterans. Almost 500,000 Vietnam-era veterans live in Pennsylvania. The focus of their concerns has been the perceived Government disinterest, if not hostility, to veterans who claim to have been seriously injured by their exposure to agent orange. We are all by now familiar with the commonly cited injuries of these veterans. They include tumors, debilitating stomach ailments, skin rashes, and genetic damage.

However, it is impossible to gauge the frustration and rage felt by many of these veterans unless you hear their stories, face to face. Several veterans testified that they were treated as "the enemy" when seeking help for their injuries. Most disturbingly, many veterans who served our country out of a profound sense of duty and patriotism said they would not let their children serve in the Armed Forces because of the Government's handling of the agent orange question.

Presently, the Veterans' Administration recognizes only a skin rash known as chlorance as having been caused by agent orange exposure and, therefore, subject to compensation as a service-connected injury. No compensation is available for the other alleged injuries because of the lack of a proven service-connection. Vietnam veterans who claim to have been harmed by agent orange are given an examination and entered into the agent orange registry. Medical attention is now available. But for compensation, they must wait, and wait, and wait.

The Federal Government has imposed an impossible burden of proof on Vietnam veterans to establish service-connection for their injuries. It is a burden of proof that far exceeds any imposed on litigants in civil trials who must establish liability for injuries far less serious than those involved in veterans' cases. It is difficult to understand why these veterans, to whom we own so great a debt, are subjected to such a singularly difficult legal barrier to just compensation.

After more than a decade since the Vietnam war, there is little, if any, solace in the impressive array of tests, studies, and experiments being conducted on the effects of exposure to agent orange and other toxic herbicides. No clear deadline has yet been produced as to when the debate will be ended and compensation paid. Veterans wait with mounting and understandable frustration as the Veterans' Administration still struggles with a protocol to get its main study begun. The other investigations grind on without promise of a resolution of this controversy within the near future.

During the confirmation hearing of Deputy Veterans' Administration Administrator Charles T. Hagel, I posed a number of questions regarding the anticipated dates of completion of the various agent orange studies. Written answers submitted by Mr. Hagel last week underlined the necessity of expediting this process. In response to my request for an estimate of when the issue of causal connection between agent orange and birth defects will be resolved, Mr. Hagel concluded:

> At present, we cannot estimate how long it will take to obtain sufficient evidence to arrive at a sound scientific conclusion.

Mr. Hagel added that as to the question of the effects of agent orange exposure generally:

> We shall be more and more definite about the health effects as information accumulates; we shall be more certain 2 years from now than we are today and still more certain 10 years from now.

This is simply too long to wait.

The legislation which I propose will provide for compensation for a 20 percent disability for a disease caused ac-

cording to credible medical opinion by exposure to agent orange. It is frankly difficult to formulate appropriate tests as to what the standard of proof should be, whether it should be a "could" standard, "may" standard, more probably the "may not" standard, and among the various alternatives considered that we have settled on the standard that the disease was caused according to credible medical opinion by exposure to agent orange. That is akin to the standard for submission of an issue to a jury in a civil litigation matter where a single doctor's testimony may be sufficient evidentiary base for a jury's conclusion.

We call for something more than a single doctor to testify that a given ailment is caused according to his opinion by exposure to agent orange, but in a generalized sense according to credible medical opinion which is a standard we believe the VA can realistically administer.

It is long, long past time that Vietnam veterans received the help they need. That is the only way to put the Vietnam war behind us and to fulfill our pledge to the men and women who served their country when called.

I ask unanimous consent to have the bill printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1953

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Vietnam Veterans Agent Orange Relief Act."

SEC. 2. Section 312 of title 38, United States Code, is amended by adding at the end thereof the following new subsection:

"(c)(1) For the purposes of section 310 of this title and subject to the provisions of section 313 of this title, in the case of any veteran who served in Southeast Asia during the Vietnam era and who (A) after such service, developed a disability of 20 per centum or more as a result of a disease which is determined under paragraph (2)(A) of this subsection to be a disease caused, according to credible medical opinion, by exposure to phenoxy herbicides, and (B) during such service, was exposed to phenoxy herbicides, as determined in accordance with rules prescribed by the Administrator under paragraph (3) of this subsection, such disease shall be considered to have been incurred in or aggravated by such service, notwithstanding that there is no record of evidence of such disease during the period of service.

"(2) The Administrator shall determine—

"(A) the diseases which are caused, according to credible medical opinion, by exposure to phenoxy herbicides; and

"(B) the conditions of service in Southeast Asia during the Vietnam era which are sufficient to establish exposure to phenoxy herbicides for the purposes of paragraph (1) of this subsection.

"(3)(A) The Administrator shall prescribe rules for the administration of this subsection. Such rules shall set forth—

"(i) the diseases which have been determined by the Administrator under paragraph (2) of this subsection to be diseases which are caused, according to credible medical opinion, by exposure to phenoxy herbicides;

"(ii) the conditions of service in Southeast Asia during the Vietnam era which are sufficient to establish exposure to phenoxy herbicides for the purposes of paragraph (1) of this subsection; and

"(iii) the factors considered and the standards used by the Administrator in making the determinations required by paragraph (2) of this subsection.

"(B) The rules prescribed under subparagraph (A)(ii) of this paragraph—

"(i) may not include a requirement that a veteran provide any information to the Veterans' Administration in connection with a claim for compensation based on paragraph (1) of this subsection other than the information included in such veteran's military service records; and

"(ii) shall include a rule establishing a presumption that a veteran was exposed to phenoxy herbicides in Southeast Asia during the Vietnam era if the information included in the veteran's military service records, information provided by the veteran, and any other information available to the Administrator establish a reasonable possibility that such veteran was exposed to phenoxy herbicides in Southeast Asia during the Vietnam era.

"(4) Notwithstanding any other provision of law, section 553 of title 5 shall apply to the promulgation of rules under paragraph (3) of this subsection, and such rules shall be made on the record after opportunity for a hearing in accordance with sections 556 and 557 of such title. Such rules shall be subject to judicial review in accordance with the provisions of chapter 7 of such title.

"(5) Not later than three months after the date of enactment of the Vietnam Veterans Agent Orange Relief Act, the Administrator shall complete final agency action to promulgate the rules required to be promulgated by paragraph (3) of this subsection. The initial rules shall be promulgated simultaneously and as one set of rules.".

Mr. SPECTER. Madam President, I yield the floor.

Mr. HEINZ. Madam President, will the Senator yield to me before he yields the floor?

Mr. SPECTER. I yield to the Senator from Pennsylvania.

Mr. HEINZ. I commend my colleague from Pennsylvania for this initiative. This is an area which has been of particular concern to this Senator ever since I arrived here in the Senate in 1977 as virtually the only Vietnam-era veteran in the entire U.S. Senate.

The Senator from Pennsylvania, my distinguished colleague, Senator SPECTER, very wisely chose earlier this year to become a member of the Veterans' Affairs Committee. I think it was, both for himself and for our veterans, particularly our Vietnam veterans, an extraordinarily wise choice.

I, having had a chance to work with Vietnam veterans over the last 5 years, can testify, from firsthand knowledge, to many of the statements that the Senator from Pennsylvania just made in his very eloquent statement on the introduction of his legislation. And the truth is that when you have a herbicide like agent orange, which contains in it some tremendously dangerous poisons, such as dioxane, so dangerous in fact that when a herbicide, 245T, was going to be used in Oregon a few years ago, that herbicide, 245T, which contained dioxane at one-fiftieth the level of its concentration in agent orange, was banned by the Environmental Protection Agency from use under an authority that they rarely, if ever, use; namely, an emergency authority saying that it was an imminent hazard to the public health. Now that, I would remind you, was in the case of a herbicide with one-fiftieth the level of poison in it that agent orange had, an imminent threat to public health.

Madam President, I suspect that if the Environmental Protection Agency thought that something with one-fiftieth the toxicity of agent orange was a threat to Americans in Oregon, that it does not take a great leap of imagination to grasp what 50 times that concentration of poison must do when it comes to the effect it has on the health of our servicemen who were sprayed, inadvertently, but nonetheless repeatedly, during their service in Vietnam.

I also want to note that I have been very pleased with the action taken by my colleagues in the Senate on occasion. I introduced a bill, somewhat different from the one the Senator from Pennsylvania introduces today, in three different Congresses, this and the previous two. The legislation—which Senator SIMPSON is intimately familiar with, the chairman of the Veterans' Affairs Committee, who is here also with us on the floor sharing in this this morning—essentially established a presumption that a Vietnam veteran, who had been exposed to agent orange by virtue of service in Vietnam and who had a compensable disability, would be recompensed for that disability upon the completion of the epidemiological study that we seem so hung up on.

That legislation has in fact passed the Senate three times. And the fact is that, unfortunately, when it has gone to conference with the House, we have not always gotten back that which we sent to conference. As a result, that legislation which has passed the Senate three times is not yet law, notwithstanding the bill the President signed a few months ago.

So I think that the effort that my friend and colleague from Pennsylvania is making today is absolutely essential if we are in any way to meet our responsibilities to our veterans. In this case, it is our Vietnam veterans, but I say our veterans generically for this reason: we want to be sure that, if we are ever called upon to ask the young men of this country to go and defend our national interests, they will do so secure in the knowledge that we will not forget them when they return, those that are fortunate enough to return.

I must say, Madam President, at this time this country has a terminal case of amnesia when it comes to our Vietnam veterans. I salute my friend and colleague from Pennsylvania on having 20–20 memory and a very high sense of what needs to be done. I am pleased I was here on the floor to have a chance to support him in that effort.

Mr. SPECTER. I thank my colleague

from Pennsylvania for those very generous remarks.

Mr. SIMPSON. Madam President, will the Senator from Pennsylvania yield for 2 minutes?

Mr. SPECTER. I do yield to the distinguished Senator from Wyoming, the chairman of the Veterans' Affairs Committee.

Mr. SIMPSON. Madam President, I came here to the floor on other business, but hearing the remarks of the good Senator and my friend from Pennsylvania, both of the Senators from Pennsylvania, who are fine contributing Members in this body, I just want to state how much I appreciate the work of Senator SPECTER, who is a new member of the Veterans' Affairs Committee. He has held hearings in his State with regard to this critical issue of agent orange. I assure him, now as I have in the past, that indeed we shall pursue the issue of agent orange and do that with hopeful skill and alacrity and as much effort we can give to it.

The thing that has always caused me concern is that we must be assured that we do here what we do in other areas of legal cause and effect. We must establish that cause and effect in this case and we will do so. An agent orange registry is being used. People are applying to the Veterans Hospital with ailments and saying they wish to be listed on the registry. We know where they are.

I thank both of the Senators from Pennsylvania who keep at me and do keep me alert in this particular area. I appreciate that. I assure them of proper hearings. The easiest thing for me to do as chairman of the Veterans' Affairs Committee would be to call about two hearings a week. And I do not choose to do that because I do not think anything would be served in that process. It is highly emotional. We must see that the protocol works. I assure both of my colleagues that we will have proper oversight, proper hearings, and we will proceed.

I appreciate very much what both Senators from Pennsylvania have done in this area. I look forward to their assistance and their cooperation in the future.

Mr. SPECTER. I thank the distinguished Senator from Wyoming for those generous remarks. I can assure him that my distinguished colleague, Senator HEINZ, and I will keep at him and it will not be necessary to have two hearings a week on the subject, one hearing would be sufficient.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin (Mr. PROXMIRE) is recognized for not to exceed 15 minutes.

PRESIDENTIAL USE OF DEBT LIMIT CRUCIAL FOR CONTROLLING DEFICITS

Mr. PROXMIRE. Madam President, we find ourselves in a very different kind of a recession than we have ever had before, at least that we have had in a long time, and certainly different than the classic type of recession. Because this is a recession that is caused by huge Government deficit and enormous Government borrowing, which have driven interest rates so high that the credit-sensitive industries—housing, automobiles, small business, farm implements, and so forth—have readily led this country into a recession.

Now we have a trillion dollar Federal debt and we have to find some way of combating it with fiscal restraint. That almost seems to be a contradiction. In the past 50 years when we have faced a recession, the obvious Federal reaction has been to start spending money in a big way to put people to work. That was the right course during the Great Depression. We had had deflation, we had a tremendous shortage of demand, and we had extraordinarily low interest rates. In fact, they were almost negative at times. But now we face an entirely different, and more complex challenge.

Is it possible that we can exercise fiscal restraint while at the same time leading this country out of our present recession?

Madam President, this country faces a crisis in Government financing. In 23 of the last 25 years, the Federal budget has run a deficit. Since fiscal year 1960, when there was a tiny $269 million surplus—million, not billion; in other words, less than a third of a billion dollars—and in 1969 when there was a slight $3.2 billion surplus, except for those 2 years, we have had a massive deficit almost every year—and a deficit every year, in fact—for the last 25 years.

The total deficit over these 25 years has been a unbelievable, whopping, incredible figure of more than $525 billion.

Mr. President, if you want to know why the country and the economy is in trouble, why auto sales are off and housing is a basket case, why prices have taken the up only elevator while wages and incomes have had to climb the stairs, this figure tells us. It does not tell us all or everything, but it tells us plently.

Personally I am not opposed to all Federal budget deficits. There was a time, during the Hoover and Coolidge periods, and for most of our 19th century history, when all American Governments believed we should have a surplus each and every year.

During the Great Depression we found that cutting spending and raising taxes just made things worse. A deficit to reinflate the economy was both necessary and an intelligent way to act.

We therefore conceived of the countercyclical budget theory. That said we should have a balanced budget not every year but a balanced budget over the business cycle. Surpluses in good years would offset deficits in bad years. Surpluses in good years would dampen down inflationary pressures. Deficits in bad years would pour money into the economy at a time when inflation was no problem. This was good theory. The only problem is that it has never been carried out.

At the economy has grown about 3 percent a year historically, to keep the country on an even keel we should have had surpluses in those years when we grew at that rate or higher. Deficits were justified when we grew at a lower than 3-percent rate.

If we had followed this policy over the last quarter of a century we would have had about 15 surpluses and only 10 deficits.

We would have reduced the national debt. Incidentally, in the course of reducing the national debt, we would have made it far easier to balance the budget because next year $100 billion will be the cost of servicing that national debt, $100 billion to pay interest on the national debt.

Instead we have had 23 deficits in 25 years and the country has not seen anything yet.

Each of the last two Presidents—President Carter and President Reagan—have campaigned on a balanced budget. Originally President Reagan promised it in fiscal year 1982. He then retrenched and called for and promised a balanced budget in his fourth year—fiscal year 1984.

President Carter—after the same kinds of pushing and hauling, of climbing up the hill and then climbing down again—also promised a balanced budget in his fourth year.

But in his fourth year, fiscal year 1981, we had a $58 to $60 billion deficit.

In fiscal year 1982, after being promised a balanced budget a few years ago—yes, that is what the budget resolutions proposed—after President Carter proposed a $27 billion deficit, and after President Reagan and his new supply side economists told us it would remain at the $40 to $45 billion level, we face a $100 billion deficit.

The $100 billion deficit forecast for fiscal year 1982 is more money than the Government spent in any year from 1789 through fiscal year 1961, or for the first 172 years of our economic and budget history.

The President—every President—in the last quarter of a century—has been unable to restrain the budget. The Congress, for a quarter of a century, has been unable to discipline either itself or the budget.

This country is in a fiscal and economic mess due in large part to the inability of the President and the Congress to follow a prudent, disciplined, budget and fiscal policy.

The irony of that is that we find ourselves in the recession we are in because the Federal Government has spent too much or taxed too little, has followed an irresponsible, year after year, unremitting policy of big deficits and now bigger and bigger deficits.

As a result we have had the worst inflation in our peacetime history. Interest rates have risen to unprecedented heights. Deficits have grown larger and larger. And the end is not in sight.

Only a few weeks ago we increased the ceiling on the national debt from $985 billion to $1,079 trillion, or a $94 billion increase. That was supposed to last a year, until the end of fiscal year 1982, next September 30.

But by December 9—a week ago tomorrow—the national debt had risen to $1,014 trillion, or a $29 billion increase in less than 2½ months. At that rate, we will have to raise the national debt in this coming calendar year and sharply.

Madam President, early last week the already shaky U.S. economy received the troubling latest internal Reagan administration's calculations for budget deficits and general economic projections for the coming years. I have just indicated what they are.

At the same time, we are told that the gross national product in current prices has been reestimated to grow only 7.9 percent during calendar year 1982. That would be the lowest rate of nominal economic growth since 1970. With this lower rate of growth tax revenues will fall drastically and help create the ballooning deficit.

At the same time, unemployment which was 8.4 percent in November, the latest month, is projected to rise above 9 percent before declining according to newspaper accounts of the Reagan administration forecast.

Of course, administrations have always been very optimistic about unemployment and about inflation. There is no reason to suspect that unemployment is likely to stop at 9 percent. It may very well go to 9.5 percent, 10 percent, or even higher.

Madam President, 9 percent is the post-World War II record. Some economists believe that a deficit in the $100 billion range can be financed in 1982 without a resurgence of interest rates.

But, of course, the only way we can do that is if the recession gives us a helping hand. I do not think anybody would want it to happen that way. Certainly, it is impossible to balance the budget in fiscal 1982, and I would concede that. But if the deficits persist at such levels once the recovery is underway, and the Federal Reserve continues to restrict the growth of money supply to hold down inflation, there is not any question that interest rates will climb, and climb very sharply, and recovery in housing, construction, and automobiles will be stymied and our economy will stagnate again.

Madam President, the Washington Post carried a lead editorial this morning in which they pointed out the virtual certainty that we are likely to have a situation in which the deficit is going to shove us into another recession. I would like to read just the last paragraph of that editorial because it is so timely.

When the recession ends and recovery begins some time next year, there will be a rapid expansion of demand for private credit. That's the point at which the federal deficit becomes dangerous. It will have to be financed by borrowing in competition with the private businesses that are also trying to borrow from the same pool of lending. The tightening competition is the process that sends interest rates shooting upward. Twice in the past two years, very high interest rates have cut off economic growth and thrown the country into recession. That's why there won't be steady growth until the structural deficit can be substantially reduced. Instead, it's getting bigger.

That is the Washington Post, a liberal newspaper that has consistently been critical of those who call year after year for balanced budgets but which realizes that we are now in a really very serious situation where, as I pointed out at the beginning of my remarks, the failure of the Federal Government to follow a responsible fiscal policy, the year after year huge deficits, have so crowded private borrowing now that they have caused our recession. To recover we now have to follow a policy of restraint. It is going to be very difficult for us to pursue that policy.

How can we end this terrible cycle of high interest rates leading to recession and unemployment and then slow recovery with rising interest rates?

Madam President, the answer is clear. The President can force the Congress to balance the budget in 1983 and beyond. How can he do this? The answer: by using the debt limit. And here is how: The President can decide now that he will not increase the debt limit beyond its present $1.79 trillion level. By the end of the current fiscal year, even with careful and conservative fiscal policies, the ballooning national debt will use up all of the remaining $70 billion. This would mean that we would be faced before September with the need either to increase the debt or to move rapidly toward balancing the Federal budget.

What we must do is begin the task of balancing the budget now. We must clearly realize that this recession is significantly different from previous recessions, because the extraordinarily high interest rates, caused in great part by the substantial federal deficit, is the central reason for the declining American economy. The clearest answer is fiscal restraint now and the secret to achieving fiscal restraint now is to pledge ourselves not to exceed the current Federal debt limit.

Madam President, I wrote the chairman of the Council of Economic Advisers and the Secretary of the Treasury, pleading with them to consider this tool that would give the President the strongest weapon he could have in achieving a balanced budget—that is, limiting the debt. He can do that. I received two very disappointing replies, which I ask unanimous consent to have printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF THE TREASURY.
Washingon, D.C., December 2, 1981.

Hon. WILLIAM PROXMIRE,
U.S. Senate,
Washington, D.C.

DEAR BILL: I am pleased to respond to your letter concerning your proposal that no new legislation to raise the statutory debt limit be proposed at the end of fiscal year 1982.

I share your concern for controlling the growth of the public debt. However, the statutory debt limit has not been an effective way to control the public debt. We must first reduce Government spending and thus eliminate the budget deficits which cause the public debt to increase. Moreover, even with a balanced budget, it will be necessary to increase the debt subject to limit because surpluses of trust funds, including the social security trust funds, are invested in Treasury securities which are suject to the debt limit.

I hope this information is helpful.

With best wishes.

Sincerely,

DONALD T. REGAN.

THE CHAIRMAN OF THE COUNCIL OF ECONOMIC ADVISERS,
Washington, D.C., November 25, 1981.

Senator WILLIAM PROXMIRE,
U.S. Senate,
Washington, D.C.

DEAR BILL: I read with interest your recent letter to the President, as well as your letter to me personally, in which you supported a balanced budget in 1983 and suggested it could be achieved by announcing that there will be no further increases in the ceiling on the national debt.

If such a pronouncement were believed, it would indeed put pressure on Congress and the Executive departments to take the tough actions you list to contain the budget deficit and Federal borrowing requirements. However, the policy changes that would be required and the dislocations that would result would be so drastic that I doubt the threat of maintaining the current debt ceiling would be credible.

Apart from the critical issue of credibility, a balanced budget is only one among several goals of economic policy that I believe you share with this Administration: reducing the burden of taxation on the American people, strengthening the nation's defenses, restraining monetary growth in order to bring down the long-run rate of inflation, eliminating unnecessary Federal government involvement in the economy and preserving commitments to citizens who truly need its help. Although you and I may disagree sometimes on the definition of these goals, we both recognize all of them as important objectives. However, refusing to raise the debt ceiling is tantamount to sacrificing some of them at the shrine of a balanced budget. The Administration's economic policy is designed to produce gradual progress on several fronts at once—including movement towards a balanced budget—without making any one goal supreme.

With best wishes,

Sincerely yours,

MURRAY L. WEIDENBAUM.

Mr. PROXMIRE. Madam President, Secretary of the Treasury Regan, who manages the debt for this country, said:

I share your concern for controlling the growth of the public debt. However, the statutory debt limit has not been an effective way to control the public debt. We must first reduce Government spending and thus eliminate the budget deficits which cause the public debt to increase.

He argues that we simply cannot do it that way. Moreover, he says, even with a balanced budget, we shall have to borrow more. He gives a very obscure reason. I have talked this over with every expert

I have found, and nobody can understand what the Secretary is talking about. He says:

> Moreover, even with a balanced budget, it will be necessary to increase the debt subject to limit because surpluses of trust funds, including the social security trust funds, are invested in Treasury securities which are subject to the debt limit.

So what, Madam President? That does not follow that we cannot balance the budget, simply because we are investing Government funds in the Federal debt. The Federal debt is enormous. Of course, it turns over every year. So there will be plenty of debt to invest in for many, many years to come.

Then I received an answer from Murray Weidenbaum, the Chairman of the Council of Economic Advisers, a fine man and an excellent economist. Mr. Weidenbaum again turns down my argument on the grounds that we should not sacrifice our other objectives at the shrine of a balanced budget.

Madam President, I love that "at the shrine of a balanced budget." We have had one little balanced budget in the last 20 years, one, in 1969. Some shrine that is. We are hardly worshiping at the shrine of a balanced budget.

Madam President, the fact is that we can overdo the balanced budget approach. As I say, we should not try to balance the budget in a year with 8.4 percent unemployment. We should recognize that if we do recover at the rate we are expected to recover over the next year or so, we should make an effort to balance the budget not in 1984 but in 1983.

There is no reason why we cannot do that, and I think if you look at it very carefully, Madam President, you will see that the growth of the economy will permit that.

I see my time is up, Madam President, and I yield the floor.

RECOGNITION OF SENATOR BUMPERS

The PRESIDING OFFICER. Under the previous order, the Senator from Arkansas (Mr. BUMPERS) is recognized for not to exceed 15 minutes.

THE PLIGHT OF THE FARMER

Mr. BUMPERS. Madam President, if I have time, I have two things I want to talk about. If I have more time, I shall touch upon a third. First of all, the plight of the American farmer.

As this recession deepens, Madam President, there are a lot of segments of our economy that are suffering unbelievable adversity. Some were suffering even before the recession started, and the recession has only exacerbated their plight. Industries such as auto manufacturing, auto dealers, housing, and agriculture have been in an economic slump for years, and many in those industries are now taking bankruptcy at an exponential rate.

The purpose of my remarks is to dramatize the plight of one of those—farming. In doing so, I in no way intend to diminish the plight of other depressed industries, because similar figures would apply to them, also.

Last summer, the summer of 1980, as I campaigned for reelection around my State. I witnessed the effects of the worst drought in our history. I saw millions of acres of crops withering under a searing Sun and no rain in sight. I watched rich soil turn to powder and the roots of plants became exposed. I watched farmers by the thousands soically watch their crops being destroyed with no hope of salvaging enough to even pay the costs of their seed, not even enough to pay the costs of plowing the crops under. Our agricultural loss in Arkansas was conservatively set at $1 billion.

A concerned Congress passed appropriations to provide low-interest loans to those who could qualify, and for many it simply meant prolonging the agony, because they were already debt-ridden to an insurmountable degree. While some dropped out, others struggled to try one more time.

That loan program itself had problems, Madam President. The Reagan administration stopped the program in midstream only to start it up again after which it was only marginally effective.

So, this year, God provided bountiful rain and moderate temperatures, and the farmers of this country produced one of our best crops, probably our best since 1973. Nationally, our yields of rice, soybeans, corn, and wheat set all-time records. But this year, Madam President, another factor, no act of God, has conspired to assure those who struggled to rise from the dust of last year's drought, that their commodities will not bring nearly enough to pay for the cost of production. The price of everything the farmer raises in my State had dropped dramatically.

To illustrate what has occurred in the last year, let me tell you what has happened to commodity prices. One year ago the prices of our three major crops—soybeans, rice, and cotton were as follows:

Soybeans were $8.02 a bushel. Rice, a commodity in which Arkansas leads the Nation in production, was $5.77 a bushel. Cotton was 79.5 cents a pound. Today, soybeans are $5.95 a bushel, or 2.07 cents a bushel less than a year ago. Rice is averaging $3.75 a bushel or $2.02 a bushel less than a year ago; and cotton is selling for 54½ cents a pound, 25¼ cents less a pound than a year ago.

Madam President, that is a one-third drop in the price of cotton. This year alone in my State, farmers will raise 100,050,000 bushels of soybeans, 153,333,000 bushels of rice, and 650,000 bales of cotton. If you calculate the drop in prices, you will see very quickly that the farmers in my State alone, if they had to sell their crop today, would get $595 million less for their crops than they would have received a year ago.

Farmers are eternal optimists, and they love what they do more than any other group I know. The only thing I ever enjoyed in my life and knew I was enjoying it was when I was farming. But optimism has to give way to reality and the reality is that barring a miracle a large percentage of our farmers will not be able to continue their chosen careers.

We laud farmers daily around here because words do not cost anything. We applaud the family farm, and pass estate tax exemptions for everyone. The thrust of the estate tax reform was for farmers, to keep the family farm intact and to assure the widow and children they would not have to sell the farm to pay their estate taxes.

But with the agricultural policies of this country we are assured that those who are not foreclosed on will be forced to sell to agribusiness interests which can afford to stay until everyone else is gone. We are going to pay a high price, Madam President, for our neglect and indifference.

Madam President, I have never wavered from the principles set out in a bill Senator Hodges and I introduced in 1978, S. 2626. It was realistic because it recognized our propensity to overproduce; it was inexpensive because it provided a cutback in production to assure a decent price, thereby eliminating subsidies and target prices; it was protective in that farmers were not force to sell at the bottom of the market to pay off their loans. At one time, we had a large number of cosponsors and the bill looked as though it had promise. But alas, enthusiasm waned, and now we have an administration that apparently has absolutely nothing in mind to save farmers. On the contrary, we just passed a bill that was only slightly better than no bill at all.

The reintroduction of S. 2626 now would get absolutely nowhere nor would any other bill to save agriculture.

So, Madam President, this will be a sad, sad Christmas season for hundreds of thousands of farmers in this Nation who look at their bountiful crops, stored in bulging bins, wondering about their seeming catch 22 situation—if they produce, there is no price—and if they have nothing to sell, the price is great.

EVENTS IN POLAND

Mr. BUMPERS. Madam President, we are all saddened by events in Poland. At a time when the Christian world is in the midst of its most joyous season, Poland, a devout Christian nation itself, is confronted with the loss, by military suppression, of small, but measurable gains in freedom, courageously won over the past 18 months. The most intense yearning of man is to be free. To see a national struggle for economic and political freedom so summarily wiped out casts an ominous pall over the world. Events in Poland and Afghanistan should serve as notice to all nations, developed and underdeveloped, that toying with systems long on rhetoric, but with miserable rec-

ords on human rights, contain within them a natural bent against freedom of expression and action.

Madam President, I recall one of Aesop's fables about the fox and the gingerbread man. On a promise by the fox, the gingerbread man decided to cooperate with the fox, only to find himself being eaten.

Many years ago, when I was Governor in my State, I read a similar story about the grasshopper trying to get across a stream. A turtle offered him a ride on his back. The grasshopper resisted, saying, "I know what you'll do. You'll get out in the middle of the stream and go under with me and I'll drown." The turtle insisted he would never do such a thing. After repeated assurances by the turtle the grasshopper finally agreed to take a chance and the trip commenced.

Sure enough, about the middle of the stream the turtle dived under and just before the grasshopper drowned he said to the turtle, "You promised you wouldn't do that, and now I'm going to drown. Why did you do it?" The turtle replied, "I really don't know. I guess it's just my nature."

So it is with the nature of those systems.

Madam President, I pray, as do my colleagues that violence can be averted in Poland; that a just solution will be found; and that the threat to world peace will be diminished.

ORDER OF PROCEDURE

Mr. BUMPERS. Madam President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Arkansas has 6 minutes remaining.

Mr. BUMPERS. There is another subject on which I really did not come to talk on this morning, but inasmuch as I have 6 minutes remaining, I will take the opportunity to do so.

DEREGULATION OF NATURAL GAS

Mr. BUMPERS. Madam President, I continue to read in the newspapers that the President has said he is opposed to any type of windfall profit tax on natural gas, if natural gas should be deregulated. I have noticed that our distinguished majority leader, for whom I have the very highest regard, is suggesting to the President that if we are ever going to come close to diminishing the monumental budget deficits that the country is facing, some dramatic action will have to be taken. One of those things is to deregulate natural gas and impose a windfall profit tax. This type of tax is calculated to produce $10 billion to $20 billion a year for the Treasury, and thereby reduce the deficit by that amount each year.

It seems to me that we have bypassed the issue of whether or not natural gas should be deregulated. We just bypassed that with the question, "Should we impose a windfall profit tax in the event natural gas is deregulated?"

I should like to go back a step and say that this is one Senator who probably will be lying prostrate on the floor of this Chamber before natural gas is deregulated.

My State is a gas-using State, and I can tell you that 85 percent to 90 percent of the people in my State are going to be very hard pressed to pay their gas bills if natural gas is deregulated. I do not say this is a matter of hyperbole or to be dramatic. I am saying that 85 percent to 90 percent of the people in my State are going to have a very tough time staying warm this winter because they will not be able to pay their gas bills at current gas prices.

Right now, the national average of natural gas is $1.78 a thousand cubic feet or, as they say in the industry, an MCF.

If natural gas were to be deregulated today, you have to assume that it would immediately go to a price at least equal to the Btu equivalent of oil. The Btu equivalent price on natural gas, if it does go to the Btu equivalent of oil, is $4.52. But natural gas is a premium fuel, much more desirable to most industries than heating oil, much more desirable for home heating than oil.

However, being very conservative, I can tell you with absolute certainty that if the President were to deregulate natural gas today, the national average price would go from $1.78 to a minimum of $4.52. I can tell you, further, that deregulation of natural gas will double the price of heating the homes of Arkansas this coming winter.

That is the reason why I am telling you that I will engage in a filibuster, I will engage in any kind of delaying tactic, I will do anything I can do in this body, within the rules of the Senate, to prevent the deregulation of natural gas.

Madam President, in 1980, according to Business Week magazine, if you exclude financial institutions, the oil and gas industry made 36 percent of all the corporate profit made in America. Incidentally, that was up from 16 percent in 1973. From 16 percent to 36 percent of all the profit in America, excluding financial institutions.

Further, according to a recent House committee report, in the 2-year period covering 1979 and 1980 the oil and gas industry accounted for 98 percent of the increase in profits of the top 500 companies in this country.

So far as I am concerned, Madam President, we have not yet reached the issue of whether we are going to have a windfall profit tax. First, we will have to debate a Presidential decision to deregulate natural gas. I can think of no quicker way to put people into the streets of this Nation than to tell them that they and their children and their families cannot stay warm without doubling the price of their heating bills.

RECOGNITION OF SENATOR COCHRAN

The PRESIDING OFFICER. Under the previous order, the distinguished Senator from Mississippi (Mr. COCHRAN) is recognized for not to exceed 15 minutes.

ECONOMIC RECOVERY: THE ROLE OF VOC-ED AND THE EMPLOYMENT SERVICE

Mr. COCHRAN. Madam President, as the debate over how to cope with budget deficits, high interest rates, inflation, and unemployment continues to occupy the minds of all Americans, I want to bring to the attention of the Senate my particular interest in, and concern over two Federal programs which, I feel, will play an integral and important role in the recovery of our economy.

An essential element of the President's economic program is the effort to stimulate the private sector to produce more jobs, increase productivity and thereby restore health and vitality to the Nation's economy. I have been, and continue to be, supportive of the President's efforts.

I am concerned, though, that in our efforts to stick by our policy of reducing Federal spending, we should not forget the important Government role as facilitator, better enabling private industry to meet its challenge of producing jobs.

Two Federal efforts which have played significant roles in the functioning of the labor market and the supply of labor in this country are the U.S. Employment Service and our vocational education programs.

The U.S. Employment Service provides assistance to States in establishing and maintaining a system of local employment service offices. These offices are responsible for providing job placement and other employment-related services to individual jobseekers and employers. Services include recruitment and counseling, developing information on employment and unemployment, and on occupational demand and supply necessary for the planning and operation of job training and vocational education programs within the State.

Some of the Federal efforts which rely heavily upon the functions of the Employment Service are:

First, unemployment insurance program; second, targeted jobs tax credit; third, work incentive program (WIN); fourth, veterans outreach; fifth, job corps; sixth, State occupational information coordinating committees; seventh, farmworker placement; eighth, alien certification; and ninth, vocational education placement.

The Employment Service is also responsible for maintaining labor statistics, and providing appropriate data for economic development.

The Comprehensive Employment and Training Act provides for a set-aside of 6 percent of funds available to the States to be used to provide vocational education and related services to CETA participants. An additional 1 percent is set aside for encouraging coordination and establishing linkages with educational agencies and institutions which

provide training programs, such as State boards of vocational education.

In Mississippi, for instance, the department of education, vocational division, administers the CETA/vocational training primarily through the Mississippi junior college system. In addition to utilizing the existing vocational education structure for providing training, existing public facilities and equipment are also used to a large extent, a cooperative arrangement which is providing maximum use of public facilities, equipment and personnel.

Each program provides a comprehensive curriculum for its participants, with the major focus on skill or occupational training in a field where there is a reasonable expectation of employment in the private sector. The participant also receives basic education in math and communication skills, counseling services emphasizing personal growth and development, methods of obtaining employment and development of good work habits, ethics, and attitude. This kind of employability skills training is essential for participants to accomplish their goals and to obtain and retain unsubsidized employment in the private sector.

As a result of the joint cooperation of the Mississippi Department of Education, the Mississippi Employment Security Commission and other providers of employment and training programs, many Mississippians have gained vocational skills, obtained unsubsidized employment, and have become more productive citizens of our State.

Thus, these two programs play a critical role in the development and creation of job opportunities and the training, education, and other services which have historically enabled individuals to secure and retain private employment at their maximum potential. These services are essential to the full development of our Nation's human resources.

In the last few months, we have seen strong evidence of the economic downturn forecasters had predicted and unemployment is at the highest monthly rate in more than 6 years. How severe the recession will be is uncertain. What is certain, however, is that as the economy begins to recover there will be an increase in the availability of jobs, jobs created by a growing and expanding private sector. Ironically, we are also facing a critical shortage of skilled workers, and we all know that the availability of a trained and competent labor force will be a primary factor in any firm's incentive for expansion.

This country needs a coordinated and functioning employment and training policy to aid in that recovery. I agree with the Secretary of Labor that this policy must mandate a system of performance standards so that we have some measure of progress. Vocational educators have always had high standards for program completion and certification of competence. The next step is to make sure that persons who complete training programs such as vocational education actually get into jobs for which they were trained. That is where employment services come in. If we are going to reach the goals of a workable and cost-efficient training and placement program described by Assistant Secretary of Labor for Employment and Training, Albert Angrisani, we need to thoroughly examine already exsting programs such as the Employment service and vocational education and utilize the resources which they have developed and which are now in place.

In the coming months Congress will consider the budget for fiscal year 1983 and the reauthorization of both the Comprehensive Employment and Training Act (CETA) and the Vocational Education Act. It is my hope that we do not undo the important work that both of these programs have accomplished over the years and thereby delegate to the private sector the task of reinventing the wheel. We should be ready to consider changes which would improve the effectiveness of the vocational education programs and the employment services within the constraints of the budget.

In order to put our unused manpower resources to work we have to use our ability to train these people and our ability to place them into productive private sector employment. If we fail to do so the consequences will be continued high unemployment, escalating pressure on our entitlement programs on one hand, and private industry stagnant for lack of skilled labor, on the other.

It will be my hope as we debate the authorization and appropriations measures next year that a new emphasis will be placed on a national jobs and employment policy to help make economic recovery really meaningful for those who are now unemployed or underemployed.

Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER (Mr. ANDREWS). The Senator yields back the remainder of his time.

Mr. COCHRAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR HEINZ

The PRESIDING OFFICER. Under the previous order, the Senator from Pennsylvania (Mr. HEINZ) is recognized for not to exceed 15 minutes.

Mr. HEINZ. I thank the Chair.

FACTS SHOW WHY S. 708 DESERVES TO BECOME LAW

Mr. HEINZ. Mr. President, last month, on November 23, the Senate passed S. 708, amendments to the Foreign Corrupt Practices Act, legislation I was pleased to manage. On the House side, the Energy and Commerce Committee's Subcommittee on Telecommunications, Consumer Protection, and Finance has begun extensive hearings on the subject, the third of which will be held tomorrow.

S. 708, the bill which we passed here in the Senate, emerged from the Senate Banking Committee and, indeed, from the Senate itself, with considerable bipartisan support, and I hope the House will approach it in the same spirit. S. 708 is not aimed at trying to weaken the law, its goal is to clarify the law so American businessmen operating abroad will know with certainly what is legal or illegal. I expect that Government enforcement agencies will do a better job under these more certain standards, and that violators will be accorded swifter, surer punishment, as a result.

Let me explore further the question of greater certainty for American businessmen.

Throughout the debate on the bill, the question of certainty has been a critical one, and linked to it has been the problem of documenting sales lost by American companies because of the act.

One of the difficulties with this whole issue is in obtaining quotable examples. First of all, it is difficult to document what did not happen, and what we are primarily talking about here are sales that were not made, lost sales opportunities, indeed sales that were not even pursued because of the uncertainty generated by the Foreign Corrupt Practices Act. That is very difficult to document.

Second, it is difficult to get companies to talk about cases that border on what may be considered by some to be inappropriate activity, and, under some constructions of the current FCPA, even illegal. In other words, the ambiguities in the bill that leave so much doubt as to what is and what is not illegal are exactly what keep companies from talking about them. They fear that even discussion of the problem might lead them into trouble. When you have an American law that elicits that kind of response, that is so vague that companies are unsure of what is permitted, then the Congress is not doing its job in writing clear and precise laws. S. 708, in my judgment, corrects that and in the process of developing it, some specific business examples have been made available, and a body of evidence has been compiled. We do have some specific incidents, reinforced by a large amount of evidence compiled in the aggregate, that strongly support our efforts to amend the Foreign Corrupt Practices Act.

I would like to share some of these examples with my colleagues, emphasizing that each case is representative of many other similar cases. These are chosen to point out different aspects of the problem.

The general problem is that the FCPA currently pays little or no attention to foreign conditions. It is as if it were created with blinders on. In some coun-

tries—I should say in a great many countries—small gratuities, or "grease payments"—facilitating payments—are essential, everyday aspects of commerce if one is to get anything accomplished. The FCPA tried to make an exception for these, but did not so do clearly. Companies still do not know what is and what is not permissible. Let me cite an example:

During an exhibition trip to Singapore, a U.S. company learned that a series of payments would be required in order to do business in Indonesia. These included payments to the switchboard operator in the hotel, to secretaries for arranging appointments, to the administrative assistant of the customer to meet with the customer (although an appointment had already been made), to all the company sales representatives, to guards watching unloaded merchandise, and to customs officials. Unclear as to which payments were proscribed by the FCPA, the company withdrew from competition for installation of the communications equipment.

Another case where the FCPA comes up, not against bribery in its true sense, but against customary practice in a culture far different from our own occurs in some Asian countries where it has always been customary and, in fact, required to provide samples of new drugs to doctors and hospitals. Health care in this part of the world is often provided in government facilities. It is well known that the samples are sold to provide extra income for government hospital doctors and staff.

Those firms that "sample generously" are more likely to have their products prescribed. Now, due to the FCPA, pharmaceutical companies are unsure as to how much sampling would constitute a violation. There is a question as to whether samples provided to doctors and purchasing agents that ultimately are given to government doctors and hospitals can be considered corrupt payments. The alternative is that less sampling by U.S. producers results in Japanese, German, and Swiss competition taking away the business of the U.S. pharmaceutical companies because they have no restrictions on their sampling practices.

These are not payments, gifts, and so forth, designed to obtain business to which one would not be entitled. These are practices often essential for doing business in these countries. It was not the intent of the drafters of the FCPA to proscribe this activity, but it has surely been the effect of the present law.

Often because of these uncertainties companies choose not even to try to enter the market for fear of unintentionally violating the law. One such example is the following:

A multinational U.S.-based engineering company spent approximately a quarter million dollars on a 1979 study to evaluate its potential market in Latin America. Three countries—Brazil, Mexico, and Venezuela—were seriously considered as potential markets for either exporting process engineering services or establishing local engineering services. One of the major reasons the company chose not to pursue these markets was that business practices associated with the construction industry in these countries are significantly different from those in the more developed markets in which the company currently operates.

Although the company is opposed to the concept of improper payments and, in fact, specifically prohibits them as part of its corporate policy, it felt that the unrealistic provisions of the FCPA regarding responsibility for the activities of independent agents and subcontractors and the concomitant costs to try to police such activities would have markedly lessened its competitiveness in this market.

The FCPA is driving American businesses out of export markets. It is losing us sales, offending those who were our commercial friends. This latter effect comes about often because the law requires that a company be responsible for the actions of its agents, even if the company has only some undefined "reason to know" that some sort of poorly defined inappropriate payment might be made. Let me cite an example:

An American manufacturing company exported its products to a country in Southeast Asia where they were marketed by a local agent. The relationship had existed for over 10 years. Although the commission paid to the agent was reasonable, the manufacturer suspected that the agent may have used part of the commission to pay Government procurement officials. His suspicions were based mainly on his knowledge of local trading practices, although there was no way he could verify these concerns.

Shortly after passage of the FCPA, the agent abruptly canceled his agreement with the manufacturer. It was determined later that the agent had signed an agreement with a European competitor. Two months later the manufacturer lost a tender, on which he bid directly, to his old agent, even though his bid was competitive. After an unsuccessful attempt to find a new agent, the manufacturer withdrew from the market in 1979.

Gov. Robert Graham of Florida, testifying in favor of S. 708 on behalf of the National Governors Association, cited several examples of how the FCPA was unintentionally disrupting U.S. export relations. These come from the failure of the act to take foreign conditions into account, a major consideration addressed by S. 708. I wish to quote from Governor Graham's testimony and share two additional examples:

I have also solicited from Florida business some other examples. One that I would share, a south Florida firm, after two years of negotiations, entered into a $200 million equipment contract for a major hospital complex in the Middle East. Corporate counsel reviewed and recommended that the foreign agent sign an affidavit concerning his past and present conduct.

The agent refused to do that, considering it an insult, and terminating what had been a longstanding profitable business relationship. The company lost $200 million in contract, a minimum of 200 new jobs.

The second example was a Florida manufacturing company which negotiated a contract for a major hotel project in the Middle East. Florida legal counsel insisted on the clause in the contract providing that the agent would comply with the U.S. Foreign Corrupt Practices Act. The agent was offended. This destroyed a 10 year business relationship between the agent and the Florida company. This particular contract would have meant $25 million and 75 new jobs in our State.

Mr. President, the ultimate point of these examples is that we are depriving ourselves of much-needed foreign trade which, in turn, would mean jobs for our work force, support for our balance of payments, and stimulation of our industry. Allow me to quote two last examples to show just how the FCPA is taxing American business:

An American company held 20 percent equity in a company in Southeast Asia. As part of their agreement, the American company provided technical and managerial expertise and held one seat of a five-man board in return for a fixed fee and a percent of the profit. Under the consent agreement reached with the U.S. Government, the manager of the American company was required to sign quarterly statements of FCPA compliance. When he informed the affiliate's board of directors of this requirement, they suggested the following alternatives:

(A) Replace the American manager with another national who would not be required to sign the compliance statement; or

(B) Divest their interest in the affiliate's company.

Since the American company knew that the change of manager would not release them from the FCPA compliance agreement, they were forced into the divestiture alternative. Unfortunately, the timing was poor and the sale of equity was at half the asset value. The loss for 1979 on the investment, management fees, and profit sharing was estimated at $2 million.

The last example that I will cite, and I emphasize once again that these are representative of many, many more cases, is from the testimony of John T. Subak, the group vice president and general counsel of Rohm & Haas Co.

We believe that the "reason to know" standard is sufficiently vague and, as I've said, it is a standard where we might well be judged by hindsight so that we, in fact, walk away from business in a number of countries not because we would have to bribe to get the business, but because it is customary to deal in those countries through distributors and we simply cannot live up to the vague standard under the present law.

We, therefore, have voluntarily walked away from that business. It hasn't busted us. We were profitable before. We are still profitable, but it hurts, and we believe that we are quite typical of a number of other countries.

You might properly ask how much. That is very hard to tell. We have made various guesses at it. We are guessing it is in the $15-to-$20 million-a-year range. That guess may be a little high, it may be a little low, but it's probably in the right ballpark. If you multiplied that number by the number of other American businesses that are similarly affected, I think that you will recognize that the law is a serious impediment to our competitive position outside the United States.

As Mr. Subak mentions, Mr. President, that is just one company, with $15 to $20 million in sales lost per year because of ambiguities in our law. I asked the Emergency Committee for American Trade to survey their members and to estimate, for the record, what they thought was the total cost to their membership, which constitutes the Fortune 100, of the uncertainties contained in the FCPA. Their estimate was that the FCPA was a factor in losses of business totaling over $2 billion. Now, they do not claim it is the sole cause, but it certainly has been an important factor. That is why we are proposing S. 708, to remove what amounts to a regressive tax on American commerce that brings revenues to no one except our trade competitors.

For these reasons, Mr. President, I must say that I was pleased by the action of the Senate in adopting S. 708. I was very pleased by its very wide and strong bipartisan support. I think the action on passage shows that we have acted to preserve the essential prohibitions against foreign bribery while eliminating costly and unnecessary inhibitions to our legitimate exports. Indeed, I challenge any Member of Congress, or anyone else, to show where S. 708, as passed by the Senate would permit any American company to act contrary to the underlying intent of the act.

I suggest that the reason that challenge has not been taken up is because S. 708, as approved by the Senate, is a moderate, reasonable piece of legislation, a compromise bill that enjoys bipartisan support and merits prompt enactment into law.

For these reasons, Mr. President, I hope that the other body will follow the example of the Senate and take prompt action on S. 708 so that we may send the revised law to the President for his signature. We will thereby do our exporters and the economy important and valuable service.

ROUTINE MORNING BUSINESS

The PRESIDIING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business for not to exceed 15 minutes, with statements therein limited to 3 minutes each.

EDUCATION EXCHANGE PROGRAMS

Mr. COCHRAN. Mr. President, on December 9, the pending business before the Senate was the amendment offered by the Senator from Connecticut (Mr. WEICKER) to express the sense of the Senate that academic exchange programs should not be reduced. However, consideration of the measure had to be postponed.

I rise at this time to indicate my strong support for the continued full funding of these programs. The educational and cultural exchange programs within the International Communications Agency serve a critical purpose in enabling the United States to maintain academic contact and hence a full flow of knowledge between and about our differing societies.

As a consequence of the educational and cultural programs of the ICA, there are now 35 heads of state and 400 cabinet ministers in foreign lands who early in their careers gained direct knowledge of American democracy and political freedom, and who established ties of continuing friendship with people in our country. The significance of these programs to our national defense and foreign policy presents not only a strong argument to maintain their existence but also one to increase support for them.

Intangibles, such as political climate, economic conditions, and attitudes, including good will developed by our exchange programs, make the Senate-recommended expenditure for educational and cultural programs very attractive. If the proposed cutbacks of these programs is allowed, the United States will surrender the field to the Soviet Union, which now offers more than 10 times as many fellowships to the Third World as we do. Hundreds of thousands of Third World students, including future leaders, will go to the U.S.S.R. to study, instead of coming to us, unless we have the vision to continue funding these important programs.

An administration-requested 56-percent reduction in the Fulbright exchange programs of students and faculty will affect our relations with 61 countries, and the reduction in the international visitors program will affect us in 75 countries. The Humphrey program will be eliminated entirely. We cannot allow such a crippling of a vital component of U.S. international good will.

I rose in support of the educational and cultural exchange programs when this issue was last discussed in the Chamber. Since that time the other body adopted a funding level of $1 million during the conference on the first resolution making continuing appropriations for fiscal year 1982. That $1 million funding level is also contained in the continuing resolution awaiting President Reagan's signature now. I hope that Congress has sent a message by these actions, that message being our strong support for adequate funds for these programs.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

EXPORT ADMINISTRATION AMENDMENTS ACT OF 1981—CONFERENCE REPORT

Mr. BAKER. Mr. President, this has been cleared with the minority. I ask unanimous consent that the Chair now lay before the Senate the conference report on the Export Administration Amendments Act of 1981, H.R. 3567, and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3567) to authorize appropriations for the fiscal years 1982 and 1983 to carry out the purposes of the Export Administration Act of 1979, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of December 11, 1981.)

Mr. BAKER. Mr. President, it is my hope that this measure can be cleared and taken to final passage in a fairly short period of time. I will not now ask for a time agreement. I am advised, though, that perhaps an hour would cover the Members on both sides.

The distinguished chairman of the Foreign Relations Committee is not yet on the floor. He will be here shortly. While I make other arrangements with the responsible parties on this side to manage the measure, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CORRECTION OF STATEMENT BY THE MANAGERS

Mr. HEINZ. Mr. President, before we begin consideration of the conference report, I would like to draw the attention of my colleagues to a printing error that was made in the conference report in the statement of the managers. The statement of the managers contains a reference to section 6130 of the Internal Revenue Code. The bill correctly cites the reference as section 6103. So, 6130 in the managers' statement should be understood as 6103.

Mr. President, I know there are a number of my colleagues coming over to the floor, but in order to advance consideration, I thought I might begin my comments on the conference report which we consider today, the conference report on H.R. 3567, the Export Administration Amentments Act of 1981.

Let me say to my colleagues that I believe this is a good conference report.

Like most good conference reports, it reflects give and take by both bodies, while showing a broad consensus on the provisions that form the heart of the act.

In addition to providing authorizations for the Export Administration ac-

tivities of the Commerce Department, the act addresses some of the major concerns that surround this important area of national policy.

For example, Mr. President, there has been a disturbing and dangerous increase in efforts by the Soviet Union, both overtly and covertly, to obtain high technology from the United States. H.R. 3567 improves our defenses against those efforts by dramatically increasing the fines for violation of any controls that are placed on U.S. exports for foreign policy or national security reasons.

The maximum $1 million fine per violation for corporations and a $250,000 maximum fine per violation for individuals for criminal violations, should, when combined with the current substantial jail terms, be sufficient to deter anyone from exporting goods or technology or services that would be a hazard to our national interest. The point is not to increase the punishment as much as it is to increase the deterrent so that such an export would never occur in the first place. I am confident, Mr. President, that this increased authority will go a long way toward achieving that objective.

On the civil penalty issue, the House receded to the Senate position, that a dramatic increase in the maximum fine currently is only necessary with respect to national security controls.

The House also receded to the Senate language providing for increased cooperation among Federal agencies responsible for enforcement of the act, another area that has been a source of difficulties and inefficiencies in the past. Related to this, H.R. 3567 provides for improved oversight by the Congress and the General Accounting Office. The House conferees agreed to accept this latter provision as well, which was not contained in the version originally passed by the House. It is an important provision that will help to insure that export controls are carried out fully in accordance with congressional intent.

But, Mr. President, I mentioned that there was give and take involved in the conference. The Senate receded, with reluctance, to the House authorization level for fiscal year 1983. The House conferees also found it necessary to object to two of the provisions in the Senate bill that were added during debate on the Senate floor. Although expressing sympathy for their intent, the House conferees indicated that the amendments, not being germane to the bill, and being under the jurisdiction of a different House committee, would be subject to a point of order on the House floor. The Senate conferees found it sensible to recede to the House position on these amendments.

The House Members raised strong and persistent objections to the amendment in the Senate bill concerning grain embargoes.

I know my colleague from Illinois, indeed, I suspect both of my colleagues from Illinois. will have some very pertinent remarks in that regard. I look forward to hearing them, Mr. President.

In light of that firm opposition by the Members of the other body, the Senate conferees deemed it advisable to recede to the House rather than unnecessarily put off the adoption of an already overdue piece of legislation. The Senate conferees noted that the protection sought by the amendment is already provided for in the Agricultural Authorization Act, which establishes a 100-percent parity standard for losses sustained by farmers due to an agricultural embargo.

Moreover, Mr. President, the provision in the Senate bill would not have entered into effect until 1985. Inasmuch as the bill before us is only a 2-year authorization, there will be another opportunity before then, in 1983, to amend the act should circumstances make it clear that it would be wise to do so.

In sum, Mr. President, this is a balanced conference report. It is a good conference report. Both Houses had to give a little, and both Houses got most of what they wanted. That is the way that our bicameral system works. The heart of the legislation was only strengthened. The fines are higher for violation of the national security controls. Increased cooperation among enforcement agencies is provided for, and the Congress and the GAO are given enhanced oversight powers. That is what the Export Administration Amendments Act entails, and I urge adoption of the conference report.

The PRESIDING OFFICER (Mr. GARN). The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I am disappointed that the conferees on the Export Administration Act adopted the House funding levels for fiscal year 1983. The House fiscal year 1983 funding level exceeded the President's request by $1.3 million which the Senate adopted. While $1.3 million may not appear to be much in the face of budget deficits projected in the range of $100 billion, the failure to save these small sums adds up.

I will not quote Everett Dirksen on that subject, but whether it is $1 million or $1 billion, it is money, and I think we should have been more careful.

The Appropriations Committees and the Congress in authorizing expenditures for fiscal year 1983 during the budget process will have to be careful with examples such as this.

There is much in this legislation to commend it. I agree with the action of the conferees in not adopting the grain embargo language. I also agree with the access to Commerce information that the GAO is granted. The sharing of information by IRS with Commerce is also a positive development.

By adopting this legislation we send a signal to the Soviet Union to keep hands off Poland. The legislation provides that no provision of law shall prohibit a total embargo against the Soviet Union in the event of military action against Poland. Stronger action is not precluded. This is a step forward and I hope the Soviets will see this as a strong signal to stay out of Poland's affairs.

I congratulate the chairman of the subcommittee, Chairman HEINZ, for his very competent work in handling the report in conference.

Mr. President, I yield the floor.

Mr. DIXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Mr. President, first I want to thank my distinguished colleague and friend, the Senator from Pennsylvania, and my colleague and friend, the Senator from Wisconsin, the ranking minority member and the manager on this side, with respect to this bill, for their courtesy throughout this proceeding.

However, I regret very much, Mr. President, that I must rise in opposition to this conference committee report, a conference report that the junior Senator from Illinois declined to sign.

Mr. President, on November 9 of this year, my distinguished senior colleague and warm friend, the chairman of the Committee on Foreign Relations (Mr. PERCY), and I offered an amendment to S. 1112, the Export Administration Amendments Act of 1981, requiring the President to obtain congressional approval for future selective embargoes of agricultural commodities.

On November 12, 1981, that amendment, in a slightly modified form, was adopted by the Senate by a substantial vote of 66 to 20.

Now the Senate is considering the conference report on H.R. 3567, the companion House measure. This act does not contain the language that Senator PERCY and I offered. In fact, it makes no change in existing law as it relates to agricultural commodities.

I continue to believe that the case for this amendment is compelling. American agriculture has been too often disadvantaged in the past by the imposition of export controls and needs the protection that the amendment would have provided.

The amendment is a simple one. It provides for meaningful congressional input into the decisionmaking process at a time when it counts, rather than, as now, when it is too late.

Mr. President, I do not want to take the time of the Senate to make again all the arguments I made when the amendment was first considered on the Senate floor. However, I do believe they deserve restating, in at least summary fashion.

The simple truth is that agricultural embargoes represent poor public policy. They feed the impression that the United States is an impulsive and unreliable supplier of goods and services.

Embargoes, or even the possibility of embargoes, make it more difficult for our farmers to meet increased foreign competition.

Embargoes act to increase the volatility of the marketplace, making it difficult for farmers to plan intelligently.

Embargoes can also have an adverse impact on the U.S. balance of payments.

In sum, Mr. President, the economic costs include inflation, economic stagnation, and unemployment, the full extent depending in part upon the uncertain duration of the embargoes.

Mr. President, let me state again that I am not suggesting that an embargo is never sound public policy. I do believe, however, that farmers should not be singled out as targets for export controls except under exceptional circumstances.

I also remind my colleagues that the amendment that was adopted by the Senate was a compromise. The facts, as I see them, warrant going considerably further. The important point to remember, however, is that the compromise language that was adopted helped to protect the American farmer while also working to preserve the President's ability to respond rapidly to fast-moving events abroad.

I am extremely disappointed, therefore, that I was outvoted in the conference and that the other conferees chose to ignore the will of the Senate and drop the Percy-Dixon amendment. I believe that the conference committee erred in not accepting the Percy-Dixon amendment.

I urge my colleagues, therefore, to join with me in opposing this conference report, to demonstrate to the House that the Senate is serious in its desire to address this issue. Defeating this conference report will demonstrate the importance the Senate attaches to the agricultural embargo question. Mr. President, I believe that the failure of the House to engage in meaningful negotiations on this issue requires the defeat of the conference report.

I urge again its defeat.

Mr. President, let me make very quickly a few points in conclusion:

First. This basic act, the act we are talking about, does not have to be extended until 1983, so it does not matter if we reject this conference committee report now, because we do not have to act until 1983.

Second. The appropriation for this act is presently contained in the continuing resolution that we passed a few days ago, so we do not kill the Export Administration Act by voting against this conference report. The act is still in place; the act is still funded by the continuing resolution.

Third. My good and warm friend, the Senator from Pennsylvania (Mr. HEINZ), has suggested that in the farm bill, there is an export embargo provision that will protect the American farmer. I agree that there is. I helped put it in there in the Committee on Agriculture with my friends, Senator DOLE, Senator JEPSEN, and others. That farm bill is not the only thing the farmers want and need. Farmers and farm organizations want this provision as well, the Percy-Dixon amendment, that was adopted by the Senate 66 to 20. They work together. They go hand in glove. They provide that the Congress of the United States must act when agricultural embargoes are under consideration.

Fourth. The conference committee was made up of members from the Banking Committee in the Senate and the Foreign Affairs Committee from the House, and there were not, frankly, other spokesmen to support my position with respect to the concerns of farm organizations on this very vital question to the American farmer.

Fifth. What do embargoes do? Yesterday, the news in the country was that we might cut off some food supplies from Poland. I hold in my hand a clipping from the Chicago Tribune of today. The Chicago Tribune business section says today, "Grains, Beans Skid on Poland Crisis."

What does it say in the body of the article? It says this:

> But after the United States suspended food aid to Poland, futures fell to new lows, just after midday.
>
> Wheat closed 8¾ to 12¾ cents lower, corn was 5 to 6½ cents lower, oats were 1¾ to 4½ cents lower, and soybeans were 1 to 9 cents lower.

My friends, the American farmer, right now, faces a major crisis. In these inflated times, he is paying $90,000 for tractors, $125,000 for combines, facing the highest interest rates he has faced in decades. And his commodity prices are dropping like a rock.

This is not any time to send the American farmer another bad message, Mr. President. This Percy-Dixon amendment was adopted in the U.S. Senate, 66 to 20. It sent the right message to the American farmer. In my view, it is an unconscionable act to remove it from this conference committee report.

I say in conclusion, Mr. President, the Senate's act in voting against this conference committee report does not mean a vote against the Export Administration Act. It does not go out of business until 1983. We can look at it again next year. And it does not fail to fund that act. That act is funded in the continuing resolution.

Strike a blow for the farmer. Vote against this conference committee report. I urge my colleagues to vote no on the conference committee report.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. COCHRAN). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PERCY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, the action of the conferees on the Export Administration Act has come as a tremendous disappointment to my distinguished colleague (Mr. DIXON) and myself.

Senator DIXON was a conferee and vigorously fought for the conference to accept this amendment. We felt it was right. It was overwhelmingly supported by the Senate, and it should have prevailed. It is a source of deep disappointment not only to us but also to every farmer in the United States of America.

I should like to express my feelings as to why the Percy-Dixon amendment should not have been dropped from this bill, and why I intend to oppose this conference report.

Our amendment passed the Senate on November 12 by a vote of 66 to 20, a strong statement by the Senate that restrictions on the export of agricultural products to any country for foreign policy or national security reasons should not be imposed unless such an across-the-board ban on all trade with that country. By adopting this amendment, the Senate agreed to preclude in the future the restriction of agricultural exports in other than a total trade embargo. If for some reason, however, of foreign policy or national security agricultural products were singled out for export control, the approval of both Houses of Congress would be required.

Mr. President, I stated at the time, and I still believe today, that—as a practical matter—we must recognize that circumstances do exist in which the economic benefits and the presumption against Government interference with international commerce by U.S. citizens are outweighed by the potential adverse effect of particular exports on the national security, foreign policy, or economy of the United States. Our amendment in no way hampered the President's authority to impose an across-the-board embargo. Because of President Carter's grain embargo, and instability it caused in the agricultural sector, there are still larger questions remaining about how selective embargoes are imposed.

Our amendment would have required congressional approval for agricultural embargoes not later than 60 days after the President acts. We felt that by adding such a provision to the Export Administration Act, full consultation by the executive branch with Congress and its leadership and with the farm community would be guaranteed.

I believe the farm community of this country has been done a great disservice in the conferees' rejection of the Percy-Dixon amendment, and I can see no other course of action but to vote against this conference report.

Mr. President, I should like to point up again the inequity of a policy that would single out agricultural products for embargo or suspended shipment and then continue business as usual for foreign policy reasons.

This was the first time in the history of America that a President did use an agricultural export embargo for foreign policy reasons. We have used them before, particularly during the Nixon administration when suspending exports was intended for the purpose of having an impact on domestic pricing. But when the Carter administration imposed the grain embargo on the Soviet Union, it was the first time such action had been taken for foreign policy reasons.

Yesterday, during a briefing that I asked the State Department to give, on a classified basis, to the Members of the Senate on events in Poland, we learned that the Polish Government had been notified by the administration of a suspension of consideration of further agricultural shipments to Poland. This should be looked upon as a period to assess what is happening in Poland, and what the intentions are of the military regime with respect to Poland's renewal and the civil rights of Polish citizens. Secretary Haig, speaking last night for the administration, announced that products in the pipeline previously approved and committed would continue to be shipped. Some $15 million worth of food and other humaritarian aid en route through CARE, Catholic Relief Agencies, and other private charities will also go forward unimpeded. What is immediately suspended and under further consideration by the administration is Poland's $740 million worth of agricultural credits for fiscal year 1982, including an initial $100 million worth of emergency credits approved last week by the administration in principle but subject to working out of technical financing details even before the weekend's imposition of martial law.

Here, again, I understand the administration's suspension to be for temporary purposes of assessment. Over the longer term, it would be perfectly improper for us to single out food, agricultural products, for people who are short of food. Those are the very kinds of shipments that should be made for humanitarian purposes, that should have the highest priority.

If we are going to suspend any shipments, all shipments should be suspended. In this case, we should give very careful consideration—and I know the administration will give very careful consideration—to any suspension of humanitarian assistance.

This is simply a pause now to assess what is happening in these rapidly changing and unfolding events in Poland.

Mr. President, I ask unanimous consent to have printed in the RECORD the statement of the administration in this regard and the action to be taken, as reported in this morning's Washington Post.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. LACKS INFORMATION, ACTS WARILY

(By John M. Goshko and Don Oberdorfer)

Senior administration officials, admitting that they still lack sufficient information to make "hard judgments" about the Polish crisis, said yesterday the United States will try to reserve its policy options toward Poland until the extent of repression, stability and Soviet involvement in the military crackdown there becomes clear.

Illustrative of this attempt to approach Poland with a cautious wait-and-see attitude were the remarks of Secretary of State Alexander M. Haig Jr. as he arrived back in Washington from Brussels. He said U.S. food aid in the pipeline for Poland should be delivered on schedule. But he added that decisions on pending requests from the economically hard-pressed Polish authorities for new assistance will be held in abeyance.

Haig's comment was intended, in part, to clear up an apparent misunderstanding that occurred when Sen. Charles H. Percy (R-Ill.), chairman of the Foreign Relations Committee, announced he had been told that shipments of U.S. food were being suspended. U.S. officials said Haig was anxious to point out that aid already agreed upon will continue and that there is no intention of taking punitive action against the Polish people.

This U.S. stance was described by a senior official aboard Haig's plane as trying to tread a fine line in actions and public comment on the Polish situation. The aim, the official stressed, is to avoid inciting violence that might lead to Soviet intervention, while at the same time, not giving the impression of U.S. acquiescence in any repression of the Polish reform process.

According to other officials, that approach also was taken by President Reagan when he talked by telephone yesterday with Pope John Paul II. The officials said the Polish-born pontiff had asked that the United States continue its food aid to his country, and they added that the president promised to give the request serious consideration.

Following Haig's return, the President's key foreign policy advisers met for an hour at the White House last night under the chairmanship of Vice President Bush for the first full-scale review of the situation and an attempt to carve out the outlines of a policy for dealing with it.

Deputy White House press secretary Larry Speakes said Reagan would not take part in the meeting, which included all of his chief aides in the foreign policy, defense and economic areas. Instead, Speakes said, the gist of what was discussed at the meeting would be relayed to the President.

According to the senior official accompanying Haig, participants in the meeting will have to wrestle with two main questions: the extent to which the dissident trade union, Solidarity, and the Polish people will resist the crackdown, and whether the military's aim in assuming complete power is a temporary slowing down of the reform process or a permanent repression of it.

As of last night, the official conceded, none of this was clear. He said: "We really lack enough information to make any hard judgments. . . . For this reason, our stance has been to avoid making hard decisions until more facts are known."

The official added, "In the hours, days and perhaps weeks ahead, we are best served by a careful monitorship and the avoidance of precipitous judgments, actions or statements."

In response to questions about whether the Soviets were involved directly or indirectly in the military takeover over the weekend, the official said western intelligence agencies had not reported any change from the situation on Sunday. At that time, Haig said there were no signs of direct Soviet involvement.

The official said the tools available to the United States and its allies in dealing with Poland are both diplomatic and economic. On the economic side, the question is whether the West will continue to provide food and financial support for that debt-ridden, increasingly destitute nation.

Although U.S. officials refused to discuss it yesterday, the administration on Friday decided to authorize $100 million in new feed-grain credits for Poland and then suspended it after the military takeover.

Other officials said the aid question was among the subjects marked for intensive discussion at last night's White House meeting. The administration, they added, recognizes there is a potential problem in reconciling political decisions that might be made by the United States and its European allies with the economic interests of private banks, which hold $16 billion of Poland's $26 billion debt to the West.

Of this $26 billion, approximately $4 billion is accounted for by loans from the U.S. government and private American banks.

The official on Haig's plane said the Voice of America had been instructed, in its broadcasts to Poland, to emphasize "factual, objective reporting of the situation" and be careful not to give the impression that the United States is calling for violence or acquiescing in the crackdown.

After landing at Andrews Air Force Base, Haig said he thought the administration had received "a fair, acceptable level of intelligence" in terms of what the Polish armed forces might do. He added, however, that Washington, its allies and the leaders of Solidarity all were surprised by the military's decision to go ahead with a crackdown and by its timing.

In addition to Bush and Haig, participants in the White House meeting last night were Defense Secretary Caspar W. Weinberger, Treasury Secretary Donald T. Regan, acting national security adviser James Nance, Central Intelligence Agency Director William P. Casey, U.N. Ambassador Jeane Kirkpatrick, Deputy Secretary of State William P. Clark, Deputy Defense Secretary Frank Carlucci, White House chief of staff James A. Baker III and deputy chief of staff Michael K Deaver.

Mr. PERCY. Mr. President, I will comment subsequently on this particular action.

Mr. DIXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. DIXON. Mr. President, I ask for the yeas and nays on this conference report.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Is there further debate on the conference report? If not, the question is on agreeing to the conference report. The yeas and nays have been ordered, and the clerk will call the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Kansas (Mrs. KASSEBAUM), the Senator from Maryland (Mr. MATHIAS), and the Senator from Texas (Mr. TOWER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Missouri (Mr. EAGLETON) and the Senator from Montana (Mr. MELCHER) are necessarily absent.

I further announce that, if present and voting, the Senator from Montana (Mr. MELCHER) would vote "yes."

The PRESIDING OFFICER (Mrs. HAWKINS). Are there any Senators in the Chamber wishing to vote?

The result was announced—yeas 67, nays 27, as follows:

[Rollcall Vote No. 485 Leg.]

YEAS—67

Armstrong	Garn	Mitchell
Baker	Glenn	Moynihan
Baucus	Gorton	Murkowski
Boschwitz	Hart	Packwood
Bradley	Hatch	Pell
Bumpers	Hatfield	Quayle
Byrd, Harry F., Jr.	Hawkins	Randolph
	Hayakawa	Riegle
Byrd, Robert C.	Heinz	Rudman
Cannon	Hollings	Sarbanes
Chafee	Inouye	Schmitt
Chiles	Jackson	Simpson
Cochran	Johnston	Specter
Cohen	Kasten	Stafford
Cranston	Kennedy	Stennis
D'Amato	Laxalt	Stevens
Danforth	Leahy	Thurmond
DeConcini	Levin	Tsongas
Denton	Long	Wallop
Dodd	Lugar	Warner
Domenici	Matsunaga	Weicker
Durenberger	Mattingly	Williams
Ford	Metzenbaum	

NAYS—27

Abdnor	Exon	Nunn
Andrews	Grassley	Percy
Bentsen	Heflin	Pressler
Biden	Helms	Proxmire
Boren	Huddleston	Pryor
Burdick	Humphrey	Roth
Dixon	Jepsen	Sasser
Dole	McClure	Symms
East	Nickles	Zorinsky

NOT VOTING—6

Eagleton	Kassebaum	Melcher
Goldwater	Mathias	Tower

So the conference report was agreed to.

Mr. STEVENS. Madam President, I move to reconsider the vote by which the conference report was adopted.

Mr. PROXMIRE. Madam President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RECESS UNTIL 2 P.M.

Mr. BAKER. Madam President, I wish to announce that a number of Senators, happily not a majority but a significant minority of Senators, are in a party caucus off the floor. In deference to that quasi-official function of the Senate, and since it involves so many Members of the Senate, I ask unanimous consent that the Senate now stand in recess until the hour of 2 p.m.

There being no objection, the Senate, at 12:32 p.m. recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. WARNER).

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SPECTER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Pennsylvania.

DISAPPROVAL OF DEFERRAL NUMBERED D82-193

Mr. SPECTER. Mr. President, I ask unanimous consent that the Committees on Appropriations, Budget, and Judiciary be discharged from further consideration of Senate Resolution 260.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, reserving the right to object—and I will not object—I reserve solely for the purpose of saying that the request made by the distinguished Senator from Pennsylvania is cleared on the majority side, and I yield to the minority.

Mr. BURDICK. Mr. President, it is likewise cleared on the minority side.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the resolution by title.

The bill clerk read as follows:

A resolution (S. Res. 260) to disapprove deferral numbered D82-193.

Mr. SPECTER. Mr. President, I further ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate proceeded to consider the resolution.

Mr. SPECTER. Mr. President, this resolution in addition to myself, is sponsored by Mr. KENNEDY, Mr. METZENBAUM, Mr. HEFLIN, Mr. WEICKER, Mr. MATHIAS, Mr. DURENBERGER, Mr. LEVIN, and Mr. RIEGLE.

I ask unanimous consent that Senator GORTON be added as a cosponsor.

Mr. President, this matter was sent to the desk on Friday last. It seeks to obtain clearance for some $70 million of urgent funding for the programs of the Office of Juvenile Justice and Delinquency Prevention, and funding of various other programs within the Office of Justice Assistance, Research and Statistics at the Department of Justice. These funds have passed all of the substantial hurdles to qualify for expenditure.

The juvenile justice program is one which has attained very great success on a matter of great urgency; it includes efforts of crime prevention among juveniles, who regrettably contribute so much to the problem of violent crime in this country.

The fiscal year 1981 figure for the Federal juvenile justice program approximated $100 million. Former President Carter had asked for $135 million for fiscal year 1982, and in line with economies generally that has been reduced to $70 million. That figure was approved by the Senate Committee on the Judiciary, the authorizing committee, and ultimately by the Committee on Appropriations. But there has been put into effect by OMB a deferral. That deferral is having very disastrous consequences and jeopardizes the juvenile justice programs in States including Alabama, Arizona, Arkansas, Louisiana, Maryland, Michigan, Minnesota, Missouri, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Texas, Utah, Vermont, Washington, West Virginia, and in the District of Columbia.

In order to expedite this matter I asked the distinguished Senator from New Mexico (Mr. DOMENICI) for clearance on Friday, and he obtained a favorable poll on Monday from the Committee on the Budget and so notified us yesterday. I wish to thank the distinguished Senator from Washington (Mr. GORTON), a member of that committee for joining as cosponsor, along with Senators METZENBAUM and RIEGLE, who have been steadfast supporters of this program.

I asked for clearance from the distinguished Senator from South Carolina (Mr. THURMOND) who did not object and this resolution was cleared through the Committee on the Judiciary this morning. I thank him for his prompt action and my colleagues from Massachusetts (Mr. KENNEDY), Maryland (Mr. MATHIAS), Ohio (Mr. METZENBAUM), and Alabama (Mr. HEFLIN), who are members of that committee cosponsoring this resolution.

The matter has been submitted to the distinguished Senator from Oregon (Mr. HATFIELD) who has given his clearance. I know of no objection to the resolution from the Appropriations Committee. Indeed, the distinguished Senator from Connecticut (Mr. WEICKER), who chairs the relevant subcommittee is a cosponsor and strong supporter of this resolution.

The approval of the other side of the aisle has also been obtained.

● Mr. KENNEDY. Mr. President, I am pleased to join with Senator SPECTER this afternoon in offering this resolution to disapprove the administration's effort to defer the appropriation for juvenile justice programs.

This matter has been before the Judiciary Committee a number of times and the committee has made clear our commitment to continue juvenile justice programs as part of the effort to combat violent crime.

In fiscal year 1981 the State of Massachusetts received $1.5 million from the juvenile justice program in the Department of Justice. With its share of $367,000 of this money, the city of Boston established eight educational and employment programs aimed at offering juveniles an alternative to a career in crime. This year, Massachusetts would receive $986,000 if the President releases the funds.

The deferral is an effort to reverse the will of Congress by OMB fiat. Since the beginning of this fiscal year, no funds have been spent on juvenile justice programs in the States and the program is being adversely effected. For example, three quarters of the Massachusetts programs will close if no funding is received by February 1, 1982.

The purpose of the OMB deferral is allegedly to "preserve policy options." But there is no question concerning congressional intent to fund the juvenile justice program. Both Houses have proposed a level of $70 million. We should send a clear message to the administration that the Congress remains serious about combating virulent juvenile delinquency.

This is just one more instance in which the administration's vaunted "war on crime" turns out to be a war in which law enforcement officials are sent into combat with little or no ammunition. For the vast majority of Americans, security on their street and in their homes is as important as international security. We cannot afford cuts in these vital programs.●

● Mr. HEFLIN. Mr. President. I rise today in support of the resolution introduced by Senator SPECTER and several

more of my distinguished colleagues. This resolution would result in a continuation of Federal funding for the Office of Juvenile Justice and Delinquency Prevention.

This is not the first time that I have addressed this body on matters related to the problem of crime in the United States, yet I feel that it is one of the most important. Crime is still a very serious domestic problem for our Nation, and adoption of this resolution will be a very important step in our fight against crime.

During the past several years, Americans have seen violent crime reach epidemic proportions in this country. Violent crime has spread to every section of America, carrying with it widespread feelings of fear. Americans are retreating, living behind locked doors to protect themselves. The current administration has declared that the reduction of violent crime is the top priority of the Department of Justice.

Today, with this resolution, we have a chance to take a step forward in the prevention of violent crime and the protection of our citizens.

According to the FBI Uniform Crime Report on Crime in the United States, juveniles are disproportionately responsible for violent crime in our country. Although less than 14 percent of the total population is made up of juveniles, juveniles account for more than 20 percent of all arrests for violent crime. Almost one-half of those arrested for arson, and one-third of those arrested for robbery are juveniles. They account for more than 15 percent of rape and aggravated assault arrests, and almost 10 percent of arrests for murder. Given these statistics, it is clear that if we are to take steps to reduce violent crime, we must certainly have a strong program of juvenile justice and delinquency prevention.

The testimony of juvenile justice experts in various forums around the country shows that the Federal Government plays an important and cost-beneficial role as a program catalyst to State and local jurisdictions in a united effort to alleviate these problems. The Office of Juvenile Justice and Delinquency Prevention has provided the major impetus of this effort, and has made significant progress. Through the efforts of this agency juvenile justice programs across our Nation have worked to reduce the commission of violent acts by juveniles, to improve the administration of juvenile justice, and to develop new approaches and responses to delinquent behavior. If we fail to adopt this resolution, these efforts, for the most part, will stop.

The Subcommittee on Juvenile Justice has heard testimony on what will happen if we do not act to continue funding of these programs. Already juvenile justice efforts are hampered by the temporary deferral of funding. Several years have been spent in developing these programs and today it is of the utmost importance that we continue them.

A year ago, when we passed the Juvenile Justice Amendments of 1980 which were signed into law by the President, the Senate Judiciary Committee reported that in view of the extent and costs of juvenile crime, the $200 million annual authorization for juvenile justice programs should be doubled or tripled. This year, rather than increasing that authorization, the committee reduced it by almost two-thirds to keep in line with efforts to reduce the Federal budget. Now, this resolution would save that $70 million authorization—the minimum amount necessary to continue this vital aspect of our effort against violent crime.

We have the opportunity, as I have said, to take an important step in our fight against crime. It is important not only to ourselves, but to our Nation and to all the Americans living in fear of violent crime. I urge each and every one of you to support this resolution and continue these important juvenile justice programs.

Thank you, Mr. President.●

Mr. SPECTER. At this point, I move adoption of the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 260) was agreed to as follows:

Resolved, That the Senate hereby disapproves the proposed deferral of budget authority (deferral numbered D82–193) for the Office of Justice Assistance, Research, and Statistics of the Department of Justice, as set forth in the special message transmitted by the President to the Congress on October 29, 1981, under section 1013 of the Impoundment Control Act of 1974.

Mr. SPECTER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SPECTER. Mr. President, I thank the distinguished majority leader for his very substanital assistance in pointing the way procedurally that enabled us to reach this point, and I thank him in behalf of thousands, perhaps tens of thousands, of people who are administering this program and benefit from it all across the country and who need this funding. This action taken by the Senate before it goes out of session will insure the continuation of this important juvenile crime prevention program, and all of us thank the Senator.

Mr. BAKER. I thank the Senator from Pennsylvania for his perseverance and skill in bringing this matter to the attention of the Senate at this time. It is indeed a major piece of legislation that will have a tremendous impact, and I think the Senate and the country owe him a debt of gratitude for his perseverance in seeing that this matter was dealt with during this session.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, it is my hope that we can proceed to the consideration of the social security minimum benefits conference report momentarily. I do not see Senators on the floor who are charged with the duty of managing that measure at the moment. I will seek to obtain their attendance on the floor so that we can proceed with that matter.

It is the intention of the leadership this afternoon to try to deal with other matters, particularly other conference reports, in the course of the afternoon. I also intend to ask the Senate later today to turn to the consideration of the agent identities bill when the appropriate time arrives.

Mr. President, while we await the managers of the bill on both sides, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BURDICK. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RURAL HEALTH CARE FOR THE ELDERLY: NEW PATHS IN NORTH DAKOTA

Mr. BURDICK. Mr. President, during the month of November I conducted a hearing of the Senate Special Committee on Aging in Grand Forks, N. Dak., to explore new ways of providing health services to the rural elderly. Many of us in Congress have been looking for ways to improve health services to the rural elderly for some time, and I thought that North Dakota offered a unique opportunity for us to gather valuable insights into the problems of rural areas.

North Dakota has the distinction of being the most rural State in the Nation. It also has a very large elderly population, and more than half of our State's elderly live in isolated, rural areas.

Given the growth of the elderly population expected in the near future, particularly among the oldest who need more specialized medical care, it is imperative that we find new and innovative ways of delivering health care services in rural areas.

The problems for rural areas are really twofold:

Historically, rural areas have been underserved by health care providers. Physicians and other health care personnel have been concentrated in more urban areas. We have taken some steps to provide incentives for health practitioners to locate in rural areas, and some progress has been made in the last few years to close the distribution gaps. But many rural areas of the country are still underserved. North Dakota certainly fits that description. Almost half of North Dakota's counties are officially designated health shortage areas, and eight do not even have a practicing physician. Over 80 percent of our physicians work in the 10 most populous counties, leav-

ing less than 20 percent of the doctors to serve the 43 percent of the population who live elsewhere.

A second problem of maldistribution is an undersupply of certain specialty areas—such as geriatric, family, and internal medicine specialties. Again, partially because of Federal incentives for increased training, part of this gap in family and internal medicine specialties has been closed. The need for geriatric specialties, however, is only beginning to be addressed. Very few physicians and other health care providers receive special training to provide health care to the elderly.

Experts now recognize that the coming explosion of the Nation's elderly population requires immediate attention to the development of geriatric training programs. I believe our hearing showed that this same problem is much more acute in rural areas.

I was especially pleased that Dr. Robert Butler, Director of the National Institute on Aging, was able to participate in our hearing and bring his insights on the need for specialized training in illnesses and care of the elderly to the discussion.

Our hearing also showed that already the demand for specialized health services to the rural elderly is booming. As Dr. Robin Staebler, chairman of the University of North Dakota's Department of Family Medicine pointed out, in North Dakota 60 percent of the present hospital care is directed to the elderly population. Nursing homes have long waiting lists and adult children are contracting their family doctors looking for specialized health services for their aged parents. The demand for health professionals who are trained in geriatrics will be made with greater frequency as nursing homes, hospitals, and physicians must expand to meet the growing number of aged patients.

All of our witnesses agreed that health professionals need much more preparation during their training for working with elderly patients.

Dr. Henry Janssen, who has practiced medicine for 2½ years in Linton, N. Dak., a very rural area in the southern part of the State, said that providing good quality health care for the rural elderly is quite difficult. He gave many reasons for this, including the isolation of the aged and the great distances which must be traveled to reach health services.

He also noted, however, what he called a lack of proper communication between the elderly and health care professionals, and strongly recommended more stress put on preventive medicine efforts through aggressive outreach and health screening programs.

One proposal which looks encouraging is a geriatric program which is now being designed by the North Dakota Department of Family Medicine. The program, called the applied gerontology educational system, will provide continuing medical education in the fields of gerontology and geriatric medicine, continuing education for nursing, allied health, and nonmedical professional personnel, and will also provide consumer education to elderly patients and their families.

Another example of the innovative work being done in North Dakota is the CARES project of the University of North Dakota Rehabilitation Hospital which provides outreach into rural areas. A team of physicians and allied health professionals provide onsite consultation with doctors and their patients for a variety of medical problems relating to rehabilitation.

Problems of getting transportation to available health services were also high on the list of problems presented by witnesses. Henry Lundene, himself a senior citizen, described a typical situation:

> In my county, an area of 36 townships or about 1,300 square miles with approximately 18,000 population, we do have a County Seat and another fair-sized city where we do have some medical services but many of my Walsh County people must somehow find transportation for 35 miles or more and then sit for hours in an uncomfortable waiting room; and pay from $12 to $16 for a blood pressure test or other minor medical service. If they are unable to contact the Senior Citizen Bus, then many must impose upon friends and relatives, which makes several of them hesitate.

Several witnesses said that one of the great failings was the lack of more homemaker and health care services for the elderly in their own homes. Home health care, in fact, was one of the ideas discussed most often. Another was the idea of a mobile health van that could travel between a number of small rural communities to provide basic preventive health services to local elderly residents. Apparently, some States already have developed this concept and have mobile health units that can serve several isolated rural communities at one time.

Both of these are ideas that I will be working to develop in the coming session of Congress. The Community Home Health Services Act, which I have cosponsored with Senator HATCH, is a promising way of making some of the ideas discussed at the hearing a reality. Despite today's budget restraints, I think there are also other things we can do at the Federal level to encourage wellness for the elderly, and I will be looking for ways of developing them in the coming year. Certainly, our hearing in North Dakota offered many innovative examples of how the whole health community, working with the rural elderly and others, can come to grips with some of the more difficult and often costly health problems faced by the rural elderly.

Mr. BURDICK. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routine morning business to extend not past the hour of 2:30 p.m. in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE SECURITY SITUATION IN CENTRAL AMERICA AND THE CARIBBEAN BASIN

Mr. HELMS. Mr. President, just a few minutes ago, the Subcommittee on Western Hemisphere Affairs of the Committee on Foreign Relations concluded 3 days of briefings and hearings focusing on the security situation in Central America and the Caribbean Basin.

On Thursday, December 10, the subcommittee received a classified briefing from the Central Intelligence Agency and the Defense Intelligence Agency on Cuban and Soviet-backed subversion in Central America. Mr. President, their briefings could not have been more professional. The Central Intelligence Agency's representative, Dr. Constantine Menges, gave the subcommittee a professional and measured overview of the security situation in the region; while the DIA representative, Ms. Kathleen Hayden, went into detail about technical aspects of weapons movement, routes of supply and strengths of insurgent forces.

Following the classified briefings, the subcommittee heard from Ambassador Thomas Enders, Assistant Secretary of State for Inter-American Affairs, on Monday, December 14. Ambassador Enders presented the subcommittee with a 37 page research paper entitled, "Cuba's Renewed Support for Violence in the Hemisphere." This detailed study outlines, first in general overview, and then on a country-by-country basis, the renewed efforts by Cuba to foment subversion in the Americas. Beginning with support for the struggling Sandinista movement in 1978, Cuba has increased support for leftist guerrilla movements in a dramatic way.

Not only does Cuba act as a training base for terrorists, but Fidel Castro's agents are active in the field. There are more than 1,500 Cuban military personnel in Nicaragua at present. In addition, there are another 4,300 nonmilitary Cuban personnel in that country. Cuba supplies weapons, either directly or as a conduit from the Soviet bloc, Libya, Algeria, and Iraq. Cuba supplies safe haven for guerrilla personnel, a transit point for training in the Soviet Union, and a conduit for money to rebel forces.

Cuba has become the greatest threat to freedom in this hemisphere, "the crown colony" of Soviet Imperialism, as Dr. Fred Ikle, today's witness before the Subcommittee on Western Hemisphere Affairs, called the Soviet outpost in the Caribbean.

Dr. Ikle, who is Undersecretary of Defense for Policy, painted a bleak picture of what Cuba is doing. With $2.5 billion worth of arms supplied by the Soviet Union, Cuba is a massive military machine, ready to do the bidding of its Soviet masters. With an army of more than 225,000 men in arms, a navy of 11,000, and an air force of 16,000. Cuba is an armed camp. And these figures do not in-

clude those hundreds of thousands of military-trained Cubans who serve as reservists—in many cases, these "reservists" are better trained than the regular armed forces of other Latin American nations.

With more than 200 Mig fighters, 650 tanks, 90 helicopters, nearly 50 torpedo and missile and attack boats, not to mention two attack submarines of the *Foxtrot* class, Cuba possesses a significant military capability. This capability is enhanced by the presence of a 3,000 man Soviet brigade stationed near Havana, 7,000 Soviet civilian advisers, and an additional 2,000 Soviet military advisers.

Dr. Ikle pointed out something that Americans are woefully unaware of—Cuba poses a not insubstantial military threat to the United States. In peacetime, 44 percent of all foreign trade tonnage and 45 percent of the crude oil to the United States pass through the Caribbean, within reach of Cuba's military might. In wartime, more than half of NATO's supplies would pass through the region. Thus, Cuba and the Soviet Union using Cuba as a basing area, pose serious threats to U.S. shipping in peacetime and wartime. In addition, Soviet technicians now use Cuba as an important intelligence gathering facility, just 90 miles from U.S. soil. Hardened aircraft storage facilities dot Cuba's massive aircraft runways, capable of servicing the most advanced attack and bomber aircraft in the Soviet inventory.

But Dr. Ikle did not confine his remarks solely to Cuba, Mr. President. In a chilling overview of the military build-up in Nicaragua, Mr. Ikle graphically showed the effect of the increase in the size of Nicaragua's armed forces:

> If Mexico, our good friend and neighbor, were ruled by a Sandinista regime and if such regime followed the pattern of the Sandinista military build-up, Mexico would acquire an armed force of seven million men. That is what the per capita mobilization in Nicaragua would translate into in Mexico: almost two million under arms today, and nearly seven million with the projected Nicaragua build-up.

Those are startling figures, Mr. President, especially when we learn that Mexico's Armed Force today is a 130,000-man force.

Mr. President, why does Nicaragua need such a large armed force? Are they afraid that the United States will invade them? I do not believe that is the case. If such fears were true, then the United States should have invaded Mexico years ago—in light of so many differences of such longstanding between our two countries. But Mexico does not fear invasion from the United States, nor should Nicaragua . . . unless Nicaragua uses its massive military force to attack its neighbors or spread subversion in the Hemisphere. Then, I predict, it will not be the United States acting alone against Nicaragua, it will be the nations of the hemisphere acting as American brothers, and dealing with an inter-American problem in an inter-American manner.

Mr. President, I commend the testimony and report provided by Ambassador Enders to my colleagues, and ask unanimous consent that they be included in the RECORD at the conclusion of my remarks.

I highly recommend that Senators take the time to read the testimony of Dr. Ikle, and ask unanimous consent that it be printed in the RECORD at the end of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE SECURITY THREAT IN THE CARIBBEAN AND CENTRAL AMERICA

Mr. Chairman, I am gratified that you invited me to appear before your committee. You have asked me to address the military developments in the Caribbean and in Central America.

For a century and a half, Mr. Chairman, the security of this hemisphere had been protected from the reach of European imperialism, initially through the application of the Monroe Doctrine and later through the efforts of collective security of the American republics. The West European empires, against which the Monroe Doctrine had been designed have long been disolved. But a new Imperialism has expanded in the East and is expanding still, stretching from the center of Europe to Afghanistan and Mongolia, with its outlying colonies and military outposts scattered around the globe: Vietnam, South Yemen, Angola—and the crown colony in the Caribbean, the island of Cuba.

The suppression of the unruly subjects in this Empire, and the annexation of new territories, is a major military enterprise.

It is backed up by the largest military arsenals in the world, it is being driven forward by the greatest military build-up in history.

In the center of the Caribbean, the crown colony of this Imperialism is becoming increasingly a direct military threat to the region and an indirect threat as an arms depot and logistics base for new Imperial annexations in Africa and Central America.

The Soviet Union has provided a high level of military imports into Cuba. The total value of Soviet arms shipments to Cuba since 1960 is about $2.5 billion. Since Cuban intervention in Angola, the average yearly totals have been almost twice that of the years preceding 1975. If one considers the weight of arms delivered thus far in 1981, Cuba has received 63,000 metric tons, making this the highest yearly total since the massive buildup in 1962—the year of the missile crisis.

Cuba's military personnel strength has increased and its military capabilities have improved dramatically over the last five years. A significant trend has been the development of an effective ready reserve which gives Castro and his Soviet masters a well trained, and to a large extent, battle experienced mercenary force which can be activated on short notice. About 70 percent of Cuba's forces in Angola and Ethiopia are these ready reservists who were recalled to active duty. The Cuban military capability is far in excess of any actual or imaginary defensive needs. Cuban armed forces include an army of over 225,000 a navy of about 11,000 and air and air defense forces of 16,000. These figures do not include hundreds of thousands of paramilitary forces which in many instances are better trained and equipped than the regular armed forces of other Caribbean countries.

Cuba has over 2.3 percent of its population in the regular armed forces. In fact, one of every twenty Cubans participates in some kind of security mission. By comparison, Mexico, with seven times Cuba's population, maintains regular defense forces half the size of Cuba's and has less than two tenths of one percent of its people in the regular armed forces. Brazil, the largest Latin American country, with 12 times the population of Cuba, also has only about two tenths of one percent of its population in its active military. And, in the United States, we have less than one percent of our people in the regular armed forces; that is to say, Mr. Chairman, Fidel Castro maintains about a ten-to-twenty times larger military effort than any of the other major nations in this hemisphere.

Cuba's neighbors in Central America (with the exception of Nicaragua) maintain small defense forces which vary from almost none for Costa Rica, to about 8,000 to 10,000 for Panama and 15,000 to 16,000 for Honduras and Guatemala, to about 20,000 for El Salvador. El Salvador, of course, has been compelled to expand its armed forces because of the totalitarian aggression against it. The Cuban army includes nine active and 18 reserve divisions.

The Cubans have over 200 MIG fighter aircraft, 650 tanks, 90 helicopters, two Foxtrot attack submarines, one Koni-class frigate, and about 50 torpedo and missile attack boats. This is clear and convincing evidence that Cuba is truly a highly militarized society with a growing military capability.

The Soviet influence in Cuba is all pervasive. The Soviet brigade with a strength of about 2,600 to 3,000 is located near Havana. In this area, the Soviets have a major intelligence collection facility which monitors U.S. communications. There are also an estimated 6,000 to 8,000 Soviet civilian advisors on the island. About 2,000 Soviet military advisors provide technical advice in support of such sophisticated weapons as the MIG's, surface-to-air missiles, and Cuba's Foxtrot submarines. Additionally, Soviet advisors are attached to Cuban ground units.

The Soviet Union has great influence on the Cuban Government for several reasons. First, the Soviets provide Cuba's principal economic support—a leverage that Fidel Castro cannot ignore. Second, the presence of Soviet personnel on the island, especially the large embassy staff and advisors in the economic and military spheres, allow the Soviet Imperial Masters to monitor closely their Caribbean crown colony.

It would be a grave mistake, Mr. Chairman, if we ignored the direct military threat that this Soviet-Cuban arsenal represents, some 90 miles to the south of Florida. This Soviet military outpost supports a massive intelligence collection center and sits astride critical sea lines of communication.

In peacetime, 44 percent of all foreign trade tonnage and 45 percent of the crude oil to the U.S. pass through the Caribbean. In addition, the Caribbean is a major refinery area in its own right. In wartime, half of NATO's supplies would transit by sea from Gulf ports through the Florida Straits and onward to Europe. Much of the petroleum shipments and important reinforcements destined for U.S. forces in Europe would be originating from Gulf ports. The security of our maritime operations in the Caribbean, hence, is critical to the security of the Atlantic Alliance.

Mr. Chairman, the increased Soviet military presence on Cuban soil and in the Caribbean poses a grave threat to this vital lifeline of the Alliance. In 1970, Soviet naval vessels spent approximately 200 ship days in the South Atlantic. In 1980, this number had increased thirteen-fold to 2,600 ship days. Given this presence and the current strength and disposition of the U.S. Navy, the South Atlantic sea lines of communication are far more vulnerable today than 10 years ago as or at the time of the Cuban missile crisis.

Mr. Chairman, sometimes it seems to me our European Allies, whose most basic security depends on this South Atlantic lifeline, are much to insouciant and cavalier about the growing military threat in the Caribbean.

More disturbing, perhaps, or at least more immediately pressing than this threat to the Alliance in the event of war, is the Soviet-Cuban effort presently underway further to

expand the reach of Soviet imperialism. This attempt for expansion and annexation employs all the tools of modern empire building: propaganda and deception, the export of terrorism, massive shipments of arms, and finally, the overthrow of established governments followed by the imposition of the new totalitarian rule, which is intended to be made irreversible through the import of these clever policy experts from East Berlin.

Nicaragua is close to the final stage of this intended irreversible transition, El Salvador is fighting in the middle phase, Honduras—as Secretary Enders explained to you yesterday—is now threatened by the early phase.

There are now between four and five thousand Cuban civilian advisors and about 1,500 Cuban military and security advisors in Nicaragua. Cuban advisors are believed to be serving in key posts throughout the government in which they exert considerable influence. Cuba is also getting considerable help from East European nations. We may soon see more East German police advisors, those efficient Gestapo's that operate in South Yemen and Angola.

There are advisors in Nicaragua from East Germany, Bulgaria, North Korea and the Soviet Union to assist in building the Sandinista Army from its currently estimated strength of 60,000 into a force of 250,000. Once achieved, this military buildup will mean one in ten Nicaraguans under arms. Even at its present strength, Mr. Chairman, the Sandinista Army represents the largest military force in the history of Central America.

Approximately 70 Nicaraguans are being trained as jet pilots and mechanics in Bulgaria. Existing landing strips in Nicaragua are being lengthened and will be able to accommodate sophisticated jet aircraft. Soviet advisors are deeply involved in directing the effort to upgrade the Nicaraguan Air Force. Although there is no evidence of MIG's in Nicaragua at present, the sighting of incoming MIG–21 crates in Cuba provides cause for concern. Arrival of MIG's would dramatically increase Nicaragua's threat to its neighbors, whose fighter inventory consists of aging World War II vintage day-fighter aircraft. Honduras, for example, has only 20 super MYSTERE and F–36 fighters with no all-weather capability. A loss of a single aircraft, such as occurred last year, will degrade this modest capability. Since Nicaragua's neighbors have no match for MIG's, one must ask why Nicaragua would want such an air buildup, which would clearly be destabilizing? And why would Nicaragua want to introduce 20 to 30 Soviet tanks?

Let us look at the cold numbers, Mr. Chairman, in all their starkness. I have a chart here that shows the present and the projected level of the Nicaraguan military buildup in terms of men under arms. This chart juxtaposes this "accomplishment of Socialism" (as Radio Moscow might call it) to the armed forces of those right-wing facist dictatorships that will be the beneficiaries of so-called "national liberation movements" Some liberation. The two neighbors of Nicaragua: Honduras and Costa Rica, have armed forces so small you can barely see them on this chart.

It is important to understand the dynamics of what is going on at the outer edges of Soviet imperialism. What does this size of Nicaragua's armed forces tell you, Mr. Chairman? It tells you this: if Mexico, our good friend and neighbor, were ruled by a Sandinista regime and if such a regime followed the pattern of the Sandinista military buildup, Mexico would acquire an armed force of nearly 7 million men. That is what the per capita mobilization in Nicaragua would translate into in Mexico: almost 2 million under arms with the present Sandinista buildup, and nearly 7 million with the projected Nicaragua buildup.

Mexico, of course, is a free and independent democracy, with which we live in peace. Today, Mexico has approximately a 130,000-man military force.

What does this development lead to? Nicaragua is now regularly violating Honduran territory in supplying the Salvadoran guerrillas. The Nicaraguan military buildup is unquestionably a threat to efforts in the region to move toward pluralism and self-determination. The November 29 elections in Honduras should put the West European admirers of the Sandinistas to shame. This election stands in marked contrast to the broken electoral pledges of the Sandinistas in Nicaragua.

In El Salvador, Cuba acted as the catalyst to organize and unify the disparate groups of the far left, as Secretary Enders testified here yesterday, and helped organize a guerrilla combined military command in 1980. Cuba assisted the guerrillas in developing a military strategy and initial war plans. It was Cuba that both encouraged and assisted the guerrillas to launch the ill-fated, so-called "final" offensive in January 1981.

The Cubans have played a key role in arranging for the acquisition and delivery of weapons for the Salvadoran guerrillas from Vietnam, Ethiopia, and Eastern Europe by way of Nicaragua. Guerrilla recruits have been transported to Cuba and elsewhere for extensive training in guerrilla tactics, marksmanship, demolitions, artillery and field fortifications as well as in a variety of other military skills.

One observer has reported seeing groups of up to battalion size in training in Cuba, which suggests that at least some Salvadoran guerrillas probably have trained as integral units. The Soviet Union has, of course, bankrolled and assisted these efforts by underwriting its Cuban proxy at a cost of $3 billion annually and by supporting efforts to collect funds, arms, and supplies from the Communist Bloc for delivery to the guerrillas.

Cuba has not devoted its attention and resources only to Nicaragua and El Salvador, but has likewise coordinated clandestine support organizations in Honduras, Costa Rica and Guatemala. In fact, convincing evidence of Cuban subversion activities has surfaced in virtually every Caribbean Basin country.

In Grenada, Cuban influence has reached such a high level that it can be considered a Cuban satellite. The Cubans are constructing air and naval facilities there that far exceed requirements of this tiny island nation.

Mr. Chairman, the news is bad, the hour is late. What can be done? I am sure that you are interested in what is being done and can be done to deal with this serious threat to American security interests. In September, the Defense Department dispatched a team of experts to El Salvador to assist the Salvadorans in developing a national military strategy. The team spent two months in El Salvador discussing the existing military capabilities and assessing requirements. The detailed findings and recommendations of the team are currently under review but some of the recommendations are already being implemented.

The Salvadorans have requested and we have agreed to provide out-of-country training for about 500-600 officer candidates, for a light infantry battalion of about 1,000 men, and for non-commissioned officers. We hope to begin this training as early as possible in 1982. There are physical problems in simply being able to marshal the people and resources to accomplish this effort in such a short time, however, the need for better trained military leaders is compelling. As you already may be aware, the cost of Salvadoran requirements far exceed planned fiscal year 82 foreign military assistance and training levels. Thus, we will need the support of the Congress if we are going to fund this urgent need and respond in a timely manner.

We are continuing to provide small mobile training teams to train personnel in areas that are deficient, such as maintenance and coastal patrolling. Equipment provided through Foreign Military Sales includes communications equipment, helicopters, weapons and trucks that should allow the Salvadoran forces to improve their mobility, command and control, and ability to interdict the supply lines of the insurgents to their external suppliers.

This effort is being supplemented by support from other concerned Latin American countries. If the favorable consensus that has developed at the fourteenth conference of American Armies in November, and more recently at the OAS meeting in St. Lucia, is indicative of the awareness in the hemisphere, a more cooperative mutual security effort can evolve among concerned nations of the Americas. We will continue to nurture the concept of collective security as it applies to the Western Hemisphere.

Both by long-standing policy and by the Rio Treaty, we are committed to join with our Latin American Allies in "mutual assistance and common defense of the American Republics." In the President's words, the United States "will accord high priority to requests from its major alliance partners and to those nations with whom it has friendly and cooperative security relationships."

Considering the nature of the security interests at stake, we would be remiss if we failed to advise you that we are developing the necessary contingency plans to respond as required and appropriate to further military threats and acts of aggression. This kind of planning is the responsibility of the Joint Chiefs of Staff and must be done by them routinely in order to fulfill their responsibility to the President and to the Nation.

In closing, I would like to emphasize that our security interests in the Caribbean basin must receive higher priority and far greater resources than in the past. In order to gain time to address the underlying political, economic and social problems of the region, we must cooperate closely with our neighbors. We must halt terrorist aggression and deter further military attacks in the hemisphere. A failure to respond to the current threat would only lead to greater suffering, and far greater human and material costs in the future.

THE STRATEGIC SITUATION IN CENTRAL AMERICA AND THE CARIBBEAN

There are four major developments that have come together to create what can only be described as a state of danger in the Caribbean Basin.

One is the new Cuban strategy for uniting the left in the countries of the region, committing it to violence, arming it, training it in warfare, and attempting to use it for the destruction of existing governments.

I say new because it is only three years ago that the policy was adopted. Prior to 1978—for some 10 years since the death of Che Guevara on an Andean hillside—Cuba had made a sustained effort to portray itself as a member of the international community not unlike others, carrying on state-to-state relations through embassies, emphasizing trade and cultural contacts.

Observing this pattern, many in this and other countries of the Hemisphere began to hope that revolutionary Cuba was on the way to becoming a status-quo nation. The 1970's, of course, were marked by Cuban intervention in Africa on a continent-wide scale. But, it was argued, Africa was a special case.

The turn came in 1978, when Cuba decided to back the insurrection in Nicaragua. At first it was not apparent to many that a new

Cuban strategy was in operation, for Nicaragua seemed like a case all of its own. But then the same thing was tried in El Salvador, in Guatemala, in Colombia; now it is being tried in Honduras.

We have attempted to identify and illustrate the full scope of this new Cuban strategy in a research paper, which I would like to submit to the Committee for its study. The paper is based on both public and intelligence sources. It was not written to make sensational revelations, and it does not. But I wonder how many Americans are aware of the sweep and the sophistication of what is going on. In many countries of the region, Cuba is attempting no less than to construct a machine to destroy the established governments.

The pattern is always the same. For years the radical left in the area has been divided by disagreement over tactics. The old line Comintern parties argued patience: you only had to wait for Marx's famous objective conditions to emerge, and the revolution would occur. Other factions were for setting up Che Guevara-style focos: put some armed guerrilleros into the countryside and their presence will radicalize the peasants. Others were for guerra prolongada: discredit the regime by hitting the economy. Still others advocated spectacular kidnappings and assassinations.

Under the new strategy Cuba is approaching each of these groups, often calling them to Havana. Cuba offers to supply (or arrange for the supply of) arms and training. But there are conditions: the left must unite, it must create a single directorate for command and control, it must commit to a single strategy (which often is written out and approved by Castro personally). And that strategy is always the same: armed struggle against the established government.

It is important to be clear about the effects of this process. It enhances Cuba's role as the guide (and sometimes as the arbiter) of each revolutionary movement. It increases the pressure on democratic movements on the left to make common cause with the men with the guns, rather than face blame as the obstacle to the unity of the left. Once unity on the left has been created, democratic socialists in the Hemisphere and in Europe face the dilemma of whether or not to support it. Many have supported such movements, only to learn with bitterness that their money and political backing are welcome, their ideas are not.

This is not only history. The process goes on. In Honduras, Cuba has just now completed the same unification operation—parties have been joined together in a national directorate committed to armed struggle. A new attempt to overthrow an established government by force is underway.

Under challenge in this way, the democracies in the Hemisphere have had to break, suspend or downgrade relations with Cuba: Colombia, Costa Rica, Jamaica, Venezuela, Peru and Ecuador.

The second development is the economic and social crisis in the region. It also began in 1978, just as Castro was launching his new policy of intervention.

For the past two generations, most of the Central American countries and many of the islands compiled an enviable record of economic and social change.

But in 1978 a serious deterioration began. Prices for export commodities—coffee, sugar, cocoa—began to decline sharply. Prices for imported oil and imported capital kept going up. With slowed economic growth in the industrial world, tourism stagnated. Run-on credit crunches resulted. Some countries are bankrupt. Others are threatened with bankruptcy. In two, Cuban-assisted insurrections are destroying power plants, bridges, and crops, and attempting to disrupt the tourist trade.

The result is a grave, general economic crisis, bringing with it misery and despair for many millions of people in the region. Coinciding as it does with the Cuban drive to unify the left and commit it to violence, economic crisis creates great potential political vulnerability throughout the area.

The third factor is developing the role of Nicaragua as a platform for intervention throughout Central America.

We have watched with deepening concern as Nicaragua has moved away from pledges of political pluralism toward a repressive, one-party state. At the same time it is greatly expanding its army and building up an inventory of heavy arms. It continues to be deeply involved in logistics and other support for the insurgency in El Salvador.

The United States and a number of other countries have tried to provide an alternative to these trends, notably by providing economic aid, but also by maintaining political contacts. Since 1979 the U.S. alone gave $120 million in assistance. Recently we tried by diplomatic means to achieve a rapprochement with Managua. And we don't close the door on future attempts.

But frankly there is little to show for our efforts. Indeed I wonder whether any of the democratic countries that have supported Nicaragua can claim to have slowed down, much less to have stopped the negative trends.

There are more than 1,500 Cuban military and security advisors in Nicaragua, twice as many as there were at the start of the year. More tanks are reported on their way. Preparations for the receipt of MIG's are well advanced.

A final factor is the special importance of the struggle in El Salvador for the future of the area.

El Salvador is the second largest Central American state in population, and in the past has achieved a relatively high level of economic development.

But El Salvador is important not only for itself. There are underway these two critical experiments in reform: one in land tenure, the other in the creation of democratic institutions and strengthening the political center. If these reforms are defeated by arms, prospects for peaceful change elsewhere will be seriously set back.

There is something else. If after Nicaragua El Salvador is captured by a violent minority, what state in Central America will be able to resist? How long would it be before the major strategic United States interests—the canal, sea lanes, oil supplies—were at risk?

To meet and overcome these challenges the United States must also have a comprehensive strategy. Let me summarize briefly the line of action we are now developing.

First, we must make sure that our friends have the means to defend themselves. El Salvador and Honduras are the two most threatened countries. The build-up in Nicaragua menaces both; targeting of El Salvador's economy by Nicaraguan-supported insurgents creates a situation of emergency in that country. Both need more resources—above all economic but military as well. We will be consulting with the Congress on how we can best provide help.

Second, we must join with others to help provide the Caribbean Basin countries the opportunity to achieve long-term prosperity. President Reagan is preparing for submission to the Congress early next year a far-reaching package of proposals. Because the markets in the countries of the Basin are so small, investment other than in staples is often unattractive. But if investors could be sure of unimpeded access to outside markets, particularly to the vast U.S. market, at least for a defined period of time, then investment in the area becomes more interesting. The skilled and relatively low cost labor of the area becomes an attraction. We are developing proposals for one-way free trade arrangements and for investment incentives; there will also be provision for preventing abuses. At the same time we will present proposals for emergency financial assistance to tide countries over until they can take advantage of the new opportunities to begin earning their own way.

Third, we must not falter in our pursuit of democratic values—for they assure the legitimacy of governments we hope to help. In a free, open election with broad participation Honduras chose a new government last month. Costa Rica—whose deeply-rooted democratic institutions are helping it to weather a brutal economic crisis without violence—goes to the polls in February. El Salvador will follow with elections for a constituent assembly—the first step in creating representative, constitutionally bound government in that nation. In Central America only the Nicaraguan government refuses to go before the people.

Let me in this regard make a remark on the subject of proposals for negotiation between the government and the insurgents. Members of the Frente Democratico Revolucionario say they want to talk about "restructuring the army" and "establishing a new order." In their view such changes are conditions precedent to elections.

But the establishment of a new order and the status of the army are among the subjects for the constituent assembly to be elected in March. Why should they only be debated and decided with the insurgents, and not with the campesinos, the labor unions, and the political parties? Why shouldn't the FDR have—only have—the representation in the assembly it can get by campaigning?

In July the U.S. said it would facilitate contacts and discussions on election issues. In September we sent a group to El Salvador and talked to all interested in talking to us, including the MNR, a member of the FDR. The representative of another member of the FDR has asked to see us in Washington this week, and we are receiving him on the same basis. If there are opposition elements who believe in a democratic solution, we will help them participate in the electoral process. But it would be wrong to assist those—in negotiations or otherwise—who are committed to the destruction of democracy.

Fourth, we must continue the pursuit of justice for the countries of the area. Lawlessness from both the left and right has been a major weakness in El Salvador. But the government is making progress in bringing it under control. Violent deaths other than in combat as reported each week by our Embassy in San Salvador are down by more than a half since last year. I do not want to give you the impression that our weekly figures are complete. But the trend is significant. Progress is unmistakable. I wonder whether the insurgents have made any contribution to that progress at all. For they claim that their violence is justified by a higher goal.

Fifth, our emphasis should be on collective action. Last week the Organization of American States voted 22 to 3 with 4 abstentions in support of free elections as a means to a political solution in El Salvador. In the same forum Secretary Haig has suggested that all countries in Central America should address the arms race that now threatens in Central America as a result of Nicaraguan imports of heavy weapons and the Cuban military advisor presence in Nicaragua. Should more serious threats emerge, it is in collective security that we should seek solutions.

Finally, we must communicate to Cuba that the costs of escalating their intervention in the region will be very high. We have readied measures to prevent another Mariel sealift should Cuba again seek to utilize the longings of its own citizens to harm this country. We are tightening the economic embargo. We are preparing creation of a ra-

dio devoted to Cuba news and beamed to the island, so that Cubans can be better able to hold their government accountable for its actions. Our underlying message is clear: we will not accept, we do not believe the countries of the region will accept, that the future of the Caribbean Basin be manipulated from Havana. It must be determined by the countries themselves.

CUBA'S RENEWED SUPPORT FOR VIOLENCE IN THE HEMISPHERE

PREFACE

Any formulation of U.S. foreign policy for Latin America and the Caribbean would be incomplete without in-depth analysis of Cuba's role in the region. Some of Cuba's international activities have received publicity and attention, but much has taken place out of the public view. While understanding the full range of Cuba's activities abroad is obviously essential for governments engaged in foreign policy planning, the general public is often uninformed about the nature and extent of Cuba's involvement in other countries. This study of Cuban activities in Latin America and the Caribbean is being issued in the interest of contributing to better public understanding of U.S. foreign policy and developments in the region.

The focus of this study is Cuba's activities in the Americas. It does not attempt to give a description of conditions in the countries in which Cuba is active, or to analyze why violent groups develop, but instead examines the degree to which Cuba is directly engaged in efforts to destabilize its neighbors by promoting armed opposition movements. Cuba is clearly not the sole source of violence and instability in the region, but Cuban activities militarize and internationalize what would otherwise be local conflicts. In a region whose primary needs are for economic development, social equity, and greater democracy, Cuba is compounding existing problems by encouraging armed insurrection.

This report describes Cuban activities that are either publicly known or can be revealed without jeopardizing intelligence sources and methods. Cuban involvement is not limited to the examples contained in this study.

SUMMARY

A country-by-country examination of Cuba's activities in Latin America and the Caribbean makes clear that Cuba has renewed its campaign of the 1960's to promote armed insurgencies. In particular, Cuba has stepped up efforts to stimulate violence and destabilize its neighbors, turning away from its early policy of strengthening normal diplomatic relations in the hemisphere.

Since 1978, Cuba has:

Worked to unite traditionally splintered radical groups behind a commitment to armed struggle with Cuban advice and material assistance;

Trained ideologically committed cadres in urban and rural guerrilla warfare;

Supplied or arranged for the supply of weapons to support the Cuban-trained cadres' efforts to assume power by force;

Encouraged terrorism in hope of provoking indiscriminate violence and repression in order to weaken government legitimacy and attract new converts to armed struggle; and

Used military aid and advisors to gain influence over guerrilla fronts and radical governments through armed pro-Cuban Marxists.

Unlike Che Guevara's attempts during the 1960's, Cuban subversion today is backed by an extensive secret intelligence and training apparatus, modern military forces, and a large and sophisticated propaganda network. Utilizing agents and contracts nurtured over more than twenty years, the Castro government is providing ideological and military training and material and propaganda support to numerous violent groups, often several in one country.

Cuba is most active in Central America, where its immediate goals are to exploit and control the revolution in Nicaragua and to induce the overthrow of the governments of El Salvador and Guatemala. At the same time, Cuba is working to destabilize governments elsewhere in the hemisphere. Cuba provides advice, safehaven, communications, training, and some financial support to several violent South American organizations. In the Caribbean, Cuban interference in the post-election period has been blunted in Jamaica, but Grenada has become a virtual Cuban client.

Cuba's new drive to promote armed insurgency does not discriminate between democracies and dictatorships. And attempts by Cuba to destabilize governments occur in spite of the existence of diplomatic ties.

This long-range campaign is directed by the Cuban Communist Party which oversees far-flung operations that include secret training camps in Cuba, intelligence officers abroad, training programs for select foreign students, networks for covert movement of personnel and material between Cuba and abroad, and propaganda support.

Cuba's enormous investment of energy, money, and agents in this campaign would not be possible without Soviet help. Soviet assistance, now totalling over $8 million a day, enables Cuba to maintain the best equipped and largest per capita military forces in Latin America and to channel substantial resources abroad. In return, Cuba usually is careful not to jeopardize ongoing government relationships in Latin America important to the Soviet Union.

The scope of Cuba's activities in the hemisphere has prevented Cuba from always keeping covert operations hidden. For instance, during 1981 alone:

In Nicaragua, Cuba has quietly increased its presence to 5,000 personnel, including more than 1,500 security and military advisors.

In El Salvador, Cuba's key role in arming the Salvadoran guerrillas was exposed and Castro admitted supplying arms.

In Costa Rica, a Special Legislative Commission documented Cuba's role in establishing an arms supply network during the Nicaraguan civil war and found the network was later used to supply Salvadoran insurgents.

In Colombia, Cuba was discovered to have trained guerrillas attempting to establish a "people's army."

Cuba's new policies abroad and its reaction to emigration pressures at home have reversed the trend in Latin America toward normalization of relations with Cuba. During the last two years, Colombia, Costa Rica and Jamaica suspended or broke relations with Cuba. Venezuela, Peru, and Ecuador withdrew their ambassadors from Havana.

Cuban intervention is, of course, not the sole source of instability. The origins of occasional violent conflict in Latin America lie in historical social and economic inequities which have generated frustrations among a number of people. Sustained economic growth over the past 20 years and resilient national institutions, however, have limited the appeal of radical groups. But in some countries, particularly the small nations of Central America, dislocations resulting from rapid growth compounded existing tensions, leading to the emergence in several countries of radical movements, which often originated with frustrated elements of the middle class. Subsequent economic reversals have subjected already weak institutions to additional stress, making these countries more vulnerable to the appeals of radical groups backed by Cuba.

Cuba is quick to exploit legitimate grievances for its own ends. But its strategy of armed struggle is not based on appeals to the "people." Instead, Cuba concentrates on developing self-proclaimed "vanguards" committed to violent action. Revolutions, according to this approach, are made by armed revolutionaries.

Cuba's readiness to train, equip and advise those who opt for violent solutions imposes obstacles to economic progress, democratic development and self-determination in countries faced with growing economic difficulties. The spiralling cycle of violence and counterviolence which is central to Cuba's policy only exacerbates the suffering of ordinary people and makes necessary adjustments more difficut.

Cuba's renewed campaign of violence is of great concern to many countries, including the United States. Cuba should not escape responsibility for its actions. Exposing Cuba's efforts to promote armed struggle will increase the costs to Cuba of its intervention.

I. POLICIES

When it first came to power, the Castro regime had its own theory of how to spread revolution: To reproduce elsewhere the rural-based guerrilla warfare experience of Castro's 26th of July Movement in Cuba. In Che Guevara's words, the Andes would become the Sierra Maestra of South America.

Initial attempts to repeat Cuba's revolution elsewhere failed decisively. During the late 1960's, the Castro regime gradually reined in its zealots. Without abandoning its ties to radical states and movements or its ideology, Cuba began to pursue normal government-to-government relations in the hemisphere. By the mid-1970's Cuba's isolation in the Americas eased and full diplomatic or consular relations were reestablished with a number of countries.

But diplomacy proved unable to satisfy the Castro government's ambitions. First in Africa, and now in Latin America and the Caribbean, Cuba's policy has again shifted to re-emphasize intervention.

On July 26, 1980, Fidel Castro declared that the experiences of Guatemala, El Salvador, Chile, and Bolivia teach us that there is no other way than revolution, that there is no other "formula" than "revolutionary armed struggle."

Castro's statement was an attempt to justify publicly what Cuban agents had been doing secretly since 1978: stepping up support for armed insurgency in neighboring countries.

This study traces the development of this latest phase in Cuba's foreign policy.

Early Failures. The original Cuban theory held that a continental Marxist revolution could be achieved by establishing armed focal points (focos) in several countries. Operating in rural areas, small bands of guerrillas could initiate struggles that would spread throughout the continent.

In 1959, Castro aided armed expeditions against Panama, the Dominican Republic, and Haiti. During the early and mid 1960's, Guatemala, Colombia, Venezuela, Peru, and Bolivia all faced serious Cuban-backed attempts to develop guerrilla focos.

In seeking indigenous groups with which to cooperate, the Cubans rejected the orthodox Latin American communist parties, which they regarded as ineffectual. Instead, they lent their support to more militant groups dedicated to armed violence even when their Marxism was not fully articulated.

The Soviet Union was suspicious of Cuba's policy of inciting armed violence, preferring to work through established Moscow-line communist parties. Disagreement over this issue was a serious point of friction for several years. Cuba denounced the Soviet policy of "peaceful coexistence" as a fraud, arguing that it implicitly undercut

the legitimacy of aiding "national liberation," struggles. At the 1966 Tricontinental Conference, Cuba sought to enlist North Vietnam and North Korea and create a more aggressive revolutionary internationalism.

None of the Latin American insurgencies fomented by Havana, however, aroused much popular support. The most severe blow to Cuba's policy during this period came in Bolivia in 1967, when Che Guevara's guerrilla band was opposed by both the peasantry and the Bolivian Communist Party.

After this maverick approach failed to establish a continental revolution, Cuban foreign policy moved into closer conformity with that of the Soviet Union. Castro endorsed the 1968 Soviet invasion of Czechoslovakia and accepted Soviet views on East-West relations. Within the hemisphere Cuba generally conformed to the Soviet approach of fostering state-to-state relations with several Latin American countries.

The Turn to Africa. In the mid-1970's, Cuba renewed its penchant for direct intervention, not in Latin America, but in Africa.[1]

In Angola, 20,000 Cuban troops, supported by Soviet logistics and materiel, assured the supremacy of the Popular Movement for the Liberation of Angola (MPLA), which had the strongest ties to Moscow of the three movements competing for power after Portugal's withdrawal.

In Ethopia, the integration of Soviet and Cuban operations was even more complete, with the Soviets providing overall command and control, materiel, and transport for 13–15,000 Cuban troops fighting against Somali forces.

The Moscow-Havana Axis. These African operations gave evidence of Cuba's military value to the Soviet Union. In areas of the Third World where the Soviets were under constraints not binding on Cuba, Havana could portray its actions as an outgrowth of its own foreign policy of support for "national liberation movements."

Cuba's extensive and costly activities overseas would have been impossible, however, without Soviet aid. The Cuban armed forces, some 225,000 strong with new sophisticated weaponry from the Soviet Union, became a formidable offensive military machine. Soviet aid and subsidies to the Cuban economy have climbed to over $3 billion annually, or about one-fourth of Cuba's gross national product. In December 1979, at a time when Soviet oil deliveries to Eastern Europe were being cut back and prices raised, Castro announced that the Soviet Union had guaranteed Cuba's oil needs through 1985 at a price roughly one-third that of the world market. The Soviet Union also pays up to 4 and 5 times the world price for Cuban sugar.[2]

In return, Cuba champions the notion of a "natural alliance" between the Soviet bloc and the Third World in the Non-Aligned Movement. At the Cuban Communist Party Congress in December 1980, Castro explicitly endorsed the Soviet intervention in Afghanistan and defended the Soviet "right" to intervene in Poland. He also reiterated that Cuba is irrevocably committed to communism and to supporting "national liberation" struggles around the world.

Cuba's policies abroad are thus linked to its relationship to the Soviet Union. By intervening in behalf of armed struggle in Latin America, Cuba injects East-West dimensions into local conflicts.

II. METHODS

Even when pursuing an open policy in the 1970's of establishing normal diplomatic relations with a number of Latin American countries, Cuba retained its clandestine ties with remnants of the insurgents and other pro-Cuban elements in Latin America, providing asylum, propaganda, some training, and other support. Between 1970 and 1973 Cuba's security services moved arms and agents into Chile. At the same time, Cubans helped organize President Allende's personal security and trained many leaders of the Chilean Movement of the Revolutionary Left (MIR).

Cuba's renewed campaign to promote insurgencies draws on these contacts and experiences and combines several different elements.

SOPHISTICATED STRATEGY

Learning from Che Guevara's failure in Bolivia, Cuban doctrine now emphasizes the need to enlist support for armed struggle through advanced training of local guerrilla cadres, sustained aid and advice, and extensive propaganda activities. The foco approach of the 1960's—when a Cuban-sponsored team in the field was considered enough to spark insurrection—has given way to a more sophisticated strategy involving extensive commitments and risks.

Soviet Support. A major difference from the 1960's is that, instead of throwing up obstacles, the Soviet Union generally has backed Cuban efforts to incorporate non-doctrinaire groups into broad political-military fronts dedicated to armed struggle. Particularly in Central America, Soviet ties to local communist parties and Bloc relationships have been used to favor insurrectionary violence. For example, a senior Soviet Communist Party functionary traveled to Panama in August 1981, to discuss strategy for Central America with Cuban officials and leaders of Central American communist parties. The Soviet Union has also used its extensive propaganda network to selectively discredit governments and build support for armed opposition groups.

Allowing Havana to take the lead in the hemisphere enables Moscow to maintain a low profile and cultivate state-to-state relations and economic ties with major countries like Brazil and Argentina.

Cuba, in turn, is generally cautious not to undercut the Soviet Union where the Soviets have established valued relationships. In Peru, for example, Cuba has been careful to exercise restraint to avoid prejudicing the status of the 300 Soviet officials there or jeopardizing the Soviet Union's arms supply arrangement.

Central Control. Most of the covert operations in support of this strategy are planned and coordinated by the America Department of the Cuban Communist Party, headed by Manuel Pineiro Losada. The America Department emerged in 1974 to centralize operational control of Cuba's covert activities. The Department brings together the expertise of the Cuban military and the General Directorate of Intelligence (DGI) into a farflung operation that includes secret training camps in Cuba, networks for covert movement of personnel and materiel between Cuba and abroad, and sophisticated propaganda support.

Agents of the America Department are present in every Cuban diplomatic mission in Latin America and the Caribbean—in at least five recent instances in the person of the Ambassador or Charge d'Affaires. America Department officials frequently serve as employees of Cuba's official press agency, Prensa Latina, of Cubana Airlines, the Cuban Institute of Friendship With People (ICAP), and other apparently benign organizations. When too great an identification with Cuba proves counterproductive, Cuban intelligence officers work through front groups, preferably those with non-Cuban leadership.[3]

Cuban military intelligence personnel selected for clandestine operations in Latin America, Africa and the Middle East go through an elaborate training program conducted by Cuban, Soviet, East German and Czech instructors in Havana with special sessions in surrounding cities. In addition to the language and customs of the area to which they are assigned, and typical intelligence operation such an infiltration procedures and photography techniques, the Cubans are instructed in handling explosives. To disguise their true occupation, the intelligence agents are also instructed in civilian skills such as automotive mechanics, carpentry and heavy equipment operation.

Armed Struggle. The new Cuban offensive relies heavily on violence. In outline, Cuba's strategy is to:

United traditionally splintered radical groups behind a commitment to armed struggle with Cuban advice and material assistance;

Train ideologically committed cadres in urban and rural guerrilla warfare;

Supply or arrange for the supply of weapons to support the Cuban-trained cadres' efforts to assume power by force.

Encourage terrorism in the hope of provoking indiscriminate violence and repression, and generalized disorder in order to weaken government legitimacy and attract new converts to armed struggle; and

Use military aid and advisors to gain influence over guerrilla fronts and radical governments through armed pro-Cuban Marxists.

The application of this strategy is demonstrated in detail in the case studies that follow. It should be noted, however, that Cuba sometimes emphasizes certain tactics over others. In pursuing its long-term strategy, Cuba concentrates initially on building a network of loyal cadres. When local extremist groups are not capable of or committed to armed struggle, Cuba generally draws on them in support of active insurgencies elsewhere while developing their capacity and willingness for agitation in their homeland. In addition, foreign policy concerns may deter Cuba from promoting armed struggle in a particular country. For example, Cuba attempts to avoid activities which could jeopardize its relations with the Mexican government since Castro seeks Mexico's support to avoid isolation in the hemisphere.[4]

Propaganda. Cuba's extensive cultural exchange and propaganda activities are tailored to support covert operations and elicit support for armed struggle.[5] For example, during the past year, Cubans have used Mexico as a base for coordination of propaganda on behalf of insurgents in El Salvador, Guatemala, and Colombia. Radio Havana and other Cuban media recently have publicized statements by Chilean Communist Party leaders urging unity of the Chilean left, and calling for armed action to topple Chile's government. Radio Havana has directed broadcasts to Paraguay urging the overthrow of the Paraguayan government.

Sports competitions, youth and cultural festivals, and special scholarships to Cuba provide channels to identify potential agents for intelligence and propaganda operations. In Ecuador, Cuban Embassy officers in Quito used their ties with Ecuadorean students to try to orchestrate pro-Cuba demonstrations when the government of Ecuador threatened to suspend relations after Cuba's forcible and unauthorized occupation in February 1981 of the Ecuadorean Embassy in Havana, following its seizure by a group of Cubans seeking to leave Cuba.

Military Training. Witnesses and former trainees have described several camps in Cuba dedicated specifically to military training, including one in Pinar del Rio province and another near Guanabaco, east of Havana. The camps can accommodate several hundred trainees. Groups from El Salvador, Nicaragua, Guatemala, Cost Rica, Honduras, Colombia, Grenada, the Dominican Republic, Jamaica,

Footnotes at end of article.

Haiti, Chile, and Uruguay have been trained in these facilities during the past two years.[6]

Recruits are normally provided false documentation (sometimes Cuban passports) by Cuban agents in third countries and are flown to Cuba on civil aircraft under cover as "students" or other occupations. Panama has been used as a regular transit point for Central and South Americans to and from military training in Cuba.[7]

Once in Cuba, trainees generally are taken immediately to the guerrilla training camps where they usually are grouped according to nationality and the organization for which they are being trained in order to promote a sense of cohesiveness and esprit de corps.

Training normally lasts 3–6 months and consists of instruction by Cuban cadres in sabotage, explosives, military tactics, and weapons use. Although military training is frequently tied closely to operational requirements (the M–19 guerrillas that landed in Colombia in early 1981 did so immediately upon completion of their military instruction in Cuba), witnesses report that political indoctrination is also included in the curriculum.

Many Cuban instructors are active military officers and veterans of Cuban expeditionary forces in Africa. Soviet personnel have been reported at these camps, but they apparently do not participate directly in the guerrilla training.

Political Training. Each year Cuba offers hundreds of scholarships to foreign students. All Cuban mass organizations operate schools in organizational work and indoctrination open to carefully selected foreign students.[8] In addition, some 11,000 non-Cuban secondary school students, mostly teenagers, were enrolled in 1980 in 15 schools on the Isle of Youth alone. Cuba does not publicize complete foreign enrollment statistics, nor does it release the names of those trained. From the Eastern Caribbean alone, close to 300 students are currently in Cuba studying technical and academic subjects. The study of Marxism-Leninism is compulsory in many courses and military affairs is compulsory in some. When governments have turned down Cuban scholarship offers, as occurred recently in Belize and Dominica, Cuba has gone ahead and concluded private agreements. Local Marxist-Leninist groups with ties to Cuba play a major role in selecting those students who receive scholarships.

In sum, the infrastructure for Cuba's intensified revolutionary agitation in Latin America is a multifaceted yet carefully coordinated mechanism. The Cuban Communist Party, through its America Department, provides cohesion and direction to a complex network that consists of intelligence officers, elements of Cuba's foreign ministry, armed forces, mass organizations, commercial and cultural entities, and front groups.

This extensive apparatus is designed to support one objective: a systematic, long-range campaign to destabilize governments.

III. CASE STUDIES

The Cuban activities described in the case studies which follow must be considered to understand developments within the particular countries in question. However, the focus of the case studies is Cuban involvement in each country. Readers should therefore guard against assuming that the cases below provide a comprehensive picture of the general situation in the country where the events described have taken place.

Central America

Nicaragua

In July 1979, internal and external factors converged to bring about the triumph of the anti-Somoza insurrection and the subsequent domination of the new Nicaraguan government by the Cuban-trained leadership of the Sandinista National Liberation Front (FSLN). These events provided a key test for Cuba's new mechanisms and strategy for promoting armed pro-Cuban movements in this hemisphere.

Opposition to Somoza's authoritarian rule in the late 1970's was widespread. The 1978 killing of Pedro Joaquin Chamorro, publisher of Nicaragua's most respected newspaper La Prensa, converted many Nicaraguans to the armed opposition of which the FSLN was the core; FSLN assurances on democracy and pluralism were accepted by newly allied political moderates and private businessmen. Internationally, sympathy for the struggle against Somoza led Venezuela, Panama, and Costa Rica to aid the insurgents, while Somoza stood practically without friends.

This environment enabled Cuba to disguise the extent of its support for the FSLN and avoid disrupting the fragile alliances between the FSLN and other opponents of Somoza. Behind the scenes, Cuba played an active role in organizing the FSLN, and in training and equipping it militarily.

Cuba had provided some training and arms to the FSLN in the early 1960's. Until late 1977, however, Cuban support consisted mainly of propaganda and safehaven.

In 1977 and early 1978, a high ranking America Department official, Armando Ulises Estrada,[9] made numerous secret trips to facilitate the uprising by working to unify the three major factions of the FSLN. Stepped-up Cuban support to the Sandinistas was conditioned on effective unity. During the XI World Youth Festival in Havana in late July 1978, the Cubans announced that the unification of the three factions had been achieved and urged Latin American radicals present at the meeting to demonstrate solidarity with the FSLN by staging operations in their own countries.

At the same time, Estrada concentrated on building a supply network for channelling arms and other supplies to guerrilla forces. International sympathy for the struggle against Somoza provided a convenient facade for Cuban operations. In preparation for the first FSLN offensive in the fall of 1978, arms were flown from Cuba to Panama, transhipped to Costa Rica on smaller planes, and supplied to Nicaraguan guerrillas based in northern Costa Rica. To monitor and assist the flow, the America Department established a secret operations center in San Jose. By the end of 1978, Cuban advisors were dispatched to northern Costa Rica to train and equip the FSLN forces with arms which began to arrive direct from Cuba. FSLN guerrillas trained in Cuba, however, continued to return to Nicaragua via Panama.

In early 1979, Cuba helped organize, arm, and transport an "internationalist brigade" to fight alongside FSLN guerrillas. Members were drawn from several Central and South American extremist groups, many of them experienced in terrorist activities. Castro also dispatched Cuban military specialists to the field to help coordinate the war efforts. Factionalism threatened Sandinista unity again in early 1979, and Castro met personally with leaders of three FSLN factions to hammer out a renewed unity pact.

When the insurgents' final offensive was launched in mid-1979, Cuban military advisors from the Department of Special Operations, a special military unit, were with FSLN columns and maintained direct radio communications to Havana. A number of Cuban advisors were wounded in combat and were evacuated to Cuba via Panama.

The operations center run by the American Department in San Jose was the focal point for coordination of Cuba's support. After the triumph of the anti-Somoza forces in July 1979, the chief of the center, Julian Lopez Diaz, became Cuban Ambassador to Nicaragua. One of his America Department assistants in San Jose, Andres Barahona, was redocumented as a Nicaraguan citizen and became a top official of the Nicaraguan intelligence service.

Castro has counseled the Sandinistas to protect their Western ties to keep the country afloat economically. But to ensure that the FSLN could move to dominate the Nicaraguan government, Cuba has acted quickly to build up Sandinista military and security forces.

Since July 1979, Cuba has provided substantial military, technical, and political assistance. Some 5,000 Cuban advisors, teachers, and medical personnel work at all levels of the military and civilian infrastructures.[10] Of this number, more than 1500 military and security advisors are actively providing military instruction and combat training; instruction in intelligence and counterintelligence activities; instruction on security protection for the FSLN leadership and advice on organization of the Nicaraguan police force. In addition, Nicaragua has received within the past year approximately $28 million worth of military equipment from the USSR, Eastern Europe, and Cuba. This has included tanks, light aircraft, helicopters, heavy artillery, SAM's, anti-aircraft weapons, hundreds of military transport vehicles, as well as tons of small arms and ammunition.

Cuba presently is using Nicaraguan territory to provide training and other facilities to guerrillas active in neighboring countries. The Cuban Ambassador to Nicaragua and other America Department officials frequently meet with Central American guerrillas in Managua to advise them on tactics and strategy. Individual Sandinista leaders have participated in such meetings and have met independently with Guatemalan and Salvadoran insurgents. The FSLN also has cooperated in a joint effort by Cuba and Palestinian groups to provide military training in the Mideast to selected Latin American extremists. Some Sandinistas were themselves trained by the PLO, which maintains an embassy in Nicaragua.

Between October 1980 and February 1981, Nicaragua was the staging site for a massive Cuban-directed flow of arms to Salvadoran guerrillas. Arms destined for Salvadoran and Guatemalan guerrillas continue to pass through Nicaragua.

El Salvador

Before 1979, Cuban support to Salvadoran radicals involved training small numbers of guerrillas, providing modest financial aid, and serving as a political conduit between Salvadoran extremists and communists outside the hemisphere.

During the Nicaraguan war, Cuba concentrated on support for the FSLN. After the fall of Somoza, Cuba began intense efforts to help pro-Cuba guerrillas come to power in El Salvador. When a reform-minded civil-military government was established in October 1979, Cuba's first priority was to tighten the political organization and unity of El Salvador's fragmented violent left. At first, arms shipments and other aid from Cuba were kept low as the Cubans insisted on a unified strategy as the price of increased material support. To forge unity, Cuba sponsored a December 1979 meeting in Havana that resulted in an initial unity agreement among the Armed Forces of National Resistance (FARN), the Popular Liberation Forces (FPL), and the Communist Party of El Salvador (PCES), which had itself formed an armed wing at Cuban and Soviet insistence. In late May 1980, after more negotiations in Havana, the Popular Revolutionary Army (ERP) was admitted into the guerrilla coalition.

The new combined military command assumed the name of the Unified Revolutionary Directorate (DRU). During this period, Cuba also coordinated the development of clandestine support networks in Honduras,

Footnotes at end of article.

Costa Rica, and Nicaragua, sometimes using arms supply mechanisms established during the Nicaraguan civil war.

With unified tactics and operations now possible, Cuba began to assist the guerrillas in formulating military strategy. Cuban specialists helped the DRU devise initial war plans in the summer of 1980. The Cubans influenced the guerrillas to launch a general offensive in January 1981. After the offensive failed, guerrilla leaders traveled to Havana in February 1981 to finalize a strategy to "improve our internal military situation" by engaging in a "negotiating maneuver" to gain time to regroup.[11]

Cuba provided few weapons and ammunition to Salvadoran guerrillas from its own resources, but played a key role in coordinating the acquisition and delivery of arms from Vietnam, Ethiopia, and Eastern Europe through Nicaragua.[12] After the unmasking of this network, Cuba and Nicaragua reduced the flow in March and early April. Prior to a guerrilla offensive in August an upswing in deliveries occurred. The arms flow continues via clandestine surface and air routes. In addition, the Cubans over the past year have established a network of small ships to deliver arms to Salvadoran insurgent groups.

Cuba also assists the Salvadoran guerrillas in contacts with Arab radical states and movements to arrange military training and financing for arms acquisitions. In September 1980, Cuba laundered $500,000 in Iraqi funds for the Salvadoran insurgents. In March 1981, the Salvadoran Communist Party Secretary General, Shafik Handal, visited Lebanon and Syria to met with Palestinian leaders. Cuba also coordinates the training of a relatively small number of Salvadoran guerrillas in Palestinian camps in the Mideast.

Cuban training of Salvadoran guerrillas increased sharply in 1980 as Cuba concentrated on building a trained army able to mount major offensives. A typical three-month training program included courses in: guerrilla tactics; marksmanship and weapons use; field engineering; demolition; fortification construction; land navigation; use of artillery and mines. One observer reported seeing groups up to battalion size (250–500 men) under instruction, suggesting that some guerrillas trained as integral units.[13]

Cuba has provided selected guerrillas more intensive training on specialized subjects. A former FPL guerrilla who defected in fall 1981 reported that during 1980 he had received 7 months of military training in Cuba which included instruction in scuba diving and underwater demolition. Soviet scuba equipment was used. The group trained as frogmen called themselves "combat swimmers" and were told that their mission was to destroy dams, bridges, port facilities and boats.

Cuba also gives political, organizational and propaganda support to the guerrillas. Cuban diplomatic facilities worldwide help guerrilla front groups with travel arrangements and contacts. The Cuban press agency, Prensa Latina, has handled communications for guerrilla representation abroad. Cuba and the Soviet Union have pressed communist parties and radical groups to support the insurgency directly and through solidarity organizations with propaganda and facilities (office space, equipment, etc.).

The Salvadoran insurgents have publicly stressed the importance of solidarity groups. A member of the FPL, Oscar Bonilla, who attended the Fourth Consultative Meeting in Havana of the Continental Organization of Latin American Students (OCLAE), a Cuban front group, told Radio Havana in August 1981 that OCLAE: "has been the most important means of solidarity of all the peoples and has gotten us ready to form an anti-interventionalist student front in El Salvador, Central America and the Caribbean. . . . We believe that it is good to carry out immediate plans for actions which will permit us to stop an imperialist intervention in El Salvador. In this respect, the students of Latin America will have to confront and attack U.S. interests so that the United States will see how the Latin American and Caribbean student movement responds to an aggression by imperialism in El Salvador."

With Soviet assistance, Cuba has orchestrated propaganda to distort the realities of the Salvadoran conflict. Unattributed foreign media placements and efforts to organize protests against the Salvadoran government and U.S. policy, which have accompanied official propaganda, stress the theme of U.S. intent to intervene militarily in El Salvador.

Unfounded claims and accusations originated by the Salvadoran guerrillas are routinely replayed to a regional and world audience by Cuba's Radio Havana or Prensa Latina, then echoed by the official Soviet Press Agency, TASS, Radio Mosoow, and Eastern European media. For example, a false report of a U.S. soldier killed in El Salvador that resounded widely in Cuban/Soviet propaganda during 1980 was traced finally to the Salvadoran Communist Party. This rumor was to support an even bigger lie: that hundreds of U.S. soldiers were in El Salvador, building U.S. bases, and herding peasants into Vietnam-style strategic hamlets.[14]

Guatemala

Castro has stepped up Cuba's support to Guatemalan guerrillas whom he has aided with arms and training since he came to power.

As elsewhere, Cuba has influenced divided extremist groups to unite and conditioned increased Cuban aid on a commitment to armed struggle and a unified strategy. During 1980, discussions about a unity agreement were held among leaders of the Guerrilla Army of the Poor (EGP), the Rebel Armed Forces (FAR), the Organization of People in Arms (ORPA), and the dissident faction of the Guatemalan Communist Party (PGT/D). At the invitation of Sandinista leaders, representatives of the four groups met in Managua under strict security to continue discussions. In November 1980, the four organizations signed a unity agreement in Managua to establish the National Revolutionary Union (with a revolutionary directorate called the General Revolutionary Command—CGR). Manuel Pineiro Losada, Chief of the America Department, and Ramiro Jesus Abreu Quintana, head of its Central American Division, represented Fidel Castro at the signing ceremony. Following the signing of the unity agreement, representatives of the CGR traveled to Havana to present the document to Castro. ORPA publicized the agreement in a communique issued November 18, 1980. All parties agreed it was significant that the unity agreement was the first such document signed on Central American soil.

After this unity agreement was concluded, Cuba agreed to increase military training and assistance. A large number of the 2,000 or more guerrillas now active have trained in Cuba. Recent military training programs have included instruction in the use of heavy weapons.

During the past year arms have been smuggled to Guatemala from Nicaragua passing overland through Honduras. The guerrilla arsenal now includes 50 mm mortars, submachine guns, rocket launchers, and other weapons. Captured M–16 rifles have been traced to U.S. forces in Vietnam. On June 26, 1981, Paulino Castillo, a 28-year-old guerrilla with ORPA, told newsmen in Guatemala that he was part of a 23-man group of Guatemalans that underwent seven months of training in Cuba, beginning around February 1980. His group was divided into sections for urban and rural combat training in explosives and firearms use. To get to Cuba, Castillo travelled to Costa Rica from Guatemala by public bus. In Costa Rica a go-between obtained a Panamanian passport for Castillo to enter Panama. In Panama other contacts equipped him with a Cuban passport and he continued on to Cuba. Castillo returned to Guatemala via Nicaragua to rejoin the guerrillas. He later surrendered to a Guatemalan army patrol.

Guatemalan guerrillas have collaborated with Salvadoran guerrillas. In January 1981, the EGP, ORPA, FAR and the PGT/D circulated a joint bulletin announcing the intensification of their activities in support of the general offensive in El Salvador. The Salvadorans in turn have provided the Guatemalans with small quantities of arms.

Unity has not been fully achieved, as the four groups have not yet carried out plans to establish a political front group. The joint military strategy, however, is being implemented. The guerrillas have stepped up terrorist actions in an effort to provoke repression and destabilize the government. For example, the EGP took responsibility for placing a bomb in one of the pieces of luggage that was to have been loaded onto a U.S. Eastern Airlines plane on July 2. The bomb exploded before being loaded, killing a Guatemalan airport employee.

Costa Rica

Cuba took advantage of Costa Rica's strong popular and governmental opposition to Somoza's authoritarian government and of Costa Rica's open democratic society to establish and coordinate a covert support network for guerrilla operations elsewhere in Central America. The apparatus was established during the course of the Nicaraguan civil war and maintained clandestinely thereafter. Costa Rica was well-disposed toward groups that opposed Somoza, including the Sandinista guerrillas. Aid provided by Panama and Venezuela was openly funneled through Costa Rica to the Nicaraguan rebels. Cuba, however, kept its role largely hidden.

A Special Legislative Commission established in June 1980 by the Costa Rican Legislature revealed Cuba's extensive role in arming the Nicaraguan guerrillas. The Commission determined that there were at least 21 flights carrying war material between Cuba and Llano Grande and Juan Santamaria Airports in Costa Rica.[15]

Costa Rican pilots who made these flights reported Cubans frequently accompanied the shipments. Although Cubans were stationed at Llano Grande, their main operations center for coordinating logistics and contacts with the Sandinistas was set up secretly in San Jose and run by America Department official Lopez Diaz. The Special Legislative Commission estimated that a minimum of one million pounds of arms moved to Costa Rica from Cuba and elsewhere during the Nicaraguan civil war, including anti-aircraft machine guns, rocket launchers, bazookas, and mortars. The Commission also estimated that a substantial quantity of these weapons remained in Costa Rica after the fall of Somoza in July 1979.

The Special Legislative Commission concluded that after the Nicaraguan civil war had ended, "arms trafficking (began), originating in Costa Rica or through Costa Rican territory, toward El Salvador, indirectly or using Honduras as a bridge." Through 1980 and into 1981 traffic flowed intermittently through Costa Rica to El Salvador, directed clandestinely by the Cubans.

In the summer of 1979 the Cubans and their paid agent, Fernando Carrasco Llanes, a Chilean national residing in Costa Rica,

Footnotes at end of article.

(along with several Costa Ricans previously involved in the logistics effort for the FSLN) agreed to continue smuggling arms to Salvadoran guerrillas. The Cubans arranged for acquisition of some of the arms and ammunition remaining in Costa Rica from the Nicaraguan airlift to supply the Salvadoran insurgents.

This new Cuban operation was coordinated from San Jose, first from their secret operations center then later directly from the Cuban Consulate. The major coordinator, until his expulsion from Costa Rica in May 1981 following the break in consular relations between Costa Rica and Cuba, was Fernando Pascual Comas Perez of the America Department. Comas worked directly for Manuel Pineiro and had the cover title of Cuban Vice Consul in San Jose. Cuban agents made arrangements to store arms for transshipment to El Salvado, and to help hundreds of Salvadoran guerrillas pass through Costa Rica in small groups on their way to training in Cuba. Cuban operations have been facilitated by Costa Rica's three Marxist-Leninist parties, which have provided funds, safehaven, transportation and false documents.[16]

Terrorism had been virtually unknown in Costa Rica until March 1981 except for scattered incidents of largely foreign origin. The first Costa Rican terrorists made their appearance in March when they blew up a vehicle carrying a Costa Rican chauffeur and three Marine security guards from the U.S. Embassy in San Jose. In April, four terrorists from the same group were captured after machine-gunning a police vehicle. In June, the group murdered three policemen and a taxi driver. Costa Rican authorities have arrested some twenty accused terrorists and are continuing to investigate leads linking them to South American terrorist groups such as the Argentine Montoneros, the Uruguayan Tupamaros, Colombia's M–19 and to Cuba itself. Two of the accused terrorists are known to have received training in the Soviet Union.

Director of the Judicial Investigation Organization Eduardo Aguilar Bloise told a press conference August 12 that captured terrorist documents indicated that two Costa Rican peasants had been given "ideological/military training" in Cuba and returned to work in the Atlantic coastal zone of Costa Rica. The documents indicate that the two were in Cuba from 8–12 months—possibly in 1978—and were financed by the terrorist group known popularly in Costa Rica as "the family." Aguilar said he did not discount the possibility that others had been trained in Cuba.

While most of Costa Rica's Marxist-Leninist parties have advocated a peaceful line in respect to Costa Rica, one group with close ties to Cuba—the Revolutionary Movement of the People (MRP)—while disavowing responsibility for terrorist acts, has spoken of them as "well intentioned." Some of the arrested terrorists are known to have belonged to the MRP at one time. On November 5 the Office of National Security announced the discovery of a terrorist cell clearly connected with the MRP. Among the arms and terrorist paraphernalia confiscated was an Uzi submachinegun with silencer. Earlier, the authorities had confiscated a "plan for Guanacaste" from an MRP official which noted such objectives as "prevent the electoral process from developing in a festive atmosphere" and "the taking of power by the armed people." The head of the MRP has traveled many times to Cuba and Cuba has given training to other MRP leaders.

Honduras

Cuba provided paramilitary training to a small number of Hondurans in the early 1960's, but relations with Honduran radicals were strained until the late 1970's. Cuba then resumed military training for members of the Honduran Communist Party (PCH) and integrated them into the "internationalist brigade" fighting in the Nicaraguan civil war. After the war, PCH members returned to Cuba for additional training.

Since then Cuba has concentrated primarily on developing Honduras as a conduit for arms and other aid to guerrillas active elsewhere in Central America. In January 1981, Honduran officials discovered a large cache of concealed arms intended for Salvadoran guerrillas, which included M–16 rifles traced to Vietnam. Smuggled arms have continued to be intercepted.

While considering Honduras a useful support base for insurgencies elsewhere, Cuba is also working to develop the capacity for insurrection within Honduras. In the normal pattern, Havana has urged splintered extremist groups in Honduras to unify and embrace armed struggle. While holding back from levels of support given to Salvadoran and Guatemalan guerrillas, Cuba has increased its training of Honduran extremists in political organization and military operations. Cuba has also promised to provide Honduran guerrillas their own arms, including submachine guns and rifles.

On November 27, Honduran authorities discovered a guerrilla safehouse on the outskirts of Tegucigalpa. Two guerrillas were killed in the resulting shootout, including a Uruguayan citizen. Nicaraguans as well as Hondurans were captured at the house, where a substantial arsenal of automatic weapons and explosives were seized. Incriminating documents, including notebooks which indicate recent attendance in training courses in Cuba, were also confiscated. One of those arrested, Jorge Pinel Betancourt, a 22-year-old Honduran, told reporters the group was headed for El Salvador to join Salvadoran guerrillas. Two additional guerrilla safehouses located in La Ceiba and San Pedro Sula were raided on November 29, and authorities seized sizable armscaches, explosives and communications equipment. These arms may have been destined for use within Honduras.

The Caribbean

Jamaica

In the late 1970's, Jamaica became a special target for Cuba. Fidel Castro and other Cuban officials developed close relationships with important members of the People's National Party (PNP) which governed Jamaica from 1973 until 1980. Cuban security personnel trained Jamaican security officers in Cuba and Jamaica, including members of the security force of the office of the Prime Minister. Cuba also trained about 1,400 Jamaican youths in Cuba as construction workers through a "brigadista" program. Political indoctrination in Cuba formed part of this group's curriculum. A considerable number of these Jamaican youths received military training while in Cuba, including instruction in revolutionary tactics and use of arms.

During this same period, the Cuban diplomatic mission in Jamaica grew in size. Most of the embassy staff, including former Ambassador Ulises Estrada, were Cuban intelligence agents. Ulises Estrada, who had served as a deputy head of the America Department for five years, had a long history of involvement in political action activities and intelligence operations, and went to Jamaica in July 1979, after playing a major role in Cuba's involvement in the Nicaraguan civil war.

Cuba was instrumental in smuggling arms and ammunition into Jamaica. A Cuban front corporation (Moonex International, registered in Lichtenstein, with subsidaries in Panama and Jamaica) was discovered in May 1980 to be the designated recipient of a shipment of 200,000 shotgun shells and .38 caliber pistol ammunition shipped illegally to Jamaica from Miami. Jamaican authorities apprehended the local manager of the corporation as he was attempting to leave the country, in defiance of police instructions, on a private plane accompanied by the Jamaican Minister of National Security and Cuban Ambassador Estrada. The manager subsequently paid a fine of U.S. $300,000 set by a Jamaican court.

In 1980, weapons were reported stockpiled in the Cuban embassy for possible use by Jamaicans during the elections campaign. M–16 rifles then appeared in Jamaica for the first time and were used in attacks against supporters of the opposition Jamaican Labour Party (JLP) and the security forces. Over seventy of these weapons have been found by Jamaican authorities. Some of the M–16's found in Jamaica have serial numbers in the same numerical series as captured M–16's shipped to Salvadoran guerrillas from Vietnam.

Ambassador Ulises Estrada was withdrawn from his post in November 1980, at the request of the newly-elected JLP government. In January 1981, the Jamaican government terminated the "brigadista" program and recalled Jamaican students remaining in Cuba under this program. The government decided to maintain diplomatic relations but warned Cuba to stop its interference in Jamaican affairs. Cuba continued to maintain some fifteen intelligence agents at the Cuban Embassy in Kingston. On October 29, the government broke diplomatic relations with Cuba and cited Cuba's failure to return three Jamaican fugitive criminals as the immediate cause for this action. On November 17, the government publicly detailed Cuba's role in providing covert military training under the curtailed "brigadista" program.

Guyana

In 1978, as many as 200 Cuban technicians, advisors, and medical personnel were stationed in Guyana. However, while claiming fraternal relations with Guyana's government, Cuba maintained contact with radical opposition groups. Guyanese authorities suspected the Cubans of involvement in a crippling sugar strike. In August 1978, five Cuban diplomats were expelled for involvement in illegal activities.

Cuban military advisors have provided guerrilla training outside Guyana to members of a small radical Guyanese opposition group, the Working People's Alliance. Five of the seven members of the Cuban Embassy are known or suspected intelligence agents.

Grenada

Cuban influence in Grenada mushroomed almost immediately after the March 1979 coup led by the New Jewel Movement of Maurice Bishop. Bishop and his closest colleagues were Western-educated Marxist radicals, and they turned for help to Fidel Castro, who proved willing to provide assistance.

To allow close Cuban supervision of Grenadian programs, a senior intelligence officer from the America Department, Julian Torres Rizo, was sent to Grenada as ambassador. Torres Rizo has maintained intimate relations with Bishop and other People's Revolutionary Government (PRG) Ministers, such as Bernard Coard.

The Grenadian government has followed a pro-Soviet foreign policy line. Cuban and Grenadian voting records in international organizations have been nearly identical, so much so that they alone of all Western Hemisphere nations have voted against U.N. resolutions condemning the Soviet invasion of Afghanistan.

Cuban aid to Grenada has been most intense in those areas which affect the security of its client government and the island's strategic usefulness to Cuba. Cuba has advisors on the island offering military, technical, security and propaganda assistance to the Bishop government. Many Grenadians have been sent to Cuba for training in these

Footnotes at end of article.

areas. Last year journalists observed Cuban officials directing and giving orders to Grenadian soldiers marching in ceremonies in St. George's.

Cuba is aiding the construction of a 75-kilowatt transmitter for Radio Free Grenada. Grenada's state-controlled press, enjoying a government-enforced monopoly, currently hews to a strict "revolutionary" line. Indications are that the new transmitter will continue this emphasis while providing facilities for beaming Cuban and Soviet supplied propaganda into the Caribbean and South America.

Cuba's largest project in Grenada is the construction of a major airfield at Point Salines on the southern tip of the island. Cuba has provided hundreds of construction workers and Soviet equipment to build the airfield. This airfield, according to PRG statements, is required to bring tourism to its full economic potential and will be used as a civilian airport only. Many questions have been raised, however, about the economic justification for the project. The Grenadian government has ignored requests for a standard project analysis of economic benefits. The planned 9,800-foot Point Salines runway, moreover, has clear military potential. Such an airfield will allow operations of every aircraft in the Soviet/Cuban inventory. Cuba's MiG aircraft and troop transports will enjoy a greater radius of operation. The airport will give Cuba a guaranteed refueling stop for military flights to Africa.

Bishop himself has given an implicit endorsement of future military use of the airfield. A March 31, 1980, Newsweek report quoted Bishop's comments to a U.S. reporter: "Suppose there's a war next door in Trinidad, where the forces of Fascism are about to take control, and the Trinidadians need external assistance, why should we oppose anybody passing through Grenada to assist them?"

The Dominican Republic

With its renewed commitment to armed struggle, Cuba's interest in the Dominican Republic has revived. Since early 1980, the Cubans have been encouraging radicals in the Dominican Republic to unite and prepare for armed actions. Cuban intelligence officials, like Omar Cordoba Rivas, chief of the Dominican Republic desk of the America Department, make periodic visits to the island.

The Soviet Union, Cuba and other communist countries have mounted extensive training programs for Dominican students. In July 1981 the Moscow-line Dominican Communist Party (PCD) for the first time publicized the Soviet scholarship program. Some 700 Dominican students are currently studying at Soviet universities (principally Patrice Lumumba University) with another 75 in five other communist states (Bulgaria, Cuba, the German Democratic Republic, Hungary and Romania). The PCD itself selects the more than 100 students who begin the Soviet program each year.

At the same time, the Soviet Union has been pressuring the PCD to unite with other extreme left organizations. The PCD and the pro-Cuban Dominican Liberation Party (PLD) receive funds from both Cuba and the Soviet Union and send significant numbers of their members and potential sympathizers for academic and political schooling, as well as military training in communist countries. Cuba also has given military instruction to many members of small extremist splinter groups like the Social Workers Movement (MST) and the Socialist Party (PS).

South America

Colombia

Since the 1960's, Cuba has nurtured contacts with violent extremist groups in democratic Colombia. During the 1970's, Cuba established full diplomatic relations with Colombia; Cuban involvement with Colombian revolutionaries was fairly limited although Cuba provided some training to guerrilla leadership. Many leaders of the April 19 Movement (M-19), including the founder, Jaime Bateman (who also attended a communist cadre school in Moscow), were trained in Cuba. Leaders of the National Liberation Army (ELN) and the Moscow-oriented Revolutionary Armed Forces of Colombia (FARC) also received Cuban instruction.

Cuban assistance to Colombian guerrillas was stepped up after the February 1980 seizure of the Dominican Republic Embassy in Bogota. A number of diplomats, including the U.S. Ambassador, were taken hostage by M-19 terrorists. As part of a negotiated settlement, the terrorists were flown on April 17 to Cuba, where the remaining hostages were released and the terrorists were given asylum.

During mid-1980, Cuban intelligence officers arranged a meeting of Colombian extremists attended by representatives from the M-19, FARC, ELN, and other Colombian radical groups to discuss a common strategy and tactics. The M-19 had previously held talks with the Nicaraguan FSLN on ways to achieve unity of action among guerrilla groups in Latin America. Although the meeting did not result in agreement by Colombian guerrillas on a unified strategy, practical cooperation among the guerrilla organizations increased.

In late 1980, the M-19 set in motion a large scale operation in Colombia with Cuban help. In November, the M-19 sent guerrillas to Cuba via Panama to begin training for the operation. The group included members who had received no prior political or military training, as well as new recruits. In Cuba the guerrillas were given three months of military instruction from Cuban army instructors, including training in the use of explosives, automatic weapons, hand-to-hand combat, military tactics and communications. A course in politics and ideology was taught as well. Members of the M-19 group given asylum in Cuba after the takeover of the Dominican Republic Embassy also participated in the training program.

In February 1981, some 100-200 armed M-19 guerrillas reinfiltrated into Colombia from Panama by boat along the Pacific coast. The guerrillas' mission to establish a "people's army" failed. The M-19 members proved to be poorly equipped for the difficult countryside and the Cuba-organized operation was soon dismantled by Colombian authorities. Among those captured was Rosenberg Pabon Pabon, the M-19 leader who had directed the Dominican Republic Embassy takeover, and then fled to Cuba. Cuba denied any involvement with the M-19 landings, but did not deny training the guerrillas.[17]

Cuba's propaganda support for Colombian terrorists was impossible to deny. When a group apparently consisting of M-19 dissidents kidnapped an American working for a private religious institute, Cuba implicitly supported the terrorists' action through Radio Havana broadcasts beamed to Colombia in February 1981, which denounced the institute workers as "U.S. spies." Radio Moscow picked up the unfounded accusation to use in its Spanish broadcasts to Latin America. The American was later murdered by the kidnappers.[18]

Colombia suspended relations with Cuba on March 23, in view of the clear evidence of Cuba's role in training M-19 guerrillas. President Turbay commented in an August 13 New York Times interview: ". . . When we found that Cuba, a country with which we had diplomatic relations, was using those relations to prepare a group of guerrillas to come and fight against the government, it was a kind of Pearl Harbor for us. It was like sending ministers to Washington at the same time you are about to bomb ships in Hawaii."

Chile

After Allende's fall in 1973, Castro promised Chilean radicals "all the aid in Cuba's power to provide." Although Cuban officials maintained regular contact with many Chilean exiles, divisions among the exiles inhibited major operations. The Moscow-line Chilean Communist Party (PCCH), holding the position that revolutionary change could be accomplished by non-violent means, was critical of "left-wing forces" like the Movement of the Revolutionary Left (MIR) with which Cuba had close relations.

Throughout the 1970's, members of the MIR received training in Cuba—and in some cases instructed other Latin American revolutionaries. This training ranged from political indoctrination and instruction in small arms use to sophisticated courses in document fabrication, explosives, code writing, photography, and disguise. In addition, Cuban instructors trained MIR activists in the Mideast and Africa.

With its renewed commitment to armed struggle, Cuba increased its training of Chileans beginning in 1979. By mid-1979, the MIR had recruited several hundred Chilean exiles and sent them to Cuba for training and eventual infiltration into Chile. At the same time, members of the MIR who had been living and working in Cuba since Allende's overthrow began to receive training in urban guerrilla warfare techniques. The training in some cases lasted as long as seven months and included organization and political strategy, small unit tactics, security, and communications.

Once training was completed, Cuba helped the terrorists return to Chile, providing false passports and false identification documents. By late 1980, at least 100 highly trained MIR terrorists had reentered Chile, and the MIR had claimed responsibility for a number of bombings and bank robberies. Cuba's official newspaper Granma wrote in February 1981 that the "Chilean Resistance" forces had successfully conducted more than 100 "armed actions" in Chile in 1980.

By late 1979, the PCCH was reevaluating its position in light of events in Nicaragua, where the fragmented Nicaraguan Communist Party emerged from the civil war subservient to the FSLN. In December 1980, PCCH leader Luis Corvalan held talks in Cuba with Fidel Castro, who urged Corvalan to establish a unified Chilean opposition. During the Cuban Party Congress that month, Corvalan delivered a speech which sketched a new party line calling for armed struggle to overthrow the Chilean government and for coordination of efforts by all parties, including the violent left. In January 1981, Corvalan commended MIR terrorist acts as "helpful" and stated that the PCCH was willing not only to talk with MIR representatives but to sign agreements with the group. Several days after this offer, Corvalan signed a unity agreement with several Chilean extremist groups, including the MIR.

Until January 1981, when the new PCCH policy evidently had been ironed out and validated by the agreement for a broad opposition coalition, Corvalan's statements were issued from such places as Czechoslovakia, East Germany, Cuba, and Peru—but never from Moscow. Within two weeks of the agreement, however, Moscow showed its implicit approval of the policy change and began broadcasting (in Spanish to Latin America and to Chile in particular) PCCH explanations of the new policy and calls for mass resistance and acts of terrorism to overthrow the Chilean government.

Terrorist activities by MIR commandos operating in Chile have increased substantially during the past year. These have included increased efforts by MIR activists to establish clandestine bases for rural insurgency, killings of policemen, and a number of assassi-

Footnotes at end of article.

nation attempts against high government officials.

Argentina

The Cubans have a long history of association with, encouragement of, and active backing for terrorism in Argentina. The Cubans were linked to the two groups responsible for unleashing the wave of leftist terrorism that swept Argentina in the early and mid-1970's, the Montoneros and the People's Revolutionary Army (ERP). Cuba backed these organizations with advice on tactics and instructions on recruiting operations and with training in Cuba in urban and rural guerrilla techniques. During the height of Argentine terrorism, in the early and mid-1970's the Cubans used their embassy in Buenos Aires to maintain direct liaison with Argentine terrorists.

The Argentine terrorists were virtually defeated by 1978. In that year, Castro permitted the Montonero national leadership to relocate its headquarters in Cuba. Today, the Montonero top command, its labor organization, its intelligence organization, among other units, are all located in Cuba. The Cubans facilitate the travel and communications of Montoneros, supplying them with false documentation and access to Cuban diplomatic pouches. Montoneros have been among the Latin American guerrillas trained in guerrilla warfare over the past year in the Mideast as part of a cooperative effort between Palestinian groups and Cuba.

Following the move of their high command to Havana, the Montoneros made repeated attempts to reinfiltrate Argentina. In late 1979, small groups of infiltrators eluded detection and were able to carry out several terrorist actions, including four murders. Subsequent attempts by the Montoneros to infiltrate terrorists in early 1980 proved unsuccessful.

With Cuban support, Montoneros are active outside Argentina. Cuban-trained Montoneros were among the members of the "internationalist brigade" that Cuba supported in Nicaragua in 1979. This connection was highlighted when Montonero leader Mario Firmenich attended the first anniversary of the July 1979 victory, wearing the uniform of a Sandinista Commander. Montoneros have been active elsewhere as well. Montoneros largely staffed and administered Radio Noticias Del Continente, which broadcast Cuban propaganda to Central and South America from San Jose until it was closed by the Costa Rican Government in 1981, after war materials were discovered on its installations.

Uruguay

After the failure of the urban insurgency organized in the early 1970's by the National Liberation Movement (MLN-Tupamaros), several hundred Tupamaros went to Cuba. During the mid-1970's, Cuba provided some of them with training in military and terrorist tactics, weapons and intelligence. Several of these former Tupamaros subsequently assisted Cuba in running intelligence operations in Europe and Latin America. Some participated in the Cuban-organized "internationalist brigade" that fought in the Nicaraguan civil war.

Cuba continues to provide propaganda support for the Tupamaros and the Uruguayan Communist Party. Radio Havana reported on June 30, 1981, that the leader of the Communist Party of Uruguay attended a ceremony "in solidarity with the Uruguayan peoples' struggle" at the headquarters of the Cuban State Committee for Material and Technical Supply in Havana. Pro-Cuban Uruguayan leaders are given red carpet treatment when they visit Havana and are usually received by at least a member of the Cuban Politburo.

IV. POSTSCRIPT

Cuba's renewed campaign of violence has had a negative impact on Cuba's relations with its neighbors. Cuba's policies abroad and its reaction to emigration pressures at home have reversed the trend in Latin America toward normalization of relations. Although the Castro government has developed close ties to Nicaragua and Grenada, Cuba finds itself increasingly isolated throughout the Americas.

Peru nearly broke relations and removed its ambassador in April 1980, when the Cuban government encouraged Cubans eager to leave the island to occupy the Peruvian Embassy. After over 10,000 Cubans crowded into the Embassy compound, Castro thwarted efforts by concerned governments to develop an orderly departure program and opened the port of Mariel to emigration, also expelling many criminals and the mentally ill, and ultimately allowing over 125,000 people to leave under sometimes perilous conditions. But Cuba still refuses to issue safe conduct passes to the 14 Cubans that remain cloistered in the Peruvian Embassy in Havana today.

Cuba's neighbors were further shocked when Cuban MiG 21's sank the Bahamian patrol boat "Flamingo" on May 10, 1980, in an unprovoked attack in Bahamian coastal waters. Subsequently, four Bahamian seamen were machine-gunned while trying to save themselves after their vessel sank. Their bodies were never recovered. U.S. Coast Guard aircraft were harrassed by Cuban MiG's while searching for survivors at the request of the Bahamian government.

Relations between Venezuela and Cuba deteriorated badly in 1980, principally over the asylum issue, to the degree that Venezuela removed its ambassador from Havana. In November 1980, Jamaica expelled the Cuban Ambassador for interference in Jamaica's internal affairs and in October 1981, broke diplomatic relations. Colombia suspended relations in March 1981, over Cuba's training of M-19 guerrillas. Cuba's handling of an incident in which a group of Cubans demanding asylum forcibly occupied Ecuador's Embassy in Havana, prompted Ecuador to remove its ambassador from Cuba in May 1981. Also in May, Costa Rica severed existing consular ties with Cuba, expelling Cuban officials active in coordinating support networks for Central American insurgents.

Today, outside the English-speaking Caribbean, only Argentina, Panama, Mexico, and Nicaragua conduct relatively normal relations through resident ambassadors in Havana. Use of Panama as a transit point for Colombian guerrillas, however, led Panama to reassess its relations with Cuba, and resulted in sharp public criticism of Cuba's "manifest disregard for international standards of political co-existence" by a high Panamanian government official.

FOOTNOTES

[1] Cuba's military and political activities in Africa are intense and wide-ranging. Cuba still maintains expeditionary forces of at least 15–19,000 in Angola and 11–15,000 in Ethiopia. Cuba has military and security advisor contingents in a number of other African countries and in South Yemen.

[2] According to the World Bank, Cuba's per capita annual growth rate averaged *minus* 1.2 percent between 1960–78. Cuban economic performance ranked in the lowest 5 percent worldwide and was the worst of all socialist countries. Only massive infusions of Soviet aid have kept consumption levels from plummeting. Cuba today depends more heavily on sugar than before 1959. The industrial sector has been plagued by mismanagement, absenteeism, and serious shortages in capital goods and foreign exchange. The economic picture is so bleak that in 1979, and again in October 1981, the Cuban leadership had to warn that 10 to 20 more years of sacrifice lie ahead.

[3] Cuba maintains some front organizations set up in the 1960's. One of these, the Continental Organization of Latin American Students, still holds irregular congresses of student leaders from Latin America and the Caribbean (the most recent was held in Havana in August 1981) and publishes a monthly journal, which is distributed by the Cuban government.

[4] Although Cuba is not involved in actions directly threatening to Mexican internal stability, Cuba has taken advantage of Mexico's open society and its extensive presence there—Cuba's Embassy in Mexico City is its largest diplomatic mission in the hemisphere—to carry out support activities for insurgencies in other countries. Mexico is a principal base for Cuban contacts with representatives of several armed Latin American groups on guerrilla strategy, logistical support, and international activities.

[5] Prensa Latina, the press agency of the Cuban Government, has field offices in 35 countries, including eleven different Latin American and Caribbean countries, and combines news gathering and propaganda dissemination with intelligence operations. Radio Havana, Cuba's shortwave broadcasting service, transmits over 350 program hours per week in eight languages to all points of the world. Cuba also transmits nightly medium-wave Spanish-language broadcasts over "La Voz de Cuba," a network of high-powered transmitters located in different parts of Cuba In the Caribbean alone, Radio Havana's weekly broadcasts include 14 hours in Creole to Haiti; 60 hours in English, 3 hours in French, and 125 hours in Spanish. Prensa Latina and Radio Havana, in close coordination with TASS and Radio Moscow, regularly use disinformation to distort news reports transmitted to the region, especially those concerning places where Cuban covert activities are most intense.

[6] Latin Americans are not the only trainees. In a May 1978 Reuters interview published in Beirut, Abu Khalaf, a leader of the military branch of El Fatah, confirmed that Palestinian agents have received training in Cuba since the late 1960's. Palestinian organizations have reciprocated by training various Latin American groups in the Middle East with Cuban assistance. Libya, which hosted a meeting of Latin American "liberation movements" January 25-February 1, 1979, also has trained some Latin American extremists.

[7] Public exposure in March 1981 of the use of Panama as a transit point for Colombian guerrillas trained in Cuba led to sharp criticism of Cuba by the Panamanian government. Panama imposed greater controls on activities of exiled Central and South Americans, and the transit of guerrillas through Panama appears to have ceased, at least temporarily.

[8] Courses in agitation and propaganda open to foreigners include the Central Union of Cuban Workers' Lazaro Pena Trade Union Cadre School and similar courses run by the Union of Young Communists, the Cuban Women's Federation, the National Association of Small Farmers, and the Committees for the Defense of the Revolution. Even the Cuban Communist Party offers special courses for non-Cubans in party provincial schools and in the Nico Lopez National Training School, its highest educational institution. The Cuban press reported graduation ceremonies July 17, 1981, for this year's 70 Cuban graduates and announced that 69 foreigners had also attended advanced courses at the Nico Lopez school. Foreign students represented political organizations from Venezuela, Costa Rica, Panama, Peru, Colombia, Ecuador, Jamaica, the Dominican Republic, Guatemala, Nicaragua, Chile, Grenada, Angola, Namibia, South Africa, Sao Tome y Principe and South Yemen. Official Cuban Communist Party newspaper *Granma* labeled their presence "a beautiful example of proletarian internationalism." Courses of

instruction at the Nico Lopez school, which is chaired by senior party leaders, include "political training for journalists," "political training for propagandists," economics, and ideology.

[9] Ulises Estrada was given his first ambassadorial post in Jamaica following the July 1979 victory of anti-Somoza forces (see Jamaica case study). He is currently Cuba's ambassador to South Yemen.

[10] The very quantity of Cuban advisors has caused resentment among nationalist Nicaraguans leading to sporadic outbursts of anti-Cuban feelings. On June 3, 1981, the FSLN announced that 2,000 Cuban primary school teachers presently in Nicaragua would return to Cuba in July, at the mid-point of Nicaragua's academic year. The Nicaraguan Education Minister announced on June 18 that 800 of those departing would return in September after vacations in Cuba, while Cuba would replace the other 1200 teachers in February. By November 1981, however, all 2,000 Cuban teachers had returned to Nicaragua.

[11] A guerrilla document outlining this strategy was found in Nicaragua in February 1981. Guerrilla representatives later confirmed its authenticity to Western Europeans with the disclaimer that the strategy elaborately developed in the paper had been rejected.

[12] The Cuban role as arms broker to the DRU since 1979 has been documented in the Department of State's Special Report No. 80, *Communist Interference in El Salvador*, February 23, 1981. In April 1981, when Socialist International representative Wischnewski confronted Castro with the evidence in the report, Castro admitted to him that Cuba had shipped arms to the guerrillas. In discussions with several Inter-Parliamentary Union (IPU) delegations at the September 1981 IPU conference in Havana, Castro again conceded that Cuba had supplied arms.

[13] Cuban Vice President Carlos Rafael Rodriguez tacitly admitted that Cuba was providing military training to Salvadoran guerrillas in an interview published in *Der Spiegel* on September 28, 1981.

[14] At the time these reports first appeared, the U.S. was providing neither arms nor ammunition to El Salvador. In January 1981 the U.S. responded to the Cuban-orchestrated general offensive by sending some military assistance and later sent American military trainers, whose numbers never exceeded 55. There are no U.S. combatants, bases, or strategic hamlets in El Salvador. TASS continues to report falsely that "hundreds" of U.S. military personnel are in El Salvador and participate in combat.

[15] The Commission's report was issued May 14, 1981.

[16] In a recorded interview broadcast by Radio Havana on June 16, 1981, Eduardo Mora, Deputy Secretary General of Costa Rica's Popular Vanguard Party (the Moscow-line traditional Communist party, the least disposed to violence of the country's several Marxist parties and splinter groups) explained his party's position. "We establish ties with all revolutionary organizations in Central America. We have close ties and are willing to give all the aid we possibly can in accordance with the principles of proletarian internationalism because we believe that the struggle of the Central American people is the struggle of our own people."

[17] Cuban Vice President Carlos Rafael Rodriquez explained in an interview published in *Der Spiegel* on September 28, 1981, why Cuba had not denied training the M–19 guerrillas: "We did not deny this because in the past few years many people came to our country for various reasons to ask for training. We did not deny this desire. If a revolutionary for Latin America wishes to learn the technique and organization of resistance for his own self-defense, we cannot refuse in view of the brutal oppression. This also holds true for the Salvadorans."

[18] The U.S. citizen killed, Chester Allen Bitterman, was working for the Summer Institute of Linguistics, a religious group which develops written forms of indigenous languages.

THE CALENDAR

Mr. BAKER. Mr. President, there are a number of items on the calendar that are cleared for action by unanimous consent. Could I invite the minority leader's attention to certain ones of those—I am referring to Calendar Order Nos. 400, 402, 403, 407, 409, and 417—as to whether he might be in a position to agree to their consideration at this time?

Mr. ROBERT C. BYRD. Mr. President, those items have been cleared on this side of the aisle.

Mr. BAKER. I thank the minority leader.

Mr. President, I ask the Chair to lay before the Senate the calendar order numbers just identified, beginning with Calendar Order No. 400, Senate Joint Resolution 121.

BICENTENNIAL YEAR OF THE AMERICAN BALD EAGLE AND NATIONAL BALD EAGLE DAY

The PRESIDING OFFICER. The clerk will state the joint resolution by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 121) to provide for the designation of the year 1982 as the "Bicentennial Year of the American Bald Eagle", and the designation of June 20, 1982, as "National Bald Eagle Day".

The Senate proceeded to consider the joint resolution.

Mr. RANDOLPH. Mr. President, I am a cosponsor of this resolution proclaiming 1982 as the "Bicentennial Year of the Eagle" and June 20 as "National Bald Eagle Day" and urge its adoption.

I am gratified to observe that June 20 is also "West Virginia Day." It was on that day in 1863 that West Virginia was established as a State, through the action of President Lincoln. In 1982 the citizens of our beautiful Mountain State will be celebrating its 119th anniversary of statehood.

It is appropriate to also honor on that day our majestic symbol of strength and independence. It is with particular pride that West Virginians will share June 20 of next year with the bald eagle because the first active eagle nest ever to be recorded in the State of West Virginia was discovered only last summer by researchers from the National Wildlife Federation. We are honored that this wilderness-loving bird is now a part of West Virginia's abundant natural resources.

We are fortunate that the eagle is apparently beginning the slow recovery from near extinction. Let us support this resolution, and join next year to celebrate the striking beauty and fierce independence of the bald eagle and the Nation it represents.

Mr. President, in its November edition our State's excellent magazine, Wonderful West Virginia, has published an article on the bald eagle, its history as a national symbol and the work of the National Wildlife Federation in protecting this magnificant bird.

I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BALD EAGLE SIGHTED IN WEST VIRGINIA

The National Wildlife Federation has called upon the nation to observe 1982 as the "Year of the Eagle" to commemorate the 200th anniversary of the selection of the bald eagle as its national symbol.

The bald eagle, now an endangered species throughout most of the country, was adopted as the central figure of the great seal of the United States by the second Continental Congress on June 20, 1782, six years after a committee consisting of Benjamin Franklin, John Adams, and Thomas Jefferson was named to recommend an official seal for the newly-independent country.

"By next June, the bald eagle will have served as our national bird and symbol for 200 years," said Dr. Jay D. Hair, executive vice president of the NWF. "An eagle bicentennial will remind all Americans of our wildlife heritage—a priceless natural resource that we must manage wisely if it is to survive—and it will also remind us of the virtues—the strength and courage—that the eagle symbolizes."

On the national seal and also the Presidential seal the eagle carries an olive branch, signifying the country's desire for peace, in one talon. In the other it holds a bundle of 13 arrows, symbolizing the willingness of the 13 colonies to fight for freedom.

The high-powered committee appointed to develop a national seal, which included two future Presidents, was created on July 4, 1776, the same day that the colonies declared their independence from England. Benjamin Franklin later said he opposed the choice of the eagle on grounds that is was a cowardly creature of "bad moral character" that stole its food from other birds.

In a letter he wrote in 1784, Franklin said he had favored the turkey gobbler as the national bird despite the fact that turkeys were sometimes "vain and silly."

Zoologists dispute Franklin's contention that the bald eagle, a bird found only in North America, is a "rank coward." After years of study by three committees, William Barton, a Philadelphia expert on heraldry (and brother of Benjamin Barton, a well-known naturalist), submitted a design to Charles Thomson, secretary of the Continental Congress, and Thomson presented his drawing, with some changes, to the Congress.

The U.S. was by no means the first country to use an eagle—there are more than 50 species of the bird worldwide—as its symbol. Eagles appeared in the heraldry of Mesopotamia more than 3,000 years before Christ and served as emblems for Roman emperors, Charlemagne, Napoleon, and Peter the Great.

Ornithologists believe the bald eagle soared over all of the present "lower 48" states when the first Europeans arrived on this continent. Their numbers declined steadily as settlers pushed back the frontier and destroyed their wilderness habitat, then fell sharply in the 1950s and 60s as DDT, dieldren, and other man-made pesticides contaminated their food supplies. The indiscriminate use of these deadly pesticides was outlawed in the early 1970s.

Shooting has also taken its toll of the "bird of freedom." Until 1940, when Congress passed the Bald Eagle Protection Act, some states actually paid bounties for carcasses of the predatory "varmit" bird. The federal pro-

tection law was reinforced by the Endangered Species Acts of 1966 and 1973 and by a campaign by the National Wildlife Federation to stamp out illegal shooting of the bird.

Since 1972 the NWF has paid 13 $500 rewards for information leading to the conviction of eagle killers—a program that the U.S. Fish and Wildlife Service now duplicates as a deterrent to eagle poaching.

The bald eagle is now listed as "endangered" in all but five of the lower 48 states. In Minnesota, Wisconsin, Michigan, Washington and Oregon it is listed as "threatened." In the 49th state, Alaska, bald eagles are plentiful and in the 50th, Hawaii, they are non-existent.

CELEBRATE TWO CENTURIES OF THE AMERICAN BALD EAGLE

Mr. ROBERT C. BYRD. Mr. President, I am pleased to cosponsor Senate Joint Resolution 121, providing for the designation of the year 1982 as the "Bicentennial Year of the American Bald Eagle," and for the designation of June 20, 1982, as "National Bald Eagle Day."

As my distinguished colleague from West Virginia, JENNINGS RANDOLPH, has noted, the date of June 20 occupies a special place in the sentiments of West Virginians. The State of West Virginia will be 119 years old on that day.

The citizens of my State will be honored to know that the bald eagle, the national symbol incorporated into the great seal of the United States, the Senate seal, our coin and currency, and other places of respect, is sharing the day set aside to celebrate the beginnings of West Virginia.

All Americans can feel proud of the majestic bald eagle itself, and of the patriotic chords that the symbol of the eagle touches in our people. The qualities of strength, bravery, and freedom that seem to belong inherently to the noble eagle are also present today, as they were 200 years ago, in the American people.

Let this resolution serve as a bright reminder to Americans of the freedom we enjoy, as symbolized by our own bald eagle.

Mr. MITCHELL. Mr. President, I would like to thank my colleagues for their consideration of Senate Joint Resolution 121 which designates 1982 as the "Bicentennial Year of the American Bald Eagle" and June 20 as "National Bald Eagle Day." I am pleased to note that since Senator CHAFEE and I introduced the bill on November 9, 1981 it has acquired 51 cosponsors.

The 200th anniversary of the designation of the eagle as our national symbol holds both good and bad news for this singularly American bird. On a sad note, the eagle population of today is but a small remnant of the numbers present 200 years ago. Where tens of thousands of bald eagles once soared over the lower 48 States, now fewer than 3,000 survive. Human activities such as destruction of habitat, chemical contamination, shooting, and egg collection contributed to the sharp decline in the eagle population.

On the brighter side, years of tenacious research and action are beginning to reverse the eagle's downward trend. While the fight to return the eagle to healthy population levels has not been won, it has achieved encouraging successes. In Maine, for example, 64 nesting eagle pairs produced 49 young last year. Summer eagle populations in Maine may be as high as 200.

Senate Joint Resolution 121 will provide a tribute not only to the majesty of the bald eagle and the Nation it represents, but also the efforts of a wide variety of Americans who are working for its recovery. In this context I would like to recognize the efforts of the National Wildlife Federation in calling the attention of Congress to the bicentennial year of our national symbol. This organization has worked hard for passage of Senate Joint Resolution 121. More importantly, it has contributed its considerable resources to the conservation and recovery of the American bald eagle.

Since 1972 the Federation has paid 13 $500 rewards for information leading to the conviction of eagle killers. In addition, NWF coordinates and conducts eagle surveys, banding research projects, and informational symposia. The organizations films and brochures also bring problems facing the eagle to the public's attention. These and similar efforts by other conservation groups, State and Federal agencies and private industry will help to insure that future generations will have the pleasure of viewing our national symbol in the wild.

The PRESIDING OFFICER. The joint resolution is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S.J. RES. 121

Whereas on June 20, 1782, the Congress adopted the American bald eagle as the symbol of our Nation;

Whereas the American bald eagle was so adopted because of its legendary strength and its single-minded commitment to the protection of its young and the defense of its home;

Whereas the American public has adopted the American bald eagle as a symbol of strength, courage, determination, and beauty;

Whereas the seals of twelve States and the District of Columbia bear the image of the American bald eagle;

Whereas human encroachment on the American bald eagle's natural habitat has resulted in the designation of the American bald eagle as an endangered species throughout most of the United States;

Whereas Federal, State and local governments and private wildlife conservation groups have adopted programs in recent years to increase the number and dispersal of nesting pairs in the United States:

Whereas the celebration of the Bicentennial Year of the American Bald Eagle and National Bald Eagle Day will serve to make people more aware of the current plight of our country's living symbol;

Whereas such celebration will draw attention to the spirit the American bald eagle represents and the pride that it signifies;

Whereas such celebration should be conducted in a manner that encourages additional efforts to keep the American bald eagle a flying symbol of freedom: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the year 1982 is designated as the "Bicentennial Year of the American Bald Eagle" and June 20, 1982, is designated as "National Bald Eagle Day". In order to promote and enhance efforts to inform the American people of the plight of our national bird, the American bald eagle, and to encourage additional efforts to protect and increase the population of this symbol of our Nation, the President of the United States is authorized and requested—

(1) to issue a proclamation calling upon the people of the United States, including wildlife conservation organizations and educational institutions, to observe such year and day with appropriate ceremonies and activities;

(2) to send a suitable copy of such proclamation to the Governor of each State and to each Member of Congress; and

(3) to direct all Federal agencies and departments which have activities which affect the bald eagle to cooperate with and participate in the celebration of such year and day.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

E. MICHAEL ROLL POST OFFICE

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 4431) to provide for the designation of E. Michael Roll Post Office.

The Senate proceeded to consider the bill.

Mr. SARBANES. Mr. President, I am pleased to join in this effort initiated by my colleague in the House of Representatives, Congressman STENY HOYER, in honoring one of Prince Georges County and the State of Maryland's most distinguished citizens. The bill before us, H.R. 4431, would honor Mayor E. Michael Roll by naming the new post office in District Heights-Forestville for him. Mayor Roll, one of Maryland's best-known and best-loved elected officials, died recently after a lifetime dedicated to public service.

Mayor Roll served 13 consecutive terms as the mayor of District Heights and was the senior municipal officer in Maryland at the time of his death. His unprecedented career included the presidency of the Maryland Municipal League and service on its board. He was president of the Prince Georges County Municipal League and an active member of the National League of Cities, including attendance at 12 of its conventions. In addition, Mayor Roll took a great interest in public education by serving as a member of the Prince Georges Community College Advisory Board. As a member of the charter review commission in Prince Georges County, he played an active role in formulating the new charter for the county. In July of this year, the Prince Georges County Council took the unusual step of honoring Mayor Roll for his many contributions to the county and to District Heights. Mayor Roll was a past president of both the Prince Georges County Board of Trade and the

Prince Georges Chamber of Commerce. In 1977 he received the board of trade's "Man of the Year" award.

Mayor Michael Roll was born in Nusco, Avelino, Italy and came to this country as a child. Upon moving to District Heights in 1948, Mr. Roll became intensely involved in community affairs and spent untold hours in the effort to improve the lives of his fellow citizens in that community. To name the U.S. Post Office, which he worked so hard to obtain, for Mayor Michael Roll is a fitting tribute to this remarkable man and his exceptional life.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 4431) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL CEREBRAL PALSY MONTH

The PRESIDING OFFICER. The clerk will state the joint resolution by title.

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 118) to authorize and request the President to designate the month of January 1982 as "National Cerebral Palsy Month."

The Senate proceeded to consider the joint resolution.

Mr. BENTSEN. Mr. President, on November 2, 1981, I introduced Senate Joint Resolution 118 designating the month of January 1982 "Cerebral Palsy Month." Cerebral palsy is caused by damage to the brain and central nervous system and can occur before, during, or shortly after birth. Cerebral palsy is not a disease and as such cannot be cured. Its effects, however, can be lessened with proper therapy.

This resolution was drafted in the hope that its passage will add new impetus and vitality to our efforts to expand educational and employment opportunities for Americans affected by cerebral palsy. As we move ahead during this decade of the 1980's we cannot be satisfied with the progress achieved in rehabilitation techniques which today aid our handicapped populations. Rather, we must adopt a new resolve and rekindle our national commitment to go even further, to take even greater strides is fostering awareness of the contributions which these Americans make.

As Members of Congress, we are uniquely privileged to be able to generate greater understanding by helping to dispel the misconceptions which often surround the capabilities of handicapped persons. It is my hope that passage of this resolution will focus attention on possible legislative initiatives aimed at improving the condition of this important segment of our society.

The PRESIDING OFFICER. The joint resolution is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S.J. RES. 118

Whereas cerebral palsy affects more than seven hundred thousand children and adults in the United States;

Whereas the Department of Health and Human Services estimates the annual cost of care for persons with cerebral palsy exceeds $3,750,000,000; and

Whereas increased national awareness of the effects of cerebral palsy may add new impetus to efforts to expand research activities, and educational and employment opportunities for persons affected by the condition: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating the month of January 1982 as "National Cerebral Palsy Month", and calling upon all Government agencies and people of the United States to observe the month with appropriate programs, ceremonies, and activities.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DOCUMENTATION OF VESSEL "CAPT TOM"

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 1797) to direct the Secretary of the Department in which the United States Coast Guard is operating to cause the vessel Capt Tom to be documented as a vessel of the United States so as to be entitled to engage in the coastwise trade.

The Senate proceeded to consider the bill, which had been reported from the Committee on Commerce, Science, and Transportation with an amendment to strike out all after the enacting clause, and insert the following:

That, notwithstanding the provisions of section 27 of the Merchant Marine Act of 1920 (46 U.S.C. 883) or any other provision of law to the contrary, the Secretary of the department in which the United States Coast Guard is operating shall cause the vessels *Capt Tom*, owned by Mr. John W. Coston of Hampstead, North Carolina, and the *Yardarm Knot*, owned by Mr. Denton Sherry of Seattle, Washington, to be documented as vessels of the United States, upon compliance with the usual requirements, with the privilege of engaging in the coastwise trade and fishing so long as such vessels are owned by a citizen of the United States.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 1797) was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZING AN UNDER SECRETARY OF COMMERCE FOR ECONOMIC AFFAIRS

The PRESIDING OFFICER. The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (S. 1808) to authorize an Under Secretary of Commerce for Economic Affairs.

The Senate proceeded to consider the bill which had been reported from the Committee on Commerce, Science, and Transportation, with an amendment to strike out all after the enacting clause, and insert the following:

That (a) there shall be in the Department of Commerce an Under Secretary of Commerce for Economic Affairs who shall be appointed by the President by and with the advice and consent of the Senate. The Under Secretary shall perform such duties as the Secretary of Commerce shall prescribe.

(b)(1) Section 5314 of title 5, United States Code, is amended by inserting before "and Under" in the item relating to the Under Secretaries of Commerce: ", Under Secretary of Commerce for Economic Affairs,".

(2) Section 5315 of title 5, United States Code, is amended in the item relating to the Assistant Secretaries of Commerce by striking out "(7)" and inserting in lieu thereof "(8)".

(c)(1) Section 2 of the Act entitled "An Act to establish the Department of Commerce and Labor", approved February 14, 1903, as amended (15 U.S.C. 1504), is amended by striking out the first two sentences.

(2) Section 8 of the Air Commerce Act of 1926 (44 Stat. 568; 52 Stat. 1029) is hereby repealed.

(3) Section 601(a) of the Public Works and Economic Development Act of 1965 (42 U.S.C. 3201) is amended by striking out "and shall be compensated at the rate provided for level IV of the Federal Executive Salary Schedule".

(4) Section 9(a) of the Maritime Appropriation Authorization Act for Fiscal Year 1978 (15 U.S.C. 1507b) is amended by striking out "shall receive compensation at the rate prescribed by law for Assistant Secretaries of Commerce, and".

(5) Section 4 of the Reorganization Plan Numbered 1 of 1977 (91 Stat. 1633; 5 U.S.C. Appendix) is amended by striking out ", and who shall be entitled to receive compensation at the rate now or hereafter prescribed by law for level IV of the Executive Schedule".

(6) Section 2(d) of Reorganization Plan Numbered 3 of 1979 (93 Stat. 1382; 5 U.S.C. Appendix) is amended by striking out "shall receive compensation at the rate payable for level IV of the Executive Schedule, and".

Mr. PACKWOOD. Mr. President, the Congressional Budget Office has estimated that the net budget impact of this legislation will be $1,000 in each of fiscal years 1982 through 1986. This increase in cost is due to the fact that the measure creates an Executive Schedule III position, with an annual salary of $59,500, and abolishes an Executive Schedule IV position, with an annual salary of $58,500. I would like to inform the Senators

that the committee intends that this additional cost will be absorbed by the Department of Commerce. The bill is not intended to drive up the Department's budget request.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute.

The committee amendment was agreed to.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill, having been read the third time, the question is, Shall it pass?

The bill (S. 1808) was passed as follows:

S. 1808

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) there shall be in the Department of Commerce an Under Secretary of Commerce for Economic Affairs who shall be appointed by the President by and with the advice and consent of the Senate. The Under Secretary shall perform such duties as the Secretary Commerce shall prescribe.

(b)(1) Section 5314 of title 5, United States Code, is amended by inserting before "and Under" in the item relating to the Under Secretaries of Commerce: ", Under Secretary of Commerce for Economic Affairs,".

(2) Section 5315 of title 5, United States Code, is amended in the item relating to the Assistant Secretaries of Commerce by striking out "(7)" and inserting in lieu thereof "(8)".

(c)(1) Section 2 of the Act entitled "An Act to establish the Department of Commerce and Labor", approved February 14, 1903, as amended (15 U.S.C. 1504), is amended by striking out the first two sentences.

(2) Section 8 of the Air Commerce Act of 1926 (44 Stat. 568; 52 Stat. 1029) is hereby repealed.

(3) Section 601(a) of the Public Works and Economic Development Act of 1965 (42 U.S.C. 3201) is amended by striking out "and shall be compensated at the rate provided for level IV of the Federal Executive Salary Schedule".

(4) Section 9(a) of the Maritime Appropriation Authorization Act for Fiscal Year 1978 (15 U.S.C. 1507b) is amended by striking out "shall receive compensation at the rate prescribed by law for Assistant Secretaries of Commerce, and".

(5) Section 4 of the Reorganization Plan Numbered 1 of 1977 (91 Stat. 1633; 5 U.S.C. Appendix) is amended by striking out ", and who shall be entitled to receive compensation at the rate now or hereafter prescribed by law for level IV of the Executive Schedule".

(6) Section 2(d) of Reorganization Plan Numbered 3 of 1979 (93 Stat. 1382; 5 U.S.C. Appendix) is amended by striking out "shall receive compensation at the rate payable for level IV of the Executive Schedule, and".

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DELINQUENT PAYMENTS ACT OF 1981

The PRESIDING OFFICER. The clerk will state the bill S. 1131 by title.

The assistant legislative clerk read as follows:

A bill (S. 1131) to require the Federal Government to pay interest on overdue payments and to take early payment discounts only when payment is timely made, and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Governmental Affairs with an amendment to strike out all after the enacting clause, and insert the following:

That this Act may be cited as the "Delinquent Payments Act of 1981".

INTEREST ON DELINQUENT PAYMENTS

SEC. 2. (a) The Administrator of the Office of Federal Procurement Policy (hereafter in this Act referred to as the "Administrator") shall promulgate regulations requiring each agency to include in any contract provisions specifying—

(1) due dates for payment; and

(2) that the United States will pay interest on any amount which is not paid by the due date for payment under the contract.

(b)(1) Except as provided in paragraphs (2) and (3), the Administrator shall promulgate regulations requiring each agency which enters into a contract to pay interest to the contractor on any amount which is not paid by the due date for payment under the contract or, in any case in which the contract does not specify a due date for payment, on any amount which is not paid within thirty days after the agency receives a proper invoice for such property or services.

(2) In the case of any contract for the procurement of meat or meat food products, the Administrator shall promulgate regulations requiring each agency to—

(A) specify in any such contract a due date for payment which is not later than seven days after delivery of each item under the contract;

(B) make payment by such due date, or, in the case of a contract in which a due date is not specified, within seven days after delivery of each item under the contract; and

(C) pay interest on any amount which is not paid in accordance with subparagraph (B).

(3) In the case of any contract for the procurement of any perishable agricultural commodity, the Administrator shall promulgate regulations requiring each agency to—

(A) specify in any such contract a due date for payment in accordance with the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499 et seq.);

(5) make payment by such due date and in accordance with such Act; and

(C) pay interest on any amount which is not paid by the due date for payment specified under the contract or, in any case in which the contract does not specify a due date for payment, to pay interest on any amount which is not paid in accordance with such Act.

(c) In the case of any contract which provides for separate payment for partial delivery or execution of property or services, the Administrator shall promulgate regulations requiring each agency—

(1) to include in such contract a due date for each such separate payment; and

(2) to pay interest on any amount of each such separate payment which is not paid by the due date specified for such payment under the contract.

(d)(1) Interest payable under rules and regulations promulgated under this Act shall be computed for the period beginning on the day after payment is due and ending on the day on which payment is paid. Interest shall be computed at the rate determined by the Secretary of the Treasury for interest payments under section 12 of the Contract Disputes Act of 1978 (41 U.S.C. 611). The Secretary of the Treasury shall publish such rate in the Federal Register.

(2) Any amount of interest which is not paid at the end of any thirty-day period beginning on the day after payment is due shall be added to the principal amount of the amount due and interest shall accrue on each such additional amount.

(e) An agency shall pay any interest charges required by this Act out of funds made available for the administration of agency programs. This Act does not authorize the appropriation of additional funds to any agency for the payment of interest required by this Act.

(f) This Act does not require an agency to pay interest with respect to a contract if performance is not in accordance with the terms of the contract.

(g) Regulations required under this section shall be promulgated not later than ninety days after the date of enactment of this Act. The Administrator may not delegate to any other person or office the responsibility for promulgating regulations under this Act.

LIMITATION ON DISCOUNT PAYMENTS

SEC. 3. If a contractor offers an agency a discount from the amount due under a contract for property or services in exchange for payment within a specified period of time, the agency may make payment in an amount equal to the discounted price only if payment is made within the specified time.

CONGRESSIONAL OVERSIGHT

SEC. 4. (a) Within sixty days after the end of each fiscal year, each agency shall submit to the Director of the Office of Management and Budget a report concerning the performance of the agency in making payments under contracts during the preceding fiscal year. The report shall include a description of any actions that the agency has taken or will take to assure timely payment under contracts and an accounting of delinquent payments and interest payments during the preceding fiscal year.

(b) Within one hundred and twenty days after the end of each fiscal year, the Director of the Office of Management and Budget shall submit to the Committee on Governmental Affairs of the Senate and to the Committee on Government Operations of the House of Representatives a report concerning the performance of the agencies in paying contractors during the preceding fiscal year. Such report shall include, by agency, the information set forth in subsection (a).

(c) The provisions of this section shall terminate one hundred and twenty-one days after the end of fiscal year 1987.

DEFINITIONS

SEC. 5. (a) For the purposes of this Act—

(1) the term "agency" means—

(A) an executive department as defined in section 101 of title 5, United States Code;

(B) a military department as defined in section 102 of such title;

(C) a Government corporation as defined in section 103 of such title; and

(D) an independent establishment as defined in section 104 of such title, except that the term "agency" includes the United States Postal Service and the Postal Rate Commission;

(2) the term "contractor" means any person who has entered into a contract with an agency;

(3) the term "contract" means a written agreement, including amendments and modifications thereto, between an agency and a contractor for the procurement of property or services;

(4) the term "meat food products" has the same meaning as in section 2(a)(3) of the Packers and Stockyards Act, 1921 (7 U.S.C. 182(3));

(5) the term "perishable agricultural commodity" has the meaning as in section 1(4) of the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499a(4));

(6) the term "person" has the same meaning as in section 551(2) of title 5, United States Code; and

(7) the term "property" means real or personal property, and includes intellectual property and leasehold interests.

(b) In accordance with regulations to be promulgated by the Administrator—

(1) an invoice shall be considered a proper invoice—

(A) if it contains or is accompanied by such substantiation of the contractor's performance of the contractual obligations as the Administrator may require by regulation, or

(B) if the agency which received the invoice fails to notify the contractor promptly of deficiencies in the invoice,

(2) an invoice shall be considered received by an agency on the later of—

(A) the date on which the agency's designated payment office or finance center actually receives a proper invoice, or

(B) the date on which the agency accepts the property or service concerned, and

(3) a payment shall be considered paid on the date the Government's check is dated for payment.

CLAIMS SUBJECT TO CONTRACT DISPUTES ACT

SEC. 6. Claims arising under this Act shall be subject to the provisions of the Contract Disputes Act of 1978 (41 U.S.C. 601 et seq.).

EFFECTIVE DATES; APPLICABILITY

SEC. 7. (a) The provisions of this Act requiring the promulgation of regulations shall be effective upon enactment.

(b) Except as provided in subsection (c), the provisions of this Act shall apply to payments made or due on or after the date which is one hundred and eighty days after the date of enactment of this Act.

(c) Each agency which, prior to the effective date specified in subsection (b), failed to make a payment under a contract by the due date of such payment shall make such payment by such effective date. Beginning on such effective date, interest shall accrue in accordance with this Act on any payment which is referred to in the preceding sentence and which is not paid prior to such effective date.

(d) The provisions of this Act shall apply to the Tennessee Valley Authority: *Provided however*, That any regulation promulgated under the authority of this Act shall not be applicable to the Tennessee Valley Authority, which shall be solely responsible for implementing the provisions of this Act with respect to its contracts.

Mr. WEICKER. Mr. President, I wish to express my strong support, and that of the small business community, for S. 1131, the Delinquent Payments Act of 1981. As I indicated when Senator DANFORTH and I introduced the bill, and again when I testified before the Subcommittee on Federal Expenditures, Research and Rules, I view late payments by the Government as one of the most pressing problems facing small Government contractors today. And I find it to be one of the most inexcusable of all Federal practices.

I would like to commend the distinguished Senator from Missouri for his outstanding leadership on this issue. He has worked diligently and expertly to move this much-needed legislation through the legislative process. I also would like to commend the distinguished chairman of the Committee on Governmental Affairs for expediting consideration of S. 1131.

Mr. President, the impact of late payments on small Federal contractors is crippling—especially in these days of high interest rates. Since introduction of this legislation, I have heard from dozens of small business organizations, representing thousands of small firms, throughout the country. These diverse organizations have united and formed a "Slow Pay Coalition," whose main purpose is to achieve enactment of this legislation.

Mr. President, this coalition has informed me of numerous late pay "horror stories" that should not be permitted to happen. They tell me that small businesses are routinely forced to wait 3 to 4 months for payments of goods and services delivered to the Government. Small firms write of cash flow problems and wasted time and money spent tracking unpaid bills. Worst of all, because of the late pay problem, small businessmen and women are increasingly writing me of their determination to avoid the Federal marketplace altogether.

Mr. President, at this point, I would like to submit a list of recent examples of Federal late payments compiled by the Slow Pay Coalition. The first case, that of Mr. Ron Chainey, of Hartford, Conn., was brought to light in hearings before the Senate Small Business Committee.

The list follows:

EXAMPLES OF LATE PAYMENTS

At a March 9, 1981, hearing before the United States Senate, the owner of a cleaning business in Connecticut said that he had been trying to collect $10,000 from the U.S. Navy for five months. He pointed out that the money was collecting no interest, meeting no payroll nor covering any of his other operating expenses.

The Atlanta regional office of a mid-western business materials firm found that 25 percent of its government accounts receivable were over 30 days due. The GSA store in Memphis had taken 85 days to pay a bill for $6,144; the GSA store in Jacksonville had taken 87 days to pay a $2,952 bill and 67 days to pay $8,414; the Atlanta office of the U.S. Fish and Wildlife Service took 86 days to pay $542, 181 days to pay $23 and 126 days to pay $42; the Atlanta regional office of the Department of Housing and Urban Development paid $965 in 85 days; and the Raleigh office of the Office of Personnel Management took 112 days to pay an invoice for $302.

A North Carolina dealer reports that a southeastern military installation has owed $16,000 for more than 60 days and that part of that figure goes back as far as 12 months. The dealer complained that if every part of the invoice is not complete, federal agencies make no effort to have it completed or to notify the dealer.

An aerospace corporation holding several contracts with the Navy calculated the loss resulting from chronically late payments on four contracts it holds. The losses are $99,718, $41,459, $89,848 and $303,648. Losses were calculated from an interest factor of 17 percent for 1980 and 20.05 percent for 1981 and based on invoices paid after 30 days.

A photo products firm in Oakland is owed money from the Naval Supply Center for some invoices going as far back as 1979. At one point in 1981, amount due over 90 days from Naval Supply Center exceeded $24,000. Firms state that "these are not contested charges—the Navy tells they are just having problems processing paperwork."

A New Jersey firm told its Congressman: "I am constantly in a financial bind because of delinquent federal payments. This is a serious problem for small businesses. Sometimes the government agencies are months late in paying their bills."

A study of the government accounts receivable by a Richmond, Virginia audio visual firm found that 95 percent of the dollars owed it by the Defense General Supply office had been outstanding more than 30 days and 67 percent had been outstanding for more than 90 days. Fifty-nine percent of the dollars owed the firm by the U.S. Navy were past due 30 days with 29 percent over 90 days. The U.S. Naval Weapons Center has owed the firm over $1,000 dollars for more than 90 days. Ninety-six percent of the dollars owed to the firm from the Marine Corps School were past due 30 days. One bill to the Navy for $109 has been unpaid since February 27, 1971.

The U.S. Department of Justice purchased $500 worth of dictating equipment for the Department Office in Kansas City. Purchase was made in March 1980 but was not paid for until March 1981.

A metropolitan St. Louis firm reports that by the end of 1980, the U.S. Army Corps of Engineers, Omaha, Nebraska, owed $960 and was 120 days overdue. Once a buyer goes over 120 days, it is placed on a cash-on-delivery basis.

An Indiana firm says that many agencies it deals with take cash discounts long after the discount period has expired. Bills paid as much as 45 days late with 1 percent prompt payment discount deducted. This firm also had problem of not receiving partial payment for partial delivery. A $3,000 video package was delivered in full with exception of a $15 service manual. Equipment fully warranteed for one year, making service manual unnecessary. Manual delivered 60 days after receipt of equipment, payment made 30 days later (or 90 days after equipment delivered). Government took 1 percent prompt payment discount on full $3,000.

A Washington D.C. consulting firm had to wait 10 weeks to get paid by the Department of Health and Human Services.

A Maryland firm writes: "We do a great deal of business with the U.S. government on GSA and open market. To date, I don't ever remember getting paid in 30 days." The Goddard Space Flight Center in Greenbelt, Maryland ordered $2,151 worth of equipment from the firm. Six months later, they still had not been paid.

A Texas firm provided $5,543 in merchandise to the Letterkenny Army Depot in Pennsylvania. The firm waited more than six months for payment. The Army depot said that the reason for nonpayment was that it was "awaiting modifications from purchasing officer."

By the first of January, 1981, the U.S. Coast Guard was overdue 120 days on $9.04 owed to a Missouri firm.

A middle Atlantic service firm had the following record of payment from federal agencies: the President's Commission on Military Compensation, 79 day payment with 1 percent discount; the Department of Labor Employment and Training Administration, 55 to 75 day payment; the Justice Department, 151 day payment; the Armed Forces Information Service, 99 day payment; the Depart-

ment of Commerce, 69 day payment; the Department of Energy, 60 to 75 day payment; the Executive Office of the President, 80 day payment; the Labor Department, 62 day payment; the Army Research Institute, 78 day payment; and the Interior Department, 61 day payment.

One firm reported that as of April 1, 1981, of all the money owed it by the federal government, $222,702 was due over 90 days. This 90 day figure has averaged $252,000 during the past year, roughly 25 percent of its government accounts receivable. For this company, the military was the worst offender. The Air Force owed $47,627 (or 44 percent of its total) for 90 days; the Army $15,972 (28 percent) for 90 days; and the Navy $54,871 (46 percent) for 90 days.

The Veterans' Administration Hospital, Danville, Illinois was 30 days late on a bill of $292 owed to a Missouri firm.

From a firm in Washington State: "Our experiences in many instances was that the government did not meet our terms of 1 percent discount in 20 days, net 30 days, but would often string the payment out significantly longer. And after much followup was done, the government might still take the 1 percent discount. When that happened, I'd sometimes let the matter go, for it wasn't worth spending more money to try to then recover the discount."

Another Washington State firm had much the same problem: "When we finally tracked down the invoice, the contracting officer said, 'Well, I need to ask you if it is okay if I take the prompt payment discount?' I told him no, of course not, and said that he ought to be paying a sizable interest penalty instead. He said that he was instructed to do this, and his supervisor had indicated that no matter how late the bill was, they should take the prompt payment discount because most suppliers (when it came right down to it) would be mad but would not go to the trouble to try to collect the discount because of the hassle involved. In instances where this has happened to us, we have taken the trouble to collect the discount and have generally been successful, but we certainly spent more in doing so than we recovered."

As of May 13, 1981, an audio visual firm was owed a balance of $1,700 from a job done for the Marine Corps in 1978. The Marine Corps claimed that the people who were involved in the original purchase are no longer available to confirm that the firm is still owed the money.

A large northeastern manufacturer studied its accounts receivable for the first five months of 1981 for government contracts. One division had accounts receivable of over $5 million, of which 50 percent were past due. The breakdown was as follows: 17 percent, 1 to 30 days late; 15 percent, 31 to 90 days late; 10 percent, 91 to 180 days late; 6 percent, 181 to 360 days late; 2 percent, over 360 days late.

A small information technology consulting firm did a project for the National Commission on Library and Information Sciences. Total invoice for $2,280 submited on February 12, 1979. Followup invoices sent periodically throughout 1979. By January 30, 1980 had received payment of only $1,422. After five letters and 10 phone calls, wrote to NCLIS chairman for help. Finally received check for balance of payment on May 20, 1980.

The Social Security Administration's Office of Hearing Appeals in Kansas City, Missouri purchased $500 worth of dictating equipment in April 1978. It was finally paid for three years later in March 1981.

Another office of the Social Security Administration ordered $4,238 worth of supplies from a company in the eastern U.S. The invoice, dated August 20, 1980 was paid December 5, 1980.

A California firm writes: "As a representative selling products for several manufacturers, my income has been directly affected as a result of slow-paying government agencies."

From a Louisiana businessman: "Frankly, the government isn't a big part of our business—but we can always count on the government and its grantees to pay late. It's terrible that the government sets such a rotten example."

A Rhode Island manufacturer wrote to its congressman: "We offer time discounts in order to obtain payment in a timely manner. In practice, however, the discount is taken even though payment is made after the account is delinquent. The government expects the best price on all commodities but will no longer honor requests for payment of partial shipments even though delivery of every line item may be complete. Our government runs the risk of driving qualified suppliers from the market and eventually paying higher prices for all requirements.

A Richmond firm that renders over 400 invoices per month to the federal government has some agencies on a C.O.D. basis. One such agency is the Office of Personnel Management, which had been paying its bills anywhere from four months to one year late. In all, the firm says that 35 percent of its government invoices are delinquent.

A Connecticut company complained that the federal government owed it over $12,000 in receivables that were well over 90 days old. Some unpaid invoices went as far back as one year. He said that calls to expedite payment usually ran into a frustrating wall of bureaucratic red tape, and that being a very small company, they were "in no position to alienate customers whose patronage they have worked hard to develop over the years."

A businessman in Florida said that the problem of government slow pay was so pervasive, their primary business lender would not extend credit on any government account. Thus, a sale is guaranteed to strain—or indeed wipe out—their working capital.

Mr. WEICKER. Mr. President, there is absolutely no excuse for this kind of continuing negligence by the U.S. Government. According to a 1978 General Accounting Office (GAO) report, one-third of all Federal bills are paid late. Unfortunately, this situation is not improving. In an updated report submitted in October 1981, GAO found that private contractors are losing between $150 million and $375 million annually because of late payments. Despite promises by Federal agencies to clean up their payment procedures, GAO states that "adequate corrective actions have not yet been taken." I think it is high time that we in the Congress act to remedy this problem once and for all.

The bill we are considering today, the Delinquent Payments Act, would require Federal agencies to pay their bills within 30 days after the date on which payment is due under the terms of the contract, or pay an interest penalty. These interest penalties would be set at a rate determined by the Secretary of the Treasury and would be paid from each agency's existing budget. It would also preclude Government agencies from taking early payment discounts, long after the discount period has expired.

Mr. President, I believe that this legislation is only fair. Imagine if you will, how the Internal Revenue Service would react if a small business owner paid his taxes 4 to 6 months late. We all know the answer—the IRS would slap penalties and interest charges on him without a moment's hesitation. And yet, Federal agencies are routinely paying their bills whenever they get around to it, without penalties or interest charges.

In the meantime, small firms awaiting payment from the Government—firms with neither the cash flow to carry these overdue accounts for a long time or the administrative personnel necessary to cope with a large number of accounts receivable—are being forced to take out short-term loans just to make the weekly payroll.

Mr. President, these small businesses have to pay their own bills on time or face severe interest charges. I think it is only fair that the Federal Government should have to do the same.

Mr. President, I would like to submit a list of small business and trade associations supporting the legislation and thank them for their dedication in keeping the Congress informed about the extent of the Federal late payment problem.

The list follows:

ORGANIZATIONS WHICH ARE URGING THE CONGRESS TO RESOLVE THE SLOW PAY PROBLEM

National Audio-Visual Association (NAVA).
National Office Products Association (NOPA).
National Micrographics Association (NMA).
National Association of Wholesaler-Distributors (NAW).
Independent Media Producers Association (IMPA).
Association of Reproduction Materials Manufacturers (ARMM).
Coalition for Common Sense in Government Procurement (CCSGP).
Media Educational Sales Association (MESA).
National Meat Association (NMA).
American Logistics Association (ALA).
Business Products Council Association (BPCA).
Business and Institutional Furniture Manufacturers Association (BIFMA).
Association of Editorial Businesses, Inc. (AEB).
National Association of Manufacturers (NAM).
American Meat Institute (AMI).
Association of the Wall & Ceiling Industries—International (AWCII).
Associated General Contractors (AGC).
National Broiler Council (NBC).
Latin American Manufacturers Association (LAMA).
Automotive Service Industry Association (ASIA).
Automotive Parts Rebuilders Association (APRA).
Committee on Federal Contracting Practices (CFCP).
United Fresh Fruit & Vegetable Association (UFFVA).
National Association of Meat Purveyors (NAMP).
American Association of Nurserymen (AAN).
National Independent Dairies Association (NIDA).
Council of Smaller Enterprises (CSE).
The National Small Business Association (NSBA).

Smaller Business Association of New England (SBANE).
Door and Hardware Institute (DHI).
Small Business United (SBU).
National Council of Professional Service Firms (NCPSF).
Mid-Continent Small Business United (MSBU).
Independent Business Association of Wisconsin (IBAW).
Chicago Association of Commerce & Industry (CACI).
National Moving & Storage Association (NMSA).
American Consulting Engineers Council.
National Federation of Independent Businesses.

Mr. WEICKER. Mr. President, I urge my colleagues to join me in supporting this measure. The idea embodied in the Delinquent Payments Act is not revolutionary, reactionary, or unreasonable. It is just good—and fair business. And I think it is the very least that small business contractors should expect from their Government.

Mr. DANFORTH. Mr. President, I am pleased to present S. 1131 to the Senate today, the Delinquent Payments Act of 1981. I thank the leadership for expediting the consideration of this bill, which enjoys broad bipartisan support. I am pleased to say that 65 Members of the Senate are now cosponsors of the bill. In particular I am grateful for the early and strong support of Senator ROTH, the chairman of the Governmental Affairs Committee; Senator WEICKER, the chairman of the Small Business Committee; and Senator SASSER, who was one of the first to call attention to the serious problems businesses—in particular small businesses—encounter when the Government fails to pay its bills on time.

Mr. President, the committee report on S. 1131 explains the legislation in some detail. I will not repeat that discussion here, but certain points do deserve to be restated.

Plainly and simply stated, the purpose of S. 1131 is to get the Government to pay its bills on time. To this end, under regulations to be promulgated by the Office of Federal Procurement Policy, the bill requires all contracts for the procurement of goods and services to include due dates for payment—and requires further that the United States pay interest on any amount which is not paid by the due date.

In 1978, the General Accounting Office issued a report on the Federal Government's bill payment performance. The GAO, which spent nearly 2 years investigating complaints that Federal contractors had experienced lengthy, unexcused delays in receiving payment for their work, found that over 40 percent of all invoices submitted to Government payment centers, representing 20 percent of the dollar volume of Federal payments, were not made within the commercially accepted 30-day time period.

Even though contractors could be blamed for some of the delays, the GAO found that 30 percent of the invoices and 15 percent of the dollar volume were late for no reason other than slowness and inefficiency on the part of the Federal money managers. The GAO report documented instances in which contractors, through no fault of their own, awaited payment for months after their services were rendered or their goods were provided.

The 1978 report estimated Federal contractors may have incurred interest costs exceeding $30 million during the GAO's 6-month sampling period—simply because their money was tied up in overdue Government bills. All told, the GAO estimated that $9.8 billion in Federal payments to contractors were paid late during the sampling period.

At my request, the GAO conducted a followup survey this year to determine if the Government's bill payment performance had improved since 1978. In a report filed October 9, 1981, the GAO stated that there had been no improvement:

Although we made specific recommendations for continued bill payment monitoring and for changes in procurement regulations more than 3 years ago, adequate corrective actions have not yet been taken. The Treasury's monitoring of federal government bill payment practices has been ineffective, and responsible agency headquarters offices apparently do little payment performance monitoring themselves. Payment due date standards for the major types of goods and services have not yet been developed and contract documents generally still do not include specific payment due dates, although we have shown good reasons for doing both.

As a result, OMB and Treasury do not know how good the government's current bill payment performance is, or if agencies have implemented recommended actions to improve payment procedures. Responsible agency headquarters offices apparently are also generally unaware of whether their agency is paying its bills when due and agency financial managers continue to have problems with non-specific payment terms in contract documents.

To its credit, OMB has acted within the last 2 months to improve financial management practices in the executive branch.

I welcome this initiative, but remain unconvinced that administrative actions will do the job. I see no chance that agencies will get serious about paying their bills unless and until they are forced to pay for their tardiness by paying interest on overdue accounts. To date, the executive branch has not even been able to accomplish the simple task of monitoring bill payment performance.

In 1979, agencies were ordered to report to the Treasury Department on their cash management practices; specifically, these reports were to include information on bills paid late. Although 86 agencies are subject to annual reporting, in the last 2 years only 18 reports have been filed. According to the GAO, virtually all of the reports received were useless for monitoring bill payment since they made broad generalizations—that is, "This agency is doing a good job"—or neglected to mention bill payment at all.

Given the Government's dismal track record in paying its bills, it is not surprising that a number of contractors simply refuse to do business with the Government. This finding by the General Accounting Office in 1978 was supported by an earlier Department of Defense study which reported that "delays in making payments have contributed to the shrinking competitive base of the military industrial establishment." Typical of the testimony received on this point was the statement of Kenton Pattie, spokesman for the "Slow Pay Coalition," a consortium of 25 trade associations:

Senator DANFORTH. To your knowledge, are there businesses that would just as soon not transact business with the Federal Government because of the difficulty in doing so? Is there less competition for the Federal contract?

Mr. PATTIE. There is no doubt about it, Senator. When I called through Missouri, Illinois, and Iowa prior to this hearing, a number of my members told me: "Frankly, we just do not do that sort of business. There is no way we are going to get involved in that. They pay late. It is too much of a hassle, and they have too many requirements. We just do not do that kind of work." I think that if the Government were a better business partner and more reliable in its payment system, I think some of these companies would rethink their participation in the Government sector.

Such anecdotal evidence is reinforced by the recent findings of the Office of Federal Procurement Policy. In its draft proposal for a uniform procurement system, OFPP notes that "the Government's payment record discourages contractors from doing business with the government and, in some cases, severely restricts competition." The committee is very concerned about such reports. When competition for Government contracts declines, prices climb and quality often suffers. For this reason, it is clearly in the Government's interests—as well as in the interest of Government contractors—for the Government to pay its bills on time.

There are other ways that sloppy cash management practices cost American taxpayers. In its 1978 report, and again in its October 8 report of this year, the GAO pointed out that the Government frequently pays its bills too early—well before payment is due. By paying bills when due, instead of early, the GAO estimated the Government could save anywhere from $900 million to $3.8 billion each year. The GAO blamed this problem on nonspecific payment terms in Government contracts which leave open to question when payment is due. Because S. 1131 requires contracts to contain clear payment terms, the committee expects that this legislation will not only reduce late payments, but also will reduce the number of early payments, with resultant savings to the Government.

The experience of the last 3 years should make it clear that there will be no meaningful improvement in the Federal Government's bill paying practices unless Governmentwide enforcement efforts have teeth. It is clear that a requirement that interest on late payments to contractors be paid out of agency accounts will prove to be the only effective means to provide proper incentives to agency bill payers.

I urge the Senate to support this legislation.

Mr. MATTINGLY. Mr. President, I rise to offer my support for S. 1131, the Delinquent Payments Act of 1981. This is a fine bill that I am pleased to cosponsor.

Before I joined this honorable body, I

was a small businessman. I know how tight cash flow can be and just how much all small business people rely upon their creditors to pay in a timely fashion. For a large creditor to be constantly negligent in his accounts often leads to the failure of the small business. Even if the large debtor ultimately reconciles with the small business, the consequences of the delay and the long collection procedure are often irrevocable.

The problem becomes a national shame when the debtor is the Federal Government. It above all others should be prompt with its bills.

This bill will help to see that the Federal Government becomes prompt with its bills. The various departments must now become accountable for their delays in payment. Congress will be able to see which branches of the Government are consistently behind in their payments, and we will be able to act accordingly.

This is a good bill, a needed bill, and one I am certain will pass this Congress with little trouble. We must move now, so that American businesses can see a "new year" in their dealings with the Federal Government.

Mr. SASSER. Mr. President, as an original cosponsor of the Delinquent Payments Act of 1981 (S. 1131) and the sponsor of the Late Payment Act of 1981 (S. 30), I urge speedy enactment of legislation to speed the payment of the Government's bills.

The committee report on S. 1131 points out the fact that between 30 and 40 percent of the time the Federal Government does not pay its bills on time. Indeed, during the recent GAO investigation of this matter, the committee found that $9.8 billion in Federal payments to Government contractors were not paid within the prescribed 30-day period. Consequently, Federal contractors may have paid some $30 million in excess interest costs due to slow payment of Federal contracts.

The committee notes that GAO has consistently filed reports that demonstrate the magnitude of this problem but that timely executive branch action is still lacking. Indeed, while Federal agencies were required in 1979 to file annual reports on cash management practices, including their record on promptly paying their bills, very few reports have been filed; and Federal contractors are still plagued by late payments problems.

I am most concerned by the fact that at a time when the Governmental Affairs Committee has acted on debt collection initiatives that I have sponsored in the 96th Congress to collect the more than $34 billion in debt that is legitimately owed to the Federal Government, the Federal Government is not setting a good example in paying its own debts on time. The American taxpayer expects that the Federal Government should collect and pay its debts on time—nothing more and nothing less. By enactment of this legislation, we will start down the road to more progressive cash management policies for the National Government.

The average American citizen knows that he will have to pay his bills on time or be subjected to an interest penalty. He accepts this as a condition of doing business. It is high time that the Federal Government be subjected to these same rules and promptly pay its bills on time. Therefore, I urge speedy enactment of S. 1131.

Mr. RIEGLE. Mr. President, it is a pleasure for me to join my colleagues in sponsoring S. 1131, the Delinquent Payments Act of 1981, legislation designed to improve the Federal Government's bill-paying practices. The purpose of this legislation is to require the Federal Government to pay interest on its overdue bills, bringing U.S. Government agencies in line with the payment practices that all businesses in America have to follow.

In the current economic climate this bill is particularly important to small businesses—90 percent of the everyday commercial products purchased by the Government come from small distributors and manufacturers. Today's economic situation is more than enough burden for small businesses, with inflation and sky-high interest rates causing businesses across the country to fold up and close their doors in record numbers. Small businesses do not have the cash flow capability to carry overdue accounts for a long period of time, nor do these businesses have the administrative personnel necessary to develop cash and credit management practices that would help them to weather the cost of carrying overdue accounts receivable or meet high financing costs. It is inexclusable for the Federal Government to compound these problems by not paying its bills on time.

A 1978 GAO study found that 39 percent of the Federal Government's bills are paid late, with an average delay of 74 days. Following this report, the Department of the Treasury in May 1978 issued cash management regulations requiring Federal agencies to make payments when due. Beginning in 1979, Federal fiscal regulations required agencies to report to the Treasury at least annually on their cash management practices and include information on late payment of bills. However, 2 years later the Treasury had received only 18 reports, although 86 agencies were subject to reporting. In addition the few reports received were inadequate for monitoring the agencies' bill payment performance.

There has been no appreciable improvement in the Federal Government's paying practices since the 1978 report. A recent update of the earlier report, released October 8, 1981, notes no significant progress in dealing with the late payments problem. Further, GAO estimates—applying an interest rate of 12 percent and assuming annual Federal procurements of $100 billion—that contractors are possibly losing at least $150 million annually on late payments and losses could be as high as $375 million. In addition, many businesses are finding that slow payment practices are the norm rather than the exception when dealing with Government agencies—consequently many small businesses cannot afford to continue to do business with the Government if this problem persists.

The Delinquent Payments Act would require Federal agencies to pay interest on any payments over 30 days late under the terms of the contract, or within 30 days after receipt of a proper invoice. The rate of interest paid is to be determined by the Secretary of the Treasury every 6 months, based on current market rates of interest for private commercial new loans maturing in approximately 5 years. The 30-day payment requirement and the concept of interest penalties contained in this legislation are not new ideas. They are standard business practices in all sectors of the U.S. economy—unless a firm is doing business with the Federal Government.

S. 1131 would provide built-in incentives to force agencies to become more efficient and improve their cash management practices, since any interest charges for late payments would come directly from the agency's own operating budget and not from additional Treasury funds. The Delinquent Payments Act specifically states that no additional funds shall be authorized for payment of such interest penalties, eliminating any additional cost to taxpayers. Offending agencies will also be required to report to Congress on interest payments made pursuant to the act, increasing the incentive to meet their obligations on time.

Delinquent payments cost small businesses and the Government unnecessary time and money in tracking unpaid bills and late payments discourage many businesses from dealing with the Federal Government. S. 1131 makes good business sense by formally implementing a procedure to provide built-in incentives to force agencies to become more efficient and improve their cash management practices. This legislation will put Federal agencies on notice that the Congress no longer finds poor financial management acceptable and expects a legitimate effort to pay their bills on time. I congratulate Senators DANFORTH and WEICKER for introducing the Delinquent Payments Act of 1981 and hope that my colleagues will move quickly and forcefully to enact this needed legislation before the end of the first session.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute.

The committee amendment was agreed to.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (S. 1131) was passed, as follows:

S. 1131

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Delinquent Payments Act of 1981".

INTEREST ON DELINQUENT PAYMENTS

SEC. 2. (a) The Administrator of the Office of Federal Procurement Policy (hereafter in

this Act referred to as the "Administrator") shall promulgate regulations requiring each agency to include in any contract provisions specifying—

(1) due dates for payment; and

(2) that the United States will pay interest on any amount which is not paid by the due date for payment under the contract.

(b)(1) Except as provided in paragraphs (2) and (3), the Administrator shall promulgate regulations requiring each agency which enters into a contract to pay interest to the contractor on any amount which is not paid by the due date for payment under the contract or, in any case in which the contract does not specify a due date for payment, on any amount which is not paid within thirty days after the agency receives a proper invoice for such property or services.

(2) In the case of any contract for the procurement of meat or meat food products, the Administrator shall promulgate regulations requiring each agency to—

(A) specify in any such contract a due date for payment which is not later than seven days after delivery of each item under the contract;

(B) make payment by such due date, or, in the case of a contract in which a due date is not specified, within seven days after delivery of each item under the contract; and

(C) pay interest on any amount which is not paid in accordance with subparagraph (B).

(3) In the case of any contract for the procurement of any perishable agricultural commodity, the Administrator shall promulgate regulations requiring each agency to—

(A) specify in any such contract a due date for payment in accordance with the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499 et seq.):

(B) make payment by such due date and in accordance with such Act; and

(C) pay interest on any amount which is not paid by the due date for payment specified under the contract or, in any case in which the contract does not specify a due date for payment, to pay interest on any amount which is not paid in accordance with such Act.

(c) In the case of any contract which provides for separate payment for partial delivery or execution of property or services, the Administrator shall promulgate regulations requiring each agency—

(1) to include in such contract a due date for each such separate payment; and

(2) to pay interest on any amount of each such separate payment which is not paid by the due date specified for such payment under the contract.

(d)(1) Interest payable under rules and regulations promulgated under this Act shall be computed for the period beginning on the day after payment is due and ending on the day on which payment is paid. Interest shall be computed at the rate determined by the Secretary of the Treasury for interest payments under section 12 of the Contract Disputes Act of 1978 (41 U.S.C. 611). The Secretary of the Treasury shall publish such rate in the Federal Register.

(2) Any amount of interest which is not paid at the end of any thirty-day period beginning on the day after payment is due shall be added to the principal amount of the amount due and interest shall accrue on each such additional amount.

(e) An agency shall pay any interest charges required by this Act out of funds made available for the administration of agency programs. This Act does not authorize the appropriation of additional funds to any agency for the payment of interest required by this Act.

(f) This Act does not require an agency to pay interest with respect to a contract if performance is not in accordance with the terms of the contract.

(g) Regulations required under this section shall be promulgated not later than ninety days after the date of enactment of this Act. The Administrator may not delegate to any other person or office the responsibility for promulgating regulations under this Act.

LIMITATION ON DISCOUNT PAYMENTS

SEC. 3. If a contractor offers an agency a discount from the amount due under a contract for property or services in exchange for payment within a specified period of time, the agency may make payment in an amount equal to the discounted price only if payment is made within the specified time.

CONGRESSIONAL OVERSIGHT

SEC. 4. (a) Within sixty days after the end of each fiscal year, each agency shall submit to the Director of the Office of Management and Budget a report concerning the performance of the agency in making payments under contracts during the preceding fiscal year. The report shall include a description of any actions that the agency has taken or will take to assure timely payment under contracts and an accounting of delinquent payments and interest payments during the preceding fiscal year.

(b) Within one hundred and twenty days after the end of each fiscal year, the Director of the Office of Management and Budget shall submit to the Committee on Governmental Affairs of the Senate and to the Committee on Government Operations of the House of Representatives a report concerning the performance of the agencies in paying contractors during the preceding fiscal year. Such report shall include, by agency, the information set forth in subsection (5).

The provisions of this section shall terminate one hundred and twenty-one days after the end of fiscal year 1987.

DEFINITIONS

SEC. 5. (a) For the purposes of this Act—

(1) the term "agency" means—

(A) an executive department as defined in section 101 of title 5, United States Code;

(B) a military department as defined in section 102 of such title;

(C) a Government corporation as defined in section 103 of such title; and

(D) an independent establishment as defined in section 104 of such title, except that the term "agency" includes the United States Postal Service and the Postal Rate Commission;

(2) the term "contractor" means any person who has entered into a contract with an agency;

(3) the term "contract" means a written agreement, including amendments and modifications thereto, between an agency and a contractor for the procurement of property or services;

(4) the term "meat food products" has the same meaning as in section 2(a)(3) of the Packers and Stockyards Act, 1921 (7 U.S.C. 182(3));

(5) the term "perishable agricultural commodity" has the meaning as in section 1(4) of the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 4992(4));

(6) the term "person" has the same meaning as in section 551(2) of title 5, United States Code; and

(7) the term "property" means real or personal property, and includes intellectual property and leasehold interests.

(b) In accordance with regulations to be promulgated by the Administrator—

(1) an invoice shall be considered a proper invoice—

(A) if it contains or is accompanied by such substantiation of the contractor's performance of the contractual obligations as the Administrator may require by regulation, or

(B) if the agency which received the invoice fails to notify the contractor promptly of deficiencies in the invoice,

(2) an invoice shall be considered received by an agency on the later of—

(A) the date on which the agency's designated payment office or finance center actually receives a proper invoice, or

(B) the date on which the agency accepts the property or service concerned, and

(3) a payment shall be considered paid on the date the Government's check is dated for payment.

CLAIMS SUBJECT TO CONTRACT DISPUTES ACT

SEC. 6. Claims arising under this Act shall be subject to the provisions of the Contract Disputes Act of 1978 (41 U.S.C. 601 et seq.).

EFFECTIVE DATES; APPLICABILITY

SEC. 7. (a) The provisions of this Act requiring the promulgation of regulations shall be effective upon enactment.

(b) Except as provided in subsection (c), the provisions of this Act shall apply to payments made or due on or after the date which is one hundred and eighty days after the date of enactment of this Act.

(c) Each agency which, prior to the effective date specified in subsection (b), failed to make a payment under a contract by the due date of such payment shall make such payment by such effective date. Beginning on such effective date, interest shall accrue in accordance with this Act on any payment which is referred to in the preceding sentence and which is not paid prior to such effective date.

(d) The provisions of this Act shall apply to the Tennessee Valley Authority, provided, however, that any regulations promulgated under the authority of this Act shall not be applicable to the Tennessee Valley Authority, which shall be solely responsible for implementing the provisions of this Act with respect to its contracts.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I thank the distinguished minority leader for his willingness to proceed with these six calendar items.

Mr. President, there are a number of other matters, which have been cleared, I believe, on the minority side. I will put a series of requests at this time.

STANDBY PETROLEUM EMERGENCY AUTHORITY ACT OF 1981

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1503.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House insist upon its amendments to the bill (S. 1503) entitled "An Act to authorize the President to allocate supplies of crude oil, residual fuel oil, and refined petroleum products during a severe petroleum supply shortage, and for other purposes", and ask a conference with the Senate on the disagreeing votes of the two Houses thereon.

Ordered, That Mr. Dingell, Mr. Sharp, Mr. Moffett, Mr. Broyhill, and Mr. Corcoran be the managers of the conference on the part of the House.

Mr. STEVENS. Mr. President, with the consent of the minority leader, I move

that the Senate agree to the request from the House for a conference and the Chair be authorized to appoint conferees.

The motion was agreed to; and the Presiding Officer (Mr. HEINZ) appointed Mr. MCCLURE, Mr. WEICKER, Mr. DOMENICI, Mr. WALLOP, Mr. WARNER, Mr. JACKSON, Mr. JOHNSTON, Mr. FORD, and Mr. METZENBAUM conferees on the part of the Senate.

DISTRICT OF COLUMBIA BOND AMENDMENTS ACT OF 1981

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House on H.R. 4910, the District of Columbia Bond Amendments Act of 1981.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 4910) to amend the District of Columbia Self-Government and Governmental Reorganization Act and the Charter of the District of Columbia with respect to the provisions allowing the District of Columbia to issue general obligation bonds and notes and revenue bonds, notes, and other obligations.

The PRESIDING OFFICER. Without objection, the bill will be considered as having been read twice and the Senate will now proceed to its immediate consideration.

The Senate proceeded to consider the bill.

● Mr. MATHIAS. Mr. President, I rise in support of H.R. 4910, a bill to amend the District of Columbia Self-Government and Governmental Reorganization Act and the charter of the District of Columbia with respect to the provisions allowing the District of Columbia to issue general obligation bonds and notes and revenue bonds, notes and other obligations.

H.R. 4910 is identical to S. 1845 which I introduced, along with Senators EAGLETON and RUDMAN, on November 12, 1981. The Subcommittee on Governmental Efficiency and the District of Columbia, to which the bill was referred, held a hearing on December 9, 1981. Testimony was heard from Barbara Washington, Assistant City Administrator for Intergovernmental Relations; Stephen L. Reichenberg, Budget Director of the Council of the District of Columbia; Roswell Dikeman of Wilkie, Farr and Gallagher, the city's bond counsel, and Franklin D. Raines of Lazard Freres & Co., the city's financial advisors. All of the witnesses expressed strong support for S. 1845, and urged its expedited consideration by the Senate. On December 11, 1981, the Subcommittee on Governmental Efficiency and the District of Columbia ordered the bill favorably reported to the full Governmental Affairs Committee.

The purpose of S. 1845, like H.R. 4910, is to revise and amend certain provisions of part E of title IV of the District of Columbia Self-Government and Governmental Reorganization Act to:

Eliminate certain legal impediments to a successful public offering of general obligation bonds and notes and revenue bonds, notes and other obligations of the District of Columbia government;

Make those technical and conforming amendments to the Home Rule Act which are necessary to resolve several ambiguities relating to the procedures for authorizing and issuing general obligation bonds and notes and revenue bonds, notes and other obligations; and,

Give the District of Columbia debt management flexibility comparable to that existing in many other jurisdictions.

Mr. President, the District of Columbia government was granted the statutory authority by Congress to issue general obligation bonds and notes and revenue bonds, notes and other obligations in 1973 with the enactment of the District of Columbia Self-Government and Governmental Reorganization Act, also known as the Home Rule Act. To date, however, the city has not been in a position to take advantage of these provisions of the Home Rule Act, in part because of ambiguities and certain legal impediments to a successful public offering of bonds contained in that law. As a result, the city has had no alternative but to continue to borrow funds, at a premium, from the U.S. Treasury to finance its capital improvements under borrowing authority provisions of the Home Rule Act.

The provisions of H.R. 4910 will in no way exempt the District of Columbia from adequately addressing and resolving all financial problems and satisfying the creditworthiness tests of the municipal bonds market. Bond ratings will be necessary and the District must convince potential investors that it will sustain balanced annual budgets and develop and pursue an acceptable method of eliminating the existing operating deficit. H.R. 4910 merely corrects technical problems in the Home Rule Act that do not reflect the realities of the bond market and, thus, make it impossible for the District to sell its bonds. When enacted, it will allow the city to enter the municipal bonds market in a comparable position to other municipalities across the Nation.

Mr. President, H.R. 4910 is a bipartisan effort in both the House and Senate to further assist the District of Columbia to achieve the level of financial responsibility and independence commensurate with that of other jurisdictions. As such, I urge its approval by the Senate.

Mr. President, I ask that a section-by-section analysis of H.R. 4910 be printed at this point in the RECORD.

The analysis follows:

SECTION-BY-SECTION ANALYSIS

SECTION 1. DEFINITION OF CAPITAL PROJECT

Under section 461(a) of the Home Rule Act, the District is empowered to issue general obligation bonds to pay the cost of acquiring or undertaking its various "capital projects" as defined in section 103(8). Section 1 amends this definition to include within the term "capital project" certain costs not expressly enumerated at present.

It is not clear whether the current definition permits the District to utilize bond proceeds to reimburse preliminary expenses for planning, studies, and similar items incurred before the capital project to which they relate is authorized and a bond act adopted for its financing. Often, the cost of preliminary planning will be substantial and must be incurred in order to estimate the cost of a capital project, thereby forming a basis for the adoption of a financing authorization. Such costs are a legitimate part of the total cost of the project, yet they must be paid before the financing of the project is accomplished. One of the amendments made by section 1 would give express sanction to the use of bond proceeds to make reimbursements for amounts previously expended for the payment of preliminary costs.

The existing definition of "capital project" makes no mention of incidental expenses, other than "preliminary studies and surveys", or incidental financing costs (such as interest during construction and bond insurance) although such items are normally treated as capital costs. The amended definition resolves this omission by including in the definition of "capital project" costs incidental to the project and to its financing.

Finally section 103(8) now limits the District to financing equipment for an improvement or betterment when first erected or acquired. Thus, bonds may not be issued for re-equipping or furnishing a District-owned building to be substantially rehabilitated although the cost of such rehabilitation itself might be financed in this manner. Neither could bond proceeds be used to purchase equipment or furnishings alone when not connected with the erection or acquisition of a betterment or improvement although it would seem appropriate to utilize long-term financing for such substantial and long-term items as fire equipment, computer-hardware, heavy-duty construction equipment, and furnishings for buildings. This would be changed by expanding the definition of "capital project" to include the purchase of equipment or furnishings. It is expected, however, that only equipment and furnishings with a relatively long useful life would be financed in this maner and that bond proceeds could not be used to purchase supplies.

SECTION 2. EXEMPTION OF CERTAIN EXPENDITURES FROM ANNUAL CONGRESSIONAL APPROPRIATIONS

Section 446 of the Home Rule Act, which includes a requirement for congressional approval of any amount "obligated or expended by any officer or employee of the District of Columbia Government," would be amended to take account of the exceptions to such requirement contained in amendments to several sections relating to borrowing. See analysis of sections 10, 11, 12, 14 and 16 for a further explanation of such exceptions.

SECTION 3. FINANCIAL DUTIES OF THE MAYOR

Section 448 of the Home Rule Act specifies certain "financial duties" of the Mayor. In particular paragraph (7) requires that the Mayor have custody of all public funds belonging to or under the control of the District or any of its agencies. Such funds must be deposited in such depositories as may be designated and under such terms and conditions as may be prescribed by act of the Council. Paragraph (8) requires that the Mayor have custody of all investments and invested funds of the District. These paragraphs do not take into account the traditional practice of utilizing a trustee bank to hold moneys to pay or secure revenue obligations, including securities in which such funds may be invested. The purpose of the amendment proposed to this section is simply to cross reference exceptions to the broadly phrased requirements mentioned above.

SECTION 4. PAYMENT OF INTEREST ON GENERAL OBLIGATION BONDS

Subsection (a) of section 461 of the Home Rule Act presently requires that general obligation bonds bear interest payable annually or semi-annually. This provision might be read to require that interest be pavable annually or at six month intervals only. While it is standard practice to have interest pay-

able in this way, it is not always possible or desirable, particularly with respect to the first interest payment after issuance of the bonds.

For budgetary or other reasons, the District may wish to have interest on an issue of general obligation bonds due on specific dates, such as October 1 and April 1. If bonds were sold in January, it would be necessary to have the first coupon cover either three or nine months, with subsequent coupons for six months, to fit into this schedule.

The alternative would be to date the bonds October 1, although they would not be sold and delivered until January. To avoid requiring the District to pay interest on funds which it does not yet have on hand, the practice has developed in such cases of including in the purchase price of the bonds an amount equal to the interest which has accrued from the date of the bonds to the date of delivery. The purchaser would pay this accrued interest to the District, which would deposit the funds in the special account from which principal and interest payments are to be made, and then pay the same amount, together with interest accrued from the date of delivery to the interest payment date, back to the purchaser on the first interest payment date. Purchasers of bonds object to paying excessive amounts of accrued interest since it deprives them of the use of (and investment income on) a sometimes considerable amount of money for the period during which it is on deposit in the District's account. Thus, it would be desirable to allow the District to set shorter first coupon dates rather than requiring that bonds be dated substantially in advance of the delivery date.

The amendment proposed to this subsection would eliminate any question as to whether this practice could be used by the District by permitting interest to be paid "on such dates" as the Mayor may determine.

The revised language restates, in clearer terms, the right of the District to fix more than one rate of interest which is often a practical necessity in the marketing of such bonds.

SECTION 5. ELECTIONS ON GENERAL OBLIGATION BONDS

Paragraph (6) of section 462 of the Home Rule Act presently authorizes the Council in its discretion to submit the question of issuing general obligation bonds to a vote of the qualified voters of the District. A question exists as to whether the election must be held before or after the submission of the bond act to the Congress for its review as required by section 602(c). The subsequent adoption of Charter Amendment No. 1, relating to initiative and referendum, and of amendments to section 602(c), makes it probable that such an election was intended to be held prior to submission of the bond act to the Congress. The amendment proposed to section 462 would (1) require the election to be held before submission of the bond act to the Congress, and (2) provide that the provisions of the bond act relating to the time and manner of holding the election take effect immediately upon the enactment of such act, since the bond act itself would not become effective until after the election and the expiration of the congressional review period. It should be emphasized that this latter provision does not affect congressional review of the substantive provisions of the bond act in other respects after its approval by the voters.

SECTION 6. PUBLICATION OF BORROWING LEGISLATION

The existing provisions of section 463 of the Home Rule Act are ambiguous in several respects. These ambiguities would be corrected by the amendments proposed.

Section 463 of the Home Rule Act directs the Mayor to publish a notice setting forth the text of each act authorizing the issuance of general obligation bonds. Such section provides that the Mayor shall make such publication within five days after the "enactment" of the bond act. The notice required to be published with the bond act must state that the act as published "has become effective". This section, in its present form, is not clear as to the exact time when the notice should be published, since "enactment" of an act is not synonymous with an act becoming "effective". Also, a question exists as to whether the notice is to be published prior to or after the election in those instances where the Council has determined to call an election on a bond issue pursuant to section 462(6).

Another question exists as to whether the provision which states that the Mayor shall publish the notice within five days after enactment is directory or mandatory (a "directory" provision in a statute is one the observation of which is not necessary to the validity of the proceedings to which it relates). Although it appears that a failure to publish within the time stipulated (as distinct from a complete failure to publish) would not affect the validity of the bond act, a court might rule that failure to publish within five days would render inoperative the short period of limitation for contesting the validity of the bond authorization proceedings as provided in section 464. In order to avoid any controversy on these points and inasmuch as the direction to publish within a particular time period appears to serve no useful purpose, such provision would be eliminated. In its place section 463 would provide that neither the failure to publish the notice nor any error in publication shall impair the effectiveness of the bond act in question or the validity of any bonds issued pursuant thereto. It should be noted, however, that a failure to publish the notice would, and an error in publication might (dependent upon the materiality of the error) continue to eliminate the application of the short period of limitation for contesting validity provided in section 464.

The amendment would direct that publication of the notice be in one or more newspapers of general circulation within the District.

This language is consistent with that contained in section 466 relating to the publication of notices of bond sales. In particular, the change is designed to remove any question regarding the authority of the Mayor to publish, in his discretion, in more than one newspaper. Under the existing provisions (which must be read with the definition of the term "publish" appearing in paragraph (12) of section 103), it might be argued that the Mayor is limited to publishing the notice in a single newspaper. The change would also require publication in a newspaper designed to reach most parties interested in the bond issue. The current provision leaves it unclear as to the type and level of circulation of the newspaper which must be used.

SECTION 7. SHORT PERIOD OF LIMITATION

Section 464 of the Home Rule Act provides a twenty day short period of limitation for contesting the validity of general obligation bond proceedings, which period is set in motion by the first publication of the notice specified in section 463. In addition to conforming section 464 to the amendments made to section 463, this section makes one substantive change by virtue of new subsection (b). The existing procedure, designed to forestall untimely collateral attacks upon the validity of bond authorization proceedings, has one major flaw. Events transpiring subsequent to the adoption of the bond act and the publication of the notice apparently are not covered. A court could hold that the publication of the section 463 notice would not estop an interested party from contesting the validity of general obligation bonds due to an alleged subsequent failure to comply with statutory requirements in connection with the sale or issuance of the bonds. New subsection (b) added to section 464 eliminates this possibility by stipulating that after the expiration of the twenty-day estoppel period, no court will have jurisdiction in any action contesting the validity of the bonds if the bonds were purchased in good faith and for fair value and the bonds contain the "Dillon estoppel clause" set forth in such subsection. It is further provided that the recitations in such estoppel clause shall bind the District.

SECTION 8. ISSUANCE OF GENERAL OBLIGATION BONDS

Two substantive amendments are proposed to section 465 of the Home Rule Act, one relating to debt service payments on general obligation bonds and the other to the manner of execution of coupons appertaining to such bonds. The amendments would also separate the various provisions of the section into separate subsections and delete several unnecessary provisions, making the section clearer and more precise.

Section 465 requires each general obligation bond issue to be payable in annual installments beginning not more than three years after the date of issue and ending not more than thirty years from such date. It is further provided that principal and interest payments in each year be substantially equal. The District's financial advisor has testified that this limitation on debt service payments substantially impedes the ability of the District to arrange its overall debt service in a manner consistent with sound fiscal planning, and may adversely affect marketability by preventing the District from arranging the maturity schedule for a given issue in the manner most acceptable to prospective investors. The amendments to this section (new subsection (b)) include the deletion of the requirement for level debt service.

The amendments proposed also would delete a portion of the second sentence of section 465, referring to the time when indebtedness is deemed to be incurred, inasmuch as this provision is simply a statement of well established principles of municipal law which are unnecessary to be restated by statute.

The sixth sentence of section 465 now provides that bonds and coupons may be executed by the facsimile signature of each of the officers designated to sign the bonds by the act authorizing such bonds, with the exception that at least one signature shall be manual. This language is ambiguous with reference to coupons which customarily are authenticated only by a single facsimile signature. To correct this ambiguity, new subsection (c) would provide that bonds shall be executed by the facsimile signature of each of the officers designated by the act authorizing the bonds with the exception that at least one signature on the bonds shall be manual. Coupons attached to bonds are to be authenticated by the facsimile signature of the Mayor unless the bond act provides otherwise.

The proposed amendment also deletes the last two sentences in present section 465, dealing with the denominations in which bonds may be issued and the places of payment which may be authorized. These provisions are considered to be unnecessary in the Home Rule Act in that they will be provided for each issue by the bond act authorizing that particular issue. In particular, the provision limiting the denominations of bonds which may be issued is considered to be outdated and too restrictive in that purchasers may desire to have bonds issued in larger denominations. The elimination of the specified limit on denominations will give the District the flexibility to design an issue to meet the needs of potential investors.

SECTION 9. PUBLIC OR PRIVATE SALE OF CERTAIN BONDS

Section 466 of the Home Rule Act requires that all general obligation bonds be sold at competitive sale. Although this is a common requirement for this type of municipal obligation the District's financial advisor has recommended that, due to the existing state of the District's finances and its lack of any track record in the municipal bond market, it may be in the District's best interest, for the next several years, to sell general obligation bonds by negotiated sale rather than by competitive bid, at least in those cases where the bonds are additionally secured by a security interest in District revenues as authorized by new section 467 (added by section 10). Accordingly, new subsection (b) of section 466 would permit negotiated sales of such additionally secured bonds until October 1, 1984, by which time it is expected that the District will have established an ongoing municipal bond issuance program.

SECTION 10. AUTHORITY TO CREATE SECURITY INTEREST IN DISTRICT REVENUES

This section adds a new section 467 specifically authorizing the District to secure general obligation bonds further by creating a security interest in favor of bondholders in specified District revenues. The District's financial advisor is of the opinion that this type of "double-barrelled" bond may be necessary to insure the successful marketing of District general obligation bonds during the next several years.

Subsection (b) lists specific provisions which may be included in the bond act creating a security interest in District revenues (including authorization for execution of a trust indenture and other agreements necessary to secure the issue). Subsection (c) provides that a security interest in District revenues shall be valid, binding, and perfected from the time it is made (the delivery of the executed documents) without the necessity for filing or recording any documents and without the physical delivery of any property. Subsection (d) exempts from section 446 any obligations or expenditures under section 467 to secure "double-barrelled" bonds (see section 14 below).

SECTION 11. BORROWING TO MEET APPROPRIATIONS

Section 471 now allows the District to issue general obligation notes to raise funds to meet appropriations made pursuant to section 446 in the absence of available unappropriated revenues. The total notes issued during a fiscal year may not exceed in amount 2 percent of the total appropriations for such year. The notes must be paid off by the end of the fiscal year next succeeding the fiscal year during which the act authorizing the notes takes effect. The amendments proposed to this section will harmonize the terminology of the section with other sections relating to borrowing and make the section more readable.

In addition, the amendment proposes a substantive change, in that it would exempt amounts obligated or expended for the payment of such notes from the congressional appropriation process provided in section 446 (see section 14 below).

SECTION 12. BORROWING IN ANTICIPATION OF REVENUES

Like section 471, section 472 of the Home Rule Act authorizes the issuance of a particular, limited type of short-term general obligation note. Specifically, borrowing under this section is authorized in anticipation of revenues which are expected to be received by the District during the current fiscal year, but which, because of the timing of the need for money relative to the collection of revenues, may not be available as needed for operative expenses. The notes must be repaid by the end of the current fiscal year. The total amount of notes outstanding at any time during a fiscal year may not exceed 20 percent of the anticipated revenue for that fiscal year. The Mayor is required to certify the amount of revenue anticipated for the fiscal year as of a date not more than fifteen days prior to each original issuance of such notes.

In addition to creating the exception to section 446 (see section 14 below) section 12 proposes an important change in section 472. Subsection (d)(1), as amended, would exempt any act authorizing the issuance of revenue anticipation notes from the congressional review process required by section 602(c). This is a practical necessity if this type of financing is to be utilized for the purpose intended, namely to meet cash flow problems which may well arise as the result of unanticipated events. If an act authorizing such notes is adopted subject to the thirty-day congressional review process there would be a substantial delay before the notes could be issued, so that the District might be unable to respond to a temporary cash flow crisis. The Committee feels that the District must be placed in a position to react expeditiously to cash flow problems if dependence upon the U.S. Treasury is to be terminated. The Committee also feels that the restrictions placed on the issuance of such notes are sufficient to assure their use in a fiscally responsible manner without the necessity of congressional review as to each issue.

SECTION 13. SPECIAL TAX

Section 481 of the Home Rule Act currently provides for the levy of a special tax in the event the Council deems it to be necessary to provide for the payment of bonds. The section also provides for the deposit of such a tax, together with other revenues intended for the payment of general obligation bonds, in a "sinking fund" and makes certain other provisions with regard to funds available for the payment of bonds. In order to clarify the meaning of these provisions and to separate the provisions for the special tax from the other, more generally applicable, provisions for payment of general obligation bonds and notes, the special tax provisions have been left in section 481 and other provisions currently in section 481 would be moved to new sections 482 and 483, discussed below. In addition, the provisions remaining in section 481 have been rewritten slightly to make them more intelligible and to eliminate the reference to a "sinking fund" replacing such reference with reference to a "separate debt service fund", to more clearly describe the nature and use of such fund. It is intended that a separate such fund be established for each bond issue for which a special tax is levied.

SECTION 14. FULL FAITH AND CREDIT OF THE DISTRICT; PAYMENT OF GENERAL OBLIGATION BONDS AND NOTES

New section 482 simply restates the provisions, currently contained in section 481, pledging the full faith and credit of the District of Columbia for the payment of the principal of and interest on all general obligation bonds and notes issued by the District.

Subsections (a), (b) and (c) of new section 483 clarify and strengthen existing provisions relating to the payment of the principal of and interest on general obligation bonds and notes. Subsection (d) adds a new substantive provision which is discussed in detail below.

Subsection (a) requires the Council to provide funds in each annual budget sufficient to pay the principal of and interest on general obligation bonds and notes becoming due and payable during the fiscal year for which such budget is prepared.

Subsection (b) imposes on the Mayor the ultimate responsibility for assuring that such principal and interest are actually paid when due. If appropriated revenues are not available to make such payments, the Mayor is directed to pay such principal or interest from any funds of the District which are not legally committed to other uses.

Under Subsection (c), if the Mayor determines no other funds are available to make principal and interest payments, he must use the federal payment provided by the Congress for this purpose before committing such payment to other uses. It is intended that all actions of the Mayor, taken to assure payment when due of the principal of and interest on general obligation bonds and notes, will be taken without the necessity for any prior action or approval by either the Council or the Congress. Such provisions are similar to provisions existing in other jurisdictions with regard to the payment of general obligations and assure bondholders of the priority of their claims and timely payment.

Subsection (d) of new section 483 is one of the most important and substantive changes proposed by this bill. This change is intended to eliminate an existing limitation which seriously impairs the marketability of District obligations.

Unlike provisions applicable to the payment of Federal indebtedness, the Home Rule Act does not authorize an automatic or continuing appropriation for the payment of the principal of and interest on District general obligation bonds and notes. Inasmuch as section 446 presently provides, without exception, that no amount may be obligated or expended by any officer or employee of the District unless such amount has been approved by Act of the Congress, it seems clear that payment of such debt service currently would be contingent upon amounts being included therefor in the annual or supplemental budget of the District and approved by Act of the Congress. Accordingly, a District bondholder would have no assurance that moneys will legally be available each year in time to pay his obligation as it matures. While it is unlikely that the Congress would refuse to approve an appropriation for debt service (particularly since the Congress would have reviewed the act authorizing the indebtedness to which such debt service relates except for notes issued under section 472) the possibility, however remote, that such approval would be withheld or that it might be delayed would materially and adversely affect the marketability of District obligations. Accordingly, the Committee feels that it is essential to the successful public offering of District obligations that the formality of annual congressional enactment of debt service appropriations be eliminated. That is the purpose of the exemption from section 446 contained in new subsection 483(d).

SECTION 15. FULL FAITH AND CREDIT OF THE UNITED STATES NOT PLEDGED

This section would add a new section 484, entitled "Full Faith and Credit of the United States Not Pledged", which makes clear the fact that the United States is under no circumstances responsible or liable for payment of principal of or interest on any District of Columbia bond or note.

SECTION 16. REVENUE BONDS AND OTHER OBLIGATIONS

Section 16 contains a general revision of section 490 of the Home Rule Act relating to the issuance of revenue bonds and notes. The revisions are designed to remove several ambiguities, restrictions, and limitations currently contained in this section and generally recast its provisions in a form and style more compatible with the customs and usages of the municipal bond market. The changes which would be made are as follows:

New subsection (a) of section 490 would permit the District to issue revenue bonds or notes for the purpose of refinancing or to assist in the refinancing of undertakings in the areas enumerated. For example, several private colleges and universities within the District have expressed an interest in re-

financing existing indebtedness incurred for various projects as is now allowed by many state laws which permit conduit financing for institutions of this type. Because the interest rate payable on tax-exempt District revenue bonds might be substantially less than the interest being paid on outstanding conventional loans the refinancing of such debt could be financially advantageous to the institutions concerned. The District's bond counsel has expressed the opinion that such refinancing is not permissible under the Home Rule Act as currently written.

The specific addition of "pollution control facilities" to the types of undertakings which may be financed by revenue bonds is not intended as a substantive change. It was deemed advisable, for purposes of clarity, to add a specific reference to such facilities rather than rely upon the more generalized reference to industrial and commercial development. This stems from the fact that pollution control facilities are frequently categorized separately in other contexts.

Finally, although the list of entities which may be the beneficiaries of revenue bond financing has been eliminated in new subsection (a)(1), this was done for drafting reasons only and is not intended to imply any change in the types of entities which may receive financing from the proceeds of revenue bonds issued under section 490. It is intended that all public, private, and quasi-private corporations, partnerships, associations, persons, or other legal entities continue to be eligible for such financing.

Proposed new subsection (a)(2) provides that revenue bonds, notes, and other obligations shall be special obligations of the District. This is merely a restatement of the limitation on the District's liability for payment of revenue bonds presently contained in subsection (c) of section 490, and which would be retained in the amended section. In addition, the provision states that such bonds, notes and other obligations shall be negotiable instruments regardless of whether they would be considered a "security" under the applicable provisions of the District's Commercial Code. Subsection (a) now states that revenue bonds, notes or other obligations shall be "fully negotiable". While it is desirable that all debt instruments issued by the District be fully negotiable, it does not necessarily follow that all such instruments should be required to qualify as a "security" within the meaning of Article 8 of the Uniform Commercial Code in order to be negotiable. Accordingly, the existing quoted reference to negotiability would be replaced by the statement mentioned above.

Proposed new subsections (a)(3) and (a)(4) relate generally to the source of security for revenue obligations and are intended to clarify the powers of both the Council and the Mayor with respect to security agreements and the creation of security interests. The only significant changes made in these subsections are: first, the elimination of any restriction on the mortgaging of property to secure revenue bonds and notes (except for property owned by the United States as provided in subsection (b)); second, the addition of a provision similar to that discussed under section 10, providing that any security interest created for the purpose of securing a revenue bond or note shall be valid and enforceable without any physical delivery of the property in question or any filing or recording of any statement or document relating thereto; and third, specific legal authority is provided for depository banks to secure deposits of moneys held for the payment or security of revenue bonds or notes in such manner as may be agreed upon with the District.

Subsection (b) now prohibits the mortgaging of property as additional security for an issue of revenue bonds or notes except in certain enumerated instances. In recognition of the common practice of securing revenue bonds issued by municipalities for revenue producing improvements by a mortgage of the improvements financed this limitation would be eliminated. The prohibition against the mortgaging or pledging of property of the United States is continued.

Subsection (e) of section 490 sets forth provisions which may be contained in a bond act authorizing an issue of revenue bonds. Three clarifying changes would be made to such subsection, none of which are substantive in nature.

In present paragraph (e)(4), which is redesignated as paragraph (e)(5), a reference is added to the effect that the act may contain provisions relating to the security for the bonds authorized thereby.

A new paragraph (e)(4) is added expressly authorizing provisions relating to remedies of bondholders in the event of a default.

The existing last sentence of subsection (e) is revised as a new paragraph (e)(6). As so revised, this paragraph specifically affirms the authority of the Council to delegate to the Mayor the power to establish the terms and conditions of the bonds (interest rates, purchase price, etc.) not provided for in the bond act. It should be noted that, as a practical matter, terms and conditions such as those mentioned could not be included in a bond act since the bond act would be enacted many months before the bond sale at a time when it would be impossible to determine such details. Such pricing details would be determined either at, or just prior to, actual sale of the bonds depending on whether the sale was competitive or negotiated.

Subsection (f) of section 490 currently provides that the provisions of section 446 relating to the obligation or expenditure of District funds without approval by Act of Congress do not apply to the transfer of bond proceeds to a private college or university for whose benefit revenue bonds or notes have been issued or to the payment of any such bond or note.

Subsection (f), as revised, will apply to all revenue bonds and notes issued by the District and will exempt from the requirements of section 446 (prohibiting the obligation or expenditure of any amount unless such amount has been approved by Act of the Congress): (1) any amount obligated or expended from the proceeds of such obligations; (2) any amount obligated or expended for the payment of debt service on such obligations; and (3) any amount obligated or expended to secure such obligations. For the reasons stated in section 14 above, it is important that bondholders be assured of the prompt receipt of principal and interest payments. Similarly, with respect to the third exception, it is important that bondholders be assured that amounts needed to secure obligations held by them will not be made subject to congressional action. The viability of a revenue bond issue is usually dependent upon timely completion of the project financed so as to insure a flow of revenues sufficient to meet the payment of the obligations undertaken by the issuer on their due date. Any delay in the prompt expenditure of bond proceeds in order to complete the project could be disastrous. Accordingly, the second exception listed above is deemed essential so as to obviate any possibility of such delay by reason of the need to obtain prior congressional approval.

The proposed amendments to subsection (g) of section 490 are intended simply to clarify that the exemption from section 446 for the obligation or expenditure of amounts in connection with housing finance agency bonds are the same as those provided in subsection (f) with regard to all other revenue bonds. (Such an exemption is currently in section 490(g). By framing the exceptions in identical language, no argument can be raised that a different meaning should be attributed to a difference in language).

SECTION 17. EXEMPTION FROM CONGRESSIONAL REVIEW

The proposed amendment to section 602 (c) of the Home Rule Act merely cross-references those sections, discussed above, where the Act provides for certain types of Council acts to become effective immediately upon enactment by the Council.

SECTION 18. TABLE OF CONTENTS

This section makes conforming amendments to the table of contents of the Home Rule Act to incorporate changes made in the titles of several sections and to include several new sections added by the amendments.

SECTION 19. EFFECTIVE DATE

Section 19 covers a special situation with respect to a proposed issue of revenue bonds by the District to finance facilities for the George Washington University pursuant to section 490 of the Home Rule Act. The proceedings relating to such proposed bonds provide, subject to certain conditions, for the substitution of a mortgage of real property for a pledge of certain revenues in the event this type of security becomes legally permissible. Section 19 would insure that this provision in the bond proceedings may become operative notwithstanding that such proceedings were adopted prior to the passage of the amendments discussed above to subsection (b) of section 490.●

● Mr. WARNER. Mr. President, I rise in support of this legislation H.R. 4910. We are all aware of the problems facing our cities today. This legislation will allow the District of Columbia to enter the private financial markets like other cities. Due to technical problems contained within the District of Columbia Home Rule Act, the District has been unable to obtain the unqualified favorable opinion of its bond counsel, which it needs to attract buyers for its bonds.

This legislation will make the necessary changes to allow the District to hopefully save money on interest payments and to curtail the present practice of borrowing from the Treasury. It will also give the District government debt management flexibility comparable to other jurisdictions.

In addition this bill should assist the District's colleges and universities to get financing for their construction projects.

Mr. President, this legislation should be approved because it is right and just to provide the District with the tools to help it compete with other cities for private capital and strive for a level of financial responsibility commensurate with other jurisdictions.

Mr. President, I urge the adoption of H.R. 4910.●

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 4910) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

IMPRISONMENT AND TREATMENT OF ALEXANDER PARITSKY AND HIS FAMILY BY THE SOVIET UNION

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on House Concurrent Resolution 215.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The assistant legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 215) expressing the sense of the Congress with respect to the imprisonment and treatment by the Government of the Soviet Union of Alexander Paritsky and his family.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. TSONGAS. Mr. President, I rise in support of the resolution which calls on President Reagan and the Secretary of State to express at every suitable opportunity and in the strongest possible terms our opposition to the imprisonment of Alexander Paritsky. As I am sure my colleagues know, Alexander Paritsky, a leader of the Jewish community in Kharkov, Ukraine, was recently sentenced to 3 years in a labor camp for slandering the Soviet state. It is clear, however, that his only real crime has been his desire to immigrate to Israel.

Mr. President, I believe we must make it very clear to Soviet leaders that their continued violation of the internationally recognized human rights of their citizens is unacceptable to the Congress and to the American people.

While the Paritsky case is important on its own, it should also remind us of the thousands upon thousands of other Jews in the Soviet Union who desire to be free. Unfortunately, the number of those granted permission to emigrate has continued on a precipitous decline during the last 12 months. Last month's total—363—is the lowest monthly figure since the Jewish exodus from the U.S.S.R. began 10 years ago.

What does this mean for the tens of thousands of other Jews in the Soviet Union who have applied to emigrate? Well, it means they will have to wait a very long time before they are free to practice their religious beliefs. Their wait will also be quite painful, for after requesting permission to leave, they become pariahs in their own country.

They will be forced out of their jobs. Their children will not be allowed to continue their education, even if they are the very best students. They will be castigated in the local newspaper and, of course, they will have to deal with the KGB.

Wiretaps on their phones, bugs in their apartments, constant surveillance, illegal searches, long interrogations and harassment will become routine. If they become too outspoken in their criticism of the Soviet system, they may receive a few years in a labor camp, as did Alexander Paritsky, on trumped up charges.

Yet these people persevere. How? I do not know. They include people like Alexander Lerner of Moscow. Once the leading computer scientist in the Soviet Union, he has been waiting to emigrate for 10 years. His wife recently died and the Soviet Government refused to allow her remains to be buried in Israel. But Professor Lerner, one of Anatoly Shcharansky's teachers, spends much of his time painting beautiful pictures of a world that should seem very ugly to him.

Another citizen who has persevered is Alexander Marysin of Riga. Once one of Latvia's best engineers, he now spends his days caring for his wife, who has received inadequate treatment for a severe brain tumor.

Mr. President, I ask unanimous consent that a letter he recently sent to the United States be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OCTOBER 20, 1981.

DEAR FRIEND: Thank you very much for your greeting, concern and kind words. I receive now many letters from many friends, but am not able to answer them all for a misfortune has come over us again.

Leah is very ill and I have to do a lot regarding her illness. She sustained an operation on the head. It was performed based on a wrong diagnosis. She suffered very much after it, and now has to undergo a new one. It is much more complicated and dangerous.

Today is Simhat Tora and I congratulate you on the holiday and am sorry for sending such sad messages.

I wrote already to another friend about a case which really took place on this very holiday.

In 1944, in a train which was loaded with Hungarian Jews, and was being led to Ozventzim, to the plant of death, someone remembered that it was the day of Simhat Tora. There happened to be a rabbi in the coach. So they turned to the rabbi and asked him whether they, being led to death, should celebrate this holiday. The rabbi thought a little, then answered affirmatively, because it is written that a Jew should sing and dance around the Tora on this day.

"Yes, Rabbi, but we don't have a Tora," they told him. The rabbi responded, "Then take a little baby and it will serve instead of a Tora." So they took a baby and danced and sang at the same time when the train could stop any minute near the furnace where they had to meet their fate.

It's a wonderful story about a wonderful people. That's us, and no one can make us otherwise. We were and shall remain such.

So we celebrated Simhat Tora and were merry, too.

Regards from Leah and Fany. Regards to all friends.

Much love,

ALEXANDER MARIASIN.

Mr. TSONGAS. These individuals are among the many thousands of extraordinary refuseniks in the Soviet Union. We must never, never forget them.

Mr. President, I ask unanimous consent that Senators ARMSTRONG, BAUCUS, BOREN, BOSCHWITZ, BRADLEY, BURDICK, COHEN, D'AMATO, DANFORTH, DECONCINI, DIXON, DODD, DOMENICI, DURENBERGER, EAGLETON, EAST, EXON, GORTON, GRASSLEY, HART, HAYAKAWA, HEINZ, HOLLINGS, LEVIN, LUGAR, MOYNIHAN, PELL, PERCY, PRESSLER, PROXMIRE, RIEGLE, RUDMAN, SARBANES, SPECTER, SYMMS, WILLIAMS, and ZORINSKY be added as cosponsors to Senate Concurrent Resolution 47.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TSONGAS. These Senators' commitment to the struggle of Soviet Jewry is greatly appreciated. Let me also express my appreciation to Congressmen FRANK and BONKER, who successfully guided this resolution through the House of Representatives.

Finally, Mr. President, let me add my deep thanks to all members of the Committee to Free the Paritsky Family, which is led by Lenny Marcus. Rarely have I met a young man who is so deeply committed to the cause of human rights

● Mr. PERCY. Mr. President, I am proud to be a cosponsor of Senate Concurrent Resolution 47, on the Alexander Paritsky family. This family represents an individual tragedy. It also symbolizes the step-up of late in Soviet harassment of Jews in the Soviet Union, both those who wish to emigrate and those who simply want to practice their religion and traditions in the U.S.S.R.

Paritsky and his family have been attempting to emigrate from the Soviet Union since 1976. In 1977 he was dismissed from his job as a scientist as a direct result. Since then he and his family have been repeatedly harassed and threatened. Last August Alexander Paritsky was arrested. In November he was sentenced to 3 years in prison for allegedly defaming the Soviet state. Intimidation of his wife and small children has continued.

The Soviet Union itself has signed several international covenants guaranteeing the right to emigrate, as well as other basic human freedoms.

This resolution urges the Soviet Union to live up to its committments by releasing Alexander Paritsky from prison, ceasing all harassment of him and his family, and allowing them to emigrate.●

The concurrent resolution was considered and agreed to, as follows:

H. CON. RES. 215

Whereas the Universal Declaration of Human Rights and the International Covenant on Civil and Political Rights guarantee to all citizens the rights to freedom of religion, the right to hold opinions without interference, the right to freedom of expression, and the right to emigrate;

Whereas the Final Act of the Conference on Security and Cooperation in Europe commits the signatory nations to respect individual rights and freedom, specifically the right to immigrate to the country of one's choice to rejoin their relatives;

Whereas the Soviet Union has signed the Final Act of the Conference on Security and Cooperation in Europe, is a party to the Universal Declaration of Human Rights, and has ratified the International Covenant on Civil and Political Rights;

Whereas Alexander Paritsky and his family first applied to emigrate from the Soviet Union in 1976 and have been repeatedly denied permission;

Whereas Alexander Paritsky was dismissed from his position as a scientist at the Kharkov Institute for Metrology in 1977 as a direct result of requesting permission to emigrate;

Whereas Alexander Paritsky and his fam-

ily have been continually harassed by Soviet authorities as a result of his involvement with the Kharkov Jewish University;

Whereas Soviet officials have confiscated numerous books, letters, and medicines from the Paritskys' apartment;

Whereas Soviet officials have published slanderous articles in the Kharkov press accusing Alexander Paritsky of black marketeering and racism;

Whereas Dorina Paritsky, aged fifteen, has been harshly interrogated by Soviet investigators at her school and told to denounce her family;

Whereas Paulina Paritsky has been threatened with arrest and informed that she will lose custody of her two daughters;

Whereas Alexander Paritsky was arrested on August 28 and charged with anti-Soviet agitation and propaganda;

Whereas Alexander Paritsky is scheduled to be tried by Soviet officials on November 11 and has been denied the legal counsel of his choice; and

Whereas Paulina Paritsky was forcefully prevented from obtaining an independent lawyer for her husband: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the President, acting directly or through the Secretary of State, should—

(1) continue to express at every suitable opportunity and in the strongest terms the opposition of the United States Government to the imprisonment of Alexander Paritsky;

(2) urge the Government of the Soviet Union to—

(A) release Alexander Paritsky from prison,

(B) halt all further harassment of Alexander Paritsky and his family, and

(C) permit Alexander, Paulina, Dorina, and Anna Paritsky to emigrate to Israel to join their relatives, in accordance with the Final Act of the Conference on Security and Cooperation in Europe, the Universal Declaration of Human Rights, and the International Covenant on Civil and Political Rights; and

(3) inform the Government of the Soviet Union that the Government of the United States, in evaluating its relations with other countries, will take into account the extent to which such countries honor their commitments under international law, especially commitments with respect to the protection of human rights.

SEC. 2. The Clerk of the House of Representatives shall transmit a copy of this concurrent resolution to the President with the request that he further transmit such copy to the Ambassador of the Union of Soviet Socialist Republics to the United States.

Passed the House of Representatives December 9, 1981.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that calendar order No. 405, Senate Concurrent Resolution 47, the Senate companion bill, be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

INCREASING EXPENDITURES BY THE SPECIAL COMMITTEE ON AGING

Mr. BAKER. Mr. President, I move that the Committee on Rules and Administration be discharged from further consideration of Senate Resolution 244, a resolution relating to a limitation by the Special Committee on Aging, and I ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 244) increasing the limitation on expenditures by the Special Committee on Aging for the procurement of consultants.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 244) was agreed to, as follows:

S. RES. 244

Resolved, That section 2 of S. Res. 45, Ninety-seventh Congress, agreed to March 3, 1981, is amended by striking out "$25,000" and inserting in lieu thereof "$35,000".

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FEDERAL PHYSICIANS COMPARABILITY ALLOWANCE AMENDMENTS OF 1981

Mr. BAKER. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1551.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1551) entitled "An Act to amend title 5, United States Code, to extend the period within which physicians comparability contracts may be entered into, and for other purposes", do pass with the following amendments:

Strike out all after the enacting clause, and insert: That this Act may be cited as the "Federal Physicians Comparability Allowance Amendments of 1981".

SEC. 2. Section 5948 of title 5, United States Code, is amended—

(1) in subsection (d)—

(A) by striking out "September 30, 1981" and inserting in lieu thereof "September 30, 1983"; and

(B) by striking out "September 30, 1983" and inserting in lieu thereof "September 30, 1985";

(2) in subsection (g), by amending so much of paragraph (1) as precedes subparagraph (A) to read as follows:

"(1) 'Government physician' means any individual employed as a physician or dentist who is paid under—"; and

(3) in subsection (g)(1)(F), by striking out "title 4 of the Foreign Service Act of 1946 (22 U.S.C. 861–890)" and inserting in lieu thereof "chapter 4 of title I of the Foreign Service Act of 1980 (22 U.S.C. 3961 and following)".

SEC. 3. Section 3 of the Federal Physicians Comparability Allowance Act of 1978 (Public Law 95–603; 92 Stat. 3018) is amended by striking out "September 30, 1983" and inserting in lieu thereof "September 30, 1985".

SEC. 4. (a) Any service agreement entered into on or after the date of the enactment of this Act pursuant to section 5948 of title 5, United States Code, as amended by section 2 of this Act, shall be effective only to such extent or in such amounts as are provided in advance in appropriation Acts.

(b) The amendments made by this Act shall not be construed to authorize additional or supplemental appropriations for the fiscal year ending September 30, 1982.

SEC. 5. (a) Section 8344(c) of title 5, United States Code, relating to termination of civil service annuities on reemployment, is amended by adding at the end thereof the following: "Upon separation from such position, an individual whose annuity is so terminated is entitled to have his rights redetermined under this subchapter, except that the amount of the annuity resulting from such redetermination shall be at least equal to the amount of the terminated annuity plus any increases under section 8340 of this title occurring after the termination and before the commencement of the redetermined annuity.".

(b)(1) Subject to paragraph (2), the amendment made by subsection (a) shall apply to individuals whose annuities terminate under section 8344(c) of title 5, United States Code, on or after October 1, 1976.

(2) In the case of an individual whose reemployment ended before the date of the enactment of this Act, the amendment shall apply only upon application by the individual to the Office of Personnel Management within one year after the date of enactment. Upon receipt of such application, the Office shall recompute the annuity, effective as of the day following the day reemployment ended.

Amend the title so as to read: "An Act to amend title 5, United States Code, to extend the Federal Physicians Comparability Allowance Act of 1978, and for other purposes.".

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee.

The motion was agreed to.

Mr. STEVENS. Mr. President, S. 1551 is a bill to extend for a 2-year period the special allowance provisions of the Federal Physicians' Comparability Act of 1978. This act was originally considered by the Governmental Affairs Committee during the 95th Congress and was enacted as Public Law 95–603. The 1978 act allowed Government agencies experiencing physician recruitment and retention problems to grant allowances to physicians who agreed to stay with the agency for a specified length of time. The allowances could not exceed $7,000 per year for those with less than 2 years of service, or $10,000 per year for those with more than 2 years of service. Under Public Law 95–603 as amended by Public Law 96–166, the authority to enter into these agreements expired on December 30 of this year and no agreement with a physician can be extended beyond September 30, 1983. The legislation we are acting on today would continue this program for an additional 24 months.

As originally passed by the Senate earlier this year, S. 1551 would have extended this program for only 12 months. However, the administration now supports a full 2-year extension, and S. 1551 as passed by the House and in the form now before us would extend for 2 years, until September 30, 1983, the pe-

riod during which agencies may enter into service agreements with physicians in exchange for special allowances. It also extends for 2 years, until September 30, 1985, the period of service which may be covered by such agreements.

The Office of Personnel Management has advised the committee that the Physician's Comparability Act program "has significantly helped" agencies of the Federal Government in their recruitment and retention efforts and urges continuation of the program for an aditional 2 years.

Mr. President, I should also observe at this time that there has been some misunderstanding among some departments of the Federal Government employing Federal civil service physicians—notably the Department of Health and Human Services—regarding congressional intent in the matter of retroactivity in this legislation. The committee has taken note of the fact that authority to enter into service agreements under this act expired on September 30 of the current year. By extending this date to September 30, 1983, it is the understanding of committee counsel and it is the intent of this committee as well as the intent of the House Post Office and Civil Service Committee that no civil service physician be denied bonus allowances for the time which expired following September 30, 1981, and the eventual date of enactment of this legislation. By extending the period during which agencies may enter into service agreements from September 30, 1981, to September 30, 1983, it is our intent that all of the time between those dates be covered by this legislation and that bonuses for this time should be paid.

It has also been the observation of the committee that implementation of the special allowance provision of the Federal Physicians' Comparability Act has been inconsistent among the Federal agencies. In some cases, agencies have granted the full allowance to all of the physicians while in other cases—notably that of the Federal Aviation Administration—no allowance has been granted at all in spite of serious recruitment and retention problems. It is our expectation, therefore, that the Office of Personnel Management and also those agencies employing civil service physicians will examine more closely the recruitment and retention problems that exist with respect to these physicians and will make more effective use of the allowances authorized by this act where measurable problems exist.

I think it is important to note the benefit to the public derived from recruiting and retaining qualified, competent physicians. These physicians perform vital functions such as research and occupational medicine for the Center for Disease Control and the Food and Drug Administration. We need to attract and retain qualified medical specialists to continue promoting the public's health and well-being. Passage of this bill will continue our promotion of this service to the public.
